ENVISION ROLLER SHADES

- Envision Roller Shades combine the elegance of the Envision Designer Collection with the proven performance of multiple hardware systems.
- Envision Roller Shades provide the best top down color coordination of operating hardware in the industry. Coordinate clutches, bead chains and tensioners, bracket covers, and cassettes with FIVE top selling hardware colors: White, Black, Ivory, Satin Nickel and Oil Rubbed Bronze.
- The Designer Cassette option is available fabric wrapped for non-screen shades.
- Battery operated, low voltage, and rechargeable remote controlled motorized Envision Roller Shades are available.
- Select from an extensive collection of fabrics, including light filtering and blackout styles, as well as contemporary solar sunscreens which help reduce glare and reduce energy consumption.
- Fabric wrapped bottom rail is standard on Comfortex Envision Roller shades for a soft, fabric look from top to bottom.
- Simplicity Motorization is available for ALL Envision Roller shades using either standard or heavy duty motors.
- Envision fabrics can be ordered by the square foot or by the full linear yard.
- All Envision Shades are covered by Comfortex's limited lifetime warranty.

Envision Roller Shades

FABRIC & PRODUCT CHARACTERISTICS

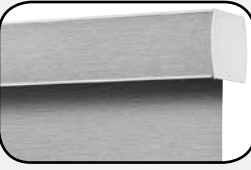

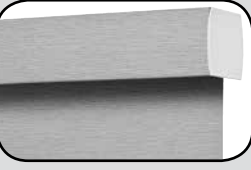

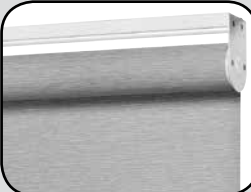

Please be aware of the following characteristics that naturally occur in roller shades.

- Slight color variation may occur from lot to lot. This slight color shift occurs naturally with any fabric production process and is within industry accepted tolerances.
- Loose fibers may appear from time to time on the edges of your fabric. This is common. Simply trim loose fibers with sharp scissors.
- Material edges may curl inward slightly (hourglass). This can be particularly noticeable on long, narrow shades.
- Shade material telescoping may occur if your shade is not mounted perfectly level. Every shade is adjusted to roll up and down straight before leaving the factory. Check to be sure your installation is level if you experience telescoping.
- Motorized roller shades may operate at different speeds, even when being controlled by a single remote.
- Cordless with Deco-Bar Shades and Cordless with Designer Cassette hardware provide less precise control and side by side shades may not always stop at the same exact location.
- Cordless roller shades should be operated from the center of the bottom rail. Operating from one side or another may introduce telescoping into your shade.
- If a fabric has the ability to be "railroaded," it means that it can be turned 90 degrees and made into a shade to accommodate windows which exceed the original maximum width. In some cases, railroading may slightly change appearance of color and pattern of fabric.
- Maximum size for Envision Roller Shades depends on hardware system. See pricing grids for details.
- RoHS Lead-Free classification is applicable to Phifer SheerWeave® and Mermet Fabrics.
- Fire classification NFPA 701 for non-solar screen flame retardant fabrics are as follows: Classics, Classic Duplex, Mirage and Shantung.
- The bacterial and fungal properties for individual fabrics can be found as part of the solar screen properties section on pages 78 - 83.
- Lanai and Cabana fabrics are made from natural materials, such as paper, jute and cotton. Small irregularities as well as possible slight fraying at the edges may occur and are considered "natural characteristics". Natural materials may crack, split, twist, bow and flare. Natural materials may experience color changes over time due to aging, direct sunlight and other climatic conditions. Climatic conditions may cause the shade length to stretch or shrink.

Please Note: "Normal Characteristics" are not considered defects in the product or workmanship.

Envision Roller Shades

CUT FABRIC LIST PRICE (DEALER DISCOUNTS APPY)

Envision fabrics are available in square feet or linear yards to allow homeowners to create interior accents to match their Envision Shades. Some materials are only available as square feet. Please see below

Custom Cut: Fabric must be ordered by length and width. Fabric will be cut to the exact size ordered. No deductions are taken. The Designer Cassette Insert Strip is available by request as a no charge option.

- There is a \$9.95 cutting fee for custom cut fabrics.

Envision Roller Shades

SOLAR OPTICAL PROPERTIES

Solar Optical Properties: Refers to the solar transmittance, solar reflectance and solar absorbency of the solar screen fabrics. This is not in relationship to the application of the fabric materials.

(TV) Visual Transmittance: Measures glare. The number is a ratio of the amount of the total visible solar energy that passes through the glass and solar screen fabrics combined. Light colors have high TV factor. Dark colors have lower TV factor.

(TS) Solar Transmittance: The percentage of the amount of solar energy allowed to pass through the solar screen fabrics to the total amount. TS measures the percentage of solar energy passing through the fabric.

(RS) Solar Reflectance: The percentage of the amount of solar energy that is reflected or bounced off the solar screen fabrics to the total amount of solar energy falling on the shade. RS measures the percentage of solar energy reflected by the fabric.

(AS) Solar Absorptance: The percentage of the amount of solar energy that is absorbed by the solar screen fabrics, to the amount of total solar energy falling on the shade. AS measures the percentage of solar energy that the solar screen fabrics absorb.

TV = Visual Transmittance
TS = Solar Transmittance
RS = Solar Reflectance
AS = Solar Absorptance

Solar screen fabrics reflect a percentage of the solar energy and absorb a percentage of the total solar energy. The energy that gets through the fabric and glass combined is the TS (Solar Transmittance). These three properties will always total 100%.

Light colors reflect more heat and have lower shading coefficients when used on the interior. Darker colors reduce glare and brightness while allowing for a better view. These factors and interior design considerations must be considered in fabric density and color selection.

(SC) Shading Coefficient: The percentage of solar heat gain through a combination of glass and solar screen fabric. When used on the interior, light colors have lower shading coefficients and dark colors have higher shading coefficients. A lower shading coefficient means lower heat gain (better thermal performance). **Also known as Solar Heat Gain Coefficient (SHGC).**

(OF) Openness Factor: The amount of open space in the material versus the amount closed or the density of weave (percentage of total surface area of fabric that is open). Selecting the proper density is affected by the sun exposure (east, west, north, south), whether the view is obstructed (by

trees or other buildings), the type of glass, the sensitivity of the end user or the activity performed in the area.

UV Reduction: Ultraviolet reduction is directly related to openness factor (example: a 5% open fabric blocks 95% of the UV). UV rays are the damaging rays of the sun that fade carpet, home furnishings and furniture.

Reflecting Heat: Solar screen fabrics efficiently reflect the sun's energy, minimizing the amount of heat transferred into the room you're trying to cool. This reduces the air conditioning load that has to be removed from the home.

Visibility: The amount of visibility depends on the percentage of reduction you are seeking. The higher the percentage reduction, the less visibility is retained.

TS = Solar Transmittance	1/8 CL = 1/8" Clear Glass
RS = Solar Reflection	1/4 CL = 1/4" Clear Glass
AS = Solar Absorptance	1/4 HA = 1/4" Heat Absorbing Glass
TV = Visual Transmittance	1/2 CL = 1/2" Insulating Clear Glass
OF = Openness Factor	1 CL = 1" Insulating Clear Glass
	1 HA = 1" Insulating Heat Absorbing Glass
	CL - S = Clear Glass, Single Glazing
	DG = Double Glazing

The Solar Transmittance (TM), Solar Reflectance (RS), Solar Absorption (AS), Visual Transmittance (TV), and Openness Factor (OF) were determined for the fabric alone.

The Shading Coefficients (SC) were determined for the fabric used with a single light of 1/8" double strength glass, a 1/4" clear plate and a 1/4" heat (HA) plate.

The Shading Coefficients are for the fabric hung internally unless otherwise indicated. The data and calculated results are presented in the above tables. The TS, RS, AS, TUV, TV and OF are expressed as percentages. All data has been provided by the manufacturers.

* Fire Rating and other properties apply to Ultra White (Color Lux Color 100) only

To be certified with OEKO-TEX® Standard 100, companies have to meet defined criteria regarding their environmentally friendly and socially acceptable production process at all production stages (International Association for Research and Testing in the Field of Textile Ecology)

See page 78 for definitions.

The Solar Transmittance (TM), Solar Reflectance (RS), Solar Absorption (AS), Visual Transmittance (TV), and Openness Factor (OF) were determined for the fabric alone. The Shading Coefficients (SC) were determined for the fabric used with a single light of 1/8" double strength glass, a 1/4" clear plate and a 1/4" heat (HA) plate. The Shading Coefficients are for the fabric hung internally unless otherwise indicated. The data and calculated results are presented in the above tables. The TS, RS, AS, TV, TV and OF are expressed as percentages. All data has been provided by the manufactures.

Envision Roller Shades GENERAL INFORMATION

Certified Fabrics

GREENGUARD® Fabrics

GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The following fabrics have passed the GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems:

- Phifer SheerWeave® 2360, 2390, 2410, 2500, 3000, 4901, 5000, 7000, 7450 and 7400
- Phifer Suntex® 90
- Mermet M Screen 3%, 5%, Deco, E-Screen 5% and 10% and S Screen 4%
- Polynesian Sands
- South Pacific Stripe
- SilverScreen™ 4%

The following fabrics have passed the GREENGUARD Children & SchoolsSM product certification program for low emitting interior building materials, furnishings, and finish systems used in educational (day care and K-12) environments:

- Phifer SheerWeave® 2360, 2390, 2410, 2500, 3000, 4901, 5000, 7000.
- Mermet M Screen 3%
- Mermet M Screen 5%

Oeko-TexSM Fabrics

The Oeko-TexSM Standard 100 is a globally uniform testing and certification system for textile raw materials, intermediate and end products at all stages of production. It evaluates and screens for any harmful substances present within processed textiles intended to come into contact with consumers.

The following fabrics have earned the Oeko-TexSM Standard 100 certification:

- Andora Light Filtering
- Andora Blackout
- Classic Linen Light Filtering
- Classic Linen Blackout
- Papyrus Linen
- Polynesian Sands
- Sahara
- Salinas
- SilverScreen™ 4%
- South Pacific Stripe
- Heritage Light Filtering
- Heritage Blackout

Bacterial and Fungal Resistant Fabrics

The following fabrics feature properties which inhibit the growth of bacteria, mold and mildew that can cause stains, odors and degrade the fabric.

- ASTM E 2180
Phifer SheerWeave® 2360, 2390, 2410, 2500, 4901 and 5000
Phifer Suntex® 90
Mermet E-Screen with KOOLBLACK™ 3% and 5%
Solar Flair 5%
- ASTM G21
Mermet E-Screen 5% and 10%, Mermet E-Screen with KOOLBLACK™ 3% and 5%
Phifer SheerWeave® 3000, 4901 5000
Mermet S Screen 4%
- ASTM G22
Phifer SheerWeave® 3000, 4901, 5000
- ASTM G21-96 and AATCC 174-1998 Part II and III
Phifer SheerWeave® 7000, 7450 and 7400
- ASTM E2149 01
SilverScreen™ 4% and EnviroScreen 4%
- Microban Antimicrobial
Phifer SheerWeave® 2360, 2390, 2410, 2500, 4901 3000, and 5000

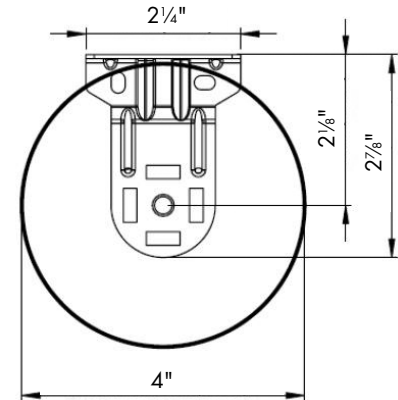

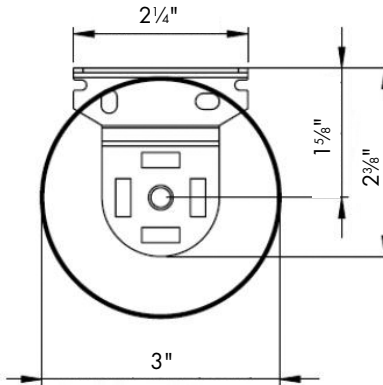

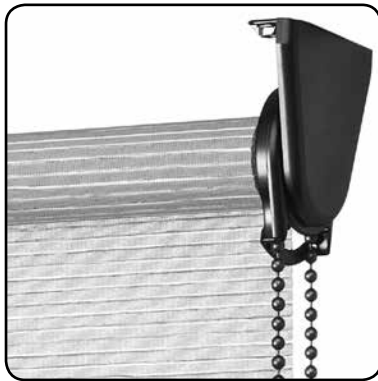

RoHS Certified Fabrics

The RoHS Directive 2002/95/EC (the Restriction of Hazardous Substances) establishes that all solar screen fabric with their strict standards is guaranteed lead-free. The following fabrics have passed this requirement:

- Mermet E Screen 5% and 10%
- Mermet E Screen with KOOLBLACK Technology 3% and 5%
- Mermet M Screen 3%, 5% and Deco 5%
- Mermet S Screen 4%
- SilverScreen™ 4%
- Solar Flair 5%
- Phifer SheerWeave® 2360, 2390, 2410, 2500, 3000, 4901, 5000, 7000, 7450 and 7400
- Phifer Suntex® 90

Envision Roller Shades

SKYLINE CORDLOOP HARDWARE

Skyline Hardware in White, Black and Ivory is standard on all Envision Roller Shades. When ordering shades with Skyline Hardware, all of the components are color coordinated, from the clutch for cord loop shades all the way down to the tensioner. Satin Nickel and Bronze are available for a surcharge.

Envision Roller Shade Cord Loop Information

Envision Roller Shades are available with a choice of colored bead chain colors.

- Select white, black, ivory, bronze or steel bead chain with the Standard Roller, Fascia, and Designer Cassette head rail options.
- The bead chain will measure the length indicated below unless otherwise specified.

SHADE HEIGHT	LOOP DROP
12" to 15 ⁷ / ₈ "	² / ₃ of shade height
16" to 29 ⁷ / ₈ "	³ / ₄ of shade height
30" - 35 ⁷ / ₈ "	24" Loop
36" - 41 ⁷ / ₈ "	30" Loop
42" - 47 ⁷ / ₈ "	36" Loop
48" - 53 ⁷ / ₈ "	42" Loop
54" - 59 ⁷ / ₈ "	48" Loop
60" - 65 ⁷ / ₈ "	54" Loop
66" - 71 ⁷ / ₈ "	60" Loop
72" - 77 ⁷ / ₈ "	66" Loop
78" - 89 ⁷ / ₈ "	72" Loop
90" - 101 ⁷ / ₈ "	84" Loop
102" - 113 ⁷ / ₈ "	96" Loop
114" - above	³ / ₄ of shade height

- Bead chain can be ordered in custom lengths. Maximum bead chain length is 15 feet.

Tensioners for All Cord Loop Shades

All Cord Loop Roller Shades feature a new tensioner design for easy mounting and smooth operation. Available in five finishes that matches the clutch control on Skyline Cord Loop roller shades, now every part of a roller shade will coordinate from top to bottom.

White Tensioner

Black Tensioner

Satin Nickel Tensioner

Ivory Tensioner

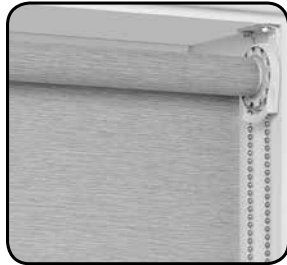

Bronze Tensioner

Envision Roller Shades Cord Loop Operation for Envision Roller Shades

Reverse Roll on Envision Roller Shades

A reverse roll option is available at no extra charge with all Envision Roller Shade fabrics on the Skyline and R-Series no head rail roller shades, and Cordless Roller with Deco-Bar Hardware.

The reverse roll allows the fabric to roll off the front of the roller instead of the back (the traditional style). The reverse roll conceals the roller for a contemporary, tailored appearance.

Standard Roll

Reverse Roll

Bottom Rail Options

Envision Roller Shades can be built with your choice of 2 bottom rail options:

- Fabric Wrapped Bottom Rail (standard)
- Exposed Bottom Rail

Choose your bottom rail color when ordering.

Fabric Wrapped Bottom Rail

The shade fabric is wrapped around an elliptical grooved rail. Two color coordinated end caps secure the fabric in place. The result is an attractive look which enhances the overall appearance of the shade.

Select from bronze, white, vanilla, black or brushed aluminum for a street side color.

Choose your bottom rail color when ordering.

Fabric Wrapped Bottom Rail

Exposed Bottom Rail

Select from bronze, white, vanilla, black or brushed aluminum bottom rail to add a decorative accent to the bottom of your shade. Two color coordinated end caps secure the fabric in place.

Choose your bottom rail color when ordering. See sample book for all bottom rail color options.

Bronze Exposed Bottom Rail

Spring Assist for Skyline Roller Shades

Spring assist is a great option for larger shades that reduces the pull force of clutch operated shades by up to 40%.

Spring Assist is available for standard roller shades, 4" Skyline Fascia and Designer Cassette.

Spring Assist is not available for motors or cordless shades.

Spring Assist is only available with a White or Black Skyline Clutch. Other Skyline Designer colors are not available.

Spring assist is recommended for shades 84" x 84" or larger. Minimum shade width is 60".

See page 84 for deduction information.

Add \$197 List to standard rectangular shade.

Envision Skyline Roller Shades

TWO-ON-ONE & SIDE BY SIDE HARDWARE SYSTEM

Two-on-One No Head Rail Shades

A Two-on-One No Head Rail mounting option is available for shades using the Skyline system. An intermediate bracket is available that reduces the light gap when two shades are placed side-by-side.

Cord Loop shades will always have the clutch on the outside of both shades to ensure proper tensioner mounting.

Standard Brackets and Intermediate Brackets are available in four colors: White, Black, Ivory and Bronze.

Bracket covers for the two outer shades are the same colors available for a Skyline Standard Roller Shade: White Black, Ivory, Bronze and Satin Nickel.

Two-on-One No Head Rail Shades are available with Cord Loop, Simplicity Rechargeable Remote Motorization and PowerTouch Rechargeable shades. PowerTouch Rechargeable wands will always hang to the outside of each Two-on-One No Head Rail shade. See page 101 for Two-on-One Shades mounted with a Designer Cassette

Side by Side Mounting Option with Skyline

A Side by Side Mounting option is available with the Skyline Bracket system. Large expanses of windows with no trim between can now have roller shades that share brackets for an improved light gap.

Side by side shade are available with Simplicity Motorization and Simplicity Rechargeable Motorization, as well as PowerTouch Rechargeable. For configuration with three or more shades, the motor will always be placed on the right hand side. The Side by Side Mounting option for three or more shades is not available for Cord Loop operation.

Brackets come in the same four colors as a Skyline Standard roller shade: White, Black, Ivory and Bronze.

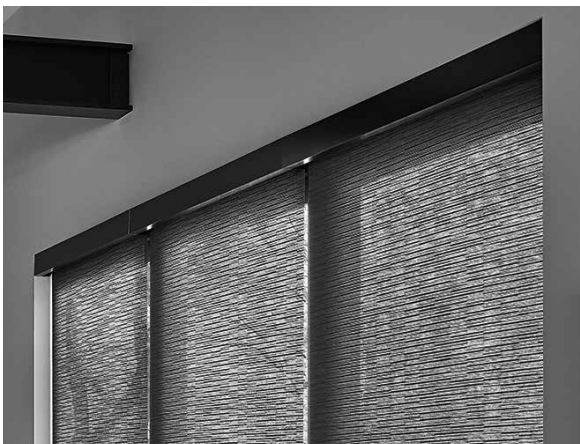

Bracket covers for the two outer shades are the same colors available for a Skyline Standard roller shade: White Black, Ivory, Bronze and Satin Nickel.

Pricing Example:

For Satin Nickel Two-on-One No Head Rail Shades with PowerTouch Rechargeable:

36 x 60 Phifer 7450 = \$356 (x2)	= \$712
Add Satin Nickel Skyline Surcharge = \$42 (x2)	= \$84
Add PowerTouch Rechargeable = \$179 (x2)	= \$358
TOTAL LIST PRICE BEFORE DEALER DISCOUNT	= \$1,154

No Head Rail Shades Beneath a Single Seamless 4" Skyline Fascia

Side by Side Shades with Simplicity Motorization can be ordered beneath a single, seamless 4" Skyline Fascia. Two-on-one No Head Rail Shades with cordloop or motorization is also available beneath a single 4" Skyline Fascia. Maximum width of a single fascia is 192". See above for available hardware options.

Pricing Example:

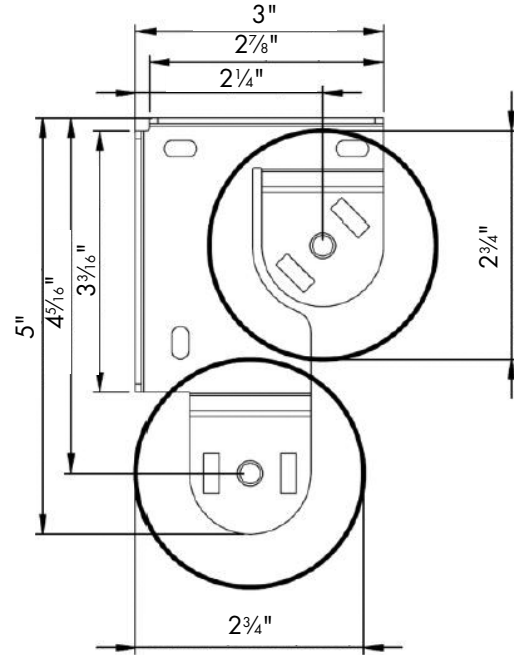

For Satin Nickel Two-on-One No Head Rail Shades with PowerTouch Rechargeable and 4" Skyline Fascia:

36 x 60 Phifer 7450 = \$356 (x2)	\$712
Add Satin Nickel Skyline Surcharge = \$42 (x2)	\$84
Add PowerTouch Rechargeable = \$179 (x2)	\$358
Add 72" Skyline Fascia =	\$192
TOTAL LIST PRICE BEFORE DEALER DISCOUNT	\$1,346

Envision Skyline Roller Shades

DUAL ROLLER WITH SKYLINE CORD LOOP & SIMPLICITY MOTORIZATION

Dual Roller Shades are available with Skyline Cord Loop and Simplicity Rechargeable Motorization. They are the perfect way to combine both light filtering and blackout fabrics into a single shade for the ultimate light control. Any fabric or screen in the Envision Fabric collection can be mixed and matched to create a truly versatile window for any time of day.

The front roll of fabric is always a reverse roll. The back roll of fabric is always a standard roll. Clutches are always on opposite sides of the shade to ensure a location for tensioner mounting.

Dual Roller Shades are not available with cordless operation or PowerTouch Rechargeable motorization. Brackets and bracket covers are available in black and white.

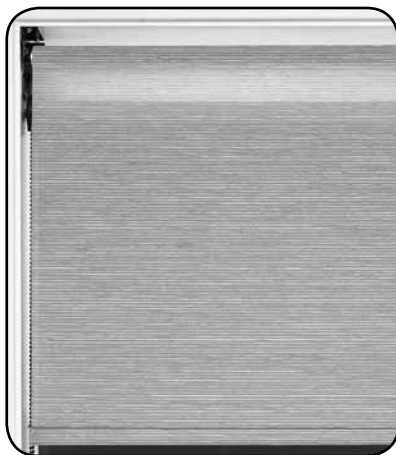

Candeling will occur between the upper and lower fabric rolls if a Blackout fabric is selected as the back roll. This allows light to come through. Blackout fabric can be selected for the front roll to prevent this.

Rechargeable Simplicity Motorization is available with Dual Roller Shades to ensure easy installation without the need to mount two battery wands.

If an exposed headrail is not desired, a 6" or 8" Highlights valance is a great option to conceal the rolls and control light. A 4" **return** for outside mounted Highlights Valances will ensure concealment of dual roller brackets. See page 112 for details. Additional Heights are available.

Highlights Valance

	Width In Inches																									
	24	30	36	42	48	54	60	66	72	78	84	94	96	102	108	114	120	132	144	156	168	180	192	204	216

Envision Roller Shades CORDLESS HARDWARE SYSTEM

Cordless Roller Shades with Designer Cassette

Create a sleek look with the Designer Cassette Head Rail. Available in White, Ivory, Black, Satin Nickel and Bronze. See individual fabric specifications for minimum and maximum shade sizes. Cordless Roller Shades with Designer Cassette are available with the Smooth Face, Fabric Insert or Fabric Wrapped options.

Designer Cassette with Smooth Face in White

Cordless Roller with DecoBar

This cord-free system operates like a spring roller shade with a gentle tug on the bottom rail to raise and lower the shade. Reverse roll is available for the Deco-Bar Cordless option

White Cordless Roller with Deco-Bar

Cordless Tassels and Pulls

Add a decorative tassel or pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Cordless Shades. Tassels and pulls are placed in the middle of the bottom rail. They feature an approximately 3-inch long cord which coordinates with the tassel color.

Tassels and pulls are attached to the back of the bottom rail with a clear clip. This allows for in the field modifications if needed.

See the Envision Designer Collection Sample Book for color selections.

ALL Envision Roller Shade hardware is available with any Tassel or Pull.

Wood Ball Pulls

Add a decorative Wood Ball Pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Envision Roller Shades. Select from 4 colors: Waxed, Natural, Whitewash and Cocoa.

Add: \$26 Per Shade

Cordless Roller Deco-Bar Bracket Covers

The Cordless Roller Decobar now offers deco bar covers in White, Ivory, Black, Satin Nickel and Bronze that coordinates with the deco-bar color selected. Available for Inside Mount or Outside Mount applications. Brackets are White and Black only.

Bracket cover provides a clean finished appearance

Clear Handle for Cordless Roller Shades

A clear handle comes with all cordless roller shade orders with the option to attach the grip during installation. This easy to attach and easy to remove clear grip is a great way to keep the rail or the fabric (for fabric wrapped option) clean after regular shade use. The width of the grip is 2 1/8".

Optional Clear Handle

Beehive Pulls

Add a durable and fashionable Beehive Pull to your shades for easy lifting and lowering. These are a great combination with solar shades and are available in White and Onyx.

The Beehive pull is 2 5/8" long.

Add: \$63 Per Shade

Jute Ball

Add a simple and natural accent to any cordless roller shade with the Jute Ball Pull. Available in a single Jute color.

Add: \$26 Per Shade

Droplet Pull

Wound with soft yarn in a elegant shape that fits comfortably into the palm of your hand. Available in Navy, Grey, Ivory and Clay. See the 2019 Envision Designer Collection Sample book for full color offering.

The Pear pull is 2 1/8" long.

Add: \$63 Per Shade

Wood Tassels

Select from 5 colors: Milky White, Ebony, Walnut, Light Pine or Mahogany.

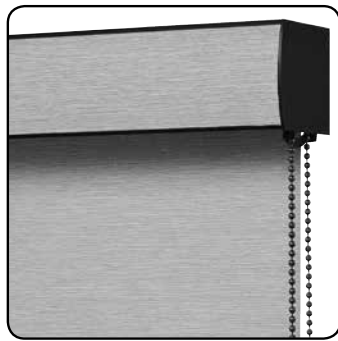

A wood tassel is 1 5/16" long.

Add \$26 Per Shade

Envision Roller Shades

RETRACTABLE CORD HARDWARE SYSTEM | DESIGNER CASSETTE

The Retractable Cord system for Envision Roller Shades is a perfect option for hard to reach shades when a continuous loop is not desired. The retractable cord system features smooth and easy to use operation. The Designer Cassette option is required for all Retractable cord shades.

Hardware Colors

Clutch: is available in White or Black. Can be coordinated with any Designer Cassette option.

Cords and Tassels: Pre-Coordinated with fabric

Operation

The clutch can be ordered to the right or left of the shade so the pull cord is easy to reach.

To raise, simply pull the cord straight down until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially raises the shade. The shade can be stopped at any point while raising.

To lower, simply pull the cord out towards you until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially lowers the shade. The shade can be stopped at any point while lowering.

Light Gap

Please note that there is a 3/4" light gap on the operation side of all roller shades.

Minimum ordered width for Retractable Cord shades is 12". See fabric specification pages for maximum sizes.

Cord Length

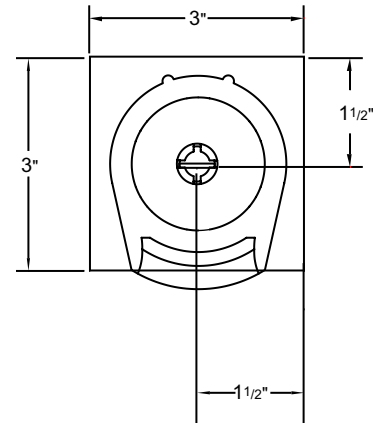

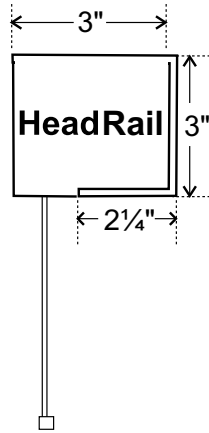

All retractable cord shades have a default cord length that is 40% of the total shade length. Custom options are available when ordering.

3/4" light gap on operation side. Clutches are available in white and black with tassels and cords coordinated to the fabric

Envision Skyline Roller Shades

4" SKYLINE FASCIA WITH CORD LOOP & SIMPLICITY MOTORIZATION

The 4" Skyline Fascia is available in five colors. Each color coordinates with a skyline clutch of the same color.

4" Skyline Fascia - White

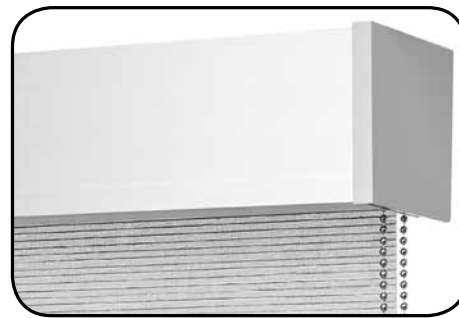

4" Skyline Fascia - Ivory

4" Skyline Fascia - Black

4" Skyline Fascia - Bronze

4" Skyline Fascia - Satin Nickel

General Information

The 4" Skyline Fascia is a roller only shade with a 4" Skyline Fascia upgrade. The fascia clips over the standard roller shade during installation.

Inside Mount - Bracket covers are not available for inside mount shades due to the snap on installation method of the covers.

Outside Mount - Bracket covers are standard with all outside mount shades.

Simplicity Rechargeable Motorization

NEW Low Voltage Hardwired Motorization

Envision Roller Shades

TWO-ON-ONE HEAD RAIL SYSTEM | DESIGNER CASSETTE

Two-on-One Designer Cassette Head Rail roller shades are two roller shades sharing the same head rail; each roller operates independently.

Operating Options

- Two-on-One Designer Cassette Head Rail can be combined with Skyline or R-Series cord loop, PowerTouch Rechargeable, and Simplicity Motorization options.
- Controls will always be placed to the far left and far right. (Controls are NOT available between two shades)

Head Rail Options

- Two-on-One is also available without a cassette. See page 84 for details.
- Two-on-One Designer Cassette Head Rail roller shades are ONLY available on 1½" tube.
- Available with Designer Cassette with Insert Strip and Smooth Face options.
- Fabric wrapping is NOT available on two-on-one Designer Cassette Head Rail shades.
- Designer Cassette with Insert Strip ordered wider than the fabric width will have two pieces of fabric butted together and aligned. Insert strip width will match each shade width.
- Minimum single section is 12".
- Maximum single section is 120" depending on fabric.
- Total maximum width in Designer Cassette head rail is 140". Maximum shade sizes will vary by fabric
- Center gap between roller shades is ⅜".

Fabric Options

- Two-on-One Designer Cassette Head Rail roller shades are available in all fabrics.
- The increased size of the roller tube requires that the following fabrics have a reduced drop:
 - Mermet S Screen 4% - 102" maximum drop
 - Lanai - 96" maximum drop
 - Cabana - 120" maximum drop
 - Phifer SheerWeave 2500 & 4901 - 138" maximum drop
 - Phifer SheerWeave 5000 (All Openness factors) – 84" maximum drop
 - Phifer Suntex 90 - 96" maximum drop
 - Polynesian Sands – 138" maximum drop
 - South Pacific Strip – 108" maximum drop
- See price grids for standard size limitations.

Two on One Pricing Example:

36" x 60" Classic Linen Light Filtering:	\$356 x 2	= \$712
White Designer Cassette Insert Strip	\$107 x 2	= \$214
PowerTouch Rechargeable:	\$179 x 2	= \$358

TOTAL LIST PRICE BEFORE DEALER DISCOUNT: \$1,284

Specify shade total width and the two individual section widths. **Please Note:** The two individual sections must add up to the total width.

Two on One Roller Shades lowered and with ⅜" light gap

Envision Roller Shades

7.4V RECHARGEABLE POWERTOCH MOTORIZATION | DESIGNER CASSETTE OR NO HEAD RAIL

Envision Designer Roller Shades can be fabricated with the PowerTouch™ Rechargeable option.

The PowerTouch™ Rechargeable provides an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch™ Rechargeable uses Simplicity motors and components.

- PowerTouch™ Rechargeable is available for No Head Rail and Designer Cassette
- The No Head Rail option can use Skyline Hardware brackets and bracket covers available in White, Ivory, Black, Satin Nickel and Bronze. Wand and Pendant are always White or Black.

Envision Roller Shade PowerTouch™ Rechargeable Upgrade Surcharges

All standard discounts apply to PowerTouch™ Shades.

- PowerTouch™ Rechargeable Pendant and Wand: \$179.00
- Charger for PowerTouch™ Rechargeable (required): \$42.00

PowerTouch™ Rechargeable Roller Shade Specifications

See specific fabric price grids for minimum and maximum shade widths and lengths. Shade sizes in Sections 3 and 4 of the price grids are NOT available with the PowerTouch™ Rechargeable option.

PowerTouch™ Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position.

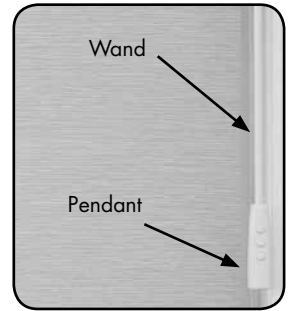

Programming the upper and lower limits is completed at the factory. These can be easily adjusted in the field if desired.

Programming the favorites position is completed after shade installation.

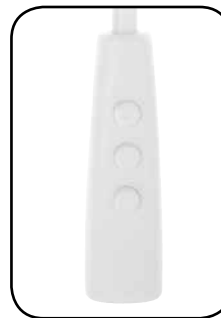

Please refer to the installation instructions at comfortexdealers.com.

PowerTouch™ Rechargeable Appearance

- The PowerTouch™ Rechargeable wand in a Designer Cassette is attached to the head rail and requires no additional mounting.
- The No Head Rail PowerTouch™ Rechargeable wand must be attached to the motor before mounting.
- The wand and pendant hangs down the front of the shade.
- The top and bottom buttons lift and lower the shade to the upper and lower limits. The center button is the favorites and stop button.
- Pendant is 2½" long.

PowerTouch™ Rechargeable Color Options with Designer Cassette and No Head Rail Roller

White

Black

- Shades with Black or Oil Rubbed Bronze head rail will be built with black wand and pendants standard.
- Shades with White hardware will be built with white wand and pendants standard.
- Shades with Fabric Wrapped Head Rail will be built according to the head rail color selected.
- Shades booked as a no head rail roller will have a prompt to select wand color.

Wand and Pendant Location with Designer Cassette and No Head Rail Roller

The standard location for the wand and pendant is on the right. Please specify when ordering.

Envision Roller Shades

7.4V RECHARGEABLE POWERTOCH MOTORIZATION | DESIGNER CASSETTE OR NO HEAD RAIL

PowerTouch™ Rechargeable Wand Length with Designer Cassette and No Head Rail Roller

Shade Length	Standard Wand Length
Shades up to 30"	1' (12")
30" to 52"	2' (24")
52" to 78"	3' (36")
78" to 100"	4' (48")
100" to 120"	5' (60")

- Custom length wands are not available with PowerTouch™ Rechargeable. Standard wand lengths can be changed at no cost.

Mounting Requirements for PowerTouch™ Rechargeable Shades with Designer Cassette

- No special installation hardware or wiring requirements are needed to install PowerTouch™ Rechargeable Roller Shades with Designer Cassette Head Rail.
- A battery wand is not required with PowerTouch™ Rechargeable shades.

Mounting Requirements for PowerTouch™ Rechargeable Shades with No Head Rail Roller

- On No Head Rail roller shades, the wand must be attached to the motor with two screws (included) before mounting the shade.
- A battery pack is not required with PowerTouch™ Rechargeable shades.

Specifications for PowerTouch™ Rechargeable Shades with and without Designer Cassette

Inside Mount Minimum Width = 18 $\frac{3}{8}$ "
 Exact Mount Minimum Width = 18 $\frac{3}{16}$ "
 Outside Mount Minimum Width = 18"

Maximum Width: See roller price grids for motorized shades specifications.

Recharging Port

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery integrated within the motor. Must specify charger when ordering a PowerTouch Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 13' wire.

PowerTouch™ Rechargeable Roller Shades Warranty

Please see page 168 for complete Comfortex warranty information.

PowerTouch™ Rechargeable Shades Do Not Have a Separate Battery Wand

There is no battery wand with the PowerTouch™ Rechargeable shades. The battery pack is integrated inside the roller tube to make mounting easier and more convenient.

The battery is recharged via the recharging port on the PowerTouch™ Rechargeable Wand.

Envision Roller Shades with Simplicity Motorization

7.4V RECHARGEABLE SIMPLICITY MOTORIZATION

The Simplicity Rechargeable Motorization program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

Simplicity Rechargeable Motorization Specs

All Roller Shade Fabrics

Minimum Width with No Headrail: 19½"
Minimum Width in Designer Cassette: 18½"
Maximum Width: Varies. See fabric pages for motorization specifications.

Simplicity Rechargeable Motors Appearance

The Simplicity Rechargeable motor and batteries are concealed within the roller tube.

Mounting Requirements

Skyline or R-Series No Headrail Roller Hardware

No special installation hardware or wiring requirements are needed. See page 84-85 for mounting information.

Dual Roller Shades

No special installation hardware or wiring requirements are needed. See pages 90-91 for mounting information.

Designer Cassette Hardware

No special installation hardware or wiring requirements are needed. See page 94 for mounting information.

4" Skyline Fascia Hardware

No special installation hardware or wiring requirements are needed. See page 100 for mounting information

Simplicity Rechargeable Motor Batteries

The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Battery Wand Mounting is Not Required

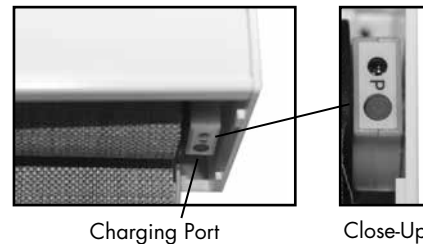

No external battery wand is required to operate an Envision Roller Shade with Simplicity Rechargeable Motorization.

Simplicity Rechargeable Motor Battery Life

Rechargeable battery is built into the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

White and Black Adapters for Skyline Motorization with no head rail

Battery Charger for Simplicity Rechargeable Motors

An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering a Simplicity Rechargeable shade. The charger plugs into the charging port of the motor.

The charger is black and comes with a 13' wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Envision Roller Shades with Simplicity Motorization

7.4V RECHARGEABLE SIMPLICITY MOTORIZATION

Envision Roller Shades with Heavy Duty Simplicity Rechargeable Motorization

Heavy Duty Simplicity Rechargeable Motorization for 2" and 2½" tubes

Heavy Duty Motors are now available for all roller shades that require a 2" or 2½" tube. See shaded sections in each fabric grid for sizes. Motors are only available with the no head rail option. Brackets are only white and no bracket covers are available. Even if not required, Heavy Duty Motorization can be ordered for smaller shades to maintain consistent appearance.

Heavy Duty Motorization is NOT available with Designer Cassette or Fascia options.

Minimum width of Heavy Duty Motorized Shades is 24".

Battery is integrated within the motor unit.

The 12 Volt charger must be used to recharge heavy duty motors. **Solar Panel Option is NOT available for Heavy Duty Motorization.**

Bracket Dimensions

Projection = 3⅝"
Width = 3"

Minimum Mounting Depth = 2"
Minimum Flush Mounting Depth = 3"
Minimum Side Mounting Depth = 3"

See page 85 for no headrail roller deductions.

New Solar Panel Option for Simplicity Rechargeable Shades with Remote Control

Dimensions: 19" x 1½"

The new solar panel option with mounting brackets plugs into any Simplicity Rechargeable Remote control shade (does not work with PowerTouch or Heavy Duty Motorization).

The solar panel provides a constant trickle charge to the 7.4v Li-Ion Rechargeable battery packs. It does not require direct sunlight, but performs best in direct sunlight applications.

This option prolongs the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables, such as size and weight of the shade, frequency of shade use, amount of direct sunlight exposure, etc.

All standard discounts apply:

- Solar Panel with Mounting Brackets: \$160.00

Important Information about Simplicity Rechargeable Motor Shade Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged. The shade will also beep when the button is pressed if the battery is low.

Envision Roller Shades with Simplicity Motorization

7.4V RECHARGEABLE SIMPLICITY MOTORIZATION

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand to charge. The wand extends up to 31" in length.

Simple to use! Place the magnetized wand tip to the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.
- A modern innovation at an affordable price.
- Great for out of reach windows
- Effortless operation

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.
- Extension cable plugs into charging port of Simplicity Rechargeable shades.

EZ Charge Wall Mount Receiver Kit | CKIT078
One kit per Simplicity Motorized shade is needed.

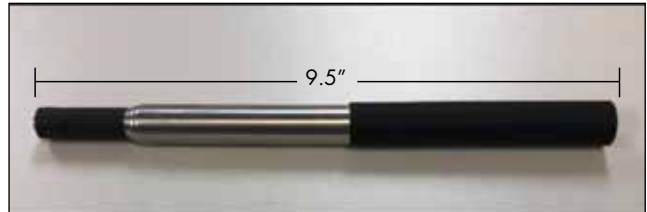

EZ Charge Extension Wand Option

Battery Charger

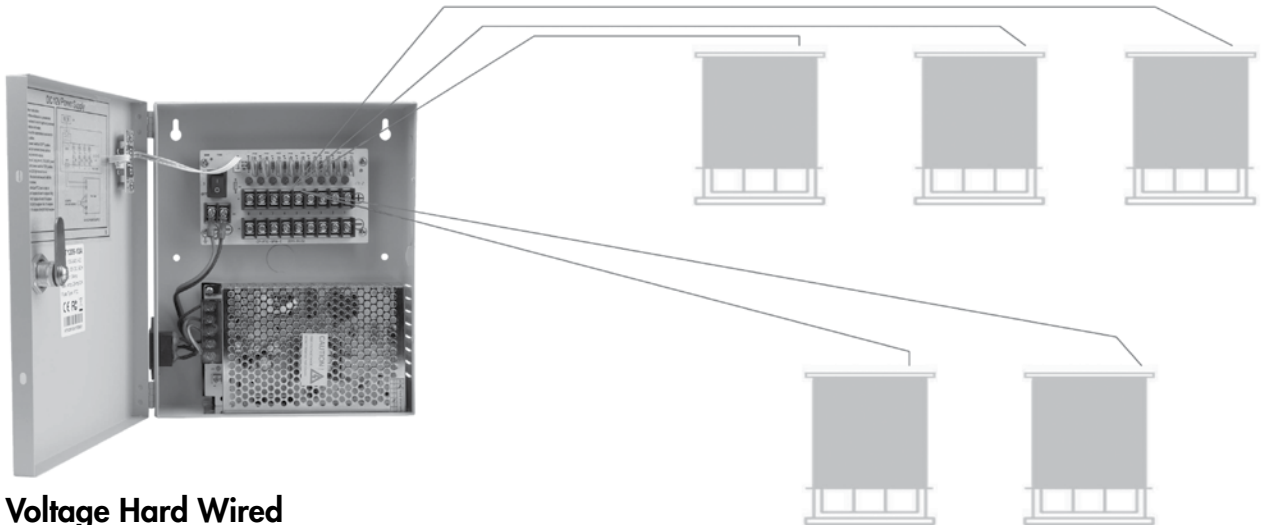

Wand Base

Battery Charger - SOLD SEPARATELY

You must specify charger when ordering a Simplicity Rechargeable Motorized Shade. The charger plugs into the wand base. The 8.4 Volt charger requires a standard power outlet to recharge the motor. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2 1/2" length x 1 3/4" deep.

Envision Roller Shades with Simplicity Motorization

12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for all Roller Shades up to a 1.5" tube. **Heavy Duty Motors are NOT available with Low Voltage Hard Wired Motorization.** The system offers a maintenance-free power option for Simplicity Motorized Shades. The Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

Simplicity Motorized Upgrade and Surcharges
Standard Envision Discounts apply to motorized lift systems pricing.

Wall Mount Transformer

- Wall Mount Transformer \$400.00

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply connect the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

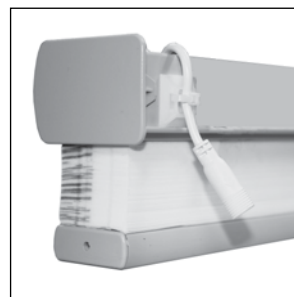

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

• Product Description:

- 12v10a 9ch
- Input Voltage Range : AC90V-264V
- Input Frequency Range : 50Hz-60Hz
- Output Voltage Range : DC12V+/-5%
- Output Current : 10 Ampere
- Output Power : 120 Watt
- Output Ripple&Noise : ≤42MV
- Output Efficiency : ≥83%
- Output Fuse Type : PTC
- Output Fuse Rating : 2A
- Environment Operatiing Amb.Temp : -30 ~45
20%~90%RH
- Environment Storage Temp : -40 ~85 10%~95%RH

12V Wall Mount 9 Channel Power Transformer

Envision Roller Shades with Simplicity Motorization

12V SIMPLICITY MOTORIZATION

Envision Roller Shades can be motorized with the non-rechargeable Simplicity Motorization system. The Simplicity Motor program features a battery powered motor and includes a single 12 volt battery wand. Simplicity motors are compact and use a radio controlled remote to raise or lower the shades.

Head Rail Options with Simplicity Motors:

- R-Series
- Skyline Standard Roller
- Designer Cassette
- 3" Fascia
- 4" Skyline Fascia

Simplicity Motorized Upgrade and Surcharges

Standard Envision Discounts apply to motorized lift systems pricing.

Motor

- Radio Frequency Motor and Battery Wand: \$485.00

Hand Held Remote

- 5 Channel Remote: \$62.00
- 6 Channel Timer Remote: \$102.00
- 14 Channel Remote: \$102.00

DC Power Supply - Replaces Battery Wand

- Wall mount transformer DC12V/2A \$112.00

Battery Wand Extension Wires

- 48" Extension Wire \$28.00

Simplicity Smart Controller

- Smart Controller Unit \$510.00

The 6 Channel Timer Remote can operate up to six shades individually or in groups and has a timer feature to create schedules for automatic shade operation.

Standard Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand. The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the limited lifetime warranty.

Steps to Pricing a Motorized Envision Roller Shade with Simplicity Motors

- Step 1** Price out Roller Shade at appropriate width and length with desired head rail.
 - Step 2** Add Motor Surcharge.
 - Step 3** Select Remote Surcharge.
 - Step 4** Add all line items for a grand total.
 - Step 5** Apply discount.
- Call Technical Services for assistance with motors.

Standard Roller Hardware Appearance Shade Features

- **Bottom rail style:** Fabric Wrapped or Exposed bottom rail
- **Bottom rail color:**
Fabric Wrapped: White, vanilla, bronze, black or brushed aluminum.
Exposed: White, vanilla, bronze, black or brushed aluminum.

The motor lead is 6" long and the battery wire is 10" long.

White and Black Adapters for Skyline Motorization with no head rail

DC Power Supply

12 Volt DC power supply is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shade with a Simplicity motor. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1 7/8" wide x 3 1/4" length x 1 1/4" deep.

Standard Simplicity Motor Battery Wand Mounting

The battery wand is wall or ceiling mounted utilizing white battery wand clips. It also can be clipped to the Designer Cassette head rail.

Batteries are needed to operate Simplicity motors. The battery wand measures 17 1/4" and comes with eight alkaline batteries and is white in color.

Battery Wand

Envision Roller Shades with Simplicity Motorization

SIMPLICITY REMOTE CONTROLS FOR ALL SIMPLICITY OPTIONS

Simplicity 5 Channel Remote

The Simplicity Remote features 5 individual frequency channels and an All channel that will operate all the shades at once.

The 5 Channel Simplicity remote is available in white and black. All remotes come with a holder which can be mounted to a wall for easy storage.

The remote controls utilizes one 3V battery (CR2430). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Remote control batteries are not covered by the limited lifetime warranty.

Standard Simplicity Battery Operated Motorized Shades Warranty

Please see page 168 for complete Comfortex warranty information.

Simplicity 14 Channel Remote

The Simplicity 14 Channel remote can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Roller Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet. A 14 Channel (14C) remote can be utilized on all Simplicity Motorized Shades.

Please Note: Unused channels can be hidden

Simplicity 6 Channel Timer Remote

The 6 Channel (6C) timer remote combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 6-channel hand held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

THE FACTORY DOES NOT PROGRAM CHANNELS FOR SIMPLICITY RECHARGEABLE MOTORS.

The factory programs the upper and lower limits of every shade. Channel programming is completed after shade installation.

Please Note:

- Not all motors run at the same rate of speed.
- REMOTES ARE NOT LINKED TO SHADES FROM THE FACTORY. SHADES MUST BE LINKED AFTER SHADE INSTALLATION.
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE SIMPLICITY RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2³/₈"
- Length of controller: 2¹⁵/₁₆"
- Height of controller: 1¹/₈"

Simplicity Smart Controller	
	<ul style="list-style-type: none"> • Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Control Shades • Powered by NEO Smart Blinds App.

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC anywhere in world.

The Simplicity Smart Controller will work with any Comfortex motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds app Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added you can use your smartphone as a single remote for all of your shades. It will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds app onto multiple devices, After installing the app on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

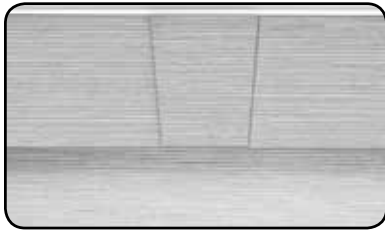

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control for it (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds app will not affect normal remote operation.

How Much Does The NEO Smart Blinds app Cost?

The app is a free download, However you must have at least one Simplicity Smart Controller (\$510) to serve as a bridge between the app and your Shades.

Envision Roller Shades

HIGHLIGHTS VALANCE

Highlight any element of your home décor with the Highlights Cornice Valance upgrade. This tailored, fabric wrapped valance, available in seven heights with seven returns sized from 1 1/2" to 6", mounts over any product, either inside or outside the frame. The Keystone option now allows for all fabrics to cover widths up to 216". It's the perfect solution for our Panel Track system. Highlights Valances can ONLY be ordered as a STANDALONE product.

Highlights Valance Specifications

Valance Width with Keystone: Maximum valance width is 216" for all Envision Fabrics

- Up to two keystones may be required for larger widths. (ex. 216" Highlights Valance will require two Keystones, each panel is 72" wide).
- Keystone placement is pre-determined. Custom placement is not available.
- The fabric for a Highlights Valance cannot be railroaded.

Valance Heights: 6", 8", 10", 12", 14", 16"

Return Size:

- Inside Mount: None
- Outside Mount: See chart below

Highlights Cornice Valance Upgrade can ONLY be ordered as a SEPARATE stand alone product. They cannot be ordered with shades.

Highlights Ordering and Measuring Instructions Inside Mount Valance ordered SEPARATELY

- Inside mount valances are made without returns.
- An inside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the inside width at the top of the window where the valance is to be installed. Measure in multiple spots to ensure accuracy.
- Please Note: The finished dimension of your inside mount valance will be 3/16" less than your ordered width (see Figure A). Example: An inside mount valance ordered at 36" wide will be made 35 13/16".
- Please Note: You will need up to 3 1/2" of mounting depth to ensure your valance is fully recessed and flush with your window opening.

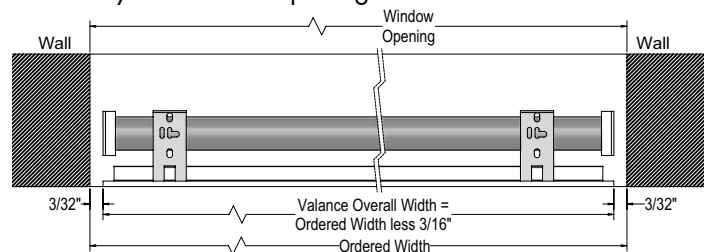

Figure A

Mounting Information for Highlight Valances with Returns Size Options

Mount Type	Return Size	Mounting Depth Required	Inside Valance Depth Clearance Provided	Comments

Envision Roller Shades

HIGHLIGHTS VALANCE

Highlights Ordering and Measuring Instructions

Outside Mount Valance ordered SEPARATELY

- An outside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover.
- **Please Note:** When ordering outside mount valances, the finished overall width of your valance will be your ordered width plus 1 1/4" (see Figures B and C).
- **Example:** An outside mount valance ordered at 36" wide will be made 37 1/4".
- **Please Note:** You will need 1/2" of surface area to mount your valance brackets (see Figure B).

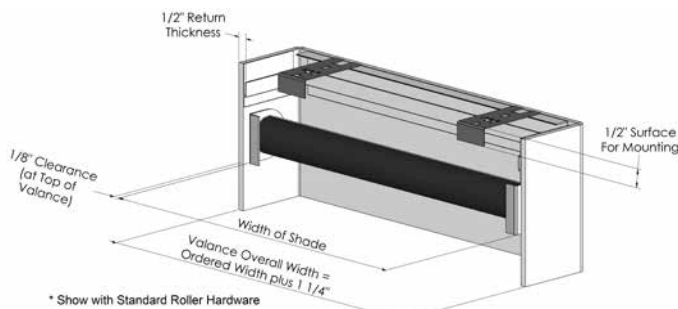

Figure B

Outside Mount

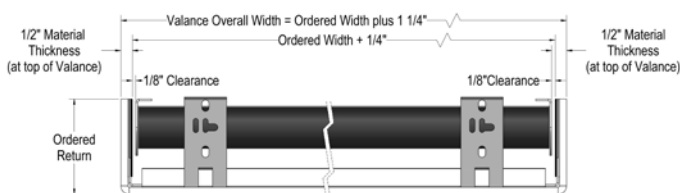

Figure C

Stand Alone Valance with Return Size Options

- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover. See Figures D-F for measuring information.
- Next, determine the length of your desired returns. Use the chart on page 112 for the mounting depth required and inside valance depth clearance provided for each return size.

Outside Mount

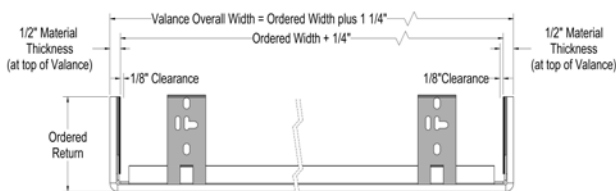

Figure D

Stand Alone Valance with Return Size Options (Cont.)

Inside Mount

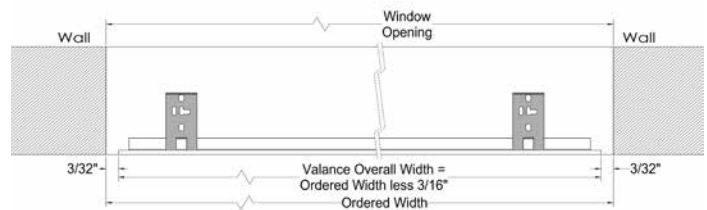

Figure E

Shallow Mount

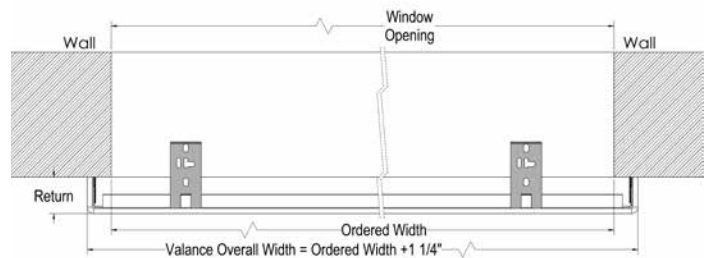

Figure F

Valance Returns

- Seven return size options are available when ordering a Highlights Valance as a stand alone product.
- **Return Sizes:** To determine a return length, add the component dimensions (mounting brackets, etc.) up to the wall. Subtract the measurements from any protrusions (molding, etc.), then choose from one of the pre-determined return sizes (from the chart on page 112) that best fits your application.
- **Return Coverage**
Ordered return size refers to the distance from the face of the valance to the back of return. See Figure G.

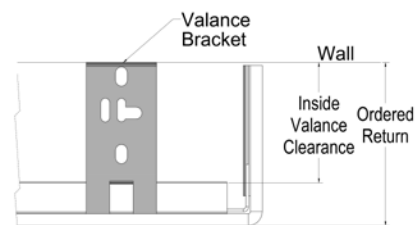

Figure G

Envision Roller Shades

HIGHLIGHTS VALANCE

Keystone Specification

- All Envision fabrics are available with the Keystone option.
- Keystones will be provided separately and installed on site.
- When a keystone is required due to board limitation or fabric width, the Highlights Valance will be built by the factory as two separate pieces and installed on site.
- Ordering two optional keystones is not available. Two keystones may be required for some wider width valances.
- Valance panels are divided in half when the keystone option is ordered.
- When keystones are not required due to fabric or board width, keystones are centered on the valance. Custom placement of the keystone is not available.
- Keystones are placed on all Highlights Valances ordered wider than 94" or for widths wider than the ordered fabric.
- Separate price grids indicate when keystones are required based on fabric width.
- For vertical or horizontal patterns, keystone alignment cannot be guaranteed.

Outside Mount Panel Tracks with Highlights Valance

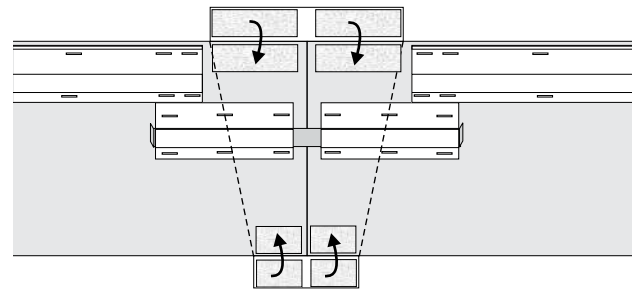

When ordering an Outside Mount Highlights Valance with the Panel Track system, use the Highlights Valance return sizes listed below to ensure clearance of the Panel Track head rail.

- 2 Panels Side or 4 Panel Split = minimum 3" returns
- 3 Panels Side = minimum 3" returns
- 4 Panels Side or 6 Panel Split = minimum 4" returns
- 5 Panels Side or 8 Panel Split = minimum 4" returns

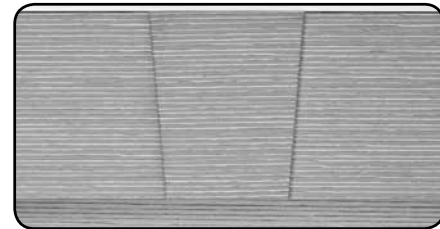

Inside Mount Panel Tracks with Highlights Valance

When ordering an Inside Mount Highlights Valance with the Panel Track system, the following measurements should be considered when ordering return sizes and mounting

- A minimum of 1 $\frac{1}{4}$ " is needed to shallow mount a two channel panel track.
- A minimum of 1 $\frac{7}{16}$ " is needed to shallow mount a three channel panel track.
- A minimum of 2 $\frac{1}{16}$ " is needed to shallow mount a four channel panel track.
- A minimum of 2 $\frac{1}{4}$ " is needed to shallow mount a five channel panel track.
- A minimum of 1 $\frac{9}{16}$ " is needed to fully recess a two channel panel track.
- A minimum of 2" is needed to fully recess a three channel panel track.
- A minimum of 2 $\frac{11}{16}$ " is needed to fully recess a four channel panel track.
- A minimum of 3 $\frac{3}{8}$ " is needed to fully recess a five channel track.

Rear view of the Highlights Valance Keystone. Not visible to room side.

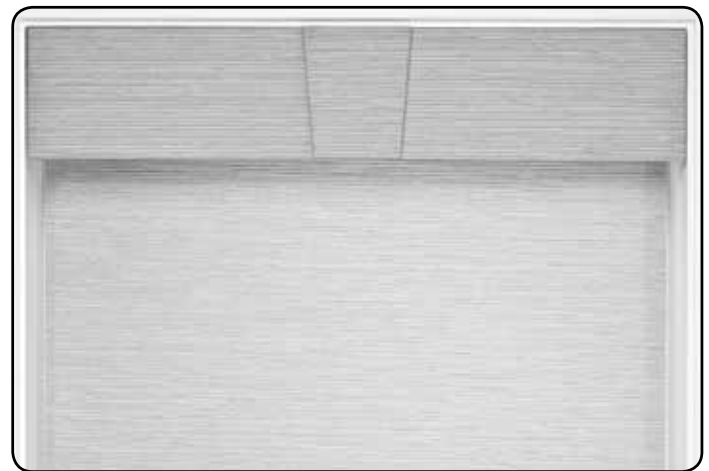

Front view of the Highlights Valance Keystone.

Example:

1) A Highlights Valance in South Pacific Stripe (70" max width) ordered at 100" wide with no returns, will have two valance panels 50" wide and ONE keystone in the middle.

2) A Highlights Valance in Lanai (69" max width) ordered at 144" wide with no returns, will have three valance panels 48" wide with TWO keystones.

A Keystone option is available for all shade widths so every Highlights Valance in a room will be uniform

ELEVANCE™ CORD-FREE ROMAN SHADES WITH INTEGRATED LINER

ELEVANCE ROMAN SHADES

Elevance Integrated Liner Roman Shades

FEATURES & BENEFITS

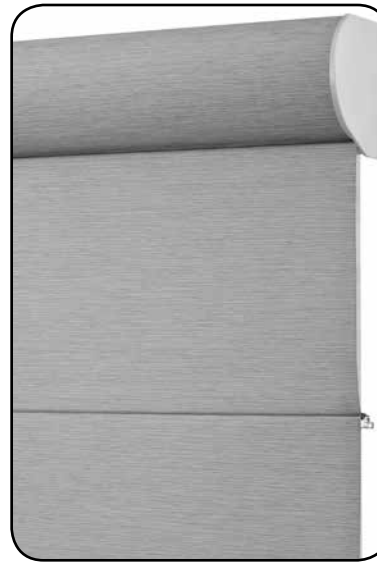

Elevance Roman is where safety and style meet. This revolutionary new flat panel roman shade features absolutely NO lifting cords at the back of the shade and offers a simple and sleek integrated liner.

The liner, available in either light filtering or blackout, smoothly lifts the shade and provides a clean, white street-side appearance. The clear clips hold the liner and the front fabric in place.

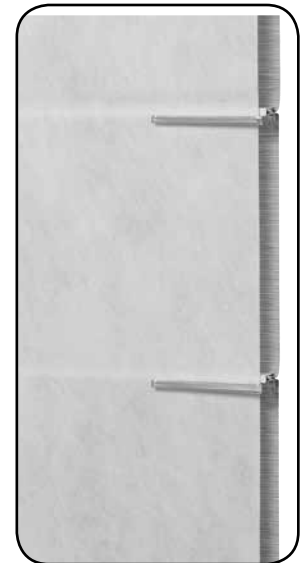

Available Liners - Three Light Control Options

- A light filtering fabric and light filtering liner provide a light filtering shade.
- A light filtering fabric and a blackout liner provide a room darkening shade.
- A blackout fabric and a blackout liner provide a blackout shade.

There is **no surcharge** for the blackout liner option.

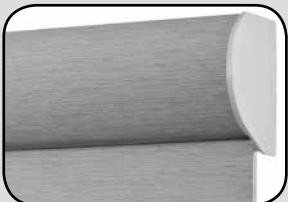

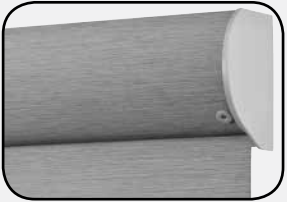

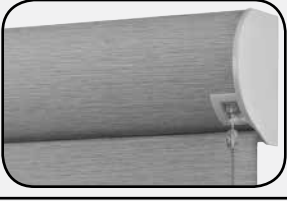

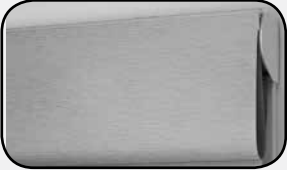

Room side with fabric wrapped head rail and 8" spacing between ribs

Street-side with white light filtering or blackout liner

Elevance Roman Shade with Simplicity Rechargeable 	<ul style="list-style-type: none"> • Easy lift with radio frequency remote control • Lift or lower multiple shades at a time • Never change batteries again. Easy Recharge feature with 6 to 9 months between recharges 	Head Rail: Fabric Wrapped with coordinated end caps Bottom Rail: Fabric Wrapped with frosted end caps	3" x 3½"	Minimum Shade Size: 18" x 18" Maximum Shade Size: (varies by fabric) 96" x 96"
Elevance Roman Shade with Retractable Cord 	<ul style="list-style-type: none"> • The retractable cord system is ideal for larger, hard to reach shades • Smooth and simple operation • Cords and tassels are pre-coordinated to the fabric 	Head Rail: Fabric Wrapped with coordinated end caps Bottom Rail: Fabric Wrapped with frosted end caps	3" x 3½"	Minimum Shade Size: 12" x 18" Maximum Shade Size: (varies by fabric) 96" x 96"
Elevance Optional Valance Upgrade 	<ul style="list-style-type: none"> • Provides a beautiful draped fabric appearance • Placed on top of the standard fabric wrapped head rail when desired 	NA	8" loop	NA

Elevance Integrated Liner Roman Shades

ORDERING

How to order an Elevance Integrated Liner Roman Shade

Step 1: Select Front Facing Fabric

Use the chart below to select an available fabric for Elevance Roman Shades.

Fabrics in **bold** have a maximum size limited by fabric width.

Light Control is indicated for the face fabric. See page 128 for the three light control options.

EVALANCE ROMAN SHADES

Fabric Collection (Alphabetical Order)	Face Fabric Light Control	Elevance Roman Price Group	Maximum Shade Width (see price grids for maximum drop)
Allure, Calico, Diamond Lattice, Enigma, Flourish, Harvest, Haven, Helena, Regency, Structure and Sylvan - Light Filtering	Light Filtering	Group 7	Hardware Maximum
Allure, Calico, Diamond Lattice, Enigma, Flourish, Harvest, Haven, Helena, Regency, Structure and Sylvan - Blackout	Blackout	Group 8	Hardware Maximum
Aspen	Light Filtering	Group 2	Maximum width 70"
Calista	Light Filtering	Group 5	Hardware Maximum
Camille	Light Filtering	Group 4	Hardware Maximum
Celestina	Blackout	Group 4	Hardware Maximum
Classic Linen Light Filtering	Light Filtering	Group 2	Hardware Maximum
Classic Linen Blackout	Blackout	Group 3	Hardware Maximum
Damascus	Light Filtering	Group 2	Maximum width 92"
Geneve Linen	Light Filtering	Group 1	Hardware Maximum
Heritage Light Filtering	Light Filtering	Group 2	Hardware Maximum
Heritage Blackout	Blackout	Group 3	Hardware Maximum
Lunel Blackout	Blackout	Group 6	Hardware Maximum
Mirage	Light Filtering	Group 4	Hardware Maximum
Mistique	Light Filtering	Group 3	Hardware Maximum
Papyrus Linen	Light Filtering	Group 2	Maximum width 70"
Polynesian Sands	Light Filtering	Group 2	Maximum width 70"
Sahara	Light Filtering	Group 3	Maximum width 70"
Salinas	Light Filtering	Group 3	Maximum width 70"
Sanibel	Light Filtering	Group 5	Maximum width 94"
South Pacific Stripe	Light Filtering	Group 3	Maximum width 70"
Toulon Blackout	Blackout	Group 6	Hardware Maximum

*Novella Light Filtering and Novella Blackout is not available with Elevance Integrated Liner Roman Shades.

Hardware Specifications:

Operation	Minimum Shade Size	Maximum Shade Size
Standard: Cordless with Lift Assist	20" x 18" (Inside and Outside Mount)	84" x 84" (varies by fabric)
Simplicity Rechargeable Motorization	18" x 18" (Inside and Outside Mount)	96" x 96" (varies by fabric)
Retractable Cord	18" x 18" (Inside and Outside Mount)	96" x 96" (varies by fabric)

Step 2: Select either the Light Filtering Liner or the Blackout Liner

- A light filtering fabric and light filtering liner provide a light filtering shade.
- A light filtering fabric and a blackout liner provide a room darkening shade.
- A blackout fabric and a blackout liner provide a blackout shade.

Step 3: Select Operating Method

Standard

- Cordless with Lift Assist operation

Upgrade to

- Simplicity Rechargeable Motorization
- Retractable Cord
- Add a fabric valance for a soft folded fabric appearance.

Elevance Integrated Liner Roman Shades

GENERAL INFORMATION

The Product

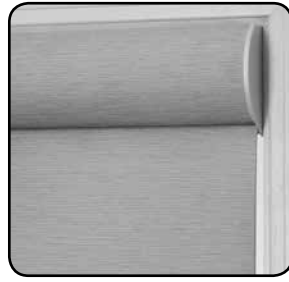

The Elevance Roman shade is a sleek and safe innovative design that provides the beautiful look of a traditional flat roman shade.

Head Rail Characteristics

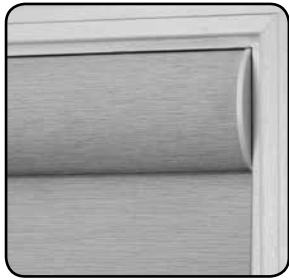

The Elevance Roman head rail offers fabric wrapped as a standard feature for an all-over fabric appeal. The curved head rail offers many more options for shallow mount windows.

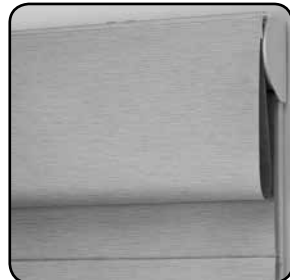

Head Rail with Outside Mount

Head Rail with Shallow Mount

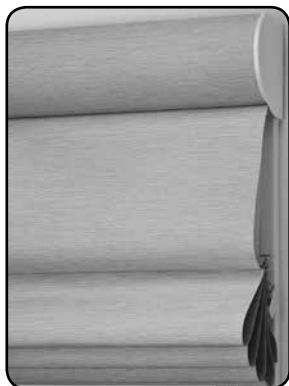

Head Rail with Inside Mount

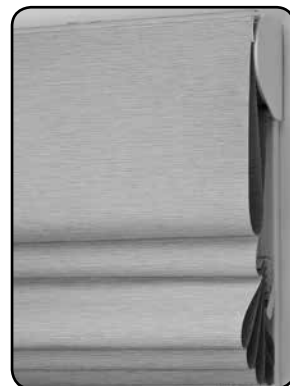

Optional Valance Upgrade (shown with outside mount)

An optional valance upgrade is also available for a soft draped top treatment on Elevance Roman shades.

Only specified fabrics are available in Elevance Roman shades to allow the best roman shade appearance and operation. When fabrics are stacked to the top of the shade, they will fall beneath the smooth fabric wrapped head rail or the optional valance upgrade as shown below.

Fabric Stack with Standard Fabric Wrapped Head Rail

Fabric Stack with Optional Valance Upgrade

Light Control Characteristics

There are three light control options available with every Elevance Roman shade. Light Filtering and Blackout fabrics are found in the Envision Designer Collection, and all of them are available as a Elevance Roman shade, EXCLUDING SCREENS.

An integrated liner is standard with every Elevance Roman Shade. Available in light filtering or blackout for a neutral streetside appearance.

The amount of light leakage in the three configurations are shown below for an inside mount shade.

Light Filtering

Room Darkening

Light Filtering Fabric with a Blackout Liner

Blackout

Blackout Fabric with a Blackout Liner

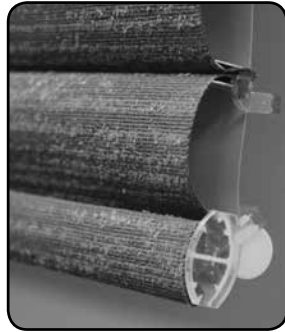

Elevance Integrated Liner Roman Shades

GENERAL INFORMATION

EVALUANCE ROMAN SHADES

Bottom Rail Characteristics

Elevance Roman Shades come standard with a fabric wrapped front bottom rail and a white liner back bottom rail.

Fabric Wrapped Bottom Rail

Please Note: The front bottom rail sits flush against the sill when in the fully lowered position. The height of the bottom panel varies by shade length. The back bottom rail should be slightly above or even with the front bottom rail.

Operation Characteristics

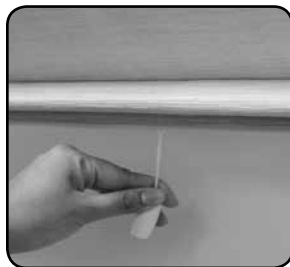

The Elevance Cordless Roman Shade with Lift Assist is a standard cord-free system with simple and smooth operation.

To lower, simply pull the tassel attached to the back bottom rail until the desired drop is reached. The back bottom rail will be hidden behind the front fabric.

To raise, pull down slightly to unlock the spring. Depending on the size and weight of the shade, some shades will need to be guided up to full height. All shades within an order and of identical size will operate identically.

Operation Tips

- When raising, the shade may need to be assisted up to full height depending on weight and size of the shade.
- Cordless shades are best lifted when the bottom rail is easily accessible. Keep in mind furniture and tall windows.

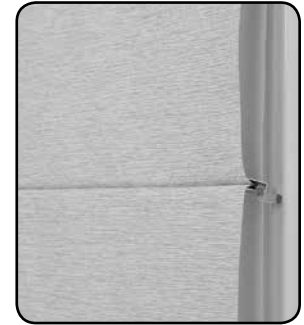

General Information

- The cut size of the liner compared to the face fabric varies by operation type. See hardware pages for more details. The narrower liner creates a halo effect, or light leakage, around the perimeter of the shade.

- Elevance Roman clips that aid in the lift and lower mechanism of the shade are clear in color. They are visible to the street, but they are against an always white liner material. Elevance Roman clips are also visible in outside mount and shallow mount applications.

Elevance Roman Clips - Outside Mount

- Comfortex cannot guarantee rib alignment when two Elevance Roman shades are installed on side-by-side windows.
- Each panel requires 1" of material to enter into the ribs, which will lead to a 1" pattern break during every panel start and end. All over patterns will not be continuous on flat panel roman shades.
- Comfortex Traditional Flat Roman Shades offers panel heights at 6" apart. Elevance Roman shades have 8" panel heights. Keep this in mind when ordering both types of flat roman shades.
- Skew adjustment is not available.
- Mounting shims are not automatically sent with shades. Please specify when ordering.
- Extension poles are not available with this product. We recommend only ordering the cordless version of this product for easy to access locations. For hard to reach places, please select Simplicity Rechargeable motorization or Retractable Cord options.

Care and Maintenance

Care should be taken with all roller and roman shade products and Elevance Roman shades are no exception. Elevance Roman shades can be gently dusted or vacuumed to keep them looking like new. The soft fabrics that are available with this system may need occasional steaming, especially if shades remain in the raised position on a regular basis and the tear drop folds settle in.

Elevance Integrated Liner Roman Shades

RETRACTABLE CORD HARDWARE SYSTEM

Retractable Cord Shade Characteristics

- **Maximum Size:** Available at maximum size of 96" x 96", dependant on fabric width and weight. See price grids for specifications.
- **Minimum Size:** Available at a minimum size of 12" x 18". This will not provide two whole fabric panels.
- **Panel Style:** Flat with integrated light filtering or blackout liner.
- **Head Rail:** Fabric wrapped head rail. Color coordinated end caps are provided with every shade.
- **Bottom Rails:** Fabric wrapped front bottom rail with frosted end caps and a white back bottom rail that matches the liner.
- **Liner:** A light filtering or blackout liner **MUST** be selected when ordering. Comfortex recommends light filtering liner for blackout fabric.
- **Rib Spacing:** Rib spacing is 8". Lower most panel size will vary in length up to 2" longer or 6" shorter than the standard 8".
- **Cord Length:** The cord length is always 40% the length of the ordered shade. Custom lengths are available at a maximum of $\frac{2}{3}$ the length of the shade. Please specify when ordering.

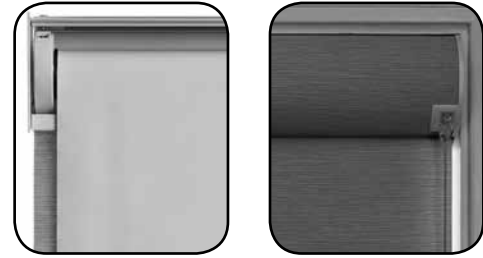

Please Note: For outside mount shades with Retractable Cord, the recommended overlap is the ordered width PLUS 2".

Retractable Cord Operation

The clutch can be ordered to the right or left of of the shade so the pull cord is easy to reach.

To raise, simply pull the cord straight down until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially raises the shade. The shade can be stopped at any point while raising.

To lower, simply pull the cord out towards you until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially lowers the shade. The shade can be stopped at any point while lowering.

The Light Filtering or Blackout Liner on Inside Mount Retractable Cord shades have a 3/4" light gap on the operation side.

Retractable Cord is available at the front of the shade for easy operation and a sleek appearance. Color coordinated tassels and cord are standard with every shade.

Elevance Roman Shade Stack Height

Stack height is approximate and will vary with fabric type. Applies to Cord-Free, Motorized and Retractable Cord shades. Does not include head rail measurement.

Shade Drop (Inches)	Stack Height (Inches)
40"	10"
48"	10½"
54"	11"
60"	11½"
66"	12"

Simplicity Rechargeable Motorization

All Elevance Roman Shade Fabrics

Minimum Width: 18"

Maximum Width: See pricing pages for size specifications on Elevance Roman Shade fabrics.

Steps to Pricing a Motorized Elevance Roman Shade with Simplicity Rechargeable Motorization

Step 1 Price out an Elevance Roman Shade at appropriate width and length.

Step 2 Add Rechargeable Motor Surcharge.

Step 3 Select Remote Surcharge.

Step 4 Add charger (at least one is required)

Step 5 Add all line items for a grand total.

Step 6 Apply discount.

Call Technical Services for assistance with motors.

Elevance Roman Head Rail Motor Appearance

This head rail is curved and fabric wrapped with matching fabric, concealing the liner fabric and motor mechanism. A small accessibility opening has been created for easy resetting of the motor.

Shade Features

- **Head Rail Color:** Fabric Wrapped
- **Bottom Rail Style and Color:** Fabric wrapped front bottom rail with frosted end caps and a white back bottom rail that matches liner.

Simplicity Rechargeable Motor Batteries

The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Battery Wand Mounting is Not Required

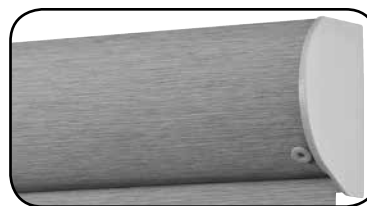

No external battery wand is required to operate an Envision Roller Shade with Simplicity Rechargeable Motorization.

Simplicity Rechargeable Motor Battery Life

Rechargeable battery is built into the motor.

The average battery charge will last 6 -12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Motorized head rail has an access point to easily re-program shades.

Battery Charger for Simplicity Rechargeable Motors

An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Simplicity Rechargeable shade. The charger plugs into the charging port of the motor.

The charger is black and comes with a 13' wire.

Elevance Integrated Liner Roman Shades

7.4V RECHARGEABLE SIMPLICITY MOTORIZATION

Simplicity 6 Channel Timer Remote

The 6 Channel (6C) timer remote combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 6-channel hand held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

THE FACTORY DOES NOT PROGRAM CHANNELS FOR SIMPLICITY RECHARGEABLE MOTORS.

The factory programs the upper and lower limits of every shade. Channel programming is completed after shade installation.

Please Note:

- Not all motors run at the same rate of speed.
- **REMOTES ARE NOT LINKED TO SHADES FROM THE FACTORY. SHADES MUST BE LINKED AFTER SHADE INSTALLATION.**
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE SIMPLICITY RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

Important Information about Simplicity Rechargeable Shade Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Motor Hand Held Remotes

The Simplicity Remote features 5 individual frequency channels and an All channel that will operate all the shades at once.

The 5 Channel Simplicity remote is available in white and black. All remotes come with a holder which can be mounted to a wall for easy storage.

The remote controls utilizes one 3V battery (CR2430). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Remote control batteries are not covered by the limited lifetime warranty.

Standard Simplicity Battery Operated Motorized Shades Warranty

Please see page 168 for complete Comfortex warranty information.

Solar Panel Option

Dimensions: 19" x 1 1/2"

The new solar panel option with mounting brackets plugs into any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).

The solar panel provides a constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. It does not require direct sunlight, but performs best in regular direct sunlight applications.

This option prolongs the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables, such as size and weight of the shade, frequency of shade use, amount of direct sunlight exposure, etc.

Solar Panel with mounting brackets is available for Simplicity Motorization with Remote Control

Envision Traditional Flat & Hobbled Roman Shades

HARDWARE OPTIONS

Envision Roman Shade Valance

- Each Envision Shade, regardless of hardware system, comes standard with its own 3" matching fabric valance.
- Inside mount Envision Roman Shade valances are built without returns.
- All outside mount Envision Roman Shades will come standard with a valance that includes 2½" valance returns. The valance returns wrap around the face of the valance concealing the ends of the head rail for a more finished look.
- The valance can be ordered without returns for outside mount applications when desired.

Inside Mount Valance

Outside Mount Valance

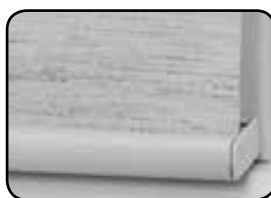

- Custom return sizes and inside mount valances with returns are not available.
- The valance is attached to the head rail using valance brackets for a secure hold and easy installation.
- The valance bracket nests between the shade bracket and window sill or wall. When the shade is raised, the fabric gathers beneath the valance for a unique, stacked appearance.

Highlights Cornice Valance Upgrade

See pages 112-114 for Highlights Cornice Valance upgrade information.

Envision Roman Shade Hardware Color

The standard head rail color for all Envision Roman Shades is color coordinated. The middle rail on Top Down - Bottom Up Shades will be color coordinated to the fabric. The bottom rail is color coordinated for cordless shades. Select Oil Rubbed Bronze or Brushed Nickel rails for a designer look.

Color Coordinated Bottom Rail

Fabric Wrapped Bottom Rail

Fabric wrapped bottom rail is standard on all cord operated shades. The shade fabric is wrapped around an elliptical grooved rail. Two clear plastic end caps secure the fabric in place. The result is an attractive look which enhances the overall appearance of the shade. The standard rail color is white to the street.

Fabric Wrapped Bottom Rail

Envision Traditional Roman Stack Height

Stack height is approximate and may vary with each fabric.

Shade Drop (Inches)	Stack Height (Inches)

HOBBLED ROMAN SHADES

ENVISION "SMOOTH-OPERATOR" PANEL TRACK SYSTEM

Envision "Smooth-Operator" Panel Track System

HARDWARE

PANEL TRACK SHADES

The Envision Panel Track Shade system offers versatility and a beautiful modern design for effective light control and outstanding performance. Panel track systems are a beautiful option for large windows and room dividers. This system offers a thin profile head rail and is available with all Envision Designer fabrics.

Stacking Options

Envision Panel Track Shades are available with 3 stacking configurations: split, left and right stacks.

- Split stack panels draw open to both sides equally. Controls may be placed on either side and is only available in cord control.
- Side stack is available as left or right stack and is available in wand or cord control.

Split Stack

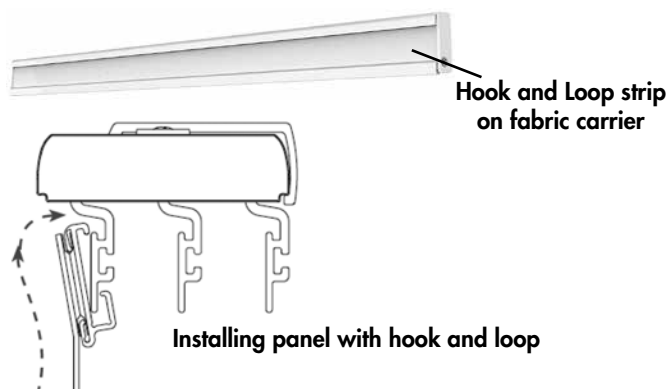

Left or Right Side Stack

Closed Side Stack

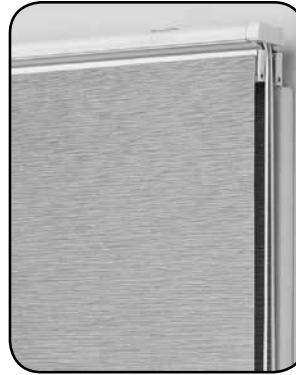

Panel Attachment

A hook and loop strip is sewn onto every panel to provide a secure attachment. The patented panel attach method makes it easy to attach the panels even after installation of the rail.

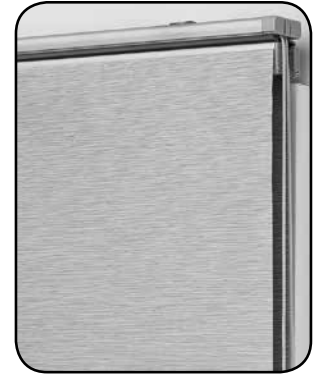

Head Rail Colors

Select from the white or aluminum system hardware system. (Wand is always white.)

White Head Rail

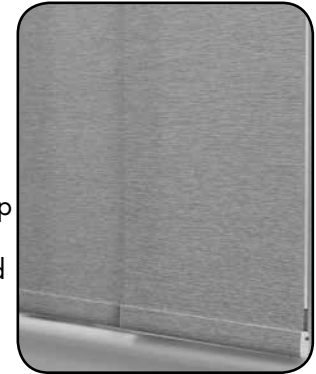

Aluminum Head Rail

Bottom Rail

The panel track bottom rails are designed for smooth operation and allows all panels to glide smoothly past each other.

- Bottom rails are designed to match perfectly with the head rail in finished white or aluminum.
- Finished bottom rails will be 1/2" higher than measured drop on inside mount shades.
- Bottom rails are not connected to each other on this panel track system.
- Fabric wrapped bottom rails are available as an option.

Fabric Wrapped Bottom Rail

Fabric Panels

All Envision Designer Collection fabrics are available with the Envision Panel Track Shade System.

- Panels will be fabricated with a standard 2" overlap. Custom overlaps are available at 1 1/2", 2 1/2" and 3". Please specify when ordering.
- Panels are attached to the fabric carrier with hook and loop to allow for subtle fabric adjustment in the field.
- Each panel traverses the track using small rollers, creating smooth operation for wand and cord control
- Panels follow a single lead panel in sequence to open and close.
- The lead panel does not stack flush in front of other panels.
- There is no light gap between the rail and the panels.
- Panels will reach the end of the track.

Please Note: Depending on fabric selection, panels may not hang perfectly flat. Some fabrics may have a billowing or wavy appearance at the time of installation which may correct itself over time.

Replacement panels are available.

HARDWARE

Control Options

The panel track system uses a cord or wand for traversing the fabric panels. Cord control is standard with every panel track shade. Wand control is available at no additional surcharge. Please specify when ordering.

Cord Control

- The nylon cord is white or grey to coordinate with hardware.
- Standard length of the cord is 10" less the ordered length. Custom cord lengths are available. Please specify when ordering.
- Standard cord placement is right stack with right cord.
- Operating cords are located on the outside edge of the panels.
- Tensioner for cord control is always white.
- Tensioner must always be placed so the cord reaches full extension.

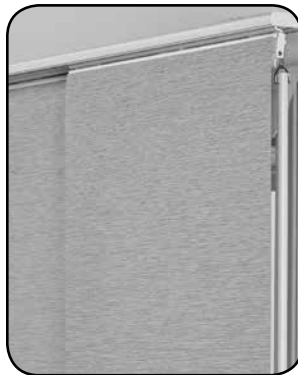

Silver Cord Control

Wand Control

The traversing wand is a convenient alternative to a traditional cord control. This single control system protects children and pets from injuries caused by loop cords.

- The wand control is always white.
- Only available on side stack systems.
- Standard wand placement is on the outside leading edge of the left or right stack. Lead panel will not sit flush to panels behind it.

White Wand Control

Standard Wand Lengths

- Shades up to 72" in Length: 36" wand
- 72" to 96" in Length: 48" wand
- 96" to 120" in Length: 60" wand
- 120" to 144" in Length: 72" wand

Custom lengths are not available but you may select from one of the above standard wand lengths.

Valance Option

The Envision Panel Track Shade System features a sleek and smooth narrow profile. See the Highlights Valance for Panel Track for options on an all fabric valance.

Panel Widths

To achieve the best performance on this panel track system, panels are designed within the following parameters:

- The minimum width for a single panel is 6".**
- The minimum length for a single panel is 12".**
- The maximum width for a single panel is 48".**
- The maximum panel height is 144".**

See price grids for the minimum number of panels that will be available at the desired width.

More panels can be ordered at an additional surcharge and to achieve the desired panel width.

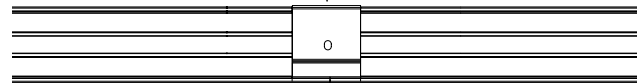

The standard panel overlap is 2". Custom overlaps are available.

Example: The standard split stack on a 96" wide opening would have 4 panels at 26" wide with a 2" overlap. If 6 panels are desired each panel would be 18" wide.

Track Specifications

- The minimum width of a track is 18".**
- The maximum width of a track is 216".**

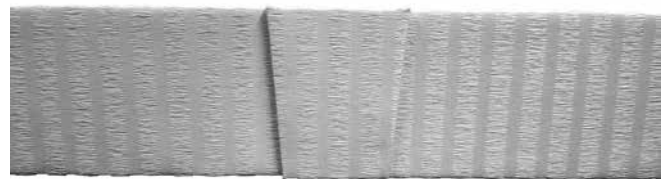

The maximum width of a single panel track is 216". When the total width is ordered over 100", tracks will be split in half and a connector bracket will be provided.

Tracks are spliced over 100". A connector clip is provided.

Highlights Valance for Panel Track with Keystone

The Highlights Cornice Valance is improved with the Keystone option. Now you can cover widths up to 216" wide so it's perfect for panel track system. Any fabric, no matter the width, can cover any opening.

Outside Mount Panel Tracks with Highlights Valance

When ordering an Outside Mount Highlights Valance with the Panel Track system, use the Highlights Valance return sizes listed below to ensure clearance of the Panel Track head rail.

- 2 Panels Side or 4 Panel Split = minimum 3" returns
- 3 Panels Side = minimum 3" returns
- 4 Panels Side or 6 Panel Split = minimum 4" returns
- 5 Panels Side or 8 Panel Split = minimum 4" returns

Inside Mount Panel Tracks with Highlights Valance

When ordering an Inside Mount Highlights Valance with the Panel Track system, the following measurements should be considered when ordering return sizes and mounting

- A minimum of 1 1/4" is needed to shallow mount a two channel panel track.
- A minimum of 1 7/16" is needed to shallow mount a three channel panel track.
- A minimum of 2 1/16" is needed to shallow mount a four channel panel track.
- A minimum of 2 1/4" is needed to shallow mount a five channel panel track.
- A minimum of 1 9/16" is needed to fully recess a two channel panel track.
- A minimum of 2" is needed to fully recess a three channel panel track.
- A minimum of 2 11/16" is needed to fully recess a four channel panel track.
- A minimum of 3 3/8" is needed to fully recess a five channel track.

PANEL TRACK SHADES

Panel Track Finished Dimensions				
	Inside Mount - Cord Draw	Inside Mount - Wand Draw	Outside Mount - Cord Draw	Outside Mount - Wand Draw
Width of Finished Panel Coverage	Ordered Width minus $\frac{5}{8}$ "	Ordered Width minus $\frac{5}{8}$ "	Ordered Width minus $\frac{3}{8}$ "	Ordered Width minus $\frac{3}{8}$ "
Track	Ordered Width minus $\frac{1}{4}$ "	Ordered Width minus $\frac{1}{4}$ "	Ordered Width	Ordered Width
Length	Ordered Length minus $\frac{1}{2}$ "	Ordered Length minus $\frac{1}{2}$ "	Ordered Length	Ordered Length

Mounting Options

The following mounting options are available. All mounting brackets are coordinated with the head rail in white or aluminum:

- Wall Bracket with End Caps
- Ceiling Bracket with End Caps

Panel Stack Back

The stack back will be equal to a single panel width. It will never be less than 12" and never exceed 48".

To determine an approximate stack back:

Ordered Width ÷ Number of Panels = Stack Back within +/- 2". (with 2" standard overlap)

Light Gap

Head Rail/Fabric Panels: There is no light gap between the fabric panels and the bottom of the head rail.

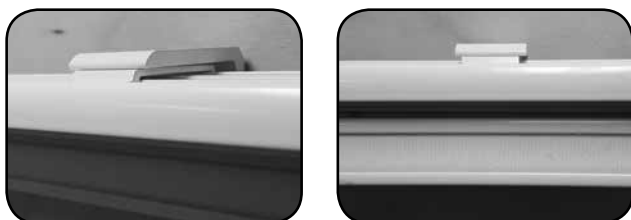

Outside Mount Bracket/Head Rail: There is a $\frac{1}{4}$ " light gap between the top of the track to the top of the outside mount installation bracket.

Inside Mount Bracket/Head Rail: There is a $\frac{1}{8}$ " gap between the top of the track to the top of the inside mount installation bracket.

Bottom Light Gap: There will be a $\frac{1}{2}$ " light gap at the bottom of the hanging panels on an inside mount shade.

Side Light Gap: There will be $\frac{3}{16}$ " side light gap at the sides of the panel track.

To avoid side light gap on outside mount shades, Comfortex recommends increasing the ordered width by 5", or 2 $\frac{1}{2}$ " on both sides.

Outside Mount Installation Bracket Appearance

Fabric Deductions and Specifications

Panels are fabricated with a 2" overlap as standard. Custom overlaps are available in 1 $\frac{1}{2}$ ", 2 $\frac{1}{2}$ " or 3".

Inside Mount:

Head rail width = ordered width minus $\frac{1}{4}$ "

Panel height allowance = ordered length minus $\frac{1}{2}$ "

Outside Mount:

No additional deductions are taken for fabric width

Panel height allowance = ordered length

Natural Fabrics

Lanai and Cabana fabrics are made from natural materials, such as paper, jute and cotton. Small irregularities as well as possible slight fraying at the edges may occur and are considered "natural characteristics". Natural materials may crack, split, twist, bow and flare. Natural materials may experience color changes over time due to aging, direct sunlight and other climatic conditions. Climatic conditions may cause the shade length to stretch or shrink.

Please Note: "Normal Characteristics" are not considered defects in the product or workmanship.

Pricing Example

Side Stack Panel Track

Price Group 4: 110" wide x 97" panel track = \$2,121

Track will have 5 panels for side stack = \$186

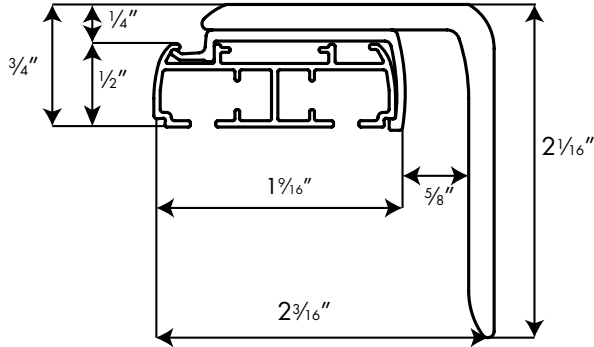

TOTAL LIST PRICE BEFORE DEALER DISCOUNT = \$2,307

Envision "Smooth-Operator" Panel Track System SPECIFICATIONS

Outside Mount Hardware Profiles

Four separate panel track profiles are available depending on the number of panels ordered.

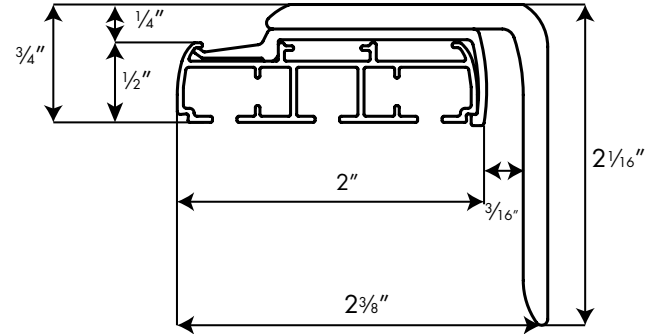

Two Track System

Two channel tracks are used for:
2 panel side stack
4 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1/16"
Extension Bracket projects back of bracket 2 5/8" from wall

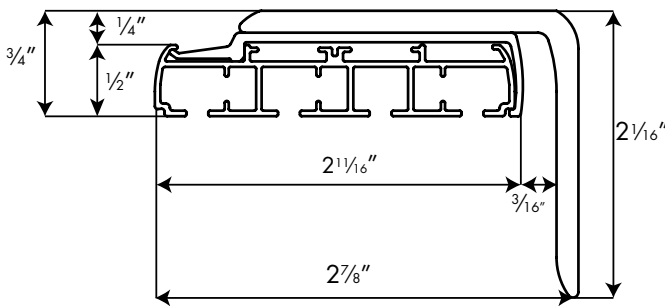

Three Track System

Three channel tracks are used for:
3 panel side stack
Not available for split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1/16"
Extension Bracket projects back of bracket 2 3/16" from wall

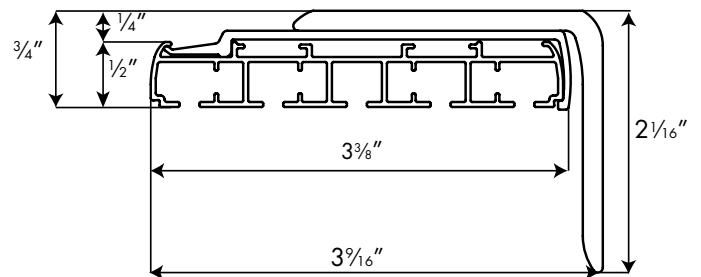

Four Track System

Four channel tracks are used for:
4 panel side stack
6 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1/16"
Extension Bracket projects back of bracket 1 1/16" from wall

Five Track System

Five channel tracks are used for:
5 panel side stack
8 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1/16"
Extension Bracket projects back of bracket 1 7/16" from wall

For outside mount brackets, Spacer blocks are available at 1/16" increments, up to two. Add to overall projection.
Example: For a four panel track, take 2 7/8" plus 1/16"

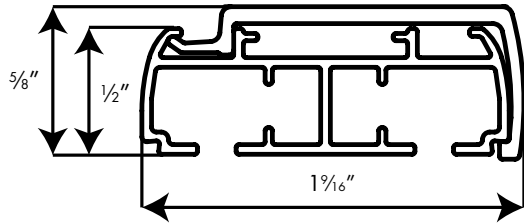

Envision "Smooth-Operator" Panel Track System SPECIFICATIONS

PANEL TRACK SHADES

Inside Mount Hardware Profiles

Four separate panel track profiles are available depending on the number of panels ordered.

Two Track System

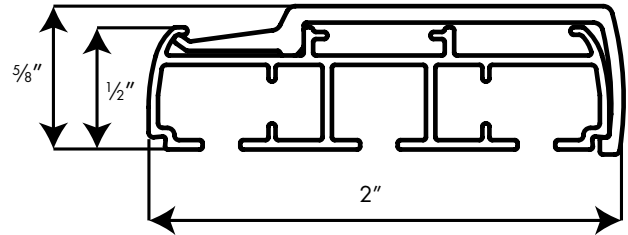

Two channel tracks are used for:
2 panel side stack
4 panel split stack

Mounting Dimensions

Minimum depth for flush inside mount: $1\frac{1}{16}$ "
Minimum depth required for shallow mounting: $1\frac{1}{4}$ "

Three Track System

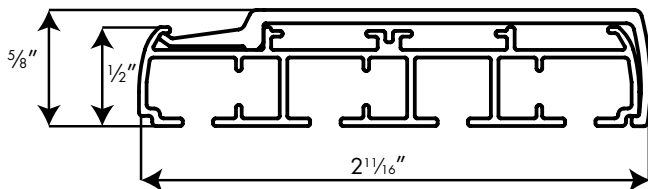

Three channel tracks are used for:
3 panel side stack
Not available for split track

Mounting Dimensions

Minimum depth for flush inside mount: 2"
Minimum depth required for shallow mounting: $1\frac{7}{16}$ "

Four Track System

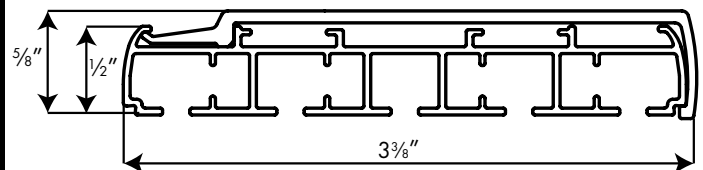

Four channel tracks are used for:
4 panel side stack
6 panel split stack

Mounting Dimensions

Minimum depth for flush inside mount: $2\frac{1}{16}$ "
Minimum depth required for shallow mounting: $2\frac{1}{16}$ "

Five Track System

Five channel tracks are used for:
5 panel side stack
8 panel split stack

Mounting Dimensions

Minimum depth for flush inside mount: $3\frac{3}{8}$ "
Minimum depth required for shallow mounting: $2\frac{1}{4}$ "

Envision "Smooth-Operator" Panel Track System SPECIFICATIONS

Clear Window Opening

Panel Tracks are an excellent option for clearing a window opening. Please see the below charts for guidance on what ordered width is recommended to clear a window opening. The following calculations are based on a 2" overlap between panels, +/- 1".

For Example:

For a One Way Side Stack ordered with 5 panels, in order to clear an opening of 94", the ordered width of the panel track should be 120".

One Way Side Stack Panel Track

Step 1: Select # of Panels

Step 2: Select uncovered width

2 Panels	If uncovered width is	17	23	29	35	-	-	-	-	-	-
3 Panels	If uncovered width is	23	31	39	47	63	79	-	-	-	-
4 Panels	If uncovered width is	25	34	43	52	70	88	106	124	-	-
5 Panels	If uncovered width is	27	37	47	56	75	94	113	133	152	171
Result: Then Ordered Width is		36	48	60	72	96	120	144	168	192	216

Split Stack Panel Track

Step 1: Select # of Panels

Step 2: Select uncovered width

4 Panels	If uncovered width is	25	34	43	52	70	88	106	124	-	-
6 Panels	If uncovered width is	28	38	48	58	78	98	118	138	158	178
8 Panels	If uncovered width is	30	40	51	61	82	103	124	145	166	187
Result: Then Ordered Width is		36	48	60	72	96	120	144	168	192	216

Please contact Customer Service for measurements not included in these charts.

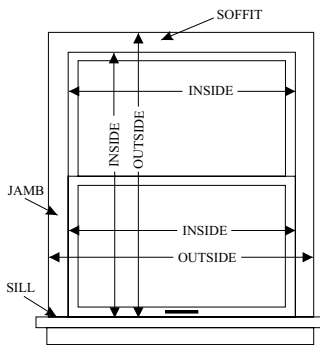

Envision Shades

GENERAL INFORMATION

Measuring Instructions for Envision Shades

Comfortex accepts measurements down to 1/8" increments.

- Precise width and length measurements are critical. Fabric width cannot be altered after the shade is fabricated.
- Please use a metal tape measure for accuracy.
- The head rail must be installed perfectly level to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.
- Envision Roller Shades are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure balanced operation.

Inside Mount

Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.

Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount

Measure the exact width and length of the area to be covered.

For Roller Shades, on the width, allow at least 1 1/2" of an overlap on each side. An overlap of 3" on each side is recommended.

For Roman Shades, on the width, allow at least 2" of an overlap on each side. An overlap of 4" on each side is recommended. Projection brackets allow shades to be mounted up to 4" away from the mounting surface.

Continued

Outside Mount (continued)

Please specify extension brackets when ordering. Extension brackets are recommended for outside mounts only.

For Panel Track System Shades, on the width, allow at least 2 1/2" of an overlap on each side. An overlap of 5" on each side is recommended.

Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

Side Mount

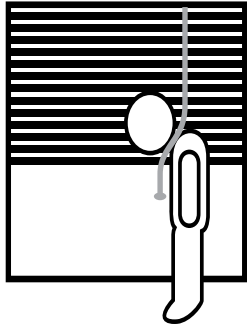

Side mount is not available for the Standard Roller, and Panel Track System Shades.

The maximum Roller shade width utilizing the side mount option is 48". Envision Roller Shades with the Designer Cassette may be side mounted using "L" brackets. See respective product sections for side mounting requirements.

GENERAL INFORMATION

GENERAL INFORMATION

⚠️ WARNING

Window Blind Cord Can
STRANGLE Your Child.

To prevent strangulation, purchase
cordless products or products with
inaccessible cords.

⚠️ ADVERTENCIA

La cuerda ciega de la ventana
puede ESTRANGULAR su niño.

Para evitar el estrangulamiento,
compre alternativas inalámbricas o
productos con cables inaccesibles.

Child Safety

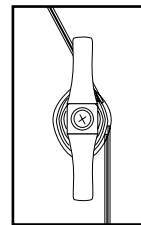

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for Safety of Window Covering Products.

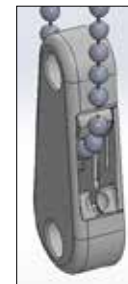

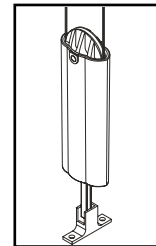

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them. To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the shade, simply wrap the excess cord around the cleat.

Cord tensioners keep the continuous cord loops taut to prevent children and pets from becoming entangled and subsequently injuring themselves. Cord tensioners must be used with all Roller, Roman, Sheer and Panel Track System Shades to comply with the Window Covering Manufacturers Association Cord Safety Guidelines.

GENERAL INFORMATION

Retrofit Existing Standard Simplicity Motorized Shades with Rechargeable Batteries

Roller shades made with Standard Simplicity Motorization can be retrofitted with the Rechargeable Simplicity Motorization Battery Wand. The Rechargeable battery wand is 22" long, comes with 10 NiMH batteries, and is white in color. Battery wands are charged at the factory.

To retrofit the rechargeable battery wand to an existing shade with a cassette head rail, you must have at least 24" between bracket centerlines to fit the battery wand. Otherwise, the wand must be placed elsewhere along the window. Wall mounting clips are provided with the wand.

Retrofit Ordering Requirements:

- Rechargeable battery wand with clips (one per shade)
- Rechargeable battery charger (one or more per order, or as needed)
- Charging port mounting base (optional)

Please contact customer service for more information.

Battery Wand for
Rechargeable Simplicity Motorization

Cleaning and Care of Envision Fabrics

Occasional light vacuuming with a soft bristle attachment or gentle feather dusting is all that is required to keep Envision Roller Shades looking fresh and neat. Occasional steaming may be necessary for softer fabrics in roman shades, including the Elevance Integrated Liner shades.

Cleaning and Care of Envision Solar Screen Fabrics

Occasional light vacuuming with a soft bristle attachment or gentle feather dusting is all that is required to keep Envision Roller Shades looking fresh and neat. Most fabrics may also be ultrasonically cleaned, SilverScreen™ fabrics are easy to maintain. Dust can be removed with a soft feather duster or by vacuuming with a soft brush at the lowest position. When intensive cleaning is required, the colored (room) side can be cleaned with a wet cloth. NEVER use an alcohol or ammonia based cleaner (such as Windex®) on SilverScreen fabrics or allow those cleaners to come into contact with the silver side of the shade. SilverScreen fabric cannot be ultrasonically cleaned.

Sunscreen fabrics are easy to maintain and only require occasional vacuuming with a soft brush attachment or washing with mild soap. Soak a sponge or damp cloth with the soapy solution and gently wipe or blot the stain from the fabric. To dry, allow the shade to air dry completely before raising.

Envision Shades

GENERAL INFORMATION

Conditions of Sale

All Comfortex products are custom fabricated to your exact specifications. We cannot accept responsibility for errors in ordering or cancellations and charges after the order is in production.

Policies

Our policies are designed to provide a guide for doing business with Comfortex. Our first priority and number one policy is to provide the highest level of service and total satisfaction.

Freight Policy Fabricated Shades/Blinds

Comfortex will ship all orders for fabricated shades or blinds freight free via UPS, FedEx Ground or other similar method within the Continental US.

Transportation Surcharge: A \$6.00 per unit transportation surcharge will be added to all fabricated product orders shipping within the Continental US; including shades/blinds, vane packs, individual vanes, tracks, valance and cut yardage orders. Exception: Vertical Sheer Shadings, Ovation Cellular Slider and Envision Panel Track system will incur a \$15 per unit transportation surcharge up to 96".

Oversized: In addition to the transportation surcharge, a \$45 per unit Common Carrier surcharge will be added to all fabricated products shipping within the Continental US, including shades/blinds, Vertical Sheer Shadings, Ovation Cellular Slider, Envision Panel Track system, valances, vane packs, individual vanes, tracks, and cut yardage orders with widths of over 96 inches.

Hawaii: Shipments to Hawaii will incur a freight charge of \$26.00 per unit when shipped from within the Continental US.

In Addition, a \$132.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Hawaii.

Alaska: Shipments to Alaska will incur a \$26.00 per unit transportation surcharge when shipped from within the Continental US.

In addition, a \$132.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Alaska from within the Continental US.

Canada: Shipments to Canadian Dealers will incur a \$7.75 per unit transportation surcharge when shipped from within the Continental US. In addition, a \$75.00 per unit Common Carrier surcharge for oversized shades/blinds (over 96") will be added to orders shipping to Canada from within the Continental US.

Other Countries: All US Dealers requesting to ship orders outside the USA, must provide a Freight Forwarder for Comfortex to ship to within the Continental US. Comfortex cannot ship directly to your customers located outside USA.

Components and Fabric

Comfortex will prepay all freight charges on shipments of component and fabric orders over \$3,500 in value within the Continental US. Fabric and component orders less than \$3,500 will be subject to freight charges.

Shutter Components and Tools

Comfortex will prepay all freight charges on shipments of stock component and tool orders exceeding \$20,000 in value, within the Continental US only. All orders less than \$20,000 will be subject to all freight charges. Customers can elect a carrier of choice and receive a freight bill directly from the carrier or Comfortex will select a carrier and invoice the customer for the freight charges. Comfortex makes every effort to provide the most economical carrier and shipping method possible.

Charged Marketing Materials

All charged marketing materials will incur freight charges. Marketing materials may ship on separate days, from different locations. Freight charges are calculated per package, not per order.

Specifications

All Comfortex products are designed and tested to perform as intended within established, published parameters. Requests for "custom fabrication" of products outside of our published specifications may be considered, but are at the discretion of the Comfortex Technical Services department. Restrictions and additional charges apply.

Download installation instructions, order forms or additional price list copies on the Comfortex OnDemand Library or www.comfortex.com/comfortex-dealers in the Dealers Resource Center.

Motorized Envision Shades Warranty

Simplicity Motors (Including PowerTouch™ Rechargeable and Simplicity Rechargeable Motors)

We offer a 5 year warranty on all motors and controls. Specifically, we warrant the Simplicity motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Simplicity product fails within this 5 year period, we will repair or replace it free of charge through your end product supplier. Remote control batteries are not covered by the warranty.

Envision Shades

GENERAL INFORMATION

Envision Roller, Elevance, Roman and Panel Track System Shades Warranty Information

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The Limited Lifetime Warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The Warranty does not include any conditions or damages resulting from accidents, alterations, misuse, abuse, misapplication, improper handling, installation, repairs, operation, cleaning, exposure to any and all natural and manufactured excessive heat sources. (Excessive heat sources include, but not limited to; magnification of sun light through cubes of glass, heaters of any kind, ovens, candles, lighting fixtures, etc.) This warranty does not cover variation in fabric color, grain, or texture in natural wood products nor excessive warping of wood slats in high humidity areas. Loss of pleating is not covered if the product is not being cycled (held in the raised position a portion of the time). Normal wear and tear is not covered.

All moving parts, such as cords and strings (internal and external), will eventually wear out and fabric may fray. Comfortex considers these things as normal wear and tear and will carry a three year Limited Warranty. All fabric, including fabric vanes, panels, inserts, and shades carry a five year Warranty. Fabric cell separation is covered for a lifetime. See Comfortex Standard Return and Repair Policy for more details.

This Limited Warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials

or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this Limited Warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this Limited Warranty.

To obtain service, contact the Dealer from whom you purchased the product.

This Warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages are not allowable. Comfortex Dealers and Fabricators must use safety devices supplied by Comfortex in accordance with Window Covering Safety Counsel guidelines.

This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This Limited Warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this Warranty.

This Limited Warranty supersedes any previous versions.
