COLOR LUX® CELLULAR SHADES

COLOR LUX®
Designer Cellular & Roller Shades

Scotchgard™ Protection
Optional Scotchgard™ Protector is available with Color Lux Linen Shades. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned.

Color Lux® Cellular Shades
HARDWARE OPTIONS

COLORLUX® CELLULAR SHADES

		Key Features	Hardware Options	Hardware Size (Depth x Height)	Shade Size Available*	More Information
Standard Cord Lock		• Proven cord lock • Sleek, fabric wrapped rails • UV resistant cords	• Fabric Wrapped • Brushed Nickel • Oil Rubbed Bronze	2⅜" x ½"	Width: 8" to 108" Length: 8" to 120"	Page 18

PRODUCT INFORMATION	
	See Page 38 for detailed information.
DESIGN UPGRADES	
Scotchgard Stain Protector	Add $38 per shade
Center Stack	Add $88 | Left or Right Stack Standard
Split Stack*	Price by dividing the full width measurement in half. Price as two separate units and add together.
Dual Panel**	Price as two separate units and add together.

*   Split stack sliders are available in widths up to 240". If the width exceeds 120", it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider.

** A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified.

Color Lux® Cellular Shades
STANDARD CORD LOCK SHADES HARDWARE SYSTEM

Cord Lock Rail

Cord Lock Rail
- Depth of rail: 1⅞"
- Depth of rail and bracket: 2⅜"
- Height: ½"
- Height of bracket: ⅝"

Hardware Features

Fabric Wrapped	Fabric used is same fabric as the shade. Back of rail is white to outside. Color coordinated end caps with white cord and tassel
Designer Metallic	• Oil Rubbed Bronze head and bottom rails with bronze colored tassel, end caps and white cord. • Brushed Nickel head and bottom rails and end caps with coordinating tassel and white cord.

Mounting Dimensions

Mounting Dimensions	Cord Lock Rail
Minimum Shallow Mount	¾"
Minimum Flush Inside Mount	2⅜"
Minimum Outside Mount	¾"
Minimum Side Mount	1⅜"
Recommended Side Mounting Method	• See figure B (pg 19) for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

Inside and Side Mount	
	• Fabric will measure ordered width less: ⅜" • Head rail* will measure ordered width less: ³⁄₁₆"
Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps.
  Width and length measurements may vary +/- ⅛"

Color Lux® Cellular Shades
STANDARD CORD LOCK SHADES HARDWARE SYSTEM

Applications
- Standard Rectangular
- Day-Night
- Trapezoids and Octagons
- Top Down - Bottom Up
- Two-On-One Head Rail

Highlights Cornice Valance
Add a designer finishing touch to a cellular shade with a Highlights Cornice Valance. See page 62 for details.

Things to Consider
- If child safety is a concern, consider cordless options: Cordless Ultra, Cordless Lift & Lock or Motorization.
- Larger shades can be difficult to operate. Consider Cord Loop, Cordless Ultra or Motorization hardware.
- If privacy is an issue, consider Top Down-Bottom Up options.

Recommended Mounting Method for Side Mount Shades
Figure B

EZ Level on Cellular Shades
EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 62 for details.

Day-Night Shades

Color Lux® Cellular Shades
CORD LOOP HARDWARE SYSTEM

Applications
- Standard Rectangular
- Two-On-One Head Rail
- Top Down - Bottom Up

Cord Loop Hardware System Features
Cord loops are available 2' to 15' lengths in 1' intervals. Please specify length when ordering. Standard loop sizes are as follows:

Shade Length	Standard Loop
Up to and including 26⅞"	1' (12")
27" to 39⅞"	2' (24")
40" to 59⅞"	3' (36")
60" to 83⅞"	4' (48")
84" to 107⅞"	5' (60")
108" and greater	6' (72")

Recommended Mounting Method for Side Mounting Shades
Width limit for side mount brackets is 48".
Cord Loop Hardware
Cordless Ultra Hardware
Cordless Ultra Top Down - Bottom Up Hardware

Figure A

Refer to the installation instructions on Comfortex.com/comfortex-dealers or the OnDemand Mobile Library for further details on side mounting shades.

Ordering Information for Cord Loop Hardware Shades

Standard Rectangular
- Specify IB or OB mount, rail color and left or right lift cord.
- Specify cord loop length when ordering.

Top Down - Bottom Up
- Specify IB or OB mount and rail color. Middle rail will match the top and bottom rails.
- Specify cord loop length when ordering.
- Controls are the right cord loop operates the middle rail and left cord loop operates the bottom. Reverse controls are not available.

Two-On-One Head Rail
- Two-On-One Head Rail Shades operate as two separate shades on one head rail.
- Specify IB or OB mount and rail color.
- Specify panel sizes.
- Specify cord loop length when ordering.
- ⅜" Space between panels.
- Fabric wrapped Two-On-One Shades will have a seam in the center of the rail due to the wide width.

Highlights Cornice Valance
Add a designer finishing touch to a cellular shade with a Highlights Cornice Valance. See page 62 for details.

EZ Level on Comfortex Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:
Standard Cord Lock, Cordless Ultra, Cord Loop Simplicity Motorized Systems

EZ Level is not available with Cordless Lift & Lock.

How does EZ Level work?
- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down. One quarter turn of the adjustment screw will move the bottom rail up or down ¼".
- Lower the rail to check the level and make further adjustments if necessary.

Color Lux® Cellular Shades
CORDLESS ULTRA HARDWARE SYSTEM

Cord Loop Rail Dimensions
- Depth of rail: 2"
- Depth of rail and bracket: 2¼"
- Height of rail: 1½"
- Height of bracket: 1¹³⁄₁₆"

Hardware Features

Fabric Wrapped	Fabric used is same fabric as the shade. Back of rail is white to outside. Frosted clear with fabric insert end caps with white cord.
Designer Metallic	• Oil Rubbed Bronze head and bottom rails with bronze colored end caps and cord. • Brushed Nickel head and bottom rails, end caps.

Mounting Dimensions

Mounting Dimensions	Cord Loop Hardware System
Minimum Shallow Mount	½"
Minimum Flush Inside Mount	2¼"
Minimum Outside Mount	⅞"
Minimum Side Mount	1¼"
Recommended Side Mounting Method	• See figure A, page 21 for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

Inside Mount
- Fabric will measure ordered width less: ⅜"
- Head rail* will measure ordered width less: ³⁄₁₆"

Outside Mount
- Fabric will measure ordered width
- Head rail* will measure ordered width plus: ³⁄₁₆"

Side Mount

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Color Lux® Cellular Shades
CORDLESS ULTRA HARDWARE SYSTEM

Applications
- Standard Rectangular
- Top Down - Bottom Up
- Two-On-One Head Rail

Things to Consider
- Is the top of your window out of reach? You can order an extension pole to reach but it can still be tricky. You may want to consider Cord Loop or Motorized hardware.
- For shades mounted on doors, you may want to order hold down brackets.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information for Cordless Ultra Hardware Shades

Standard Rectangular
- Specify IB or OB mount and rail color.

Top Down - Bottom Up
- Specify IB or OB mount and rail color.
  Middle rail will match the head and bottom rails.

Accessories
- 6' Expandable Pole:
- 12' Expandable Pole:
Specially designed pole end fits into the handle on the bottom rail and allows for easy operation.

Cordless Ultra and Cordless Ultra Top Down - Bottom Up Hardware Features
- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Ultra and Cordless Ultra Top Down - Bottom Up Shades can be raised or lowered with a gentle push or pull on the rail handle.
- Cordless Ultra Top Down - Bottom Up Shades feature two moving rails.
- Order an operating pole for out of reach applications.

Fabric Wrapped Head Rail and Designer Metallic Head Rails.

Cordless Ultra Shade Operation
Cordless shades should be operated from the handle located in the center of the bottom rail. Using the handle will aid in smooth and easy shade operation. Two handles are supplied on wider width shades.

To lower the shade, pull down on the handle which is secured to the bottom rail and guide the rail to desired position (Figure A). For out of reach applications, an optional extension pole should be used.

To raise the shade, push the bottom rail up using the handle on the bottom rail and guide the rail to the desired position. The shade will hold any position when the bottom rail is released. Raise the shade slowly and steadily to allow the shade to stack evenly (Figure B).

2 3/8"
5/8"
1/2"
1 7/8"

Cordless Lift & Lock Rail
- Depth of rail: 1⅞"
- Depth of rail and bracket: 2⅜"
- Height: ½"
- Height of bracket: ⅝"

Hardware Features

Hardware	• Fabric wrapped head, middle and bottom rails. Shades will have a coordinated or white push button/handle and end caps on the middle/bottom rail. Refer to coordination chart in the Dealer Resource Center in the Fabrication section online. • Fabric used to cover the rails is the same fabric as the shade. The back of the rail will be white to the outside.

Upgrades

Designer Metallic Upgrade	• Smooth faced Designer Oil Rubbed Bronze Metallic head, middle and bottom rail and end caps. • Oil Rubbed Bronze push button/handle on the middle and bottom rails.

Mounting Dimensions	Lift & Lock Head Rail
Minimum Shallow Mount	¾"
Minimum Flush Inside Mount	2½"
Minimum Outside Mount	¾"
Minimum Side Mount	1⅜"
Recommended Side Mounting Method	• See figure A (pg 21) for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

CORDLESS LIFT & LOCK HARDWARE SYSTEM

Cordless Lift & Lock Shades Hardware System Bottom Rail Dimensions
1 7/8"

1 1/8"

- Depth of rail: 1⅞"
- Height of rail: 1⅛"

Applications
- Standard Rectangular
- Top Down-Bottom Up
- Two-On-One Head rail

Important Operating Note on Cordless Lift & Lock Shades
- To operate a Cordless Lift & Lock Shade, the middle or bottom rails must be accessible. An extension pole is not available for Cordless Lift & Lock Shades.
- If the bottom or middle rail is not accessible, you may want to consider Cord Loop, Cordless Ultra or Motorized hardware. An extension pole is not available for Cordless Lift & Lock Shades.

Cordless Lift & Lock Hardware Features
- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Lift & Lock Shades can be raised or lowered by pressing the button located on the bottom rail and guiding the rail into the desired location.

Leveling the Bottom Rails
Each Cordless Lift & Lock Shade includes a skew adjustment leveling tool hidden in the bottom rail of each shade.
To level the bottom rail, remove the bottom rail end cap to access the tool which allows you to adjust the placement of the bottom rail. Adjustment instructions are supplied with each shade.

Ordering Information for Cordless Lift & Lock Shades
Standard Rectangular
- Specify IB or OB mount and rail color.

Cordless Lift & Lock Shade Operation
Cordless Lift & Lock Shades are operated using the push button handle located in the center of the bottom rail.
To raise or lower the shade; press the button on the shade handle, and guide the rail to desired position. Release the button to lock the shade into place.

The shade will in hold any position when the button is released. Raise the shade slowly and steadily to allow the shade to stack evenly.

Cellular Shade
12V NON-RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Simplicity Motors
The Simplicity Motor program features a battery powered motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.
• Length measurements may vary +/- ⅛".

Applications
• Standard Rectangular
• Two-On-One Head Rail

EZ Level
Learn about the EZ Level feature on page 62.

Simplicity Motorization Surcharges
The standard Simplicity Motorized Lift System surcharge includes a 12 volt battery wand with eight AA batteries. Remotes are needed to operate the shades. See pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

• Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
• Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

SIMPLICITY MOTORIZATION PRICING EXAMPLE:

Linen Weave	
Light Filtering 42" x 60" Shade:	$422.00
Simplicity Motor Surcharge:	$368.00
Simplicity Remote Control:	$44.00
Total List Price:	**$834 .00**

Simplicity Battery Wand
Batteries are needed to operate Simplicity motors. The battery wand can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement
Eight alkaline batteries are included with the wand.
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily will commonly have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase.

Simplicity Hand Held Remotes
The *5 Channel (5C) remote* can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

A *6 Channel (6C) timer remote* is also available. See page 30 for more information.

A *14 Channel (14C) remote* is also available. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. See page 32 for more information.

DC Power Supply/Transformer
12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep

Color Lux® Cellular Shades

Color Lux® Cellular Shades

7.4V RECHARGEABLE SIMPLICITY MOTORIZED HARDWARE SYSTEM

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications
- Standard Rectangular
- Two-On-One Head Rail

Please Note
- Motorized shades less than 24" in width are limited to a maximum of 60" in length.

EZ Level

Learn about the EZ Level feature on page 62.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.
Charging Port on Back of Head rail.

SIMPLICITY RECHARGEABLE BATTERY WAND PRICING EXAMPLE:

Linen Weave
Light Filtering 42" x 60" Shade:	$422.00
Simplicity Rechargeable Surcharge:	$368.00
Charger for Rechargeable :	$30.00
Simplicity Remote Control:	$44.00
Total List Price:	**$864.00**

Color Lux® Cellular Shades
7.4V RECHARGEABLE SIMPLICITY MOTORIZED HARDWARE SYSTEM

Simplicity Rechargeable Battery Life
Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option
- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY"position setting. If the homeowner wants to set several shades at the same intermediate position, follow instructions provided with installation manual.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Simplicity Motorized Shade Warranty
Please see page 154 for complete Comfortex warranty information.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes
5 Channel Remote

The **5 Channel (5C) remote** can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote

The **6 Channel (6C) timer remote** combines the functionality of a six channel hand-held control with the convenience of a programmable timer.
- The 6C timer remote allows for 18 different scheduled actions.
- Manual function disables the timer and the remote then operates as a held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

A **14 Channel (14C) remote** is also available. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. See page 32 for more information.
Simplicity Motor Hand Held Remotes Operation

Press the up or down button on the remote to raise or lower the shade to your desired position.

To reprogram channel assignments, please refer to the installation instructions and/or view the video at: comfortex.com/comfortex-dealers.

The Simplicity remotes utilize one 3V battery. Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

Color Lux® Cellular Shades

7.4V RECHARGEABLE MOTORIZED TOP DOWN-BOTTOM UP HARDWARE SYSTEM

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. If shades are less than 36" in width, an external snap-on battery pack is necessary. *(See picture to right)*

Applications
• Rectangular

EZ Level

Learn about the EZ Level feature on page 62.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Ordering Information for Top Down-Bottom Up Motorized Cellular Shades

Simplicity Motor Option
• Specify IB or OB mount and rail color.
• 14 Channel TDBU Remote is required.
• Specify one or more battery chargers.

Please Note:
• Shades that are 24"-36" in width will have an external battery.
• Shades with an external battery and OB mounted will need spacer blocks.
• Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits set on both moving rails.

• **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Top Down-Bottom Up Simplicity Motor Hand Held 14 Channel Remote

The TDBU remote has 14-channels. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The 1*4 Channel TDBU remote* can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Rechargeable Battery Pack is concealed in the head rail. Minimum width of 36" is required otherwise battery must be mounted externally.
Charging Port on Back of Head rail.

Snap-On external battery for shades under 36" or less in width. Spacer block also shown, required for outside mount.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Color Lux® Cellular Shades
7.4V RECHARGEABLE MOTORIZED TOP DOWN-BOTTOM UP HARDWARE SYSTEM __

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand. The wand extends up to 31″ in length.

Simple to use! Place the magnetized wand tip on the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.
- Great for out of reach windows

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.
- Extension cable plugs into charging port of Simplicity Rechargeable shades.

EZ Charge Wall Mount Receiver Kit | CKIT078
One kit per Simplicity Motorized shade is needed.

EZ Charge Wand

- Wand is 9½″ and extends to 31″
  Magnetized tip makes connection quick and easy.
- Once wand is in place plug the 8.4v charger into the bottom of the extension wand for charging.

Battery Charger   Wand Base

Battery Charger - SOLD SEPARATELY

You must specify charger when ordering a Simplicity Rechargeable Motorized Shade. The charger plugs into the wand base. The 8.4 Volt charger requires a standard power outlet to recharge the motor. The charger is black and comes with a 156″ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep.

Cellular Shade Collection
12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Wall Mount 9 Channel
Power Transformer
(Only for Bottom Up Shades)

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Roller Shades, Sheer Shadings and Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

- **Product Description:**
  -12v10a 9ch
  -Input Voltage Range : AC90V-264V
  -Input Frequency Range : 50Hz-60Hz
  -Output Voltage Range : DC12V+/-5%
  -Output Current : 10 Ampere
  -Output Power : 120 Watt
  -Output Ripple&Noise : ≤42MV
  -Output Efficiency : ≥83%
  -Output Fuse Type : PTC
  -Output Fuse Rating : 2A
  -Environment Operating Amb.Temp : -30 ~45
    20%~90%RH
  -Environment Storage Temp : -40 ~85 10%~95%RH
  -Plugs sinto standard household outlet
  -Power cord is 56" in length

Color Lux® Cellular Shades
SIMPLICITY SMART CONTROLLER

COLORLUX® CELLULAR SHADES

Simplicity Smart Controller Dimensions
- Width of controller: 2⅜"
- Length of controller: 2¹⁵⁄₁₆"
- Height of controller: 1⅛"

Simplicity Smart Controller	
	• Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Control Shades • Powered by NEO Smart Blinds App • Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?
The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?
Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?
There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?
The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?
You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?
Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?
Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control for it (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?
The app is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the app and your shades. See page 7.

Color Lux® Cellular Shades
7.4V RECHARGEABLE POWERTOUCH MOTORIZED HARDWARE SYSTEM

Simplicity Motorized Rail Dimensions
- Depth of rail: 2"
- Depth of rail and bracket: 2¼"
- Height of rail: 1½"
- Height of bracket: 1¹³⁄₁₆"

Hardware Features	
Standard Hardware	• Fabric Wrapped head and bottom rails. Head rail and Bottom rails will have frosted end caps with fabric inserts. • Fabric used to cover the rails is the same fabric as the shade. The back of the rail will be white to the outside.
Simplicity Remote	Upper and lower limit stops pre-programmed, Intermediate stop "favorites" position can be set on site.
Upgrades	
Designer Metallic Upgrade	• Smooth faced Designer Oil Rubbed Bronze head, middle, bottom rails and end caps • Smooth faced Designer Brushed Nickel head, middle, bottom rails and end caps

Mounting Dimensions	Simplicity Motorized Hardware System
Minimum Shallow Mount	½"
Minimum Flush Inside Mount	2¼"
Minimum Outside Mount	⅞"
Minimum Side Mount	1¼"
Recommended Side Mounting Method	• See page 21 for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

Inside Mount	
	• Fabric will measure ordered width less: ⅜" • Head rail* will measure ordered width less: ³⁄₁₆"
Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆"
Side Mount	
	• Fabric will measure ordered width less: ⅞" • Head rail* will measure ordered width less: ¹¹⁄₁₆"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆" • Head rail* will measure ordered width
* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"	

Color Lux® Cellular Shades
7.4V RECHARGEABLE POWERTOUCH MOTORIZED HARDWARE SYSTEM _____

PowerTouch™ Rechargeable Shades

Cellular Shades can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. A "favorites" or intermediate stop position can be set once installed.

PowerTouch Rechargeable Surcharges

See page 7.

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail when installed.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

Wand

Pendant

PowerTouch Rechargeable Color Options

- Shades with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

- The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

Mounting Requirements for PowerTouch Rechargeable Shades

- No special installation hardware or wiring requirements are needed.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shades Warranty

Please see page 154 for complete warranty information.

COLORLUX® CELLULAR SHADES

Color Lux® Cellular Shades
OVATION CELLULAR SLIDER HARDWARE SYSTEM
Ovation Hardware Rail Dimensions
- Depth of rail: 3″
- Depth of rail and bracket: 3⅛″
- Height of rail: 1¾″

Hardware Features	
Standard Hardware Color	Aspen White #785
Optional Hardware Colors	Ivory, beige, tan and gray rails are available as an option. Visit comfortex.com to view color options • Silverado #276 • Honey Bisque #882 • Camel #082 • Gardenia White #862

Mounting Dimensions	Ovation Hardware System
Minimum Inside Mount	¾″
Minimum Flush Mount	3⅝″
Minimum Outside Mount	⅝″

Finished Dimensions

Inside Flush Mount	
Track Width:	
Right or Left Stack	³⁄₁₆″ less than ordered width
Split Stack	³⁄₁₆″ less than ordered width
Center Stack	³⁄₁₆″ less than ordered width
Finished Slider Length	½″ less than ordered width
Valance	³⁄₁₆″ less than ordered width
Outside Mount	
Track Width	Ordered width
Finished Slider Length	Ordered length - No reductions will be made
Valance	Ordered width plus 1¼″
Valance Returns	Will measure 3⅛″ (standard)

Color Lux® Cellular Shades
OVATION CELLULAR SLIDER HARDWARE SYSTEM

Applications
- Standard Rectangular
- Opens and closes from side to side
- Four stacking options - see below.
- Dual Panel option with a center opening design with two fabrics, one on each side, each spanning the width of the window.

Ovation Stacking Options
Specify stacking configuration when ordering.

Left Stack   Right Stack   Split Stack (Center Opening)

Center Stack   Dual Panel
Left: Fabric stacks to the left side of the slider.

Right: Fabric stacks to the right side of the slider.

Center Stack: Center Stack Sliders fabric panels can move fully to the left or the right.

Split Stack: Fabric is split in the center of the slider forming two equal panels which open to opposite ends of the slider. Both panels will be of equal width unless otherwise specified. Split stack is not available with Gradient shades.

* Split stack sliders are available in maximum widths from 240" to 336" (maximum width depends on the fabric selected). If the width exceeds the maximum width of the fabric, it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider.

Dual Panel: A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified. Specify which fabric stacks to left and which fabric stacks to the right.

Ordering Information for Ovation Cellular Sliders
- Specify IB or OB mount.
- Specify stacking configuration.
  On Dual Panel Shades, specify which fabric stacks to the left and right.
  On Split Stack Shades, both panels will be of equal width unless specified.
- Specify valance width and return length.

Ovation Valance Specifications
- Every Ovation Slider is supplied with a painted aluminum valance to match your hardware color choice.
- The valance attaches to the head rail using a durable plastic clip system.
Ovation Valance Dimensions
All valance dimensions are measured on the flat, back side.
- Valance Height: 2¾"
- Standard Return Length (OB only):   3⅛"
- For each spacer block, ½" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.
- If the slider requires a non-flush inside mount, you must order a custom valance. Exact valance width and exact valance return length (minimum 1½") must be specified in the Special Instructions section of the order form.
- Custom returns are available for IB non-flush and OB Cellular Sliders. Please specify return length upon ordering.

Things to Consider
- Since most Ovations are sold in large sizes, the shade will have a large fabric stack. On an outside mount, you may want to order the shade a few inches wider so that the fabric stack can be clear of the window.
- **Minimum Ovation Stack:** Ovation's minimum fabric stack measures 6½" regardless of the ordered width. Minimum fabric stacking dimensions are determined by the slider's hardware, not ordered width.

Color Lux® Cellular Shades
7.4V RECHARGEABLE SIMPLICITY WAVE MOTORIZED HARDWARE SYSTEM

Simplicity Rechargeable Rail Dimensions
- Depth of rail: 2"
- Depth of rail and bracket: 2¼"
- Height of rail: 1½"
- Height of bracket: 1¹³⁄₁₆"

Diagram measurements: 2 1/4, 1 1/2, 1 13/16, 2

Hardware Features	
Standard Hardware	• Fabric Wrapped head and bottom rails. Head rail and Bottom rails will have frosted end caps with fabric inserts. • Fabric used to cover the rails is the same fabric as the shade. The back of the rail will be white to the outside.
Telescoping Wand	Extends to 33" to reach shades mounted high. Wand retracts to 9" for easy storage.

Mounting Dimensions	Simplicity Wave Rechargeable Motorization Hardware System
Minimum Shallow Mount	½"
Minimum Flush Inside Mount	2¼"
Minimum Outside Mount	⅞"
Minimum Side Mount	1¼"
Recommended Side Mounting Method	• See page 21 for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

Inside Mount	
	• Fabric will measure ordered width less: ⅜" • Head rail* will measure ordered width less: ³⁄₁₆"
Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆"
Side Mount	
	• Fabric will measure ordered width less: ⅞" • Head rail* will measure ordered width less: ¹¹⁄₁₆"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Color Lux® Cellular Shades

7.4V RECHARGEABLE SIMPLICITY WAVE MOTORIZED HARDWARE SYSTEM _____

Wave Rechargeable Simplicity Motor

The Simplicity Wave Motor features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity wave motors are compact and use a telescoping wand to raise or lower the shades.

Wave Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Rectangular

EZ Level

Learn about the EZ Level feature on page 62.

Simplicity Wave Rechargeable Motorization Surcharges

The Simplicity Wave Rechargeable Motorized Lift System surcharge includes a rechargeable battery. A Wand is needed to operate the shades and a charger to charge the battery. Refer to pricing pages.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option
- Specify IB or OB mount and rail color.
- Specify wand and other accessories if needed.
- Specify one or more battery chargers.

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity Wave Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits.
- Favorites position can be set on site.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

SIMPLICITY RECHARGEABLE BATTERY WAND PRICING EXAMPLE:

Linen Weave	
Light Filtering 42" x 60" Shade:	$422.00
Simplicity Wave Surcharge:	$132.00
Charger for Wave Rechargeable:	$30.00
Simplicity Wave Wand:	$30.00
Total List Price:	**$614.00**

Simplicity Wave Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Charging Port on Back of Head rail.

Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery pack. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Telescoping Wand

- Extends to 33" to reach shades mounted high.
- Wand retracts to 9" for easy storage.
- The wand is silver with white handle and white magic tip.
- Wall mount plate included for convenience.
- Wand is universal and will operate all Simplicity Wave shades

Simplicity Motorized Shade Warranty

Please see page 154 for complete Comfortex warranty information.

The Ultimate Blackout Color Lux® Cellular Shade
INSULATING SLUMBERSHADES HARDWARE SYSTEM

Deluxe Head Rail

2 3/8"
5/8" 1/2"
1 7/8"

- Depth of rail and bracket: 2⅜"
- Height: ½"
- Height of bracket: ⅝"

Cord Loop & Cordless Ultra Rail
- Depth of rail: 2"
- Depth of rail and bracket: 2¼"
- Height of rail: 1½"
- Height of bracket: 1¹³⁄₁₆"

Hardware Features

Hardware colors for all Cellular fabrics	Fabric wrapped head, middle, bottom rails and end caps is standard. Back of rail is white to outside.
Blackout Sidetrack Colors Available	White, Tan and Bronze

Upgrades

Designer Metallic Upgrade	• Oil Rubbed Bronze and Brushed Nickel head, middle, bottom rails and end caps.

Mounting Dimensions (inside mount only)	**Deluxe Head Rail**
Standard Cord Lock (Standard Rectangular and Top Down-Bottom Up)	
Minimum Inside Mount	1½"
Minimum Flush Inside Mount	2⅜"
Cord Loop & Cordless Ultra (Standard Rectangular and Top Down-Bottom Up)	
Minimum Inside Mount	1½"
Minimum Flush Inside Mount	2⅜"

Outside, shallow and side mounts are not available. The shade's light blocking ability is compromised by using any other mount than a fully flush mount application.

Finished Dimensions

Inside Mount	
	• Fabric will measure ordered width less: ⅞" • Head rail and bottom rail will measure ordered width less: ¹¹⁄₁₆" • Sidetrack length will measure ordered length less: ⅛"

The widest width of the window cannot exceed the narrowest width of the window by more than ¼".
Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest ¹⁄₁₆" and provide the NARROWEST width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom.

The Ultimate Blackout Color Lux® Cellular Shade

INSULATING SLUMBERSHADES HARDWARE SYSTEM

Applications
- Standard Rectangular   • Top Down - Bottom Up
- Cordless and Cordless Top Down - Bottom Up
- Cord Loop and Top Down - Bottom Up
- Motorization

SlumberShades are for inside mount applications only.

Insulating SlumberShade Fabric
Light Filtering fabrics are available as SlumberShades, however the best light control is achieved by using a blackout cellular fabric. Not available in Boutique fabric.

Ordering Information for Insulating SlumberShades
SlumberShades are for inside mount applications only.
Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest $\frac{1}{16}$" and provide the NARROWEST width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom. The widest width of the window cannot exceed the narrowest width of the window by more than $\frac{1}{4}$".
If you have questions about ordering SlumberShades, contact Comfortex Technical Services at 800-843-4151.

Accessories
- 6' Expandable Pole:
- 12' Expandable Pole:
Specially designed pole end fits into the handle on the Cordless Ultra bottom rail and allows for easy operation.

Insulating SlumberShades Features
Use SlumberShades to provide the darkest sleeping environment by sealing out the highest percentage of light.

Energy Saving Blackout Sidetracks
Energy saving blackout sidetracks are made from a durable window grade PVC. The blackout sidetracks seal off the light gap between the blackout cellular shade and the window. The blackout sidetracks feature a black interior lining to absorb light and prevent it from entering the room.

Insulating SlumberShades Large Track Dimensions
Used with all fabrics that utilize the deluxe sized head rail.
Large Track
- Width of track: 1 $\frac{1}{8}$"
- Height of track: $\frac{7}{8}$"

SlumberShades are easy to install, and feature removable sidetracks that are attached to the window frame with magnets. The sidetracks can be removed for window cleaning. The UV stable, window grade PVC sidetracks are available in white, tan and bronze to match your existing trim.

Please Note: When properly installed, SlumberShades block 99% of all visible light. In certain installations with intense sunlight, a very small amount of light may reflect around the edges of the honeycomb fabric along each side of the shade. This is a normal attribute of the SlumberShade system.

Insulating SlumberShade End Caps
The specially designed notched bottom rail end caps fit over the blackout sidetracks and allow for smooth movement when raising and lowering the shade.

Head and Bottom Rail Seals
To ensure a perfectly dark sleeping environment, additional fuz bar are supplied to be placed along the shade's bottom rail and between the head rail and the window frame if needed. These barriers provide a complete light stop all the way around the window to keep all exterior light out. Also, these additional seals provide a very effective barrier against heat loss along your windows.

Magnets and fuzz bar are standard on Cordless and Cordless Top Down-Bottom Up Shades to ensure closure between the bottom rail and window sill.

Energy Efficiency
Independent testing has shown SlumberShades provide an R-value greater than 7.0* when installed over a double paned vinyl window. The testing also indicates that the R-value of a SlumberShade is 2.5 to 3 times higher than that of the same shade without sidetracks. The insulating cellular fabric, sidetracks, and fuz bar all ensure that the SlumberShades provides superior energy efficiency.

* Independent testing provided by Consortium for Advanced Residential Buildings (CARB), a U.S. Department of Energy Building America research team. Learn more at comfortex. com.

Stationary Starburst Features (Figure A)
• **All non-perfect Stationary Starburst arches require a template made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000, See page 151
• A perfect arch is twice as wide as it is high.
• Stationary Starburst shades which are not perfect half circles must have a height that equals half the width +/- 5".
• Price according to the largest radius measurement. If the height is greater than the width, take height X 2 and use that number to determine pricing.
• When ordering arches as perfect half-circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)

Movable Starburst Features (Figure B)
• Starburst Movable archtop shades are cut to perfect half circles only and do not require a template. The height must be exactly ½ the diameter.
• A perfect arch is twice as wide as it is high.
• When ordering arches as perfect half circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)
• The hinge gap (gap between the two rails) is not centered in the window. The moving rail is always smaller than the stationary rail to provide proper movement within the window.

Accessories
• 6' Expandable Pole:
• 12' Expandable Pole:

Specially designed pole end fits into the handle on movable Starburst Shades for easy operation.

Hardware Features | See Page 18 for Rail Dimensions	
Hardware colors for all Cellular and Pleated fabrics	Fabric wrapped rails with white cord and tassel. Fabric used is same fabric as the shade. Back of rail is white to outside.

Upgrades

Designer Metallic Upgrade	• Oil Rubbed Bronze rails and endcaps, bronze colored tassel and white cord. • Brushed Nickel rails and end caps with coordinating tassel and white cord.

Mounting Dimensions	Standard Rail	Deluxe Rail
Minimum Shallow Mount	¾″	¾″
Minimum Flush Inside Mount	2″	2⅜″
Minimum Outside Mount	¾″	¾″
Minimum Side Mount	1¹⁄₁₈″	1⅜″
Recommended Side Mounting Method	• See page 21 figure A for recommended mounting method for side mount shades	

Finished Dimensions

Inside and Side Mount	
	• Fabric will measure ordered width less: ⅜″ • Head rail* will measure ordered width less: ³⁄₁₆″

Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆″

Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆″ • Head rail* will measure ordered width

* Head rail measurements include endcaps.
   Width and length measurements may vary +/- ⅛″

Applications
• Stationary Fan Style Quarter Round
• Movable Fan Style Quarter Round

Ordering Information for Quarter Rounds Shades
• Specify IB or OB mount and rail color.
• Include a template if the shade is a non-perfect quarter round.

Accessories
• 6′ Expandable Pole:
• 12′ Expandable Pole:

Specially designed pole end fits into the handle on movable Quarter Round Shades for easy operation.

Color Lux® Cellular Specialty Shades
QUARTER ROUNDS HARDWARE SYSTEM

Quarter Rounds Features (Figure B, page 47)
- **All Quarter Round Shades which are not perfect quarter circles require a template.** Price according to the largest radius measurement.
- See page 151 for template instructions.
- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- The horizontal (moving) rail of a Movable Quarter Round shade **must be smaller** than the vertical (stationary) rail to allow clearance for the moving rail. The shade will stack in the vertical position.
- When ordering arches as perfect quarter circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B, page 47)

	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆"

Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps.
  Width and length measurements may vary +/- ⅛"

Applications
• Movable Arch

Ordering Information for Sunset Shades
• Specify IB or OB mount and rail color.
• Include a template if the shade is a non-perfect arch.

Accessories
• 6' Expandable Pole:
• 12' Expandable Pole:

Specially designed pole end fits into the ball on Sunset Shades for easy operation.

Color Lux® Cellular Specialty Shades
SUNSET ARCHES HARDWARE SYSTEM

Sunset Features and Ordering Notes
(Figure A, pg 49)

- Sunset shades have horizontal pleats that stack at the bottom, on a stationary sill rail. Sunset shades are operated by a continuous cord that runs through a top mount guide block and back down through the stationary rail. A moving metal ball attached to the cord is used to raise and lower the shade. (See Figure E).

- **All Sunset arches which are not perfect half circles require a template.** A perfect arch is twice as wide as it is high. See page 151 for template instructions.

- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000

- Sunset shades which are not perfect half circles must have a height which is equal to or greater than 25% of the width.

- When ordering Sunset shades that are perfect half circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B).

- **Stringing Method:** Depending on the curvature of a particular arch, it may be necessary to use the two string method (See Figure C) to ensure proper fit and operation of your Sunset shade. Comfortex will determine the best stringing method after examination of the template.

- **Arch Styles:** Sunset arches are available in a variety of styles including: palladium, eyebrow and bullet shaped arches. (See Figure D).

Color Lux® Cellular Specialty Shades
TRAPEZOIDS AND OCTAGONS HARDWARE SYSTEM

Movable Trapezoids
Movable Octagons

Hardware Features	See Page 18 for Rail Dimensions	
Fabric Wrapped	Fabric used is same fabric as the shade. Back of rail is white to outside. Frosted clear end caps with white cord and tassel
Designer Metallic	• Oil Rubbed Bronze head and bottom rails with bronze colored tassel, end caps and white cord. • Brushed Nickel head and bottom rails and end caps with coordinating tassel and white cord.

Mounting Dimensions	Standard Cord Lock Rail
Minimum Shallow Mount	¾"
Minimum Flush Inside Mount	2"
Minimum Outside Mount	¾"
Minimum Side Mount	1⅟₁₈"
Recommended Side Mounting Method	• See page 21 for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"

Finished Dimensions

Inside and Side Mount	
	• Fabric will measure ordered width less: ⅜" • Head rail* will measure ordered width less: ³⁄₁₆"
Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: ³⁄₁₆"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: ³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps.
   Width and length measurements may vary +/- ⅛"

Applications
- Movable Trapezoids
- Movable Octagons

Ordering Information for Trapezoid Shades
- Specify IB or OB mount and rail color.
- **Trapezoid orders must be faxed or emailed in with a diagram. Please provide measurements for all four sides when ordering. No template is required.**

Ordering Information for Octagon Shades
- Specify IB or OB mount and rail color.
- **The width, length and one side are required measurements when ordering.**

Color Lux® Cellular Specialty Shades
TRAPEZOIDS AND OCTAGONS HARDWARE SYSTEM

Trapezoids (Figure A)
- **Trapezoid orders must be faxed in with a diagram. Please provide measurements for all four sides when ordering. No template is required.**
- The maximum slope of the top rail is 30 degrees from horizontal. Slope is the angle between slope and a horizontal line. The slope angle must be measured with a protractor.
- Sides of trapezoid must be parallel.
- Sill must be level for proper installation and operation of a trapezoid shade.
- Operating cord must be placed on the short side.
- See Figures B and C for trapezoid shade operation.

Octagons
- **The width, length and one side are required measurements when ordering.**
- Octagon shades raise only to the point where the top angle begins. (See Figure D)
- See Figure A on page 21 for recommend mounting method for side mount shades.
- Width limit for side mount brackets is 48".

Trapezoid Shade
Figure A

30°

Max. slope of
top width 30°

Trapezoid Shade Operation

Operate as a standard rectangular shade until the bottom rail reaches the point where the angled portions of the window begins. (Figure B)

Figure B

To have shade stack on the angle: Continue pulling the cord for the longer side of the shade until the fabric is in the stacked position, then engage the cord lock. (Figure C)

Figure C

Octagon Operation

Octagon Shades raise only to the point where the top angle begins.

Ordering Information for Mezzo Motorized Skylight Shades

- Specify inside mount dimensions.
- Specify fabric color and style.
- Specify remote and other accessories if needed.

Color Lux® Cellular Specialty Shades
MEZZO MOTORIZED SKYLIGHT HARDWARE SYSTEM

Applications
- Horizontal, Angled and Vertical motorized skylight shades.

Mezzo Motorized Skylight Shades are for inside mount applications only.

Mezzo Power Options
- Simplicity Rechargeable Motor

RECHARGEABLE SIMPLICITY MOTORS
The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Simplicity Rechargeable Battery
The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.
Charging Port on Back of Head rail.

Simplicity Hand Held Remotes
The **5 Channel (5C) remote** can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

A **6 Channel (6C) timer remote** is also available. See page 31 for more information

The Simplicity remote utilizes one 3V battery (CR2032). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

A **14 Channel (14C) remote** is also available. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. See page 32 for more information.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

Solar Recharge Optimum Application
- Full direct sunlight (minimum 4-6 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Solar panel will charge batteries even without direct sunlight. Ambient light will charge the batteries but at a slower rate.
- Excessive duration of cloudy weather will impact the rate of charge.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Color Lux® Cellular Specialty Shades
MEZZO MOTORIZED SKYLIGHT HARDWARE SYSTEM

Solar Panel Location Requirements
For Locations North of Washington, DC (39° Latitude)

Vertical Windows   Slanted Skylights   Flat or Shallow Slant Skylights

For Locations South of Washington, DC (39° Latitude)

Vertical Windows   Slanted Skylights   Flat or Shallow Slant Skylights

Assumptions: 1) Window area free from shadows 9 AM to 3 PM.

2) Glazing is double pane, clear.

Excessive shading or tinted glass will impact the solar charging capability of the system.

Indicates orientations which may require periodic manual recharge with Plug In Charger.

Indicates orientations which are optimum for solar recharge (wireless systems).

Important Simplicity Motorized Shades Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Make sure to leave the top of the shade head rail open (motor exposed), do not cover; especially with metal materials. This could result in a reduced radio frequency range for the remote control or the shade may not operate at all, depending on the application.

FRENCH DOOR DÉCOR HARDWARE SYSTEM

Applications
- Stationary Door Décor
- Movable Door Décor
- Top Down - Bottom Up Door Décor
- Cover French doors, transoms, and side lights.

French Door Décor Hardware Features
- Features two non-moving rails which are mounted in the window or door. A tension control system enables the movable rail to be easily moved with the touch of a finger. The only visible cords are the ones that hold the movable middle rail in place.
- The widest width of the window cannot exceed the narrowest width of the window by more than ⅜".

Stationary Non-Movable French Door Décor Shades
- Top and bottom rails are mounted to the window and are stationary.

Movable French Door Décor Shades
- Top and bottom rails are mounted to the window, one middle movable rail raises from the bottom.

Top Down - Bottom Up Option
- Top and bottom rails are mounted to the window, two movable rails allow the shade to lower from the top and raise from the bottom.
- The non-movable top and bottom rails are attached to the window or door.
- Ideal for entry ways with narrow windows next to doors and other narrow windows that are easily accessible.

HIGHLIGHTS CORNICE VALANCE
Highlights Cornice Valances

Highlight any element of your home décor with the Highlights Cornice Valance upgrade.

This tailored, fabric wrapped 6-inch valance, available with seven returns sized from 1½" to 6", mounts over any product, either inside or outside the frame. The keystone option now allows for all Color Lux Roller fabrics to cover widths up to 216".

Highlights Valance without a keystone can be added to your cellular shade order or as a stand alone product. Highlights Valance orders with a keystone are a stand alone product only.

Color Lux® Cellular Shades
EZ LEVEL

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:
- Standard and Deluxe Cord Lock
- Cordless Ultra
- Cord Loop
- SlumberShades
- Simplicity Motorized Systems

EZ Level is not available with Lift & Lock Cordless.

How does EZ Level work?
- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down. One quarter turn of the adjustment screw will move the bottom rail up or down ¼".
- Lower the rail to check the level and make further adjustments if necessary.

FABRIC INFORMATION

Choosing the Right Color Lux Roller Fabric

What are the fabric contents of each fabric?
- Classic Duck Light Filtering is 100% Polyester
- Classic Duck Blackout is 100% Polyester
- Linen Light Filtering is 100% Polyester
- Linen Blackout is 100% Polyester with a foam coated backing
- Solar Screen 5 is 36% Polyester, 51% FR Polyester and 13% Cationic Polyester

Classic Duck Light Filtering and Blackout Fabrics
Classic Duck provides the perfect canvas for all 800 Color Lux colors. A simple weave works well with any complementary fabric textures. Available in Light Filtering and Blackout.

Linen Light Filtering and Blackout Fabrics
Linen provides the natural timeless look of linen fabric into Color Lux Roller Shades. Light Filtering allows in just the right amount of opacity to maintain privacy but allow light into the home. Linen Blackout is perfect for bedroom and media room applications.

Solar Screen 5 Fabric
Solar Screen 5 is the perfect balance of function and design. With a 5% openness factor, Solar Screen 5 provides light and privacy. Color Lux Color 100 Ultra White has passed the NFPA and California Title 19 Fire Rating Standards. Solar Screen 5 also offers a subtle linen texture that enhances every decor style.

What are the fabric properties of Solar Screen 5?
The below ratings apply to **Color Lux Color 100 Ultra White Only**

	TS	RS	AS	TV	OF	Commercial SHGC % Improvement	Residential SHGC	Fire Rating
Solar Screen 5								
100 Ultra White*	39	56	5	38	5.00	39%	0.42	
ISO 14001:2004 **OEKO-TEX® Standard 100** **OEKO-TEX® Standard 1000** **Zero Landfill** **Water Conservation and Usage** **Use of Recycled Materials**								NFPA 701-10 TM#1, California U.S. Title 19

(Header spanning: **SHGC/G Value** covers Commercial SHGC % Improvement and Residential SHGC)

* Fire Rating and other properties apply to Ultra White (Color Lux Color 100) only

To be certified with OEKO-TEX® Standard 100, companies hve to meet defined criteria regarding their environmentally friendly and socially acceptable production process at all production stages (International Association for Reseach and Testing in the Field of Textile Ecology)

TS = Solar Transmittance OF= Openness Factor
RS = Solar Reflectance 1/4 CL = 1/4" Clear Glass
AS = Solar Absorptance 1/4 HA = 1/4" Heat Absorbing Glass
TV = Visual Transmittance

Color Lux® Roller Shades
CORDLESS OPTIONS

Cordless Roller Shades with Designer Cassette
Create a sleek look with the Designer Cassette Head Rail. Available in White, Ivory, Black, Satin Nickel and Bronze. See individual fabric specifications for minimum and maximum shade sizes. Cordless Roller Shades with Designer Cassette are available with the Smooth Face, Fabric Insert or Fabric Wrapped options.

See page 92 for the five Designer Cassette colors.

Cordless Roller DecoBar
This cord-free system operates like a spring roller shade with a gentle tug on the bottom rail to raise and lower the shade. See page 80 for mounting information and finished dimension information. Reverse roll is available for the Deco-Bar Cordless option

White Cordless Roller Deco-Bar

Black Cordless Roller Deco-Bar

Ivory Cordless Roller Deco-Bar

Bronze Cordless Roller Deco-Bar

Satin Nickel Cordless Roller Deco-Bar

NEW Cordless Roller DecoBar Standard Light Block
All Color Lux Roller Decobar shades now feature a standard light block behind the rail for enhanced light control between the rail and the fabric roll. The light block is always white to the room side and is a no charge feature exclusively for Color Lux Cordless DecoBar roller shades.
Standard Light Block

NEW Cordless Roller DecoBar Fabric Valance
All ColorLux Cordless DecoBar shades now feature a beautiful fabric valance option. This option is perfect to conceal the roll of the cordless decobar system but still maintain the 1¾" for shallow applications.

Dealer List Price = $33.00

The fabric valance is available on Linen Light Filtering, Linen Blackout, Duck Light Filtering and Duck Blackout and Solar Screen 5 fabric. The valance will always match the shade pattern and fabric.
All valances are 4.5" long to ensure that the roll and bottom rail is concealed when the shade is raised.
Fabric Valance Upgrade

Cordless Roller Deco-Bar Bracket Covers
The Cordless Roller Decobar now offers deco bar covers in White, Ivory, Black, Satin Nickel and Bronze that coordinates with the deco-bar color selected. Available for Inside Mount or Outside Mount applications. Brackets are White and Black only.

Bracket cover provides a clean finished appearance

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades
CORDLESS OPERATION

Cordless Tassels and Pulls
Add a decorative tassel or pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Cordless Shades. Tassels and pulls are placed in the middle of the bottom rail. They feature an approximately 3-inch long cord which coordinates with the tassel color.

Tassels and pulls are attached to the back of the bottom rail with a clear clip. This allows for in the field modifications if needed.

ALL Color Lux Roller Shade hardware is available with any Tassel or Pull.

Wood Ball Pulls
Add a decorative Wood Ball Pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Color Lux Roller Shades. Select from 4 colors: Waxed, Natural, Whitewash and Cocoa.
Add: $18 Per Shade

Beehive Pulls
Add a durable and fashionable Beehive Pull to your shades for easy lifting and lowering. These are a great combination with solar shades and are available in White and Onyx.
The Beehive pull is 2 ⅝" long.
Add: $42 Per Shade

Wood Tassels
Select from 5 colors: Milky White, Ebony, Walnut, Light Pine or Mahogany.
A wood tassel is 1⁵⁄₁₆" long.
Add $18 Per Shade

Jute Ball
Add a simple and natural accent to any cordless roller shade with the Jute Ball Pull. Available in a single Jute color.
Add: $18 Per Shade

Droplet Pull
Wound with soft yarn in a elegant shape that fits comfortably into the palm of your hand. Available in Navy, Grey, Ivory and Clay. See the 2019 Envision Designer Collection Sample book for full color offering.
The Pear pull is 2 ⅛" long.
Add: $42 Per Shade

Clear Handle for Cordless Roller Shades
A clear handle comes included with all cordless roller shade orders with an option to attach the handle during installation. This easy to attach and easy to remove clear handle is a great way to keep the rail or the fabric (for fabric wrapped option) clean and new after regular shade use. The width of the handle is 2⅛" wide.

Optional Clear Handle

Cocoa   Whitewash   Waxed   Natural

Onyx   White

Grey   Navy   Clay   Ivory

Color Lux® Roller Shades
GENERAL INFORMATION

Reverse Roll on Color Lux Roller Shades

A reverse roll option is available at no extra charge with all Color Lux Roller Shade fabrics only on the Standard Roller Hardware and Cordless Roller with Deco-Bar Hardware. The reverse roll allows the fabric to roll off the front of the roller instead of the back (the traditional style). The reverse roll conceals the roller for a contemporary, tailored appearance.

Bottom Rail Options

Color Lux Roller Shades can be built with your choice of 2 bottom rail options:
- Fabric Wrapped Bottom Rail (standard)
- Exposed Bottom Rail

Choose your bottom rail color when ordering.

Fabric Wrapped Bottom Rail

The shade fabric is wrapped around an elliptical grooved rail. Two clear plastic end caps secure the fabric in place. Select from bronze, white, vanilla, black or brushed aluminum.

Choose your bottom rail color when ordering.

Fabric Wrapped
Bottom Rail

Exposed Bottom Rail

Select from bronze, white, vanilla, black or brushed aluminum bottom rail to add a decorative accent to the bottom of your shade. Two clear plastic end caps secure the fabric in place.

Choose your bottom rail color when ordering.

Bronze Exposed
Bottom Rail

Spring Assist for Skyline Roller Shades

Spring assist is a great option for larger shades that reduces the pull force of clutch operated shades by up to 40%.

Spring Assist is available for standard roller shades, 4" Skyline Fascia and Designer Cassette.

Spring Assist is not available for motors or cordless shades.

Spring Assist is only available with a White or Black Skyline Clutch. Other Skyline Designer colors are not available.

Spring assist is recommended for shades 84" x 84" or larger. Minimum shade width is 60".

Add $130 List to standard rectangular shade.

Color Lux® Roller Shades
NEW FEATHERTOUCH™ CORDLESS GENERAL INFORMATION

FeatherTouch™ Cordless Features

Unlike other spring operated cordless shades, the FeatherTouch™ cordless roller system maintains a balance between the weight of the fabric and the strength of the spring. This provides:

- Fine adjustment and precision placement of the shade
- Alignment across multiple shades
- Safest option for kids
- Smooth operation
- All EZ Mount hardware shades feature a standard light block
- FeatherTouch is NOT available on Custom Graphics 5% Screen fabric.

List Price for FeatherTouch Cordless Upgrade Option: $42.00

FeatherTouch™ Operation

To operate FeatherTouch Cordless shades, simply pull on the center of the bottom rail until you reach your desired position. To lift your shade, push the bottom rail upwards. FeatherTouch does not have an release mechanism that raises the shade. Operation is all with a touch of your finger.

FeatherTouch™ EZ Mount Hardware Finishes

FeatherTouch is available with the EZ Mount Hardware option or Designer Cassette.
EZ Mount hardware is available in three colors:

- White
- Black
- Designer Nickel **($63.00 List Surcharge)**

All FeatherTouch shades with EZ Mount hardware includes matching end cap covers for both inside mount and outside mount shades.

EZ Mount Hardware ensures the proper spacing of brackets for the best performance.

A light block is standard with every EZ Mount shade

COLORLUX® ROLLER SHADES

White EZ Mount Hardware

Black EZ Mount Hardware

Designer Nickel EZ Mount Hardware

Designer Cassette (All Options)

FeatherTouch™ Cordless Options and Upgrades

Fabric Valance Option for Inside Mount Shades

FeatherTouch Cordless Shades feature an optional 4.5" fabric valance to conceal the EZ Mount Hardware. Valances are only available in matching shade fabric and color, and attach separately with the supplied brackets. A light block is attached to the back of the head rail for better light control. Fabric Valances are only available for Inside Mount shades ordered with the EZ Mount Hardware system. A surcharge of **$33.00 List** will apply.

Fabric Valance Upgrade

Clear Handle

A clear handle is included at no charge for every FeatherTouch roller shade unit. To prevent damage to the roller shade fabric, handles are not installed at the factory. The width of the handle is 2⅛" wide.

Telescoping: To prevent telescoping, the factory has indicated the center of your bottom rail for easy and accurate handle placement.

Clear Handle

Magnetic Wand Kit

The magnetic wand is optional for hard to reach shades and attaches to the magnetic plate included with your kit. Four handle plates are included with every kit. The pole is extendable up to 33". A surcharge of **$39 List** will be applied. Other standard pole options are available.

Additional Information

- FeatherTouch Cordless is NOT available as reverse roll.
- Decorative Pulls and Tassels are NOT available.
- A 6mm hex wrench is required if adjustment is necessary. Tension and upstops are set at the factory.

Optional Magnetic Wand Kit

Color Lux® Roller Shades
TWO-ON-ONE HEAD RAIL SYSTEM

Two on One Head Rail roller shades are two roller shades sharing the same head rail; each roller operates independently.

Operating Options
- Two on One Head Rail can be combined with cord loop, PowerTouch Motorization, Simplicity Motorization and Simplicity Rechargeable Motorization hardware options.
- Controls will always be placed to the far left and far right. (Controls are NOT available between two shades)

Fabric Options
- Two on One Head Rail roller shades are available in all Color Lux Roller Shade fabrics.
- See price grids for standard size limitations.

Head Rail Options
- Available with Designer Cassette or Standard Roller Shades.
- Two on One roller shades are ONLY available on 1½" tube.
- Available with Designer Cassette with Insert Strip and Smooth Face options.
- Fabric wrapping is NOT available on two on one Designer Cassette.
- Minimum single section is 12".
- Maximum width for a single section is 106".
- Total maximum width in Designer Cassette head rail is 140". Maximum shade sizes will vary by fabric
- Center gap between roller shades is ⅜".

COLORLUX® ROLLER SHADES

TWO ON ONE CASSETTE PRICING EXAMPLE:

36" x 60" Classic Duck
Blackout Fabric	$358 x 2 = $712
Designer Cassette Insert Strip	$90 x 2 = $180
PowerTouch Motorization:	$118 x 2 = $236

TOTAL LIST PRICE BEFORE DEALER DISCOUNT = $1,128
- Specify shade total width and the two individual section widths. **Please Note:** The two individual sections must add up to the total width.

Two-on-One No Head Rail Shades

The Two-on-One No Head Rail mounting option uses an intermediate bracket that reduces the light gap when two shades are placed side-by-side.

Cord Loop shades will always have the clutch on the outside of both shades to ensure proper tensioner mounting.

Standard Brackets are available in White, Black, Ivory and Bronze. Intermediate Brackets are available in White, Black and Ivory.

Bracket covers for the two outer shades are the same colors available for a Skyline Standard Roller Shade: White Black, Ivory, Bronze and Satin Nickel.

Two-on-One No Head Rail Shades are available with Cord Loop, Simplicity Motorization, Simplicity Rechargeable Motorization and PowerTouch Rechargeable shades.

PowerTouch Rechargeable wands will always hang to the outside of each Two-on-One No Head Rail shade.

TWO ON ONE NO CASSETTE PRICING EXAMPLE:

For Satin Nickel Two-on-One No Head Rail Shades with PowerTouch Rechargeable:

36 x 60 Linen Light Filtering Fabric:	$323 x 2 = $646
Add Satin Nickel Skyline:	$28 x 2 = $56
Add PowerTouch Rechargeable:	$118 x 2 = $236

TOTAL LIST PRICE BEFORE DEALER DISCOUNT = $938

Bottom Rail Width:	Ordered width minus 1¹⁄₁₆"	Ordered width minus 1⅛"

Color Lux® Roller Shades
DUAL ROLLER HARDWARE SYSTEM

Dual Roller Shades are available with Skyline Cord Loop and Simplicity Rechargeable Motorization. They are the perfect way to combine both light filtering and blackout fabrics into a single shade for the ultimate light control. Any fabric or screen in the Envision Designer Collection can be mixed and matched to create a versatile window for any time of day.

The front roll of fabric is always a reverse roll. The back roll of fabric is always a standard roll. Clutches are always on opposite sides of the shade to ensure a location for tensioner mounting.

Dual Roller Shades are not available with cordless operation or PowerTouch Rechargeable motorization. Bracket covers are available in white or black for outside mount shades only. Brackets are available in black and white.

Candeling will occur between the upper and lower fabric rolls if a Blackout fabric is selected as the back roll. This allows light to come through. Blackout fabric can be selected for the front roll to prevent this.

Simplicity Rechargeable Motorization is available with Dual Roller Shades to ensure easy installation without the need to mount two battery wands.

See price grids for Dual Roller Shade Specifications. Shade minimums and maximums are identical to single shade systems. Not available with 2″ tube.

A **Highlights Valance** is the perfect option to conceal both roller tubes on a Dual Roller Shade system. Highlights Valances are available in 6″, 8″, 10″, 12″, 14″ and 16″ heights. See page 101 for details.

Color Lux® Roller Shades
DESIGNER CASSETTE WITH RETRACTABLE CORD HARDWARE SYSTEM

The Retractable Cord system for Color Lux Roller Shades is a perfect option for hard to reach shades when a continuous loop is not desired. The retractable cord system features smooth and easy to use operation. The Designer Cassette option is required for all Retractable Cord shades.

Colors

Clutch: is available in White or Black. Can be coordinated with any Designer Cassette option.

Cords and Tassels: White or Black

Operation

The clutch can be ordered to the right or left of the shade so the pull cord is easy to reach.

To raise, simply pull the cord straight down until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially raises the shade. The shade can be stopped at any point while raising.

To lower, simply pull the cord out towards you until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially lowers the shade. The shade can be stopped at any point while lowering.

Light Gap

Please note that there is a ¾" light gap on the operation side of all roller shades.

Minimum ordered width for Retractable Cord shades is 12". See fabric specification pages for maximum sizes.

Cord Length

All retractable cord shades have a default cord length that is 40% of the total length. Custom options are available when ordering.

¾" light gap on operation side. Clutches are available in white and black with tassels and cords in white or black

Color Lux Retractable Cord Pricing Example:

36 x 60 Linen Light Filtering Fabric:	$323

Color Lux® Roller Shades
DESIGNER CASSETTE WITH SIMPLICITY RECHARGEABLE ROLLER WAVE _____

Simplicity Rechargeable Roller Wave
The Simplicity Wave Motor features a roller motor with integrated batteries. Simplicity Wave requires a Designer Cassette option and uses a telescoping wand to raise or lower the shade.

The Simplicity Rechargeable Roller Wave option is available in all sizes in Section 1 of each fabric price grid.

Please Note:
• Not all motors run at the same rate of speed.
• Simplicity Rechargeable Roller Wave shades are programmed at the factory with the "up" and "down" limits.
• Order at least one charger.

Telescoping Wand
• Extends to 33" for hard to reach shades.
• Wand retracts to 9" for easy storage.
• Wand is silver with white handle and white magnetic tip.
• Wall mount plate included for convenience.
• Wand is universal and will operate all Simplicity Wave shades.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery integrated within the motor. Must specify charger when ordering a PowerTouch Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire.

Mounting Requirements for Simplicity Rechargeable Wave with Designer Cassette

No special installation hardware or wiring requirements are needed to install Simplicity Wave Roller Shades with Designer Cassette Head Rail. A battery wand is not required.

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades
POWERTOUCH RECHARGEABLE FOR NO HEAD RAIL & DESIGNER CASSETTE ___

Color Lux Roller Shades can be fabricated with the PowerTouch™ Rechargeable option.

The PowerTouch™ Rechargeable provides an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch™ Rechargeable uses Simplicity motors and components.

- PowerTouch™ Rechargeable is available for Roller Only and Designer Cassette
- The Roller Only option uses Skyline Hardware brackets and bracket covers available in White, Ivory, Black, Satin Nickel and Bronze. Wand and Pendant are always White or Black.

Color Lux Roller Shade PowerTouch™ Rechargeable Upgrade Surcharges
All standard discounts apply to PowerTouch™ Shades.

- PowerTouch™ Rechargeable Pendant and Wand: $118.00
- Charger for PowerTouch™ Rechargeable (required): $28.00

PowerTouch™ Rechargeable Roller Shade Specifications
See specific fabric price grids for minimum and maximum shade widths and lengths. Shade sizes in grey shaded sections are NOT available with the PowerTouch™ Rechargeable option.

PowerTouch™ Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position.

Programming the upper and lower limits is completed at the factory. These can be easily adjusted in the field if desired.

Programming the favorites position is completed after shade installation.

Please refer to the installation instructions at comfortex.com/ comfortex-dealers.

PowerTouch™ Rechargeable Appearance
- The PowerTouch™ Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The No Head Rail PowerTouch™ Rechargeable wand must be attached to the motor before mounting.
- The wand and pendant hangs down the front of the shades
- The top and bottom buttons lift and lower the shade to the upper and lower limits. The center button is the favorites and stop button.
  from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
Wand

Pendant

PowerTouch™ Rechargeable Color Options with Designer Cassette and No Head Rail Roller

White   Black

- Shades with Black or Oil Rubbed Bronze head rail will be built with black wand and pendants standard.
- Shades with White hardware will be built with white wand and pendants standard.
- Shades with Fabric Wrapped Head Rail will be built according to the head rail color selected.
- Shades booked as a no head rail roller will have a prompt to select wand color.

Wand and Pendant Location with Designer Cassette and No Head Rail Roller
The standard location for the wand and pendant is on the right. Please specify when ordering.

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades
POWERTOUCH RECHARGEABLE FOR NO HEAD RAIL & DESIGNER CASSETTE

PowerTouch™ Rechargeable Wand Length with Designer Cassette and No Head Rail Roller

Shade Length	Standard Wand Length
Shades up to 30"	1' (12")
30" to 52"	2' (24")
52" to 78"	3' (36")
78" to 100"	4' (48")
100" to 120"	5' (60")

- Custom length wands are not available with PowerTouch™ Rechargeable. Standard wand lengths can be changed at no cost.

Mounting Requirements for PowerTouch™ Rechargeable Shades with Designer Cassette

- No special installation hardware or wiring requirements are needed to install PowerTouch™ Rechargeable Roller Shades with Designer Cassette Head Rail.
- A battery wand is not required with PowerTouch™ Rechargeable shades.

Mounting Requirements for PowerTouch™ Rechargeable Shades with No Head Rail Roller

- On No Head Rail roller shades, the wand must be attached to the motor with two screws (included) before mounting the shade.
- A battery wand is not required with PowerTouch™ Rechargeable shades.

PowerTouch™ Rechargeable Shades Do Not Have a Separate Battery Wand

There is no battery wand with the PowerTouch™ Rechargeable shades. The battery pack is integrated inside the roller tube to make mounting easier and more convenient.

The battery is recharged via the recharging port on the PowerTouch Rechargeable™ Wand.

Recharging Port

Minimum Width Requirements for PowerTouch™ Rechargeable Shades with and without Designer Cassette

Inside Mount = 18⅜"
Exact Mount = 18³⁄₁₆"

Simplicity Rechargeable Motorization

All Roller Shade Fabrics

Minimum Width with No Head rail: 19½"
Minimum Width in Designer Casssette: 18½"
Maximum Width: See roller price grids for motorized shades specifications.

Simplicity Rechargeable Motors Appearance
The Simplicity Rechargeable motor and batteries are concealed within the roller tube.

Mounting Requirements
Standard Skyline Roller Hardware
No special installation hardware or wiring requirements are needed. See page 75 for mounting information.

Dual Roller Shades
No special installation hardware or wiring requirements are needed. See page 85 for mounting information.

Designer Cassette Hardware
No special installation hardware or wiring requirements are needed. See page 83 for mounting information.

4" Skyline Fascia Hardware
No special installation hardware or wiring requirements are needed. See page 91 for mounting information.

Simplicity Rechargeable Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Battery Wand Mounting is Not Required
No external battery wand is required to operate a Color Lux Roller Shade with Simplicity Rechargeable Motorization.

Simplicity Rechargeable Motor Battery Life
Rechargeable battery is built into the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.
Charging Port   Close-Up

Battery Charger for Simplicity Rechargeable Motors

An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering a Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor.

The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Color Lux® Roller Shades
SIMPLICITY RECHARGEABLE MOTORIZATION

Heavy Duty Simplicity Rechargeable Motorization for 2″ and 2½" tubes

Heavy Duty Motors are now available for all roller shades that require a 2″ or 2½″ tube. See shaded sections in each fabric grid for sizes. Motors are only available with the no head rail option. Brackets are only white and no bracket covers are available. Even if not required, Heavy Duty Motorization can be ordered for smaller shades to maintain consistent appearance.

Heavy Duty Motorization is NOT available with Designer Cassette or Fascia options.

Minimum Width of Heavy Duty Motorized Shades is 24″.

Battery is integrated within the motor unit.

The 12 Volt charger must be used to recharge heavy duty motors. **Solar Panel Option is NOT available for Heavy Duty Motorization.**

Width = 3"

Minimum Mounting Depth = 2"
Minimum Flush Mounting Depth = 3"
Minimum Side Mounting Depth = 3"

Important Information about Simplicity Rechargeable Motor Shade Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This my interfere with signals from the remote control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged. The shade will also beep when the remote button is pressed if the battery is low.

New Solar Panel Option
Dimensions: 19" x 1½"

The new solar panel option with mounting brackets plugs into any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).

The solar panel provides a constant trickle charge to the 7.4v Li-Ion Rechargeable battery packs. It does not require direct sunlight, but performs best in direct sunlight applications.

This option prolongs the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables, such as size and weight of the shade, frequency of shade use, amount of direct sunlight exposure, etc.

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades
7.4V SIMPLICITY RECHARGEABLE HARDWARE SYSTEM

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand. The wand extends up to 31″ in length.

Simple to use! Place the magnetized wand tip on the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.
- Great for out of reach windoww

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.
- Extension cable plugs into charging port of Simplicity Rechargeable shades.

EZ Charge Wall Mount Receiver Kit | CKIT078
One kit per Simplicity Motorized shade is needed.

Shade Features
• **Bottom rail style:** Fabric Wrapped or Exposed bottom rail
• **Bottom rail color:**
  Fabric Wrapped: White, vanilla, bronze, black or brushed aluminum.
  Exposed: White, vanilla, bronze, black or brushed aluminum.
The motor lead is 6" long and the battery wire is 10" long.

White and Black Adapters for Skyline Motorization with no head rail

DC Power Supply
12 Volt DC power supply is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shade with a Simplicity motor. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" length x 1¼" deep.

Standard Simplicity Motor Battery Wand Mounting
The battery wand is wall or ceiling mounted utilizing white battery wand clips. It also can be clipped to the Designer Cassette head rail.

Batteries are needed to operate Simplicity motors. The battery wand measures 17¼" and comes with eight alkaline batteries and is white in color.

Battery Wand

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades

SIMPLICITY MOTORIZATION

Simplicity 7.4V Rechargeable and 12V Remote Control Options

Simplicity 5 Channel Remote

The Simplicity Remote features 5 individual frequency channels and an All channel that will operate all the shades at once.

The 5 Channel Simplicity remote is available in white and black. All remotes come with a holder which can be mounted to a wall for easy storage.

The remote controls utilizes one 3V battery (CR2430). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Remote control batteries are not covered by the limited lifetime warranty.

Standard Simplicity Battery Operated Motorized Shades Warranty

Please see page 153-154 for complete Comfortex warranty information.

Simplicity 14 Channel Remote

The Simplicity 14 Channel remote can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Roller Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet. A 14 Channel (14C) remote can be utilized on all Simplicity Motorized Shades.

Please Note: Unused channels can be hidden

Simplicity 6 Channel Timer Remote

The 6 Channel (6C) timer remote combines the functionality of a six channel hand-held control with the convenience of a programmable timer.
- The 6C timer remote allows for different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 6-channel hand held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

THE FACTORY DOES NOT PROGRAM CHANNELS FOR SIMPLICITY RECHARGEABLE MOTORS.
The factory programs the upper and lower limits of every shade. Channel programming is completed after shade installation.

Please Note:
- Not all motors run at the same rate of speed.
- **REMOTES ARE NOT LINKED TO SHADES FROM THE FACTORY. SHADES MUST BE LINKED AFTER SHADE INSTALLATION.**
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE SIMPLICITY RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

COLORLUX® ROLLER SHADES

Color Lux® Roller Shades

COLOR LUX® HIGHLIGHTS CORNICE VALANCE WITH KEYSTONE
Highlight any element of your home décor with the Highlights Cornice Valance upgrade. This tailored, fabric wrapped valance, available in seven heights with seven returns sized from 1½" to 6", mounts over any product, either inside or outside the frame. The Keystone option now allows for all fabrics to cover widths up to 216". It's the perfect solution for our Panel Track system. Highlights Valances can ONLY be ordered as a STANDALONE product.

Highlights Valance Specifications

Valance Width with Keystone: Maximum valance width is 216" for all Color Lux Roller Fabrics.

- Fabric cannot be railroaded
- Keystone placement is pre-determined. Custom placement is not available.
- Seaming is not available.
- Multiple Keystones may be required for larger widths. (ex. 216" Highlights Valance will require TWO Keystones, each 72" wide).

Valance Heights: 6", 8", 12", 14" and 16"

Standard Return Sizes:
- Inside Mount: None
- Outside Mount: See chart below.

Highlights Cornice Valance Upgrade can ONLY be ordered as a SEPARATE stand alone product. They cannot be ordered with shades.

Highlights Ordering and Measuring Instructions
Inside Mount Valance ordered SEPARATELY

- Inside mount valances are made without returns.
- An inside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the inside width at the top of the window where the valance is to be installed. Measure in multiple spots to ensure accuracy. If there are variances, supply the smallest measurement.
- **Please Note:** The finished dimension of your inside mount bracket will be ³⁄₁₆" less than your ordered width (see Figure A). Example: An inside mount valance ordered at 36" wide will be made 35¹³⁄₁₆".
- **Please Note:** You will need up to 3½" of mounting depth to ensure your valance is fully recessed and flush with your window opening.
Figure A

Mounting Information for Highlight Valances with Returns Size Options

Style	Return Size	Mounting Depth Required	Inside Valance Depth Clearance Provided	Comments
Inside Mount	None	3" for flush	N/A	Mounted inside window opening

Highlights Ordering and Measuring Instructions

Outside Mount Valance ordered SEPARATELY
- Outside mount valances come in seven return options.
- An outside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover.
- **Please Note:** When ordering outside mount valances, the finished overall width of your valance will be your ordered width plus 1¼" (see Figures B and C). **Example:** An outside mount valance ordered at 36" wide will be made 37¼".
- **Please Note:** You will need ½" of surface area to mount your valance (see Figure B).
Figure B

Outside Mount
Figure C

Valance with Return Size Options
- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover. See Figures D-F for measuring information.
- Next, determine the length of your desired returns. Use the chart on page 88 for the mounting depth required and inside valance depth clearance provided for each return size.

Outside Mount
Figure D

Valance Return Size Options (Cont.)
Inside Mount
Figure E

Shallow Mount
Figure F

Valance Returns
- Seven return size options are available.
- **Return Sizes:** To determine a return length, add the component dimensions (mounting brackets, etc.) up to the wall. Subtract the measurements from any protrusions (molding, etc.), then choose from one of the pre-determined return sizes (from the chart on page 88 that best fits your application.
- **Return Coverage**
Ordered return size refers to the distance from the face of the valance to the back of return. See Figure G.
Figure G

Clearances

Shallow Mount Bracket
- 1½" Return provides an inside valance clearance of ⅞".
- 2" Return provides an inside valance clearance of 1⅜".
- 2½" Return provides an inside valance clearance of 1⅞".

Outside Mount Bracket
- 3" Return provides an inside valance clearance of 2⅜".
- 4" Return provides an inside valance clearance of 3⅜".
- 5" Return provides an inside talance clearance of 4⅜".
- 6" Return provides an inside valance clearance of 5⅜".

Color Lux® Roller Shades

COLOR LUX® HIGHLIGHTS CORNICE VALANCE WITH KEYSTONE _____

Keystone Specification

- All keystones will automatically be wrapped with matching Color Lux Roller Fabric.
- Available in Classic Duck, Linen and Solar Screen 5.
- Keystones will be provided separately and installed on site.
- Ordering two optional keystones is currently not available. Two keystones may be required for some wider width valances.
- Valance panels are divided in half when the Keystone option is ordered. Custom locations for keystone placement is not available.

Keystones for Panel Tracks

- Keystones ordered for Panel Tracks should use the return sizes list below to ensure clearance of the Panel Track Rail.
- **2 Panels Side or 4 Panel Split = minimum 3" returns**
- **3 Panels Side = minimum 3" returns**
- **4 Panels Side or 6 Panel Split = minimum 4" returns**
- **5 Panels Side or 8 Panel Split = minimum 4" returns**
Rear view of the Highlights Valance Keystone. Not visible to room side.

Front view of the Highlights Valance Keystone.

Color Lux Custom Graphics for Highlights Cornice Valance.

Custom Graphics is available for Highlights Cornice Valance without a Keystone only.

- Available in Classic Duck Light Filtering, Classic Duck Blackout, and 5% Scree (5% Screen is only available on Custom Graphics).
- Add 25% to Standard Rectangular Price on page 88.
A Keystone option is available for all shade widths so every Highlights Valance in a room will be uniform

Color Lux® Fabric Cornice from Designer Window Solutions

Color Lux Designer Window Solutions now offers a beautiful new cornice option using **Color Lux Linen and Sateen Drapery** fabrics. Color Lux Fabric Cornice is NOT available with Color Lux Roller shade fabrics. Available in heights ranging from 6" to 16", with return sizes from 3" to 7", this cornice is sure to fit any application in the home. They are designed to coordinate beautifully with all Color Lux solid colors and are a perfect top treatment for other hard or soft window treatments.

See the 2020 Color Lux Designer Window Solutions Manufacturer's Price List and Reference Guide for more information!

COLORLUX® ROLLER SHADES

COLOR LUX® PANEL TRACK SYSTEM

COLOR LUX®
Designer Cellular & Roller Shades

Color Lux® Panel Track Shades
SYSTEM FEATURES & OPTIONS

The Color Lux Panel Track Shade system offers versatility and a beautiful modern design for effective light control and outstanding performance. Panel track systems are a beautiful option for large windows and room dividers. Available in Classic Duck and Linen Light Filtering and Blackout, and Solar Screen 5.

Stacking Options

Color Lux Panel Track Shades are available with 3 stacking configurations: split, left and right stacks.
- Split stack panels draw open to both sides equally. Controls may be placed on either side and is only available in cord control.
- Side stack is available as left or right stack and is available with a white wand or cord control.

Split Stack

Left or Right Stack

Closed Side Stack

Panel Attachment

A hook and loop strip is sewn onto every panel to provide a secure attachment. The patented panel attach method makes it easy to attach the panels even after installation of the rail.

Hook and Loop Strip

Installing panel with hook and loop strip
Head Rail Colors

Select from the white or aluminum system hardware system. (Wand is always white.)

White Head Rail

Aluminum Head Rail

Bottom Rail

Panel track bottom rails are designed for smooth operation and allows all panels to glide smoothly past each other.
- Bottom rails are designed to match perfectly with the head rail in exposed white or silver.
- Finished bottom rails will be ½″ higher than measured drop on inside mount shades.
- Bottom rails are not connected to each other on this panel track system.
- Fabric Wrapped bottom rails are available as an option.

Fabric Wrapped Bottom Rail

Fabric Panels and Custom Overlaps

Classic Duck Light Filtering and Blackout are both available with the Color Lux Panel Track Shade System.
- Panels will be fabricated with a 2″ overlap as standard. Custom overlaps are available at 1½″, 2½″ and 3″. Please specify when ordering.
- Panels are attached with a hook and loop strip to allow for subtle fabric adjustment in the field.
- Each panel traverses the track using ball bearings, creating smooth operation for wand and cord control
- Panels follow a single lead panel in sequence to open and close.
- Panels position exactly behind one another in the open position.
- There is no light gap between the rail and the panels.
- Panels will reach the end of the track.

Please Note: Panels may not hang perfectly flat immediately upon installation. Panels may have a billowing or wavy appearance at the time of installation which may correct itself over time.

Replacement panels are available.

COLORLUX® PANEL TRACK SHADES

Color Lux® Panel Track Shades
SYSTEM FEATURES & OPTIONS

Control Options
The panel track system uses a cord or wand for traversing the fabric panels. Cord control is standard with every panel track shade. Wand control is available at no additional surcharge. Please specify when ordering.

Cord Control
- The nylon cord is white or grey to coordinate with hardware.
- Standard length of the cord is 10″ less the ordered length. Custom cord lengths are available. Please specify when ordering.
- Standard cord placement is right stack with right cord.
- Operating cords are located on the outside edge of the panels.
- Tensioner for cord control is always white.
- Tensioner must always be placed so the cord reaches full extension.

Grey Cord Control

Wand Control
The traversing wand is a convenient alternative to a traditional cord control. This single control system protects children and pets from injuries caused by loop cords.

- The wand control is always white.
- Only available on side stack systems.
- Standard wand placement is on the outside leading edge of the left or right stack.

White Wand Control

Standard Wand Lengths
- Shades up to 72″ in Length: 36″ wand
- 72″ to 96″ in Length: 48″ wand
- 96″ to 120″ in Length: 60″ wand
- 120″ to 144″ in Length: 72″ wand

Custom lengths are not available but you may select from one of the standard wand lengths above.

Panel Widths
To achieve the best performance on this panel track system, panels are designed within the following parameters:

The minimum width for a single panel is 6″.
The maximum width for a single panel is 48″.
The maximum panel height is 144″.

See price grids for the minimum number of panels that will be available at the desired width.

More panels can be ordered at an additional surcharge and to achieve the desired panel width.

The standard panel overlap is 2″. Custom overlaps are available.

Example: The standard split stack on a 96″ wide opening would have 4 panels at 26″ wide with a 2″ overlap. If 6 panels are desired, each panel would be 18″ wide.

Track Specifications

The minimum width of a track is 18″.
The maximum width of a track is 216″.

The maximum width of a single panel track is 216″
When the total width is ordered over 100″, tracks will be split in half and a connector bracket will be provided.
Panel Stack Back
The stack back will be equal to a single panel width. It will never be less than 12″ and never exceed 48″.

To determine an approximate stack back:
Ordered Width ÷ Number of Panels = Stack Back within +/- 2″. (with 2″ standard overlap)

Color Lux Custom Graphics for Panel Track
Custom Graphics is available on Panel Track Shades in the following fabrics:
- Classic Duck Light Filtering
- Classic Duck Blackout
- 5% Screen (only available for Custom Graphics)

Add 25% to Standard Rectangular price plus desired upgrades.

Length	Ordered Length minus $1/2''$	Ordered Length minus $1/2''$	Ordered Length	Ordered Length

Mounting Options
The following mounting options are available. All mounting brackets are coordinated with the head rail in white or aluminum:
• Wall Bracket with End Caps
• Ceiling Bracket with End Caps

Light Gap
Head Rail/Fabric Panels: There is no light gap between the fabric panels and the bottom of the head rail.

Outside Mount Bracket/Head Rail: There is a $1/4''$ light gap between the top of the track to the top of the outside mount installation bracket.

Inside Mount Bracket/Head Rail: There is a $1/8''$ gap between the top of the track to the top of the inside mount installation bracket.

Bottom Light Gap: There will be a $1/2''$ light gap at the bottom of the hanging panels on an inside mount shade.

Side Light Gap: There will be $3/16''$ side light gap at the sides of the panel track.

To avoid side light gap on outside mount shades, Comfortex recommends increasing the ordered width by $5''$, or $2½''$ on both sides.
Outside Mount Installation Bracket Appearance

Fabric Deductions and Specifications
Panels are fabricated with a $2''$ overlap as standard. Custom overlaps are available in $1½''$, $2½''$ or $3''$.

Inside Mount:
Head rail width = ordered width minus $1/4''$
Panel height allowance = ordered length minus $1/2''$

Outside Mount:
No additional deductions are taken for fabric width
Panel height allowance = ordered length

Highlights Valance for Panel Track with Keystone
See pages 101 - 103 for more information on the Color Lux Highlights Cornice Valance for your Panel Track system.
• Keystones ordered for Panel Tracks should use return sizes list below to ensure clearance of the Panel Track Rail.
• **2 Panels Side or 4 Panel Split = minimum 3″ returns**
• **3 Panels Side = minimum 3″ returns**
• **4 Panels Side or 6 Panel Split = minimum 4″ returns**
• **5 Panels Side or 8 Panel Split = minimum 4″ returns**
• Keystones automatically match the color and fabric of the ordered Color Lux Highlights Valance. Custom color options are not available.
• Valance panels are divided in half when the Keystone option is ordered. Custom locations for keystone placement is not available.
• Ordering two optional keystones is currently not available.
• Multiple Keystones may be required for larger widths. (ex. A Highlights Valance with an ordered width of 216″ will require TWO Keystone. All three valances will be 72″ wide, excluding returns).
• The front panel on a split stack will overlap the back panel as illustrated on page 103.

Clear Window Opening
Panel Tracks are an excellent option for clearing a window opening. Please see the below charts for guidance on what ordered width is recommended to clear a window opening.

For Example:
For a One Way Side Stack ordered with 5 panels, in order to clear an opening of 94", the ordered width of the panel track should be 120".

One Way Side Stack Panel Track

Step 1: Select # of Panels
Step 2: Select uncovered width

2 Panels	If uncovered width is	17	23	29	35	-	-	-	-	-	-
3 Panels	If uncovered width is	23	31	39	47	63	79	-	-	-	-
4 Panels	If uncovered width is	25	34	43	52	70	88	106	124	-	-
5 Panels	If uncovered width is	27	37	47	56	75	94	113	133	152	171
	Result: Then Ordered Width is	**36**	**48**	**60**	**72**	**96**	**120**	**144**	**168**	**192**	**216**

Split Stack Panel Track

Step 1: Select # of Panels
Step 2: Select uncovered width

4 Panels	If uncovered width is	14	20	26	32	44	56	68	80	-	-
6 Panels	If uncovered width is	-	-	36	44	60	76	92	108	124	140
8 Panels	If uncovered width is	-	-	-	-	68	86	104	122	140	158
	Result: Then Ordered Width is	**36**	**48**	**60**	**72**	**96**	**120**	**144**	**168**	**192**	**216**

Color Lux® Custom Graphic Shades
CELLULAR SHADE FEATURES & GENERAL INFORMATION

Custom Graphics
With Custom Graphics, you can print anything on a Cellular Shade. From logos to personal photos, theme room graphics or advertising for your storefront, anything you envision can be featured on a Custom Graphics Cellular Shade.

Hardware | Mounting | Finished Dimensions
See Page 18

Available Fabrics
Custom Graphics are available with the following fabrics:
* Premiere ½" and ¾" Light Filtering Fabrics
* Premiere ½" and ¾" Blackout Fabrics

Custom Graphics can work for any window.

Advertising and Store Identification
Contact local businesses and explain how you can to turn their window space into advertising!

Decorative and Personal Photos
Customers can now convert their special photos into a highly personalized room!

Printing Information and Options
Custom Graphics will look different from fabric to fabric. The color vibrancy on cellular shades will be muted due to the density of the fabrics and the printing process.

To view the color differences on Cellular Shades, visit the Custom Graphic section of the Comfortex Dealers website.

Single Sided Printing:
Cellular Custom Graphics are available as single-sided only. Double-sided graphics are not available.

You can choose to have Side A face the room side or the street side.

Color Lux® Custom Graphic Shades
ROLLER SHADE FEATURES & GENERAL INFORMATION

Print Photos, Logos, Artwork, Advertisements and More on Color Lux® Roller and Panel Track Shades!
With Color Lux® Custom Graphics you can print literally anything on a Color Lux® Roller or Panel Track Shade. From logos and advertisements for a store front, to personal photos and theme room graphics, virtually anything you imagine can be featured on a Color Lux® Roller or Panel Track Shade.

Color Lux® Custom Graphics are also available on Cellular Shades. See the **Comfortex Cellular Shade Collection Manufacturer's Price List and Reference Guide** for more information.

Side A
Shows Printed Image
Side B
White Fabric

Single Sided Printing:
- Select a Roller or Panel Track Shade.
- Color Lux® Roller Custom Graphics Shades are available on Classic Duck Light Filtering, Classic Duck Blackout and 5% Screen.
- (5% Screen is only available with Custom Graphic Shades)
- Use the Color Lux Custom Graphics Grids on pages 116 and 117.
- A Color Lux® solid color may be selected for the background color of your shade.
- You can choose to have Side A face the room side or the street side.
- Use the Color Lux® Custom Graphics Order Form

Please Note: When ordering a Color Lux® Panel Track System Shade with a custom graphic, the custom graphic will not line up. The fabric used on Color Lux® Panel Track Shades will be printed at the total width and length specified for the complete system and then will be cut into the number of panels specified. **The pattern on the adjacent panels will overlap by 1½".**

How to order Color Lux® Custom Graphic Shades

STEP 1. FAX OR E-MAIL YOUR ORDER

Fax the appropriate Color Lux® Custom Graphics order form (Roller, Panel Track or Cellular) located on comfortex.com/comfortex-dealers to (800) 336-4580. Or e-mail the order form to customercare@comfortex.com. Upon receipt and review of your order, you will receive a work order confirmation number from Comfortex. Please be sure to reference this number when submitting your artwork in Step 2.

STEP 2. SOURCE AND SEND YOUR GRAPHIC

Source your graphic from a stock photo site such as www.istockphoto.com or use your own high resolution photography. Send your files via e-mail to: customgraphics@comfortex.com OR ship a CD/portable media containing your graphics to:

> Color Lux® Custom Graphics
>
> Comfortex Window Fashions
>
> 21 Elm Street
>
> Maplewood, New York 12189

Using Online Stock Agencies for Graphics for Your Shades

Sometimes, finding the right graphic or photograph to fit your shade size, shape, or content can be challenging. Fortunately, many web sites offer a great solution. Online stock agencies allow you to purchase reasonably priced, royalty-free digital illustrations, graphics, photographs, patterns, and more in thousands of different subject areas. Some of the more popular sites include:

- thinkstock.com
- istockphoto.com
- veer.com
- shutterstock.com
- gettyimages.com
- 123rf.com
- photosearch.com

Using these sites is easy, simply follow these steps:
Step 1. Create an account and search for your image (i.e. apples).

Step 2. Select, purchase, and download the image you like. You may be given a choice of sizes, so take care to select an option large enough for your needs.
Be sure to include the Work Order Confirmation Number received from Comfortex Customer Service with your graphic files.

STEP 3. APPROVE YOUR PROOF

The Color Lux® Custom Graphic Team will email a PDF proof of your shade order which must be reviewed and approved for production to begin. Once the artwork is approved, it will take 2 weeks for your order to be printed, assembled, and shipped.

Color Lux® Graphic File Specifications
Preferred Formats
- Vector files/Adobe Illustrator (AI or EPS)
  Please convert all typography to paths prior to submitting your vector artwork.
- TIFF, JPG/JPEG, or Adobe Photoshop (PSD) files with a minimum resolution of 100 pixels per inch at 100% size. For example, a shade measuring 30" x 40" should be supported by a graphic measuring at least 3000 x 4000 pixels.
- Adobe Acrobat (PDF) files created in "Press Quality" or "High Quality Print" with a minimum resolution for all raster elements of 100 pixels per inch at 100% size.

Graphics optimized for, or harvested from the internet are, in general, not suitable for reproduction onto shades.

Comfortex will seek to verify ownership and rights to reprint for all images showcasing copyrighted material.

Questions? Please contact Comfortex Customer Care with all questions regarding Color Lux® Custom Graphic Orders.

COLOR LUX® SHANGRI-LA® SHEER HORIZONTAL SHADINGS

- Color Lux Sheer Shadings are a window shading of unique beauty and performance for the finishing touch to a beautiful window and room.

- Horizontal fabric vanes float between two layers of soft, knitted fabric sheers to soften your view outside.

- Color Lux Sheer Shadings are available to widths of 120" and drops to 132", Color Lux Solid Color Sheer Shadings are available to widths of 96" and drops to 96", both provide visual elegance to the widest of windows.

- Color Lux Sheer Shadings are available in 3-inch vane widths in both light filtering and room darkening fabrics.

- The sophisticated 25 patterns of white on white Color Lux Printed Sheer Shadings is designed to flatter your decor.

- All Color Lux Sheer Shadings , printed and solid colors, will have fabric wrapped head rail and bottom rail.

- Vanes glide from open to closed to out of sight with elegant hardware.

- Choose from multiple hardware options to customize your

shading: traditional cord loop, retractable cord, cordless PowerTouch with Touch and Go feature or Simplicity Integrated Rechargeable Motorization.

- Only the Omni-View cord system provides five distinctly different variations of vane position for numerous combinations of privacy, view and light control.

- Only with Color Lux Sheer Shadings, can you partially raise the shading with the fabric vanes in the open, view-through position so you keep your view and still feel the outdoor breeze.

- Create your customers own sophisticated look with the low light gap Designer Cassette Head Rail.

- Easy to install hardware and brackets allow for effortless installations and easy removal for cleaning.

- Color Lux Sheer Shadings may be ultrasonically or traditionally cleaned to stay bright and beautiful.

- A Limited Lifetime Warranty serves as a commitment to your satisfaction.

Color Lux® Shangri-La Sheer Horizontal Shadings
FABRIC COLLECTIONS

Color Lux Printed Sheer Shadings are available with different fabric collections.

COLLECTION	3″ Vanes
Light Filtering	•
Room Darkening	•

Please Note: Room Darkening fabrics are not blackout fabrics. Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

Bottom Rail Closed

(Bottom Rail is always fabric wrapped)

Hardware Features

Standard Designer Cassette	Fabric Wrapped Designer Cassette is standard. Head rail endcap is fabric covered
Bottom Rail Color	Bottom rail is fabric wrapped with white end caps.

Head Rail Upgrades *(Bottom rail is always fabric wrapped)*

Designer Metallic Upgrade (Smooth Face)	• Oil Rubbed Bronze • Onyx Black • Brushed Nickel

Mounting Dimensions

Mounting Dimensions	Designer Cassette Head Rail
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Width Side Mount	48" Max width side mount

Finished Dimensions

Inside Mount

	• Fabric will measure ordered width less: 1" • Head rail* will measure ordered width less: ³⁄₁₆"

Side (End) Mount

	• Fabric will measure ordered width less: 1½" • Head rail* will measure ordered width less: ¹¹⁄₁₆"

Outside Mount

	• Fabric will measure ordered width less: ⅝" • Head rail* will measure ordered width plus: ³⁄₁₆"

Exact (End Cap to End Cap) Mount

	• Fabric will measure ordered width less: ¹³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the opened position.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Color Lux® Shangri-La Sheer Horizontal Shadings
CORD LOOP SHADING HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Head Rail Options
Fabric Wrapped Designer Cassette Head Rail is standard. End caps of the head rail are fabric covered.

Designer Metallic Upgrade is available. Colors available: Oil Rubbed Bronze, Onyx Black and Brushed Nickel. Bottom rail is always fabric wrapped.

Cord Type and Color
White, black or bronze loop cord coordinates with your hardware choice. Bead cord is optional in white, bronze, black or steel. Cord tensioners match your hardware choice (white, black or bronze).

Reverse Roll
The braided cord does not have a reverse roll stop. If a shading with the Designer Cassette hardware is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Length Considerations with Shangri-La Shadings
Comfortex will fabricate your Shangri-La Window Shading to the length ordered, when the vanes are in the open position (Figure A).

- When the vanes are rotated to the closed position, the shading will become slightly longer.

- When closed on an inside mount, the shading will be slightly longer than ordered length.

- Rotating the vanes closed will cause the bottom rail to touch the window sill, before it begins to raise.

Open   Closed

Window Sill
Figure A

Side By Side Alignment
When Shangri-La Window Shadings are installed side-by-side, vane alignment can be guaranteed within ¼" only if:

- The shadings are the same color and ordered at the same time.

- The sum total of the widths of all shadings needing alignment is less than 118".

Side-by-side lineup is specified when the order is placed.

Omni-View System
Shangri-La Shadings feature the Omni-View™ Cord System. The Omni-View System provides the ability to manipulate the shading into various viewing positions. There are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The following five modes can be obtained with standard shading operation when viewing the shading at eye level.

- **Closed top, open bottom:** By partially lowering the shading from the fully raised position, the upper portion of your window will become semi-opaque while allowing a clear view below.

- **Fully private:** When lowered completely, Shangri-La provides complete privacy and softly diffused light.

- **Partially open:** Opening Shangri-La slightly will gradually increase the level of light and allow varying levels of view through.

- **View-through when lowered:** By completely opening the vanes, Shangri-La provides a softened, veiled view to the outside.

- **View-through when raised:** From the open or view-through position, continuing to pull down on the back of the cord will raise the fabric allowing a clear view outside from below, and a veiled view above. This exclusive feature allows Shangri-La to be raised up to 24" in this mode.

- Comfortex recommends that you **do not** raise the shading more than 24" off the sill in the view-through when raised mode. Refer to warranty section below for more information.

- Omni-View is only available with Shangri-La Shadings built with braided cord loop.

Cord Information For Shangri-La Shadings
A braided cord loop is used to raise and lower the shading. White, black or bronze loop cord matches your hardware choice. Cord tensioner will match the hardware color.

Bead cord is available in black, white, bronze, nickel and steel.

The cord loop will measure the length indicated below unless otherwise specified.

Shade Length	Standard Loop
16" to 26⅞"	1' (12")
27" to 39⅞"	2' (24")
40" to 59⅞"	3' (36")
60" to 83⅞"	4' (48")
84" to 107⅞"	5' (60")
108" and greater	6' (72")

Maximum cord length is 15 feet. Polyester cord can be ordered in custom lengths in 1 foot increments only.
Braided Cord Loop Warranty Information
The shadings built with a braided cord loop do not have a reverse roll stop. If a shading is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Mounting Dimensions	
Finished Dimensions	Mounting and Finished Dimensions are the same as Cord Loop See Page 128

Retractable Cord Shadings

The Retractable Cord option is a single cord design that provides easy one hand operation to raise, lower and open and close the vanes.

- Retractable Cord hardware is an alternative to conventional cord loop controls. The short retractable cord maintains a consistent length whether the shadings are raised or lowered. The elimination of cord loop enhances child and pet safety.

- Available with all fabrics with Designer Cassette.

- White, black or bronze cord and tassel coordinates your hardware color choice.

- Standard cord length is 40% the length of the shading. Cord may be shortened to match consumer operating preferences and to keep out of reach of children. Cord length can be easily modified in the field.

- Mounting a cord tensioner is not necessary. Cord cleat is recommended.

Overall Operation

When raising and lowering the shading, pull the cord down in long, even strokes. Allow the cord to fully retract into the head rail after each downward stroke.

To Lower The Shading And Open The Vanes

- Pull the cord down toward the center of the shading with long strokes. Continue until the shading is fully lowered and the vanes are open.

- Allow the cord to retract completely into the head rail after each downward stroke.

- The shading can be stopped at any point while lowering

To Tilt The Vanes And Raise Shading

- Pull the cord straight down or down and slightly out with long strokes. With each stroke the shading partially raises.

- Allow the cord to retract completely into the head rail after each downward stroke.

- Use multiple strokes until the shading reaches the desired position.

- The shading can be stopped at any point while raising.

Two-On-One Designer Cassette Head Rail
Two-On-One Head Rail shadings are two shadings sharing the same head rail; each shading operates independently.

- Two-On-One Head Rail can be combined with cord loop, PowerTouch Rechargeable, Simplicity Motorization and retractable cord hardware options. Price as two shadings (including upgrades) and add together. Pricing example on page 125.
- Two-On-One not available with cordless.
- Specify shading total width and two individual section widths. **Note:** The two individual sections must add up to the total width.
- Two on One Head Rail Shadings are available with all vane sizes.
- Two on One Head Rail Shadings are available with bead cord or braided cord loop. See page 129 for more information.

- Controls will always be placed to the far left and far right.
- Available in widths up to 140" with Designer Cassette hardware.
- Minimum single section width is 12". Maximum single section width is 102". The center gap between shadings is ⅜".
- Side by side alignment is available if the two panels measure less than 120". Alignment must be specified when the order is placed.
- Shadings over 98" are subject to common carrier surcharge. See page 152 for more information on the freight policy.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Color Lux® Shangri-La Sheer Horizontal Shadings
CORDLESS HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Cordless Shangri-La Shadings Head Rail
- The Standard Designer Cassette head rail is fabric wrapped.
- Designer Cassette head rail is also available in Oil Rubbed Bronze, Brushed Nickel and Onyx Black.
- Shangri-La Cordless Sheer Horizontal Shadings use quick-snap, no-light-gap brackets.

Cordless Shangri-La Shadings Bottom Rail
- Bottom rail includes a sliding weight to adjust fabric skewing if necessary.
  Bottom rail is always fabric wrapped.

Operating A Cordless Shangri-La Shading
Cordless Shangri-La Shadings utilize a roller catch mechanism in the head rail which allows for the vanes to be adjusted into various positions.

Pull the handle that is attached to the bottom rail until the shading reaches the desired length, allow catch mechanism to engage and lock shade in desired position.

To Open Or Close Vanes
Lower the shading all the way down and continue pulling down on the handle until the vanes open. The roller catch mechanism allows the vanes to be adjusted open, closed and to various positions in between.

When adjusting the vane position, release the catch by tugging on the handle, roll up the shading several inches (this resets the catch mechanism), then pull back down to the desired position.

- The Omni-View setting is not available with Shangri-La Cordless Shadings.

To Raise The Shading
Pull down on the handle to release the catch mechanism and let the shading rise. Tug the handle to lock the shade in the desired position.

When first learning to operate the shading, it may take a few tries to get the feel of the mechanism.

Color Lux® Shangri-La Sheer Horizontal Shadings
SHANGRI-LA DOORSTYLES HARDWARE SYSTEM

Shangri-La DoorStyles Shadings

Shangri-La DoorStyles Shadings cover French doors, transoms and sidelights for a look of sheer perfection without a bulky head rail. They attach to the window frame or door with unobtrusive hinges and tilt open and closed with easy to install hardware. An operating handle allows the fabric to be tilted open and closed (Figure A).

Hardware used on DoorStyle Shadings may not match standard shadings.

Fabric

All 3" light filtering and room darkening fabric collections are available as DoorStyle Window Shadings.

Rails and end caps on Shangri-La DoorStyles Shadings are coordinated to the fabric color.

Designer Metallic Hardware Upgrade: Not available with DoorStyles.

Figure A

Operating Pole

An operating pole is available for hard to reach windows and doors. Please specify when ordering.

6 Foot Expandable Pole

12 Foot Expandable Pole
DoorStyles Shading Specifications

Minimum Width:	6"	Maximum Width:	72"
Minimum Length:	12"	Maximum Length:	72"*

*Maximum length varies by width.

DoorStyles are **not** available with 2½" vane fabrics.

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the open or "view-through" position.

Length Considerations With Shangri-La DoorStyles

Comfortex will fabricate your Shangri-La DoorStyles to the length ordered when the vanes are in the open (or view through) position. When the vanes are tilted to the closed position, the shading will become 1¾" longer.

When closed on an inside mount or when used with hold down brackets, a slight puckering may occur.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Color Lux® Shangri-La Sheer Horizontal Shadings
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades
Sheer Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position. When the shading is fully lowered to the factory programmed lower limit, the bottom rail will be set in the level position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. Favorites position can be programmed on-site.

PowerTouch Rechargeable Surcharges
See page 125.

PowerTouch Appearance
- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

Wand
Pendant

PowerTouch Rechargeable Color Options
- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location
The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length
The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings
- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shadings Warranty
Please see page 154 for complete warranty information.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Color Lux® Shangri-La Sheer Horizontal Shadings
12V NON-RECHARGEABLE SIMPLICITY MOTORIZATION | DESIGNER CASSETTE HEAD RAIL _____

Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shadings. The Simplicity motor is concealed in the head rail.

See page 140 for information on Simplicity Rechargeable system version.

Simplicity Motors With Designer Cassette

No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. See page 22 for mounting information.

Simplicity Battery Wand

The battery wand can be clipped to the Designer Cassette head rail. Can not be mounted on shadings under 25" wide. The battery wand is wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight alkaline batteries, and is white in color. The battery wand must be placed so it does not interfere with the mounting brackets.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand.
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep. Extension wires are available if needed.

Important Simplicity Motorized Shading Operating and Installation Information

Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application

Simplicity Motor Hand Held Remotes

IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote

The *5 Channel (5C) remote* can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote

The *6 Channel (6C) timer remote* combines the functionality of a six channel hand-held control with the convenience of a programmable timer.
- The 6C timer remote allows for 18 different scheduled actions.
- Manual function disables the timer and the remote then operates as a hand held remote.

Simplicity (6C) remotes and holders are available in white. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

14 Channel White Remote also available

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.

Simplicity Battery Operated Motorized Shadings Warranty

Please see page 154 for complete Comfortex warranty information.

Finished Dimensions

Inside Mount

	• Fabric will measure ordered width less: 1" • Head rail* will measure ordered width less: ³⁄₁₆"

Side (End) Mount

	• Fabric will measure ordered width less: 1½" • Head rail* will measure ordered width less: ¹¹⁄₁₆"

Outside Mount

	• Fabric will measure ordered width less: ⅝" • Head rail* will measure ordered width plus: ³⁄₁₆"

Exact (End Cap to End Cap) Mount

	• Fabric will measure ordered width less: ¹³⁄₁₆" • Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the open position.

COLORLUX® SHANGRI-LA SHEER SHADINGS

140

Color Lux® Shangri-La Sheer Horizontal Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Simplicity Rechargeable Motors
The Rechargeable Simplicity Motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

PowerTouch Integrated Rechargeable Surcharges
See page 122 for shading standards and page 125 for surcharges and pricing example.

Simplicity Rechargeable Motors
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. No external battery wand is required. See page 140 for mounting information.

Rechargeable Simplicity Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Integrated Rechargeable Motor Battery Charger
An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Integrated Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor. Required with Integrated Shading order. Sold separately.

The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes

IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote
The *5 Channel (5C) remote* can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote
The *6 Channel (6C) timer remote* combines the functionality of a six channel hand-held control with the convenience of a programmable timer.
- The 6C timer remote allows for 18 different scheduled actions.
- Manual function disables the timer and the remote then operates as a hand held remote.

Simplicity (6C) remotes and holders are available in white. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

A *14 Channel (14C) remote* is also available. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. See page 32 for more information.

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE NEW INTEGRATED RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

Solar Panel Recharge Option
Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).
See page 142.

Color Lux® Shangri-La Sheer Horizontal Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Important Information about Integrated Rechargeable Simplicity Motor Shading Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Battery Operated Motorized Shadings Warranty

Please see page 154 for complete Comfortex warranty information.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand. The wand extends up to 31″ in length.

Simple to use! Place the magnetized wand tip on the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.

- Great for out of reach windows

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.

- Extension cable plugs into charging port of Simplicity Rechargeable shades.

EZ Charge Wall Mount Receiver Kit | CKIT078
One kit per Simplicity Motorized shade is needed.

EZ Charge Wand

- Wand is 9½″ and extends to 31″
  Magnetized tip makes connection quick and easy.

- Once wand is in place plug the 8.4v charger into the bottom of the extension wand for charging.

Battery Charger - SOLD SEPARATELY

You must specify charger when ordering a Simplicity Rechargeable Motorized Shade. The charger plugs into the wand base. The 8.4 Volt charger requires a standard power outlet to recharge the motor. The charger is black and comes with a 156″ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Cellular Shade Collection
12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Wall Mount 9 Channel
Power Transformer
(Only for Bottom Up Shades)

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Roller Shades, Sheer Shadings and Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

- **Product Description:**
  -12v10a 9ch
  -Input Voltage Range : AC90V-264V
  -Input Frequency Range : 50Hz-60Hz
  -Output Voltage Range : DC12V+/-5%
  -Output Current : 10 Ampere
  -Output Power : 120 Watt
  -Output Ripple&Noise : ≤42MV
  -Output Efficiency : ≥83%
  -Output Fuse Type : PTC
  -Output Fuse Rating : 2A
  -Environment Operating Amb.Temp : -30 ~45
    20%~90%RH
  -Environment Storage Temp : -40 ~85 10%~95%RH
  -Plugs into standard household outlet
  -Power cord is 56" in length

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions
- Width of controller: 2⅜"
- Length of controller: 2¹⁵⁄₁₆"
- Height of controller: 1⅛"

Simplicity Smart Controller	
	• Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Controlled Shades • Powered by NEO Smart Blinds App. • Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC anywhere in world.

The Simplicity Smart Controller will work with any Comfortex motorized shade with Simplicity Remote Controlled motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?
The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?
Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?
There are 2 main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added you can use your smartphone as a single remote for all of your shades. It will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?
The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?
You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?
Yes! You can download the NEO Smart Blinds app onto multiple devices, After installing the app on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?
Yes! Simply follow the directions in the NEO Smart Blinds app to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control for it (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds app will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?
The app is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the app and your Shades. See page 125.

Color Lux® Shangri-La Sheer Horizontal Shadings

GENERAL INFORMATION

Certified Fabrics | GREENGUARD® Fabrics

GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The Shangri-La fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems.

Flame Resistance

Shangri-La fabric may be processed with a topical treatment to resist flames and adhere to strict flammability codes. For more information, contact Customer Service at (800) 843-4151.

UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

Shangri-La fabrics have the following UV Protection ratings:

Light Filtering Fabrics	Open Vanes	87%
Room Darkening Fabric	Open Vanes	88%
All Fabrics	Closed Vanes	99%

Vane Closure

Shangri-La vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.
Vane closure is measured as the distance between the front and rear fabric sheers 6" up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅜" for shadings under 60" and ⅝" for shadings longer than 60". On room darkening fabrics, the distance is ⅜" regardless of shading length.

Vane Opening and Visibility

Vanes on the three styles of Shangri-La fabrics open to slightly different degrees. Consequently, there are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The variations among the products are shown in the below illustration when looking through the shading ¼ of the way up from the bottom.

3" Fabrics
Magnetic Hold-Down Brackets

Optional magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Please specify when ordering.
Extension Brackets

Extension or "L" brackets are available to project the back of the shading from the mounting surface. The extension brackets for Designer Cassette head rail projects it 3".

Spacer Blocks

Spacer blocks project the shading ⅜" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of the shading.

Leveling Shangri-La Sheer Shadings

Shangri-La Window Shadings are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure correct and balanced operation.
Child Safety

Please see page 150 for child safety information.

COLORLUX® SHANGRI-LA SHEER SHADINGS

Color Lux® Shangri-La Sheer Horizontal Shadings
GENERAL INFORMATION

Measuring Instructions for Sheer Shadings

Important Measuring Guidelines for Sheer Shadings. Comfortex accepts measurements down to 1/16" increments.

Precise width and length measurements are critical. Fabric width cannot be altered after the shading is fabricated.

Please use a metal tape measure for accuracy.

The head rail must be installed perfectly level to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.

Inside Mount
Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.
Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount
Measure the exact width and length of the area to be covered. On the width, allow at least 1½" of an overlap on each side. An overlap of 3" on each side is recommended. Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

Side Mount
**Side mount is not available with DoorStyles Shadings.**
Shangri-La may be side mounted using "L" brackets. For side mounts, follow the instructions for inside mounts. An additional ½" will be taken off the standard inside mount deduction to allow room for the "L" brackets.
The maximum shading width utilizing the side mount option is 48".

Skew Adjusting Bottom Rail

After installation, windows that are not square and level may cause the shadings to shift to one side as it rolls up, requiring adjustment of the bottom rail. If the brackets are not level it may be necessary to adjust the bottom rail weight.

- To access the bottom rail weight, release the weight clip on the bottom rail by using a flat blade screwdriver. Insert it into the weight clip in the bottom rail and turn clockwise.
- Move the weight in 1" increments toward the side where the fabric is gathering.
- Secure the weight clips in position by turning them counterclockwise after making the adjustment.
Cleaning and Care
Shangri-La Shadings are made from a sturdy, knitted polyester fabric which can be feather dusted or vacuumed at a low setting. Spots or stains can be lightly rubbed clean with a damp sponge and mild soap. To avoid discoloration of the material, we recommend against the use of chemical cleaners.

Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure to salt air through open windows and doors will accelerate fabric deterioration over time.

Important: Do not clean the fabric using electrostatic wipes such as Swiffer® or Pledge Grab-It®.

Ultrasonic Cleaning
Shangri-La Shadings can be ultrasonically cleaned. Adco OnSite Fabricare provides shading and blind cleaning services. For more information, visit www.onsitefabricare.com. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

For additional advice on care or cleaning, please contact the Comfortex Technical Service Department at 800-843-4151.

COLOR LUX® GENERAL INFORMATION

COLOR LUX®
Designer Cellular & Roller Shades

Color Lux® Shades
GENERAL INFORMATION

Cut-Outs, Scotchgard Protection, Certified Fabrics and Highlights Cornice Valances

Cut-Outs

Cut-outs are available with all cellular fabrics. Cut-outs are $55.00 per side and are subject to approval by the Comfortex Technical Service department.

There are no limits on cut out lengths. There are limits on cut out widths:
Cellular shade widths 18" or less 3" maximum width
Cellular shade widths greater than 18" 5" maximum width

Scotchgard™ Protection

Scotchgard™ Protector is available with Color Lux Cellular, Roller and Panel Track Shades.
Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned.

Certified Fabrics

GREENGUARD Indoor Air Quality Certified® Fabrics
The GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

Color Lux Linen Weave fabrics have received GREENGUARD Indoor Air Quality Certified® certification for low emitting interior building materials, furnishings, and finish systems.

Highlights Cornice Valances

Elevate your windows to a whole new level of design with the Highlights Cornice Valance. Coordinate with other design elements in your room and add a finishing touch to the top of any window treatment. The Highlights Cornice Valance is versatile and beautiful at a price point that won't leave you wondering how to cover the rest of your windows!

Choose from any color in the Color Lux Roller line and customize the valance with our 7 available return sizes to best fit your application.

Easy assembly and quick installation, with the Highlights Cornice Valance, more beautiful windows are within your reach.

Shade Stack Heights

Measurements are in inches. Shade stacking heights applicable when the shade is in the fully raised position.

> 5.1.3   Rev. 5/18   Print 5/18
>
> Window Blind Cord Can **STRANGLE** Your Child. To prevent strangulation, purchase cordless products or products with inaccessible cords.
>
> La cuerda de la persiana puede **ESTRANGULAR** a su niño. Para evitar el estrangulamiento, compre alternativas cuerda o productos con cuerdas inaccesibles.

Child Safety

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.
Cord Cleat

Cord Tensioner

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for safety of corded window coverings.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.
A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them.

To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the blind, simply wrap the excess cord around the cleat.

Cleaning and Care

While beautiful and pleasing to the eye, all Comfortex products are designed to be durable, easily cared for and easily cleaned. Our non-woven fabrics are inherently anti-static and repel dust, but occasional feather dusting or vacuuming may be necessary to keep the fabrics clean and bright. Comfortex Color Lux Cellular fabrics may be ultrasonically cleaned.

Our light filtering and room darkening fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. Spills and stains can be lightly blotted with a cloth or damp sponge. More difficult stains may require soaking in water with mild soap. For this, remove the shades from the window and soak in warm water. Complete immersion of hardware is not recommended.

DO NOT submerge the Cordless Ultra head rail in water. When damp, lay flat to dry or place back in window and raise tightly to recrisp pleats. Please test any stronger cleaners on an unobtrusive portion of the shade before using.

For additional advice on care or cleaning, please contact our Technical Services Department.

Scotchgard™ Treated Shades
The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.
- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not over wet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

COLORLUX® GENERAL INFORMATION

Measuring Instructions

Comfortex accepts measurements down to $\frac{1}{16}$" increments.

Inside Mount

Use a steel tape to measure the opening at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade $\frac{3}{8}$" narrower so it will not rub against the window casing. Measure the height of the window from the top (soffit) down to the sill.

Outside or Ceiling Mount

Use a steel tape to measure the exact height and width of the area to be covered. It is recommended that the shades overlap the window by at least 1½" on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least 1½". Shade fabric will measure width indicated on the order form.

Measuring for Specialty Shapes

Templates are required with some specialty shade orders. Consult the individual product sections of this guide for specifics regarding accurate measurements and mounting information.

Arches and Quarter Round Circles
*   Measure the window height and width appropriately for an inside or outside mount.
*   With perfect arches, the height will be one half the width. With perfect quarter rounds, height will equal width. If the arch or quarter round is perfect, **a template is not required.**
*   Windows with imperfect arch measurements do not maintain the height/width relationship. Templates **are required** for these windows.

Trapezoids
*   Measure the window height and width appropriately for an inside or outside mount. For outside mounts, remember to add the desired amount of overlap.
*   Either the top or bottom of the shade is sloped or angled.
*   Measure all four sides for accurate fabrication. Provide all measurements. **Templates are not required.**
*   The slope angle must be measured with a protractor. Slope is the angle between slope and a horizontal line. The maximum slope is 30 degrees.

Octagons
*   **Templates are required** and must be cut out of brown craft paper.
*   Measure the window height and width appropriately for an inside or outside mount. Be sure to measure the width at the shade's widest point.
*   Provide the width, length and the length of one side when ordering.

Making the Perfect Template

Tape brown craft paper over the window opening. Be sure to allow plenty of overlap and check to see that the paper is smooth and pulled taut. Do not use newspaper as the ink can rub off on fabric. Do not use paper that has been folded. Notice the outline of the framework superimposed on the template as the light filters through the window. You may create the template in one of two ways:
Trace the outline of the window with a pencil and continue along the side of the window frame. Once the window is completely traced, remove the craft paper from the window. Cut out the traced shape with a pair of scissors.

You may choose to skip tracing the window outline with a pencil and cut out the shape immediately with a razor knife.

Once your template is cut, double check its width and height with your initial measurements. Test the template by placing it in the window. Check for light gaps, uneven cutting of curves etc. Trim or remake if necessary.
With arch top shades, fold the template in half. Check the outline of the curve for smoothness, light gaps and curve continuity. Place the template in the window and check it for light gaps or uneven cutting of curve. Trim or remake it if necessary.

On the front of the template, mark the shade measurements along with your company name, account number, sidemark, shade style and color. Be sure to indicate inside or outside mount, the room side and which ends of the template are top and bottom. Do not take any deductions on inside mount shades. The factory will make all necessary allowances for inside mounts.

Remember: The quality of the finished shades depends heavily on the quality of the template supplied. Do not hesitate to remake a template if you feel uncomfortable of the quality of your first attempt.

Template Kits: Comfortex offers template kits which includes brown craft paper, razor knife, instructions and order form. Please contact Customer Service or visit www.comfortex.com to order. Stock number: 751000

COLORLUX® GENERAL INFORMATION

Color Lux® Shades
GENERAL INFORMATION

Conditions of Sale

All Comfortex products are custom fabricated to your exact specifications. We cannot accept responsibility for errors in ordering or cancellations and charges after the order is in production.

Policies

Our policies are designed to provide a guide for doing business with Comfortex. Our first priority and number one policy is to provide the highest level of service and total satisfaction.

Freight Policy
Fabricated Shades/Blinds

Comfortex will ship all orders for fabricated shades or blinds freight free via UPS, FedEx Ground or other similar method within the Continental US.

Transportation Surcharge: A $6.00 per unit transportation surcharge will be added to all fabricated product orders shipping within the Continental US; including shades/blinds, vane packs, individual vanes, tracks, valance and cut yardage orders. Exception: Vertical Sheer Shadings, Ovation Cellular Slider and Envision Panel Track system will incur a $15 per unit transportation surcharge up to 96".

Oversized: In addition to the transportation surcharge, a $45 per unit Common Carrier surcharge will be added to all fabricated products shipping within the Continental US, including shades/blinds, Vertical Sheer Shadings, Ovation Cellular Slider, Envision Panel Track system, valances, vane packs, individual vanes, tracks, and cut yardage orders with widths of over 96 inches.

Hawaii: Shipments to Hawaii will incur a freight charge of $26.00 per unit when shipped from within the Continental US.
In Addition, a $132.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Hawaii.

Alaska: Shipments to Alaska will incur a $26.00 per unit transportation surcharge when shipped from within the Continental US.
In addition, a $132.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Alaska from within the Continental US.

Canada: Shipments to Canadian Dealers will incur a $7.75 per unit transportation surcharge when shipped from within the Continental US. In addition, a $75.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Canada from within the Continental US.

Other Countries: All US Dealers requesting to ship orders outside the USA, must provide a Freight Forwarder for Comfortex to ship to within the Continental US. Comfortex cannot ship directly to your customers located outside USA.

Components and Fabric
Comfortex will prepay all freight charges on shipments of component and fabric orders over $3,500 in value within the Continental US. Fabric and component orders less than $3,500 will be subject to freight charges.

Shutter Components and Tools
Comfortex will prepay all freight charges on shipments of stock component and tool orders exceeding $20,000 in value, within the Continental US only. All orders less than $20,000 will be subject to all freight charges. Customers can elect a carrier of choice and receive a freight bill directly from the carrier or Comfortex will select a carrier and invoice the customer for the freight charges. Comfortex makes every effort to provide the most economical carrier and shipping method possible.

Charged Marketing Materials
All charged marketing materials will incur freight charges. Marketing materials may ship on separate days, from different locations. Freight charges are calculated per package, not per order.

Specifications

All Comfortex products are designed and tested to perform as intended within established, published parameters. Requests for "custom fabrication" of products outside of our published specifications may be considered, but are at the discretion of the Comfortex Technical Services department. Restrictions and additional charges apply.

COLORLUX® GENERAL INFORMATION

Color Lux® Shades

Scotchgard™ Warranty

Comfortex Window Fashions provides a limited warranty for fabrics treated with Scotchgard™ Protector against permanent stains for a period of 1 year from the date of original purchase.

This warranty excludes conditions or damages resulting from accidents, alterations, exposure to the elements, and exposure to any and all natural and manufactured excessive heat sources, or failure to follow the Installation and Care instructions. This warranty also excludes fabric submerged in water or cleaning solutions, or treated with household products that may alter or deplete the effectiveness of the treated fabric. In addition, the following types of stains are excluded from this limited warranty: pet stains, bodily fluids, stains caused by wine, bleach, plant fertilizers, acne medication, misuse or abuse. This warranty is not a cleaning contract and does not cover the cleaning of fabrics that are soiled or discolored through daily use. This warranty coverage is limited to residential use and is not transferable.

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.
- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not over wet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Should the results of the cleaning and care instructions not result in the removal of permanent stains covered by this limited warranty, Comfortex will retreat or replace the fabric, at it's discretion, for a period of 1 year from the date of original purchase. Customer must provide proof of purchase and provide proof the stain occurred during the warranty period. Shipping and handling costs to send the window treatment back to Comfortex are the responsibility of the customer.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Sheer Horizontal Shadings Warranty Information

Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

Warranty Information Regarding the Braided Cord on Shangri-La Sheer Shadings with Designer Cassette Hardware:

Designer Cassette Shadings built with a braided cord do not have a reverse roll stop. If a Shangri-La Shading with the Designer Cassette Head Rail is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Color Lux Cellular, Roller, Panel Track Shades and Sheer Horizontal Shadings Warranty Information

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The Limited Lifetime Warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The Warranty does not include any conditions or damages resulting from accidents, alterations, misuse, abuse, misapplication, improper handling, installation, repairs, operation, cleaning, exposure to any and all natural and manufactured excessive heat sources. (Excessive heat sources include, but not limited to; magnification of sun light through cubes of glass, heaters of any kind, ovens, candles, lighting fixtures, etc.)   This warranty does not cover variation in fabric color, grain, or texture in natural wood products nor excessive warping of wood slats in high humidity areas. Loss of pleating is not covered if the product is not being cycled (held in the raised position a portion of the time). Normal wear and tear is not covered.

All moving parts, such as cords and strings (internal and external), will eventually wear out and fabric may fray. Comfortex considers these things as normal wear and tear and will carry a three year Limited Warranty. All fabric, including fabric vanes, panels, inserts, and shades carry a five year Warranty. Fabric cell separation is covered for a lifetime. See Comfortex Standard Return and Repair Policy for more details.

This Limited Warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this Limited Warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this Limited Warranty.

To obtain service, contact the Dealer from whom you purchased the product.

This Warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages are not allowable. Comfortex Dealers and Fabricators must use safety devices supplied by Comfortex in accordance with Window Covering Safety Counsel guidelines.

This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This Limited Warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this Warranty.

This Limited Warranty supersedes any previous versions.

Motorized Color Lux Shadings/Shades Warranty

Standard Simplicity and Simplicity Rechargeable Motors

We offer a 5 year warranty on all motors and controls. Specifically, we warrant the Simplicity motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Simplicity product fails within this 5 year period, we will repair or replace it free of charge through your end product supplier.

Color Lux Color Warranty

Comfortex utilizes state of the art technology to provide you Color Lux Shades within 2 Delta-E (DE) of the sample fabrics found in the Color Lux Sample Book. When viewed under different lighting sources such as fluorescent, incandescent, halogen, ultraviolet and others, fabrics may appear different to the eye. Comfortex utilizes the worldwide lighting standards of Daylight 65 (D65) as our official standard for measuring and qualifying color accuracy, because D65 daylight bulbs best represent actual "daylight" illumination. Slight color variations (under 2 DE) are within established industry standard and should be expected.

This warranty is in addition to Comfortex limited lifetime warranty.
