FABRIC INFORMATION

Choosing the Right Color Lux Roller Fabric

What are the fabric contents of each fabric?
- Classic Duck Light Filtering is 100% Polyester
- Classic Duck Blackout is 100% Polyester
- Strata Light Filtering is 100% Polyester
- Linen Light Filtering is 100% Polyester
- Linen Blackout is 100% Polyester with a foam coated backing
- 5% Screen is 70% PVC, 30% Polyester

Classic Duck Light Filtering and Blackout Fabrics
Classic Duck provides the perfect canvas for all 800 Color Lux colors. A simple weave works well with any complementary fabric textures. Available in Light Filtering and Blackout. Also available in Color Lux Custom Graphics.

Strata Light Filtering Fabrics
Strata provides the natural texture of hand woven fabrics that is popular in many home fashions today. The attention to detail in this fabric is apparent in it's perfect opacity and slightly textured surface. Strata is perfect for solids and patterns.

Linen Light Filtering and Blackout Fabrics
Linen provides the natural timeless look of linen fabric into Color Lux Roller Shades. Light Filtering allows in just the right amount of opacity to maintain privacy but allow light into the home. Linen Blackout is perfect for bedroom and media room applications.

5% Screen
The 5% Screen is a perfect basketweave screen fabric that balances privacy and light control. All shades printed on 5% Screen stays white and clean to the outside, which looks beautiful and provides optimal light reflectance. 5% Screen is also available in Color Lux Custom Graphics.

5% Screen Properties

5% Screen		Optical Properties		Thermal Properties		
		OF	TV	RS	TS	AS
Composition: 70% PVC	Chalk	5%	13%	68%	17%	15%
30% PES	Phthalate Free		Formaldehyde Free			
Weight: 410 g/m2	Lead Free		GreenGuard® Indoor Air Quality Certified			
UV Blockage: 95%	Zero VOC		Oeko-Tex Standard 100 Certified			
	Fire Rating: NFPA 701-10 TM #1					

TS = Solar Transmittance
RS = Solar Reflectance
AS = Solar Absorptance
TV = Visual Transmittance

OF= Openness Factor
1/4 CL = 1/4" Clear Glass
1/4 HA = 1/4" Heat Absorbing Glass

- **Section 4:** Shades in the orange section requires a 2½" tube/Galaxy 200 clutch

Color Lux® Roller Shades

SHADE SHUTTER

SHADE SHUTTER by Comfortex Window Fashions goes beyond the traditional roller shade by creating the appearance of an interior shutter window treatment.

All SHADE SHUTTERS are produced on 5% PVC screen for easy cleaning and an excellent view through to the outside. Using Comfortex's cordless roller shade system and digital print technology, SHADE SHUTTERS are easy to order and provide a great solution for high traffic utility spaces like garages and carriage houses where an alternative to high cost traditional shutters is a perfect fit.

View From Outside

Pricing

Pricing for SHADE SHUTTER is **$6.50 per square foot NET**.
DEALER DISCOUNTS DO NOT APPLY.

Specifications

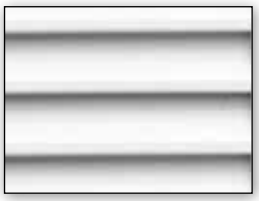
All SHADE SHUTTERS use White Cordless Deco-bar hardware, featuring fabric wrapped bottom rail and white valance attached to the Deco-bar to conceal the roll.

- Minimum width is 15½".
- Maximum width is 96".
- Maximum length is 96".

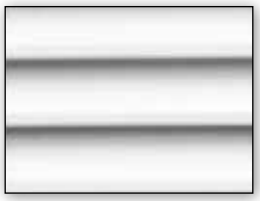
Louver Options

Two louver sizes are available in white only. Select a size when ordering.

- 3.5" Louver
- 4.5" Louver



3.5" Louver



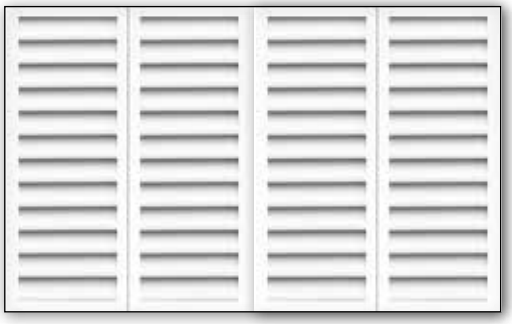
4.5" Louver

Number of Panels

The ordered width will determine the number of panels printed on the shade. Panels will be divided into equal sizes for two and four panel options.

One Panel
Width 24" or less

Two Panels
Width 24⅛" to 48"



Four Panels
Width 48⅛" to 96"

Shade Installation

SHADE SHUTTERS are printed on a reverse roll cordless deco-bar shade. When installing, the shade should be turned with the print side closest to the glass and the white valance facing the room.

CORDLESS OPTIONS

Cordless Roller Shades with Designer Cassette

Create a sleek look with the Designer Cassette Head Rail. Available in White, Ivory, Black, Satin Nickel and Bronze. See individual fabric specifications for minimum and maximum shade sizes. Cordless Roller Shades with Designer Cassette are available with the Smooth Face, Fabric Insert or Fabric Wrapped options.

See page 4 & 5 for the five Designer Cassette colors.

Cordless Roller DecoBar

This cord-free system operates like a spring roller shade with a gentle tug on the bottom rail to raise and lower the shade. See page 16 for mounting information and finished dimension information. Reverse roll is available for the Deco-Bar Cordless option

White Cordless Roller Deco-Bar

Black Cordless Roller Deco-Bar

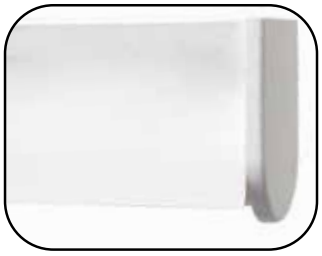
Ivory Cordless Roller Deco-Bar

Bronze Cordless Roller Deco-Bar

Satin Nickel Cordless Roller Deco-Bar

Cordless Roller DecoBar Standard Light Block

All Color Lux Roller Decobar shades now feature a standard light block behind the rail for enhanced light control between the rail and the fabric roll. The light block is always white to the room side and is a no charge feature exclusively for Color Lux Cordless DecoBar roller shades.



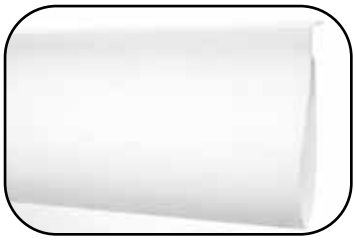
Standard Light Block

Cordless Roller DecoBar Fabric Valance

All Color Lux Cordless DecoBar shades now feature a beautiful fabric valance option. This option is perfect to conceal the roll of the cordless decobar system but still maintain the 1¾" for shallow applications.

Dealer List Price = $35.00

The fabric valance is available on Strata Linen Light Filtering, Linen Blackout, Duck Light Filtering and Duck Blackout fabrics and 5% Screen. The valance will always match the shade pattern and fabric.
All valances are 4.5" long to ensure that the roll and bottom rail is concealed when the shade is raised.



Fabric Valance Upgrade

Cordless Roller Deco-Bar Bracket Covers

The Cordless Roller Decobar now offers deco bar covers in White, Ivory, Black, Satin Nickel and Bronze that coordinates with the deco-bar color selected. Available for Inside Mount or Outside Mount applications. Brackets are White and Black only.

Bracket cover provides a clean finished appearance

Color Lux® Roller Shades

Table of Contents

CORDLESS OPERATION

Cordless Tassels and Pulls

Add a decorative tassel or pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Cordless Shades. Tassels and pulls are placed in the middle of the bottom rail. They feature an approximately 3-inch long cord which coordinates with the tassel color.

Tassels and pulls are attached to the back of the bottom rail with a clear clip. This allows for in the field modifications if needed.

ALL Color Lux Roller Shade hardware is available with any Tassel or Pull.

Wood Ball Pulls

Add a decorative Wood Ball Pull to help facilitate easy operation and keep the fabric on the bottom rail clean on all Color Lux Roller Shades. Select from 4 colors: Waxed, Natural, Whitewash and Cocoa.
Add: $19 Per Shade

Beehive Pulls

Add a durable and fashionable Beehive Pull to your shades for easy lifting and lowering. These are a great combination with solar shades and are available in White and Onyx.
The Beehive pull is 2 ⅝" long.
Add: $44 Per Shade

Wood Tassels

Select from 5 colors: Milky White, Ebony, Walnut, Light Pine or Mahogany.
A wood tassel is 1 5/16" long.
Add $19 Per Shade

Jute Ball

Add a simple and natural accent to any cordless roller shade with the Jute Ball Pull. Available in a single Jute color.
Add: $19 Per Shade

Droplet Pull

Wound with soft yarn in a elegant shape that fits comfortably into the palm of your hand. Available in Navy, Grey, Ivory and Clay.
The Pear pull is 2 ⅛" long.
Add: $44 Per Shade

Clear Handle for Cordless Roller Shades

A clear handle comes included with all cordless roller shade orders with an option to attach the handle during installation. This easy to attach and easy to remove clear handle is a great way to keep the rail or the fabric (for fabric wrapped option) clean and new after regular shade use. The width of the handle is 2⅛" wide.

Optional Clear Handle

Cocoa Whitewash Waxed Natural

Onyx White

Grey Navy Clay Ivory

Color Lux® Roller Shades
GENERAL INFORMATION

Reverse Roll on Color Lux Roller Shades
A reverse roll option is available at no extra charge with all Color Lux Roller Shade fabrics only on the Standard Roller Hardware and Cordless Roller with Deco-Bar Hardware. The reverse roll allows the fabric to roll off the front of the roller instead of the back (the traditional style). The reverse roll conceals the roller for a contemporary, tailored appearance.

Black Cordless Roller with Deco-Bar in Standard Roll

White Cordless Roller with Deco-Bar in Reverse Roll

Black Cordless Roller with Deco-Bar in Reverse Roll

Standard Roller in Standard Roll

Standard Roller in Reverse Roll

Bottom Rail Options
Color Lux Roller Shades can be built with your choice of 2 bottom rail options:
- Fabric Wrapped Bottom Rail (standard)
- Exposed Bottom Rail

Fabric Wrapped Bottom Rail
The shade fabric is wrapped around an elliptical grooved rail. Two clear plastic end caps secure the fabric in place. Select from bronze, white, vanilla, black or brushed aluminum.
Choose your bottom rail color when ordering.

Fabric Wrapped Bottom Rail

Exposed Bottom Rail
Select from bronze, white, vanilla, black or brushed aluminum bottom rail to add a decorative accent to the bottom of your shade. Two clear plastic end caps secure the fabric in place.
Choose your bottom rail color when ordering.

Bronze Exposed Bottom Rail

NEW Spring Assist with Designer Cassette for Skyline Roller Shades
Spring assist is a great option for larger shades that reduces the pull force of cordloop operated shades by up to 40%.

Headrail Options
- The NEW Spring Assist system is now available exclusively with the Designer Cassette option.
- All Designer Cassette options are available.

Clutch and Beadchain Options
All Skyline Clutch finishes are available. Select from White, Ivory, Satin Nickel, Bronze and Black.

Spring Assist is not available for motors and cordless shades.

Shade Size Specification
- Available in Sections 1 and 3 of Fabric Grids.
- Fabric grids with sizes in Section 3 are now available with Designer Cassette when ordered with a Spring Assist option.
- Most fabrics have a maximum shade length of 144", some exceptions apply. See fabric grids for details.
- Minimum width is 36"

Add $44 List PLUS Designer Cassette Surcharge.

All cordloop shades are available with Spring Assist. Select from any decorative clutch and Designer Cassette color

Color Lux® Roller Shades

FEATHERTOUCH™ CORDLESS GENERAL INFORMATION

FeatherTouch™ Cordless Features

Unlike other spring operated cordless shades, the FeatherTouch™ cordless roller system maintains a balance between the weight of the fabric and the strength of the spring. This provides:

- Fine adjustment and precision placement of the shade
- Alignment across multiple shades
- Safest option for kids
- Smooth operation
- All EZ Mount hardware shades feature a standard light block

List Price for FeatherTouch Cordless Upgrade Option: $44.00

EZ Mount Hardware ensures the proper spacing of brackets for the best performance.

FeatherTouch™ Operation

To operate FeatherTouch Cordless shades, simply pull on the center of the bottom rail until you reach your desired position. To lift your shade, push the bottom rail upwards. FeatherTouch does not have an release mechanism that raises the shade. Operation is all with a touch of your finger.

A light block is standard with every EZ Mount shade

FeatherTouch™ EZ Mount Hardware Finishes

FeatherTouch is available with the EZ Mount Hardware option or Designer Cassette.
EZ Mount hardware is available in three colors:

- White
- Black
- Designer Nickel **($66.00 List Surcharge)**

All FeatherTouch shades with EZ Mount hardware includes matching end cap covers for both inside mount and outside mount shades.

White EZ Mount Hardware

Black EZ Mount Hardware

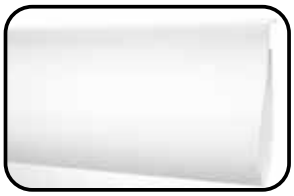
Designer Nickel EZ Mount Hardware

Designer Cassette (All Options)

FeatherTouch™ Cordless Options and Upgrades

Fabric Valance Option for Inside Mount Shades

FeatherTouch Cordless Shades feature an optional 4.5" fabric valance to conceal the EZ Mount Hardware. Valances are only available in matching shade fabric and color, and attach separately with the supplied brackets. A light block is attached to the back of the head rail for better light control. Fabric Valances are only available for Inside Mount shades ordered with the EZ Mount Hardware system. A surcharge of **$35.00 List** will apply.



Fabric Valance Upgrade

Clear Handle

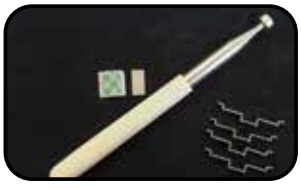
A clear handle is included at no charge for every FeatherTouch roller shade unit. To prevent damage to the roller shade fabric, handles are not installed at the factory. The width of the handle is 2⅛" wide.

Telescoping: To prevent telescoping, the factory has indicated the center of your bottom rail for easy and accurate handle placement.

Clear Handle

Magnetic Wand Kit

The magnetic wand is optional for hard to reach shades and attaches to the magnetic plate included with your kit. Four handle plates are included with every kit. The pole is extendable up to 33". A surcharge of **$41.00 List** will be applied. Other standard pole options are available.



Optional Magnetic Wand Kit

Additional Information

- FeatherTouch Cordless is NOT available as reverse roll.
- Decorative Pulls and Tassels are NOT available.
- A 6mm hex wrench is required if adjustment is necessary. Tension and upstops are set at the factory.

Color Lux® Roller Shades
TWO-ON-ONE HEAD RAIL SYSTEM

Two on One Head Rail roller shades are two roller shades sharing the same head rail; each roller operates independently.

Operating Options
- Two on One Head Rail can be combined with cord loop, PowerTouch Motorization, Simplicity Motorization and Simplicity Rechargeable Motorization hardware options.
- Controls will always be placed to the far left and far right. (Controls are NOT available between two shades)

Fabric Options
- Two on One Head Rail roller shades are available in all Color Lux Roller Shade fabrics.
- See price grids for standard size limitations.

Two-on-One No Head Rail Shades

The Two-on-One No Head Rail mounting option uses an intermediate bracket that reduces the light gap when two shades are placed side-by-side.

Cord Loop shades will always have the clutch on the outside of both shades to ensure proper tensioner mounting.

Standard Brackets are available in White, Black, Ivory and Bronze. Intermediate Brackets are available in White, Black and Ivory.

Bracket covers for the two outer shades are the same colors available for a Skyline Standard Roller Shade: White Black, Ivory, Bronze and Satin Nickel.

Two-on-One No Head Rail Shades are available with Cord Loop, Simplicity Motorization, Simplicity Rechargeable Motorization and PowerTouch Rechargeable shades.

PowerTouch Rechargeable wands will always hang to the outside of each Two-on-One No Head Rail shade.

Head Rail Options
- Available with Designer Cassette or Standard Roller Shades.
- Two on One roller shades are ONLY available on 1½" tube.
- Available with Designer Cassette with Insert Strip and Smooth Face options.
- Fabric wrapping is NOT available on two on one Designer Cassette.
- Minimum single section is 12".
- Maximum width for a single section is 106".
- Total maximum width in Designer Cassette head rail is 140". Maximum shade sizes will vary by fabric
- Center gap between roller shades is ⅜".

TWO ON ONE CASSETTE PRICING EXAMPLE:

36" x 60" Classic Duck

Blackout Fabric	$380 x 2 = $760
Designer Cassette Fabric Wrap	$95 x 2 = $190
PowerTouch Motorization:	$124 x 2 = $248

Manufacturer's List Price = $1,198

- Specify shade total width and the two individual section widths. **Please Note:** The two individual sections must add up to the total width.

TWO ON ONE NO CASSETTE PRICING EXAMPLE:

For Satin Nickel Two-on-One No Head Rail Shades with PowerTouch Rechargeable:

36 x 60 Linen Light Filtering Fabric:	$343 x 2 = $686
Add Satin Nickel Skyline:	$29 x 2 = $58
PowerTouch Motorization:	$124 x 2 = $248

Manufacturer's List Price = $992

Color Lux® Roller Shades

DUAL ROLLER HARDWARE SYSTEM

Dual Roller Shades are available with Skyline Cord Loop and Simplicity Rechargeable Motorization. They are the perfect way to combine both light filtering and blackout fabrics into a single shade for the ultimate light control. Any fabric or screen in the Color Lux Roller shade program can be mixed and matched to create a versatile window for any time of day.

The front roll of fabric is always a reverse roll. The back roll of fabric is always a standard roll. Clutches are always on opposite sides of the shade to ensure a location for tensioner mounting.

Dual Roller Shades are not available with cordless operation or PowerTouch Rechargeable motorization. Bracket covers are available in white or black for outside mount shades only. Brackets are available in black and white.

Candeling will occur between the upper and lower fabric rolls if a Blackout fabric is selected as the back roll. This allows light to come through. Blackout fabric can be selected for the front roll to prevent this.

Simplicity Rechargeable Motorization is available with Dual Roller Shades to ensure easy installation without the need to mount two battery wands.

See price grids for Dual Roller Shade Specifications. Shade minimums and maximums are identical to single shade systems. Not available with 2" tube.

A **Highlights Valance** is the perfect option to conceal both roller tubes on a Dual Roller Shade system. Highlights Valances are available in 6", 8", 10", 12", 14" and 16" heights. See page 43 for details.

Color Lux® Roller Shades

DESIGNER CASSETTE WITH RETRACTABLE CORD HARDWARE SYSTEM

The Retractable Cord system for Color Lux Roller Shades is a perfect option for hard to reach shades when a continuous loop is not desired. The retractable cord system features smooth and easy to use operation. The Designer Cassette option is required for all Retractable Cord shades.

Colors

Clutch: is available in White or Black. Can be coordinated with any Designer Cassette option.

Cords and Tassels: White or Black

Operation

The clutch can be ordered to the right or left of the shade so the pull cord is easy to reach.

To raise, simply pull the cord straight down until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially raises the shade. The shade can be stopped at any point while raising.

To lower, simply pull the cord out towards you until it reaches full extension and then allow the cord to retract completely into the head rail. Each stroke partially lowers the shade. The shade can be stopped at any point while lowering.

Light Gap

Please note that there is a ¾" light gap on the operation side of all roller shades.

Minimum ordered width for Retractable Cord shades is 12". See fabric specification pages for maximum sizes.

Cord Length

All retractable cord shades have a default cord length that is 40% of the total length. Custom options are available when ordering.

¾" light gap on operation side. Clutches are available in white and black with tassels and cords in white or black

Color Lux Retractable Cord Pricing Example:

36 x 60 Linen Light Filtering Fabric:	$343
Add Retractable Cord Surcharge:	$43

Color Lux® Roller Shades

DESIGNER CASSETTE WITH SIMPLICITY RECHARGEABLE ROLLER WAVE

Simplicity Rechargeable Roller Wave

The Simplicity Wave Motor features a roller motor with integrated batteries. Simplicity Wave requires a Designer Cassette option and uses a telescoping wand to raise or lower the shade.

The Simplicity Rechargeable Roller Wave option is available in all sizes in Section 1 of each fabric price grid.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity Rechargeable Roller Wave shades are programmed at the factory with the "up" and "down" limits.
- Order at least one charger.

Telescoping Wand

- Extends to 33" for hard to reach shades.
- Wand retracts to 9" for easy storage.
- Wand is silver with white handle and white magnetic tip.
- Wall mount plate included for convenience.
- Wand is universal and will operate all Simplicity Wave shades.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery integrated within the motor. Must specify charger when ordering a PowerTouch Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire.

Mounting Requirements for Simplicity Rechargeable Wave with Designer Cassette

No special installation hardware or wiring requirements are needed to install Simplicity Wave Roller Shades with Designer Cassette Head Rail. A battery wand is not required.

Simplicity Wave for Roller Shades

Standard Color Lux Discounts apply to motorized lift systems pricing.

Motor

• Radio Frequency Motor Includes integrated rechargeable battery	$127.00

Simplicity Wave Wand

Color Lux® Roller Shades
FRICTION FIT MOUNTING SYSTEM | DESIGNER CASSETTE | SKYLINE ROLLER | CORDLESS DECO BAR

FRICTION FIT MOUNTING SYSTEM
The Friction Fit Mounting System is the perfect solution for hard to drill materials and where drilling is not desired or allowed. There is NO BRACKET INSTALLATION REQUIRED.

This pressure mounted system utilizes an aluminum rail designed with a high tension spring that is pre-fabricated with your ordered shade. INSTALLATION BRACKETS for your ordered shade ARE PRE-ATTACHED AT THE FACTORY for easy installation on site.

White Friction Fit Rail with Standard Roller

To install, simply insert the rail within the window opening and secure the lever. This increases the pressure to the ends of the rail, allowing for a snug fit in the window opening.

Manufacturer's List Price: $78

Friction Fit is ideal for many applications, such as:

- Brick
- Concrete
- Cinderblock
- Steel*
- Aluminum*
- Tile*
- Popcorn and other textured finishes
- Wood

* Smooth surfaces will require use of included double-sided adhesive.

LEVER LOCATION
The lever will always be on the clutch side for cordloop shades. For cordless and motorized, it will always be on the right.

Deductions for Cordless and Designer Cassette shades will be unchanged.

See below for Skyline Standard Roller Shades deductions. Skyline standard roller is not available with end caps.

Minimum Mounting Depth is 2⅛"

Maximum width for all mounting systems is 84".

SIMPLICITY BLUETOOTH™ RECHARGEABLE MOTORIZATION

PRODUCT	Simplicity PowerTouch	Simplicity Remote	NEO Smart Controller	Simplicity w/ Bluetooth	Rechargeable SOMFY	12v Low Volt Hardwire
Roller	•		•	•		•
Soft Roman	•		•	•		

Benefits of Simplicity BlueTooth™ Motorization: Featuring the Free Color Lux Mobile App

- New "state of the art" 7.4v rechargeable motorization operates with both BlueTooth and Radio Frequency control technology.
- Download the new Color Lux Mobile Bluetooth App FREE on the Apple App Store for iPhone or the Google Play Store for Android.
- Optional Simplicity radio frequency remote control with choice of 5 channel, 6 channel with timer, or 14 channel remote.
- Optional Simplicity Smart Controller (NEO) for remote operation of shades which integrates with Amazon Alexa and Google Assistant devices.

Features of the Color Lux Mobile Bluetooth App:

- Controls your shade directly from your phone with Bluetooth control.
- Has a shade position display indicator. See screen to the right.
- Has a battery charge level indicator.
- Controls the shade using easy swipe or control buttons.
- Controls up to 5 shades simultaneously and no limit to the number of shades connected to a single account.
- Has timer and scene setting options.

Please Note: There are many factors affecting Bluetooth range

- Physical obstacles in the transmission path
- The antennas should be exposed for best performance
- Bluetooth 4.2 supports 10 meters indoor range (~33 feet).

Color Lux® Roller Shades

POWERTOUCH RECHARGEABLE FOR NO HEAD RAIL & DESIGNER CASSETTE

Color Lux Roller Shades can be fabricated with the PowerTouch™ Rechargeable option.

The PowerTouch™ Rechargeable provides an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch™ Rechargeable uses Simplicity motors and components.

- PowerTouch™ Rechargeable is available for Roller Only and Designer Cassette
- The Roller Only option uses Skyline Hardware brackets and bracket covers available in White, Ivory, Black, Satin Nickel and Bronze. Wand and Pendant are always White or Black.

Color Lux Roller Shade PowerTouch™ Rechargeable Upgrade Surcharges

All standard discounts apply to PowerTouch™ Shades.

- PowerTouch™ Rechargeable Pendant and Wand: $124.00
- Charger for PowerTouch™ Rechargeable (required): $29.00

PowerTouch™ Rechargeable Roller Shade Specifications

See specific fabric price grids for minimum and maximum shade widths and lengths. Shade sizes in grey shaded sections are NOT available with the PowerTouch™ Rechargeable option.

PowerTouch™ Rechargeable Shades Operation

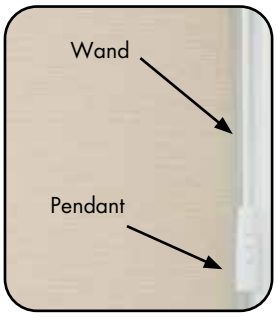
Press the up or down button on the pendant to raise or lower the shading to your desired position.

Programming the upper and lower limits is completed at the factory. These can be easily adjusted in the field if desired.

Programming the favorites position is completed after shade installation.

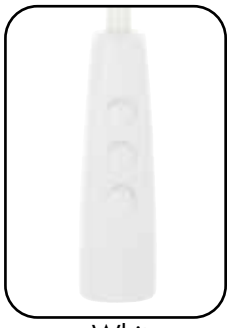
Please refer to the installation instructions at comfortex.com/comfortex-dealers.

PowerTouch™ Rechargeable Appearance



- The PowerTouch™ Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The No Head Rail PowerTouch™ Rechargeable wand must be attached to the motor before mounting.
- The wand and pendant hangs down the front of the shades
- The top and bottom buttons lift and lower the shade to the upper and lower limits. The center button is the favorites and stop button.
  from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.

PowerTouch™ Rechargeable Color Options with Designer Cassette and No Head Rail Roller



White

Black

- Shades with Black or Oil Rubbed Bronze head rail will be built with black wand and pendants standard.
- Shades with White hardware will be built with white wand and pendants standard.
- Shades with Fabric Wrapped Head Rail will be built according to the head rail color selected.
- Shades booked as a no head rail roller will have a prompt to select wand color.

Wand and Pendant Location with Designer Cassette and No Head Rail Roller

The standard location for the wand and pendant is on the right. Please specify when ordering.

Color Lux® Roller Shades

POWERTOUCH RECHARGEABLE FOR NO HEAD RAIL & DESIGNER CASSETTE

PowerTouch™ Rechargeable Wand Length with Designer Cassette and No Head Rail Roller

Shade Length	Standard Wand Length
Shades up to 30″	1′ (12″)
30″ to 52″	2′ (24″)
52″ to 78″	3′ (36″)
78″ to 100″	4′ (48″)
100″ to 120″	5′ (60″)

- Custom length wands are not available with PowerTouch™ Rechargeable. Standard wand lengths can be changed at no cost.

Mounting Requirements for PowerTouch™ Rechargeable Shades with Designer Cassette

- No special installation hardware or wiring requirements are needed to install PowerTouch™ Rechargeable Roller Shades with Designer Cassette Head Rail.
- A battery wand is not required with PowerTouch™ Rechargeable shades.

Mounting Requirements for PowerTouch™ Rechargeable Shades with No Head Rail Roller

- On No Head Rail roller shades, the wand must be attached to the motor with two screws (included) before mounting the shade.
- A battery wand is not required with PowerTouch™ Rechargeable shades.

PowerTouch™ Rechargeable Shades Do Not Have a Separate Battery Wand

There is no battery wand with the PowerTouch™ Rechargeable shades. The battery pack is integrated inside the roller tube to make mounting easier and more convenient.

The battery is recharged via the recharging port on the PowerTouch Rechargeable™ Wand.

Recharging Port

Minimum Width Requirements for PowerTouch™ Rechargeable Shades with and without Designer Cassette

Inside Mount = 18⅜″
Exact Mount = 18³⁄₁₆″
Outside Mount = 18″

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery integrated within the motor. Must specify charger when ordering a PowerTouch Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 156″ (13′) wire.

PowerTouch™ Rechargeable Roller Shades Warranty

Please see page 144 for complete Comfortex warranty information.

Table of Contents

All standard discounts apply.

Simplicity Bluetooth™ Rechargeable Motorization

All Roller Shade Fabrics

Minimum Width with No Head rail: 19½"
Minimum Width in Designer Casssette: 18½"
Maximum Width: See roller price grids for motorized shades specifications.

Simplicity Motors Appearance

The Simplicity Rechargeable motor and batteries are concealed within the roller tube.

Mounting Requirements

Standard Skyline Roller Hardware

No special installation hardware or wiring requirements are needed. See page 14 for mounting information.

Dual Roller Shades

No special installation hardware or wiring requirements are needed. See page 24 for mounting information.

Designer Cassette Hardware

No special installation hardware or wiring requirements are needed. See page 22 for mounting information.

4" Skyline Fascia Hardware

No special installation hardware or wiring requirements are needed. See page 30 for mounting information.

Simplicity Rechargeable Motor Batteries

The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Battery Wand Mounting is Not Required

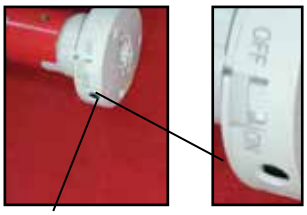
No external battery wand is required to operate a Color Lux Roller Shade with Simplicity Rechargeable Motorization.

Simplicity Rechargeable Motor Battery Life

Rechargeable battery is built into the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.



Charging Port Close-Up

Battery Charger for Simplicity Rechargeable Motors

An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering a Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor.

The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Important Information about Simplicity Rechargeable Motor Shade Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This my interfere with signals from the remote control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged. The shade will also beep when the remote button is pressed if the battery is low.

Color Lux® Roller Shades
SIMPLICITY BLUETOOTH™ RECHARGEABLE MOTORIZATION

Heavy Duty Simplicity Bluetooth™ Rechargeable Motorization for 2" and 2½" tubes

Heavy Duty Motors are now available for all roller shades that require a 2" or 2½" tube. See shaded sections in each fabric grid for sizes. Motors are available with the no head rail option or with 4" Skyline Fascia. Brackets are available in White, Black and Silver. Even if not required, Heavy Duty Motorization can be ordered for smaller shades to maintain consistent appearance.

Heavy Duty Motorization is NOT available with Designer Cassette or Dual Roller Shades.

Minimum Width of Heavy Duty Motorized Shades is 24".

Battery is integrated within the motor unit.

The 12 Volt charger must be used to recharge heavy duty motors. **Solar Panel Option is NOT available for Heavy Duty Motorization.**

Motor Mount

Heavy Duty Motor available with Skyline 2" bracket (also available with 4" Skyline Fascia)

Color Lux Roller Shades with Heavy Duty Motorization

- Heavy Duty Simplicity Bluetooth™ Rechargeable Motorization: $456.00
- 12V Charger for Heavy Duty Simplicity Rechargeable Motorization (required): $62.00

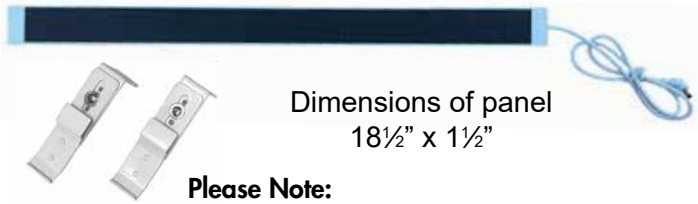
All standard discounts apply.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.



Dimensions of panel
18½" x 1½"

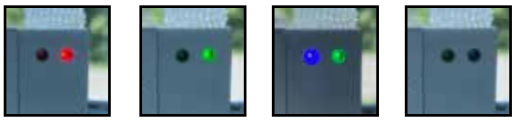
Please Note:
LED solar panel cord length is 24". Make sure to order 48" extension cord if needed.

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

Solar Panel LED Lights

Red Light: Indicates optimum direct sun exposure
Green Light: Indicates sunlight is enough to charge battery
Blue Light: Indicates battery is chargeing. Blue light is off when not charging (including when the battery is full)
No Lights: Night or very low sun

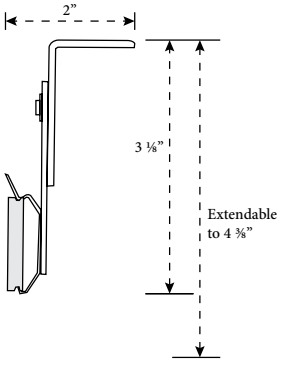


Red Light Green Light Blue Light No Light

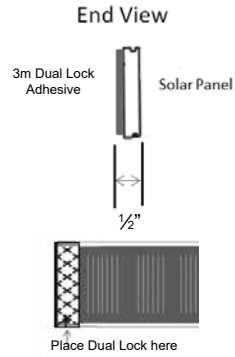
Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Bracket Method



Tape Method



Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Color Lux® Roller Shades
SIMPLICITY BLUETOOTH™ RECHARGEABLE MOTORIZATION

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand. The wand extends up to 31″ in length.

Simple to use! Place the magnetized wand tip on the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.
- Great for out of reach windows

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.
- Extension cable plugs into charging port of Simplicity Rechargeable shades.

Port/Wand Connection

Battery Charger

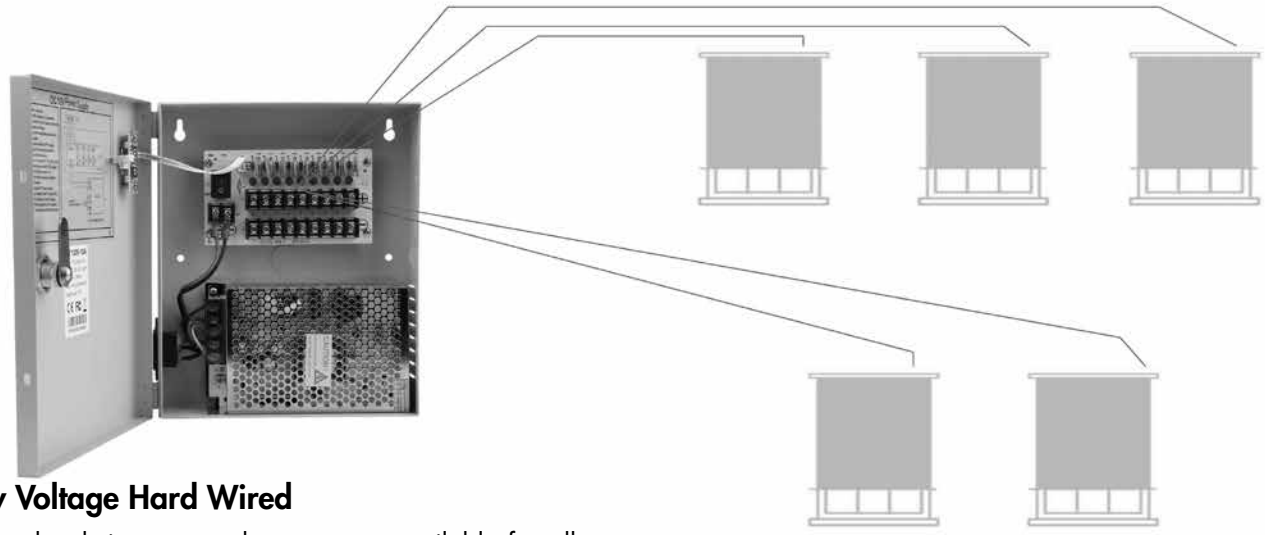
Wand Base

Battery Charger - SOLD SEPARATELY

You must specify charger when ordering a Simplicity Rechargeable Motorized Shade. The charger plugs into the wand base. The 8.4 Volt charger requires a standard power outlet to recharge the motor. The charger is black and comes with a 156″ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep.

Color Lux® Roller Shades

12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM



12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for all Roller Shades up to a 1.5" tube. **Heavy Duty Motors are NOT available with Low Voltage Hard Wired Motorization.** The system offers a maintenance-free power option for Simplicity Motorized Shades. The Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

Simplicity Motorized Upgrade and Surcharges
Standard discounts apply to motorized lift systems pricing.

Wall Mount Transformer

- Wall Mount Transformer $276.00

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

- **Product Description:**

-12v10a 9ch
-Input Voltage Range : AC90V-264V
-Input Frequency Range : 50Hz-60Hz
-Output Voltage Range : DC12V+/-5%
-Output Current : 10 Ampere
-Output Power : 120 Watt
-Output Ripple&Noise : ≤42MV
-Output Efficiency : ≥83%
-Output Fuse Type : PTC
-Output Fuse Rating : 2A
-Environment Operating Amb.Temp : -30 ~45
20%~90%RH
-Environment Storage Temp : -40 ~85 10%~95%RH

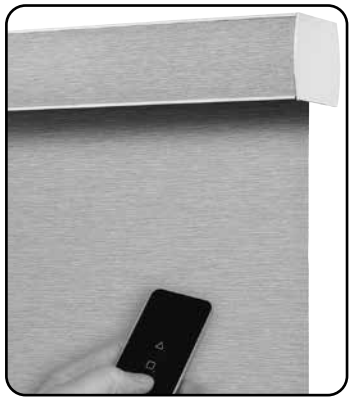
Color Lux® Roller Shades

12V SIMPLICITY MOTORIZATION



Color Lux Roller Shades can be motorized with the non-rechargeable Simplicity Motorization system. The Non-Rechargeable motor can be powered by either a single 12 Volt battery wand or a 12V DC Power Supply Unit. Simplicity motors are compact and use a radio controlled remote to raise or lower the shades.

Head Rail Options with Simplicity Motors:

- R-Series
- Skyline Standard Roller
- Designer Cassette
- 3" Fascia
- 4" Skyline Fascia

Simplicity Motorized Upgrade and Surcharges

Motor	
• Radio Frequency Motor with battery wand:	$335.00
Hand Held Remote	
• 5 Channel Remote:	$43.00
• 6 Channel Timer Remote:	$70.00
• 14 Channel Remote	$70.00
DC Power Supply - Replaces Battery Wand	
• Wall mount transformer DC12V/2A	$78.00
Battery Wand Extension Wires	
• 48" Extension Wire	$19.00
All standard discounts apply.	

The 6 Channel Timer Remote can operate up to six shades individually or in groups and has a timer feature to create schedules for automatic shade operation.

Standard Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand.
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the limited lifetime warranty.

12V Simplicity Motorization and Hardwired Minimum Shade Sizes

Minimum Width with No Head rail: 12"
Minimum Width in Designer Casssette: 12"
Maximum Width: See roller price grids for motorized shades specifications.

Standard Roller Hardware Appearance

Shade Features

- **Bottom rail style:** Fabric Wrapped or Exposed bottom rail
- **Bottom rail color:**
  Fabric Wrapped: White, vanilla, bronze, black or brushed aluminum.
  Exposed: White, vanilla, bronze, black or brushed aluminum.

The motor lead is 6" long and the battery wire is 10" long.

White and Black Adapters for Skyline Motorization with no head rail

DC Power Supply

12 Volt DC power supply is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shade with a Simplicity motor. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" length x 1¼" deep.

Standard Simplicity Motor Battery Wand Mounting

The battery wand is wall or ceiling mounted utilizing white battery wand clips. It also can be clipped to the Designer Cassette head rail.

Batteries are needed to operate Simplicity motors. The battery wand measures 17¼" and comes with eight alkaline batteries and is white in color.

Battery Wand

Color Lux® Roller Shades
SIMPLICITY CONTROL OPTIONS
Simplicity 7.4V Rechargeable and 12V Remote Control Options

Simplicity 5 Channel Remote

The Simplicity Remote features 5 individual frequency channels and an All channel that will operate all the shades at once.

The 5 Channel Simplicity remote is available in white and black. All remotes come with a holder which can be mounted to a wall for easy storage.

The remote controls utilizes one 3V battery (CR2430). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Remote control batteries are not covered by the limited lifetime warranty.

Standard Simplicity Battery Operated Motorized Shades Warranty

Please see page 146 for complete Comfortex warranty information.

Simplicity 14 Channel Remote

The Simplicity 14 Channel remote can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Roller Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet. A 14 Channel (14C) remote can be utilized on all Simplicity Motorized Shades.

Please Note: Unused channels can be hidden

Simplicity 6 Channel Timer Remote

The 6 Channel (6C) timer remote combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 6-channel hand held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

THE FACTORY DOES NOT PROGRAM CHANNELS FOR SIMPLICITY RECHARGEABLE MOTORS.
The factory programs the upper and lower limits of every shade. Channel programming is completed after shade installation.

Please Note:

- Not all motors run at the same rate of speed.
- REMOTES ARE NOT LINKED TO SHADES FROM THE FACTOR**Y. SHADES MUST BE LINKED AFTER SHADE INSTALLATION.**
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE SIMPLICITY RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2⅜″
- Length of controller: 2 15⁄16″
- Height of controller: 1⅛″

Simplicity Smart Controller	
	• Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Control Shades • Powered by NEO Smart Blinds App • Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?

The App is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the App and your shades.

Highlights Valance Specifications

Valance Width with Keystone: Maximum valance width is 216" for all Color Lux Roller Fabrics.

- Fabric cannot be railroaded
- Keystone placement is pre-determined. Custom placement is not available.
- Seaming is not available.
- Multiple Keystones may be required for larger widths. (ex. 216" Highlights Valance will require TWO Keystones, each 72" wide).

Valance Heights: 6", 8", 12", 14" and 16"

Standard Return Sizes:

- Inside Mount: None
- Outside Mount: See chart below.

Highlights Cornice Valance Upgrade can ONLY be ordered as a SEPARATE stand alone product. They cannot be ordered with shades.

Inside Mount: Bracket attachment location is placed flush to the top of the valance.
Outside Mount: Bracket attachment location is placed 1" down from the top to better conceal brackets.

Highlights Ordering and Measuring Instructions

Inside Mount Valance ordered SEPARATELY

- Inside mount valances are made without returns.
- An inside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the inside width at the top of the window where the valance is to be installed. Measure in multiple spots to ensure accuracy. If there are variances, supply the smallest measurement.
- Please Note: The finished dimension of your inside mount bracket will be 3/16" less than your ordered width (see Figure A). Example: An inside mount valance ordered at 36" wide will be made 35 13/16".
- Please Note: You will need up to 3½" of mounting depth to ensure your valance is fully recessed and flush with your window opening.

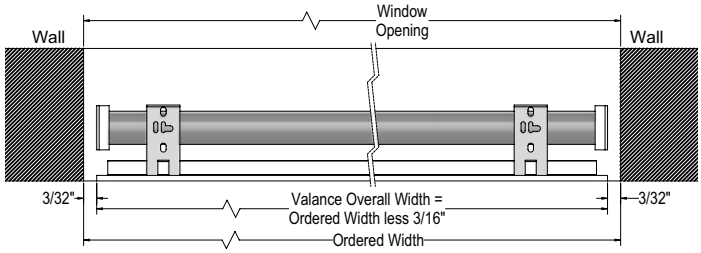

Figure A

Highlights Ordering and Measuring Instructions

Outside Mount Valance ordered SEPARATELY

- Outside mount valances come in seven return options.
- An outside mount Highlights Valance will come with its own set of mounting brackets. In most scenarios, the valance brackets must be installed separately from the shade.
- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover.
- **Please Note:** When ordering outside mount valances, the finished overall width of your valance will be your ordered width plus 1¼" (see Figures B and C). **Example:** An outside mount valance ordered at 36" wide will be made 37¼".
- **Please Note:** You will need ½" of surface area to mount your valance (see Figure B).

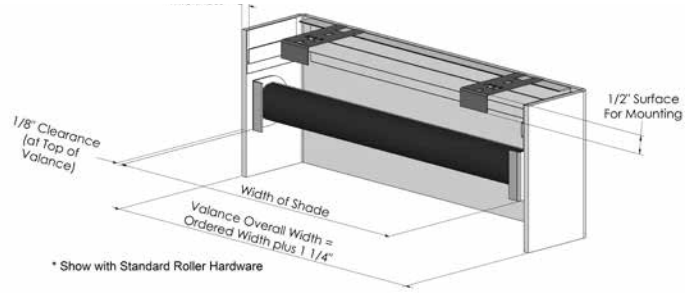

Figure B

Outside Mount

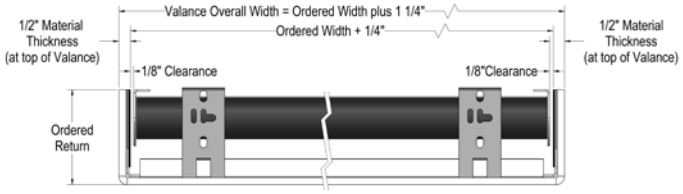

Figure C

Valance with Return Size Options

- Measure the width of the area you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover. See Figures D-F for measuring information.
- Next, determine the length of your desired returns. Use the chart on page 43 for the mounting depth required and inside valance depth clearance provided for each return size.

Outside Mount

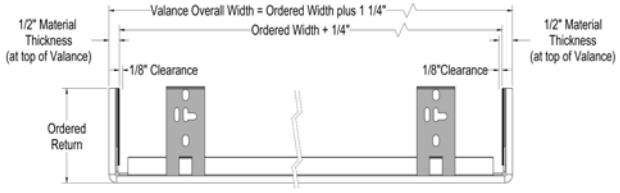

Figure D

Valance Return Size Options (Cont.)

Inside Mount

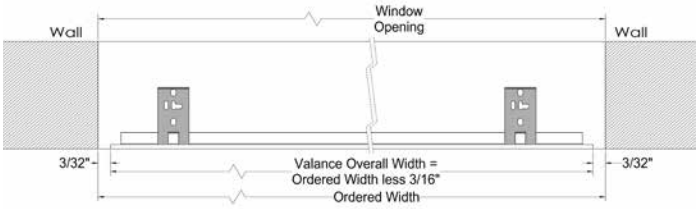

Figure E

Shallow Mount

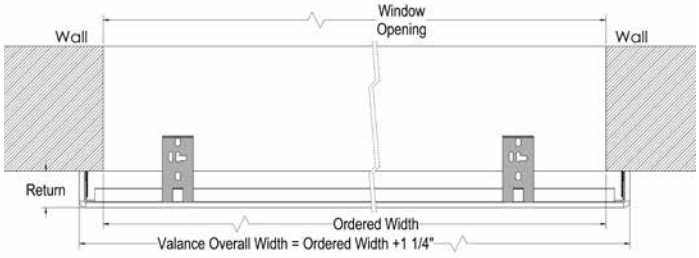

Figure F

Valance Returns

- Seven return size options are available.
- **Return Sizes:** To determine a return length, add the component dimensions (mounting brackets, etc.) up to the wall. Subtract the measurements from any protrusions (molding, etc.), then choose from one of the pre-determined return sizes (from the chart on page 43 that best fits your application.
- **Return Coverage**
  Ordered return size refers to the distance from the face of the valance to the back of return. See Figure G.

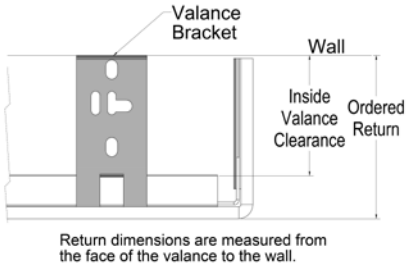

Figure G

Clearances

Shallow Mount Bracket

- 1½" Return provides an inside valance clearance of ⅞".
- 2" Return provides an inside valance clearance of 1⅜".
- 2½" Return provides an inside valance clearance of 1⅞".

Outside Mount Bracket

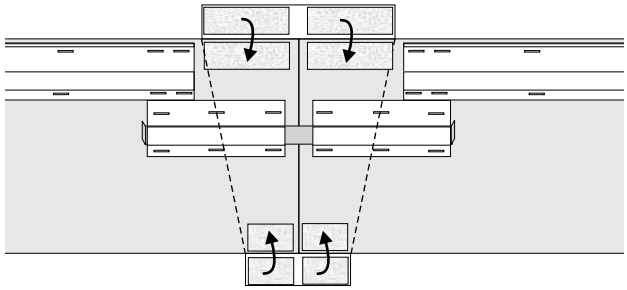
- 3" Return provides an inside valance clearance of 2⅜".
- 4" Return provides an inside valance clearance of 3⅜".
- 5" Return provides an inside valance clearance of 4⅜".
- 6" Return provides an inside valance clearance of 5⅜".

Color Lux® Roller Shades

COLOR LUX® HIGHLIGHTS CORNICE VALANCE WITH KEYSTONE

Keystone Specification

- All keystones will automatically be wrapped with matching Color Lux Roller Fabric.
- Available in Classic Duck, Linen and 5% Screen.
- Keystones will be provided separately and installed on site.
- Ordering two optional keystones is currently not available. Two keystones may be required for some wider width valances.
- Valance panels are divided in half when the Keystone option is ordered. Custom locations for keystone placement is not available.

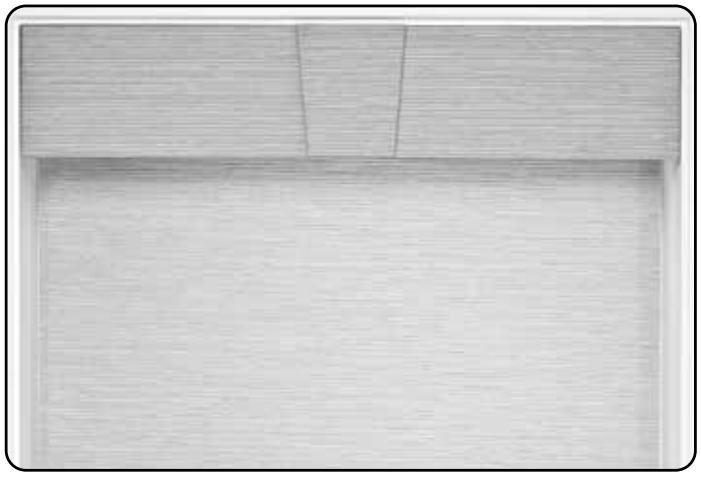


Rear view of the Highlights Valance Keystone. Not visible to room side.

Front view of the Highlights Valance Keystone.

Keystones for Panel Tracks

- Keystones ordered for Panel Tracks should use the return sizes list below to ensure clearance of the Panel Track Rail.
- 2 Panels Side or 4 Panel Split = minimum 3" returns
- 3 Panels Side = minimum 3" returns
- 4 Panels Side or 6 Panel Split = minimum 4" returns
- 5 Panels Side or 8 Panel Split = minimum 4" returns



A Keystone option is available for all shade widths so every Highlights Valance in a room will be uniform

How to order Color Lux® Custom Graphic Shades

STEP 1. FAX OR E-MAIL YOUR ORDER

Fax the appropriate Color Lux® Custom Graphics order form (Roller, Panel Track or Cellular) located on comfortex.com/comfortex-dealers to (800) 336-4580. Or e-mail the order form to customercare@comfortex.com. Upon receipt and review of your order, you will receive a work order confirmation number from Comfortex. Please be sure to reference this number when submitting your artwork in Step 2.

STEP 2. SOURCE AND SEND YOUR GRAPHIC

Source your graphic from a stock photo site such as www.istockphoto.com or use your own high resolution photography. Send your files via e-mail to: customgraphics@comfortex.com OR ship a CD/portable media containing your graphics to:

Color Lux® Custom Graphics
Comfortex Window Fashions
21 Elm Street
Maplewood, New York 12189

Using Online Stock Agencies for Graphics for Your Shades

Sometimes, finding the right graphic or photograph to fit your shade size, shape, or content can be challenging. Fortunately, many web sites offer a great solution. Online stock agencies allow you to purchase reasonably priced, royalty-free digital illustrations, graphics, photographs, patterns, and more in thousands of different subject areas. Some of the more popular sites include:

- thinkstock.com
- istockphoto.com
- veer.com
- shutterstock.com
- gettyimages.com
- 123rf.com
- photosearch.com

Using these sites is easy, simply follow these steps:
Step 1. Create an account and search for your image (i.e. apples).

Step 2. Select, purchase, and download the image you like. You may be given a choice of sizes, so take care to select an option large enough for your needs.
Be sure to include the Work Order Confirmation Number received from Comfortex Customer Service with your graphic files.

STEP 3. APPROVE YOUR PROOF

The Color Lux® Custom Graphic Team will email a PDF proof of your shade order which must be reviewed and approved for production to begin. Once the artwork is approved, it will take 2 weeks for your order to be printed, assembled, and shipped.

Color Lux® Graphic File Specifications

Preferred Formats

- Vector files/Adobe Illustrator (AI or EPS)
  Please convert all typography to paths prior to submitting your vector artwork.
- TIFF, JPG/JPEG, or Adobe Photoshop (PSD) files
  with a minimum resolution of 100 pixels per inch at 100% size. For example, a shade measuring 30" x 40" should be supported by a graphic measuring at least 3000 x 4000 pixels.
- Adobe Acrobat (PDF) files
  created in "Press Quality" or "High Quality Print" with a minimum resolution for all raster elements of 100 pixels per inch at 100% size.

Graphics optimized for, or harvested from the internet are, in general, not suitable for reproduction onto shades.

Comfortex will seek to verify ownership and rights to reprint for all images showcasing copyrighted material.

COLOR LUX® PANEL TRACK SYSTEM

COLOR LUX
Designer Cellular & Roller Shades

Color Lux® Panel Track Shades

SYSTEM FEATURES & OPTIONS

The Color Lux Panel Track Shade system offers versatility and a beautiful modern design for effective light control and outstanding performance. Panel track systems are a beautiful option for large windows and room dividers. Available in Strata Light Filtering, Linen Light Filtering and Blackout, Classic Duck Light Filtering and Blackout, and 5% Screen.

Stacking Options

Color Lux Panel Track Shades are available with 3 stacking configurations: split, left and right stacks.

- Split stack panels draw open to both sides equally. Controls may be placed on either side and is only available in cord control.
- Side stack is available as left or right stack and is available with a white wand or cord control.

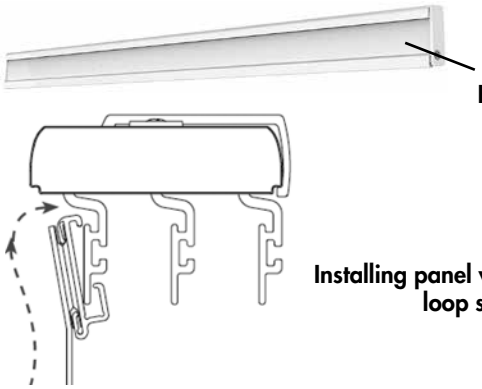
Split Stack

Left or Right Stack

Closed Side Stack

Panel Attachment

A hook and loop strip is sewn onto every panel to provide a secure attachment. The patented panel attach method makes it easy to attach the panels even after installation of the rail.



Hook and Loop Strip

Installing panel with hook and loop strip

Head Rail Colors

Select from the white or aluminum system hardware system. (Wand is always white.)

White Head Rail

Aluminum Head Rail

Bottom Rail

Panel track bottom rails are designed for smooth operation and allows all panels to glide smoothly past each other.

- Bottom rails are designed to match perfectly with the head rail in exposed white or silver.
- Finished bottom rails will be ½" higher than measured drop on inside mount shades.
- Bottom rails are not connected to each other on this panel track system.
- Fabric Wrapped bottom rails are available as an option.

Fabric Wrapped Bottom Rail

Fabric Panels and Custom Overlaps

- Panels will be fabricated with a 2" overlap as standard. Custom overlaps are available at 1½", 2½" and 3". Please specify when ordering.
- Panels are attached with a hook and loop strip to allow for subtle fabric adjustment in the field.
- Each panel traverses the track using ball bearings, creating smooth operation for wand and cord control
- Panels follow a single lead panel in sequence to open and close.
- Panels position exactly behind one another in the open position.
- There is no light gap between the rail and the panels.
- Panels will reach the end of the track.

Please Note: Panels may not hang perfectly flat immediately upon installation. Panels may have a billowing or wavy appearance at the time of installation which may correct itself over time.

Replacement panels are available.

Color Lux® Panel Track Shades
SYSTEM FEATURES & OPTIONS

Control Options
The panel track system uses a cord or wand for traversing the fabric panels. Cord control is standard with every panel track shade. Wand control is available at no additional surcharge. Please specify when ordering.

Cord Control

Grey Cord Control

- The nylon cord is white or grey to coordinate with hardware.
- Standard length of the cord is 10″ less the ordered length. Custom cord lengths are available. Please specify when ordering.
- Standard cord placement is right stack with right cord.
- Operating cords are located on the outside edge of the panels.
- Tensioner for cord control is always white.
- Tensioner must always be placed so the cord reaches full extension.

Wand Control

The traversing wand is a convenient alternative to a traditional cord control. This single control system protects children and pets from injuries caused by loop cords.

White Wand Control

- The wand control is always white.
- Only available on side stack systems.
- Standard wand placement is on the outside leading edge of the left or right stack.

Standard Wand Lengths

- Shades up to 72″ in Length: 36″ wand
- 72″ to 96″ in Length: 48″ wand
- 96″ to 120″ in Length: 60″ wand
- 120″ to 144″ in Length: 72″ wand

Custom lengths are not available but you may select from one of the standard wand lengths above.

Panel Widths
To achieve the best performance on this panel track system, panels are designed within the following parameters:

The minimum width for a single panel is 6″.
The maximum width for a single panel is 48″.
The maximum panel height is 144″.

See price grids for the minimum number of panels that will be available at the desired width.

More panels can be ordered at an additional surcharge and to achieve the desired panel width.

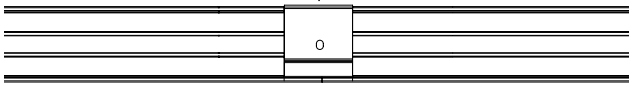
The standard panel overlap is 2″. Custom overlaps are available.

Example: The standard split stack on a 96″ wide opening would have 4 panels at 26″ wide with a 2″ overlap. If 6 panels are desired, each panel would be 18″ wide.

Track Specifications

The minimum width of a track is 18″.
The maximum width of a track is 216″.

The maximum width of a single panel track is 216″
When the total width is ordered over 100″, tracks will be split in half and a connector bracket will be provided.



Panel Stack Back
The stack back will be equal to a single panel width. It will never be less than 12″ and never exceed 48″.

To determine an approximate stack back:
Ordered Width ÷ Number of Panels = Stack Back within +/- 2″. (with 2″ standard overlap)

Color Lux Custom Graphics for Panel Track
Custom Graphics is available on Panel Track Shades in the following fabrics:

- Classic Duck Light Filtering
- Classic Duck Blackout
- 5% Screen

Add 25% to Standard Rectangular price plus desired upgrades.

Length	Ordered Length minus 1/2"	Ordered Length minus 1/2"	Ordered Length	Ordered Length

Mounting Options

The following mounting options are available. All mounting brackets are coordinated with the head rail in white or aluminum:

- Wall Bracket with End Caps
- Ceiling Bracket with End Caps

Light Gap

Head Rail/Fabric Panels: There is no light gap between the fabric panels and the bottom of the head rail.

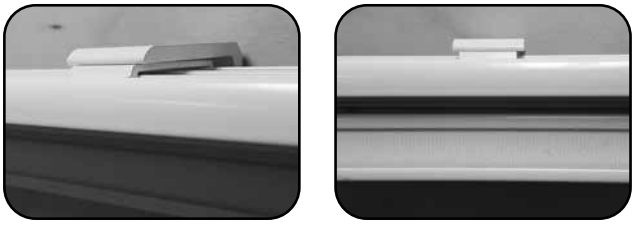
Outside Mount Bracket/Head Rail: There is a 1/4" light gap between the top of the track to the top of the outside mount installation bracket.

Inside Mount Bracket/Head Rail: There is a 1/8"gap between the top of the track to the top of the inside mount installation bracket.

Bottom Light Gap: There will be a 1/2" light gap at the bottom of the hanging panels on an inside mount shade.

Side Light Gap: There will be 3/16" side light gap at the sides of the panel track.

To avoid side light gap on outside mount shades, Comfortex recommends increasing the ordered width by 5", or 2 1/2" on both sides.



Outside Mount Installation Bracket Appearance

Fabric Deductions and Specifications

Panels are fabricated with a 2" overlap as standard. Custom overlaps are available in 1 1/2", 2 1/2" or 3".

Inside Mount:
Head rail width = ordered width minus 1/4"
Panel height allowance = ordered length minus 1/2"

Outside Mount:
No additional deductions are taken for fabric width
Panel height allowance = ordered length

Highlights Valance for Panel Track with Keystone

See pages 43 - 45 for more information on the Color Lux Highlights Cornice Valance for your Panel Track system.

- Keystones ordered for Panel Tracks should use return sizes list below to ensure clearance of the Panel Track Rail.
- **2 Panels Side or 4 Panel Split = minimum 3" returns**
- **3 Panels Side = minimum 3" returns**
- **4 Panels Side or 6 Panel Split = minimum 4" returns**
- **5 Panels Side or 8 Panel Split = minimum 4" returns**
- Keystones automatically match the color and fabric of the ordered Color Lux Highlights Valance. Custom color options are not available.
- Valance panels are divided in half when the Keystone option is ordered. Custom locations for keystone placement is not available.
- Ordering two optional keystones is currently not available.
- Multiple Keystones may be required for larger widths. (ex. A Highlights Valance with an ordered width of 216" will require TWO Keystone. All three valances will be 72" wide, excluding returns).
- The front panel on a split stack will overlap the back panel as illustrated on page 56.

Color Lux® Panel Track Shades
SPECIFICATIONS

Clear Window Opening
Panel Tracks are an excellent option for clearing a window opening. Please see the below charts for guidance on what ordered width is recommended to clear a window opening.

For Example:
For a One Way Side Stack ordered with 5 panels, in order to clear an opening of 94", the ordered width of the panel track should be 120".

One Way Side Stack Panel Track

Step 1: Select # of Panels
Step 2: Select uncovered width

2 Panels	If uncovered width is	17	23	29	35	-	-	-	-	-	-
3 Panels	If uncovered width is	23	31	39	47	63	79	-	-	-	-
4 Panels	If uncovered width is	25	34	43	52	70	88	106	124	-	-
5 Panels	If uncovered width is	27	37	47	56	75	94	113	133	152	171
	Result: Then Ordered Width is	**36**	**48**	**60**	**72**	**96**	**120**	**144**	**168**	**192**	**216**

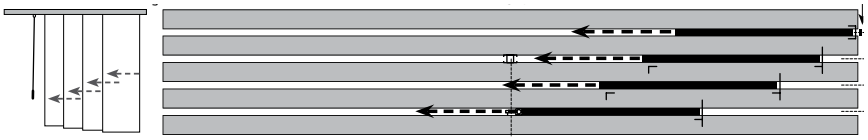
Split Stack Panel Track

Step 1: Select # of Panels
Step 2: Select uncovered width

4 Panels	If uncovered width is	14	20	26	32	44	56	68	80	-	-
6 Panels	If uncovered width is	-	-	36	44	60	76	92	108	124	140
8 Panels	If uncovered width is	-	-	-	-	68	86	104	122	140	158
	Result: Then Ordered Width is	**36**	**48**	**60**	**72**	**96**	**120**	**144**	**168**	**192**	**216**

Panel Configuration - Wand and Cord Control
The lead panel is always in front and catches the panels behind it. Right stack and split stack panel configuration is shown below.

Right Stack Wand Control



Right Stack Cord Control

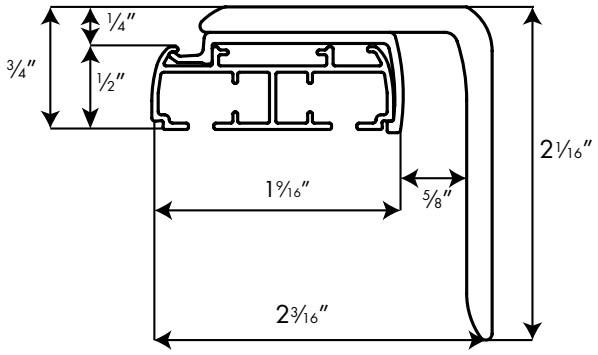
Color Lux® Panel Track Shades

SPECIFICATIONS

Outside Mount Hardware Profiles

Five separate panel track profiles are available depending on the number of panels ordered.

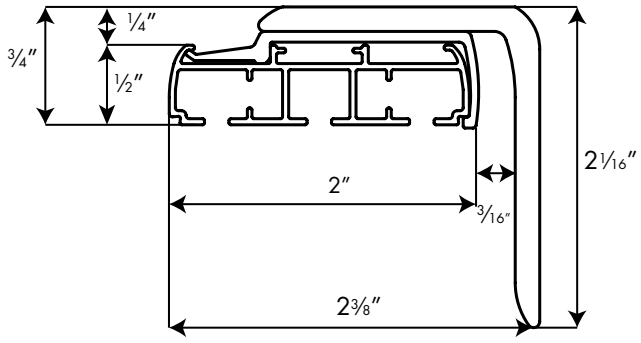
Two Track System



Two channel tracks are used for:
2 panel side stack
4 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1⁄16″
Extension Bracket projects back of bracket 2 5⁄8″ from wall

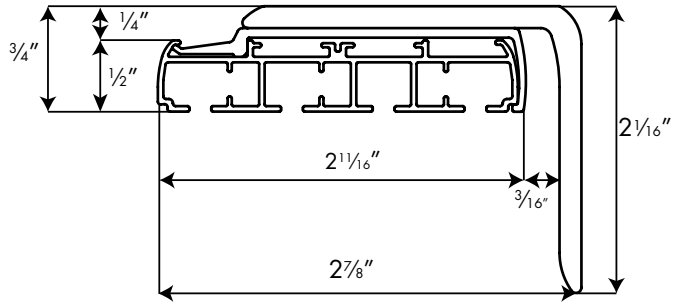
Three Track System



Three channel tracks are used for:
3 panel side stack
Not Available for split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1⁄16″
Extension Bracket projects back of bracket 2 3⁄16″ from wall

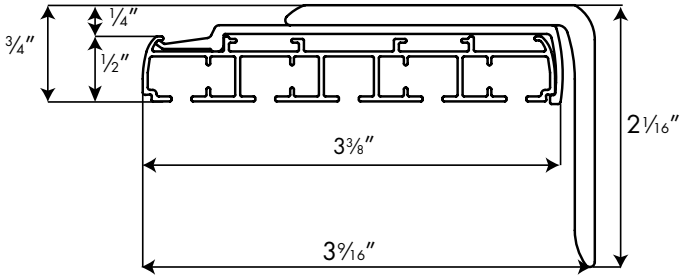
Four Track System



Four channel tracks are used for:
4 panel side stack
6 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1⁄16″
Extension Bracket projects back of bracket 1 9⁄16″ from wall

Five Track System



Five channel tracks are used for:
5 panel side stack
8 panel split stack

Mounting Dimensions
Minimum height required for outside mounting: 2 1⁄16″
Extension Bracket projects back of bracket 1 7⁄16″ from wall

For outside mount brackets, Spacer blocks are available at 9⁄16″ increments, up to two. Add to overall projection.
Example: For a four panel track, take 2 7⁄8″ plus 9⁄16″

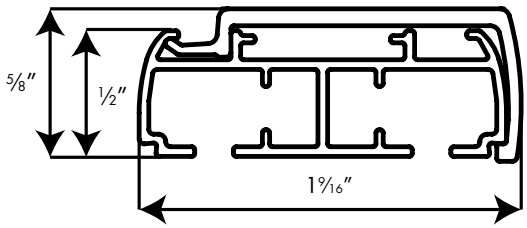
Color Lux® Panel Track Shades

SPECIFICATIONS

Inside Mount Hardware Profiles

Five separate panel track profiles are available depending on the number of panels ordered.

Two Track System



Two channel tracks are used for:

8 panel split stack

Mounting Dimensions
Minimum depth for flush inside mount: 3 3/8"
Minimum depth required for shallow mounting: 2 1/4"

COLOR LUX® WINDOW SOLUTIONS

COLOR LUX
Designer Cellular & Roller Shades

Color Lux® Designer Window Solutions

FEATURING SOFT ROMAN, DRAPERY, VALANCES AND CORNICES

Color Lux Window Solutions

The Color Lux Designer Window Solutions platform brings color harmonies and style to every space. Color Lux Window Solutions is an easy-to-use system featuring more than 800 colors. The coordination of cellular and roller shades with drapery and soft treatment products is fun and easy!

The Soft Roman collection features flat, relaxed, classic and hobbled style shades that can be designed with any Color Lux solid or one of the many patterns featured for rollers and draperies. The Color Lux Design Tool enables you to select from the hundreds of patterns that have been professionally harmonized with the extensive Color Lux color palette.

The Color Lux Designer Window Solutions offers:

- Flat, Classic Relaxed and Hobbled Roman Shades
- Draperies
- Stationary Side Panels
- Cut "Fabric by the Yard"
- Soft Treatment Valances
- Upholstered Cornices
- Light Weight Fabric Cornice
- Drapery Hardware
- Swatches of hundreds of patterns designed using the Color Lux color palette

Color Lux® Designer Window Solutions
DESIGN TOOL

Color Harmonization Made Easy!
Our Color Lux Design Tool creates the perfect window ensemble for draperies, soft treatments and hard treatments, such as cellular and roller shades. The Color Lux Design Tool is easy to use, and provides design harmony recommendations in seconds. Here's how:

Step 1: Start designing by selecting any product: Cellular Shades, Roller Shades, Soft Roman Shades, Sheer Horizontal Shades, Draperies or Valances. You can design around a preferred decorating color or find inspiration in our design library. Use our professionally selected harmonies or create your own. Build a layered ensemble by adding additional coordinated treatments.

Step 2: Order swatches of your favorite ensembles in any of the fabrics available in the program.
- Soft Treatments are available in Linen, Sateen Matte and Sateen Luster.
- Cellular swatches are available in Linen Weave Light Filtering and Room Darkening, Boutique Light Filtering and Room Darkening, Verona Light Filtering and Room Darkening and Aspen Double Cell Room Darkening and Light Filtering.
- Roller Swatches are available in Strata Light Filtering, Linen Light Filtering and Blackout, 5% Screen and Classic Duck in Light Filtering and Blackout.

Step 3: Choose your product from the selection of soft treatment and hardware options. The Color Lux Window Solutions Reference Guide has all your options.

Visit ColorLuxWindowSolutions.com to start designing!

1. *Choose patterns from the library. Sort from various drop down lists.*

2. *In the library click on the heart icon to add you patterns to your favorites.*

3. *Select the product you want to edit and click on the patterns or colors in your favorites. To see coordinating colors click the double arrow icon to the left of the pattern.*

COLOR LUX SOFT ROMAN SHADES

COLOR LUX®
Designer Window Solutions

Color Lux® Soft Roman Shades

SHADE STYLES

Color Lux Window Solutions offers the most elegant and popular roman shades in the market today. Featuring the luxuriously soft Color Lux Sateen and Linen fabrics, every pattern and color-way available in the Color Lux Design Tool provides hundreds of options for a beautiful roman shade. Every roman shade can be seamlessly harmonized with draperies and top treatments.

Flat Roman

The Flat Roman shade looks like a beautiful roller shade when down, and gathers up in soft folds when raised. **This shade looks beautiful with designs with patterns or solids.**

Relaxed Roman

The Relaxed Roman shade lies flat when lowered, but always has a gentle, decorative "smile" at the bottom. **This shade looks beautiful with designs with patterns or solids. Available only on Linen fabric.**

Classic Roman

The Classic Roman shade features decorative pleats that appear at the front of the shade when lowered. This shade is recommended for textures and solids. **Not recommended for designs with a pattern that will be interrupted by the pleats.**

Hobbled Roman

The Hobbled Roman shade's defining elegance is its beautiful soft folds that drape when lowered. **Works well with patterns and solids due to the soft draping folds of the fabric. Recommended for shades in a blackout application.** (Valance as pictured is standard for front operating position shades.)

SHADE OPTIONS

Cord Loop Color Selection

When ordering a cord loop system, select from one of the following color and material options. Tensioner will match cord loop color. Lengths over 6 feet available in white only.

- White Plastic
- Stainless Steel

Shade Height	Loop Length
12" to 15⅞"	⅔ of shade height
16" to 29⅞"	¾ of shade height
30" - 35⅞"	24" Loop
36" - 41⅞"	30" Loop
42" - 47⅞"	36" Loop
48" - 53⅞"	42" Loop
54" - 59⅞"	48" Loop
60" - 65⅞"	54" Loop
66" - 71⅞"	60" Loop
72" - 77⅞"	66" Loop
78" - 89⅞"	72" Loop
90" - 101⅞"	84" Loop
102" - 108"	96" Loop

Cordlock Color Selection

When ordering a cordlock system, select from one of the following color options.

- White

Features and Benefits

- All roman shades are constructed with sturdy brass rings that are securely sewn to the liner. All rings are 3/8" diameter
- Seamless Roman Shades without a vertical seam at wider widths are also available for Classic and Hobbled Roman Shades.

Shade Construction

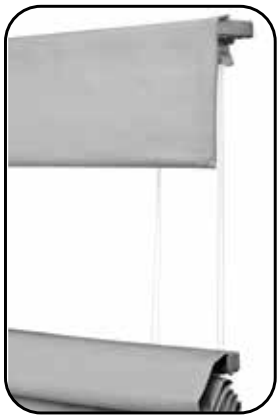
Additional Information

- All Roman shades over 50" wide will have two vertical seams.
- The Relaxed Roman Shade tends to "toe-in" noticeably at the bottom. This is inherent to the product. Inside mount and multiple shades on one head rail are not recommended.
- The height of a Relaxed Roman Shade is the short point of the "smile".

Top Down - Bottom Up Option

Top Down - Bottom Up is available on all four roman shade styles. The shade may be raised from the bottom or lowered from the top with cord lock controls one each side.

- Maximum width is 60"
- A 7" Front Valance is standard with all Top Down - Bottom Up Shades
- Outside Mount head rails will be made 1" wider than the ordered size, so the shade will fold up under the valance.
- Available with Cordlock operation only.
- **Please Note:** To adhere to child safety regulations, the center rail will only lower 40% of the full length of the shade. This is not a product defect. The cord length override option must be selected and changed to the full length of the shade in order to allow for the center rail to reach the bottom. This manual change overrides child safety standards.



Top Down Bottom Up Available on Cordlock

Rib Spacing

Rib spacing will not exceed 6¾". The last panel on top or bottom of aligned shades will be half the size of the middle panels. Custom spacing between ribs is not available. Please indicate when shades are in the same room so pattern and ribs can be manufactured to align.

Seamless Classic and Hobbled Soft Romans

Soft Roman Shades typically have a seam when the shade is made wider than the fabric. Unique to Comfortex is the ability to create seamless shades for Classic and Hobbled styles. Shades wider than 50" can be made without any vertical seams running down the shade. While patterns remain aligned in the correct orientation, seams are tucked into and hidden by the ribs of the Classic and Hobbled style roman shades.

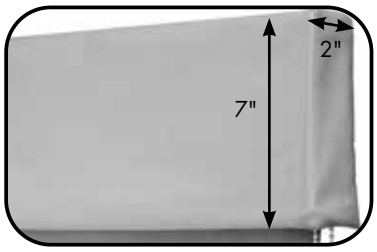
Table of Contents

Color Lux® Soft Roman Shades

SHADE OPTIONS

Front Valance Option

- All four styles of roman shades may be ordered with a 5″, 7″ or 9″ valance.
- The valance will hang off the front of the head rail.
- Standard with all front operating position shades where the cordlock and cord loop controls are easier to access but the hardware should be concealed with a valance.
- Not available for back operating position shades due to the proximity of shade and valance fabric that could damage shade material.
- The bottom of the valance is reinforced with a rib to insure the stability and shape of the valance.



Standard Valance Height is 7". 5" and 9" options available.

Valance Returns:

- Valance Returns wrap around the head rail.
- There are no returns for inside mount valances. These must be requested.
- 2″ valance returns are standard for outside mount shades under 70″ wide.
- 3″ valance returns are standard for outside mount shades over 70″ wide.
- Custom return sizes are not available.

Back Valance

Back Valance:
A 7″ back valance hides the hardware from the outside of the shade. The valance is made from blackout lining and provides a uniform street side appearance. Standard on all Hobbled Roman Shades ordered with back operating position and available as an upgrade option for Flat, Relaxed and Classic styles. Back Operating position must be ordered for this option.

Back Valance is available 7" long and conceals operating mechanisms

Side Tabs for Outside Mount Shades:
Side tabs are standard for outside mount roman shades with back operating position (see below). This conceals the sides of the head rail from view and finishes the appearance of the roman. They are 5" long so as not to interfere with the shade when raised.

Side tabs can be ordered as an option for inside mount shades. Deduction is ¼" for inside mount shades with side tabs.

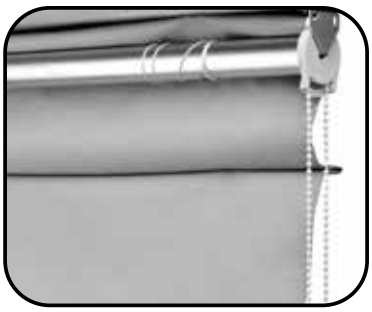
Side tabs are standard for outside mount shades with back operating position

Operating Position

Shades are made standard with the operating hardware behind the shade. This hides operating cords from sight and provides a clean, valance free shade. A front operating position upgrade is an excellent option when cords need to be more readily accessible, or for blackout shades where the fabric is installed closer to the window to provide better light control. Front operating position is an upgrade and includes a free valance at 5″, 7″ or 9″.

Back Operating Position is Standard - Operating Mechanism positioned behind the shade fabric. Pictured without 7" Back Valance.

All cordless shades feature a tassel for easy operation and minimal contact with fabric.



Front Operating Position is Optional - Operating Mechanism positioned in front of the shade fabric. Front valance is included when this option is chosen.

Color Lux® Soft Roman Shades

SHADE OPTIONS

Multiple Shades on One Head Rail

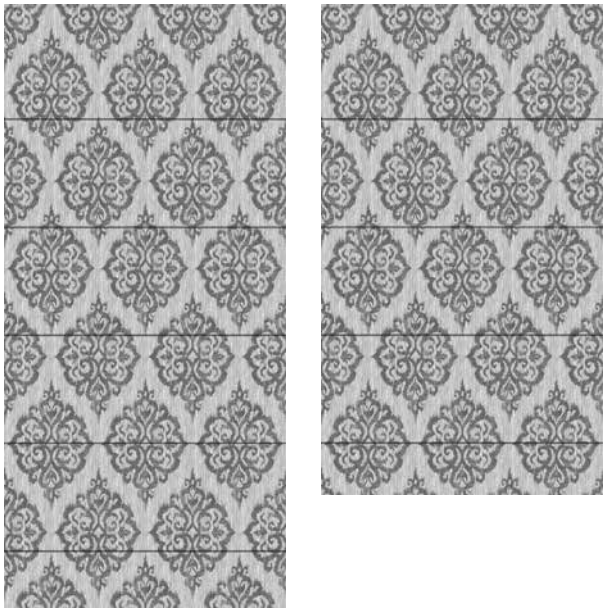
- Valances ordered with two or three shades mounted on a single head rail will be a common single valance. Front position shades are required for front valance.
- Head rail is wrapped with matching shade fabric.
- Provide the sizes of each individual shade AND the total width of the unit
- Available with cordless and motorization options only.
- The sizes of the individual shades must add up to the total width, and must not exceed the maximum width.
- The workroom will take a ½" deduction for inside mount shades and a ¼" deduction for each space between shades.
- Price as two or three separate shades then add surcharge.
- Maximum total width is 144"

Rib and Pattern Alignment

Classic and Hobbled shades may have noticeably different top or bottom fold sizes when multiple shades with different lengths are in the same room. Please indicate when ordering if shades will be side by side in a room so the workroom can align patterns and ribs.

Comfortex aligns the pattern and ribs starting at the TOP of the shade as standard. Matching starting from the BOTTOM is a no charge option but must be requested. Bottom alignment is recommended for side by side windows that start at different heights but are equal height at the bottom.

Top Alignment - Standard



Bottom Alignment - Optional

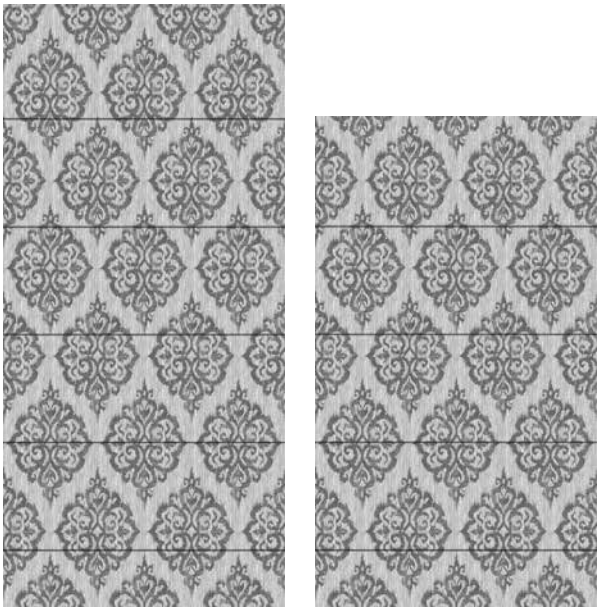


Table of Contents

Color Lux® Soft Roman Shades

LINER OPTIONS

Light Filtering Lining

Light Filtering Liner is 100% Cotton and is standard at no extra charge. Available in white only.

Room Darkening Lining

Room Darkening Lining is 50% Polyester and 50% cotton and is available as an upgrade option for all roman shade styles. This is recommended in combination with Hobbled Roman shades to minimize any light filtering pinholes. Available in white only.

Napped Lining

- Napped lining is available on all Soft Roman Shade styles and with all fabrics. It is a thicker, layered liner that replaces the standard light filtering liner. This provides a fuller hand than standard light filtering liner.
- Napped lining is only available in white.
- Available on all operating systems
- Napped lining cannot be used with room darkening liner.
- 100% Cotton

Interlining

- Interlining is only available on Classic and Hobbled Soft Roman Shade styles and with all fabrics. A third material is placed between the face fabric and the liner fabric to create a fuller hand to any roman shade.
- Interlining is only available in white.
- Available on all operating systems
- Interlining cannot be used with room darkening liner.
- 100% Cotton

Color Lux® Soft Roman Valance

NEW ROMAN VALANCE - RELAXED STYLE (NON-OPERABLE)

Color Lux Window Solutions now features a beautiful new valance option. When you want the elegant appearance and the graceful folds of a Relaxed Roman without the need to operate your shade, the Roman Valance - Relaxed Style is the perfect option. The Roman Valance is available in all patterns and solids found on the Color Lux Window Solutions Design Tool and is the perfect top treatment over roller or cellular shades.

All valances feature four elegant fabric folds regardless of the height ordered.

All valances are cord-free and clean to the streetside.

All boards are wrapped with matching fabric. Side tabs are optional for Inside Mount & standard for Outside Mount

Valance measurements start from the top of the headrail to the shortest point of the valance on the side.

Features

- The Roman Valance is entirely cord-free in design, so the street-side appearance is clean and simple.
- A stabilizing bar gives the relaxed roman valance just enough stability to hold the beautifully folds in place
- All boards are wrapped with matching fabric for a finished look.
- **Maximum width is 72".**

Height Options

All Relaxed Roman Valances will have four elegant fabric folds regardless of the overall height of the valance. Valance heights are available in:

- 14"
- 16"
- 18"
- 20"

The height measurement starts from the top of the headrail to the shortest point on either end of the "smile". Outer edges of the relaxed roman are approximately 2" less than the center. This difference will vary based on the width of the valance. Narrower valances will have less of a smile.

Liner Options

Relaxed Roman Valances are available standard with Room Darkening Liner. Light Filtering Liner is available as a no charge option.

Napped Lining and Interlining is not available for relaxed roman valances.

Side Tabs

- Side tabs are standard for Outside Mount valances and optional for Inside Mount. Side tabs are not available for turned headrail.
- Side tabs will match the ordered width of the board.
- Standard Height for side tabs is 6".

Mounting Options and Return Sizes

- Roman Valances are available for Inside Mount, Outside Mount and Turn Headrail.
- The standard return size is 2".
- 1.5" return is optional.
- Turned Headrail has a return of ¾".
- Custom board depths are available. Please contact Customer Service when ordering.
- All boards are fabric wrapped with matching fabric.

Color Lux® Soft Roman Shades

7.4V SIMPLICITY POWERTOUCH™ RECHARGEABLE MOTORIZATION

Color Lux Soft Roman Shades are the only roman shades in the market to offer PowerTouch™ Rechargeable motorization. Convenient and simple to use, the wand can remain hidden behind the roman fabric with the standard back operation position, or can hang in front of the fabric for easier access when ordering front operating position.

The PowerTouch™ Rechargeable provides an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch™ Rechargeable uses Simplicity motors and components.

- PowerTouch™ Rechargeable is available for all roman styles.
- Wand and Pendant are always White or Black.

Wand Appearance from Back of Shade

Color Lux Soft Roman Shade PowerTouch™ Rechargeable Upgrade Surcharges

All standard discounts apply to PowerTouch™ Shades.

- PowerTouch™ Rechargeable Pendant and Wand: $124.00
- Charger for PowerTouch™ Rechargeable (required): $29.00

PowerTouch™ Rechargeable Soft Roman Shade Specifications

See motorization specifications on page 64 for details.

PowerTouch™ Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position.

Programming the upper and lower limits is completed at the factory. These can be easily adjusted in the field if desired.

Programming the favorites position is completed after shade installation.

Please refer to the installation instructions at comfortexdealers.com.

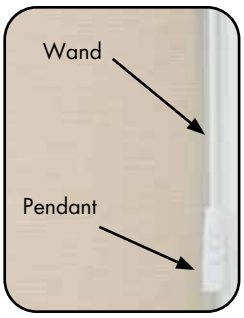
PowerTouch™ Rechargeable Shades Do Not Have a Separate Battery Wand

There is no battery wand with the PowerTouch™ Rechargeable shades. The battery pack is integrated inside the roller tube to make mounting easier and more convenient.

The battery is recharged via the recharging port on the PowerTouch Rechargeable™ Wand.

Recharging Port

PowerTouch™ Rechargeable Appearance



- The PowerTouch™ Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shade for front operating position.
- The wand and pendant hands down the back of the shade for back operating position.
- The top and bottom buttons lift and lower the shade to the upper and lower limits. The center button is the favorites and stop button.
- Pendant is 2½" long.

PowerTouch™ Rechargeable Color Options For Soft Roman Shades

White

Black

- Select White or Black wand and pendant when ordering this option for soft roman shades.

Wand and Pendant Location with Soft Roman Shades

The standard location for the wand and pendant is on the right. Please specify when ordering.

PowerTouch™ Rechargeable Wand Length with Soft Roman Shades

Shade Length	Standard Wand Length
Shades up to 30"	1' (12")
30" to 52"	2' (24")
52" to 78"	3' (36")
78" to 100"	4' (48")
100" to 108"	5' (60")

- Custom length wands are not available with PowerTouch™ Rechargeable. Standard wand lengths can be changed at no cost.

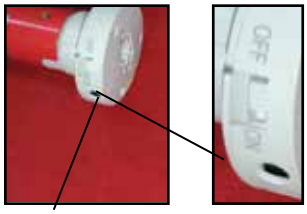
Simplicity Rechargeable Motors Appearance for Soft Roman

The Simplicity Rechargeable motor and batteries are concealed within the roller tube. There are no special installation considerations.



Charging Port Close-Up

Important Information about Simplicity Rechargeable Motor Shade Operation and Installation

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged. The shade will also beep when the remote button is pressed, if the battery is low.

Simplicity Rechargeable Motor Batteries

The battery for the rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Battery Wand Mounting is Not Required

No external battery wand is required to operate a Color Lux Soft Roman Shade with Simplicity Rechargeable Motorization.

Simplicity Rechargeable Motor Battery Life

Rechargeable battery is built into the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger for Simplicity Rechargeable Motors (Remote and PowerTouch Rechargeable)

An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor.

The charger is black and comes with a 13′ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep. **Charger MUST be specified when ordering EZ Charge Extension Wand.**

Solar Panel Option

Dimensions: 19" x 1½"

The new solar panel option with mounting brackets plugs into any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).

The solar panel provides a constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. It does not require direct sunlight, but performs best in regular direct sunlight applications.

This option prolongs the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables, such as size and weight of the shade, frequency of shade use, amount of direct sunlight exposure, etc.

Solar Panel with mounting brackets

Table of Contents

Color Lux® Soft Roman Shades

SIMPLICITY BLUETOOTH™ RECHARGEABLE MOTORIZATION

Simplicity 5 Channel Remote

The Simplicity Remote features 5 individual frequency channels and an All channel that will operate all the shades at once.

The 5 Channel Simplicity remote is available in white and black. All remotes come with a holder which can be mounted to a wall for easy storage.

The remote controls utilizes one 3V battery (CR2430). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Remote control batteries are not covered by the limited lifetime warranty.

Standard Simplicity Battery Operated Motorized Shades Warranty

Please see page 146 for complete Comfortex warranty information.

Simplicity 14 Channel Remote

The Simplicity 14 Channel remote can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Roller Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet. A 14 Channel (14C) remote can be utilized on all Simplicity Motorized Shades.

Please Note: Unused channels can be hidden

Simplicity 6 Channel Timer Remote

The 6 Channel (6C) timer remote combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 6-channel hand held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

THE FACTORY DOES NOT PROGRAM CHANNELS FOR SIMPLICITY RECHARGEABLE MOTORS.

The factory programs the upper and lower limits of every shade. Channel programming is completed after shade installation.

Please Note:

- Not all motors run at the same rate of speed.
- REMOTES ARE NOT LINKED TO SHADES FROM THE FACTORY. SHADES MUST BE LINKED AFTER SHADE INSTALL**ATION.**
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE SIMPLICITY RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

7.4V EZ CHARGE EXTENSION WAND FOR RECHARGEABLE SHADES

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand to charge. The wand extends up to 31" in length.

Place the magnetized wand tip to the receiving port to attach. Then plug the charger into the base of the wand.

PANEL STYLES

Grommet Style
Style Number: CLD1

The Grommet style is a soft folding, casual pleat. Grommets are installed near the top of the panel through which the rod is inserted.

Grommet Panel Specifications:

- Grommet Size:
- Round = 1 9/16" inside diameter, 2 3/8" outside diameter
- Square = 1 9/16" inside edge to edge, 2 3/8" outside edge to edge (recommended for stationary panels)
- Grommets color coordinated with drapery hardware:
  - Black (Suggested coordination with Black Rods or Burnt Gold Rods)
  - Black Nickel
  - Chrome
  - Pewter
  - Old Gold
  - Antique Copper (Suggested coordination with Oil Rubbed Bronze Rods)
- Grommet edge placed 7/8" down from top of drape. Top of rod is approximately 1¼" down from top of drape.
- Grommets are spaced evenly across width; 8 grommets per width
- First grommet starts 1½" from leading edge

General Specifications:

- 2 x 1 fullness
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:

- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:

- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

PANEL STYLES

Rod Pocket Panel with No Heading
Style Number: CLD2

No Heading

Rod Pocket Panel with 2" Heading
Style Number: CLD3

2" Heading

The rod pocket is a popular traditional style that's easy to mount. A pocket is formed at the top of the panel and a drapery rod is then inserted through the pocket. A rod pocket is a versatile solution that can be used alone on a decorative rod or under a valance or cornice.

Rod Pocket Specifications:
- Rod pocket sizes are available in 2½", 3½" and 4". The 2½" pocket is recommended for use with 1⅛" diameter rods, 3½" pocket is recommended for 1⅜" diameter rods, and 4" pockets are recommended with 2" diameter rods.
- Available with or without heading
  - With heading: 2" heading is standard
- Not Available with Traverse Rods

General Specifications:
- 2 x 1 fullness
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal), 1½" Venus (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:
- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:
- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

PANEL STYLES

Soft Top
Style Number: CLD4

The Soft Top is a flat panel of drapery fabric. Pins are provided separately with every panel.

Soft Top Specifications:
- Double turned heading with 4" buckram for stability
- 3½" leading edge
- Custom lengths are available up to 180"
- Returns are not available
- Not Available with Traverse Rods

General Specifications:
- 2 x 1 fullness
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal), 1½" Venus (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:
- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:
- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

Color Lux® Designer Window Solutions Draperies and Stationary Side Panels

PANEL STYLES

Hidden Tab Top
Style Number: CLD5

The Hidden Tab Top is another popular casual contemporary style. 3¼" tabs are attached on the back near the top of panel through which the drapery rod may be inserted. Though similar to a rod pocket, the tab top provides a softer more contemporary relaxed pleated look.

Hidden Tab Top Specifications:
- Back tabs measure 3¼" in length
- Tabs start 1" from the edge of the panel
- Tabs match drapery fabric
- Tabs are evenly spaced on the panel
- Returns are not available
- Not Available with Traverse Rods

General Specifications:
- 2 x 1 fullness
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal), 1½" Venus (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:
- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:
- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

PANEL STYLES

Two Fingered Pinch Pleat
Style Number: CLD6

Two Fingered Pinch Pleat

Three Fingered Pinch Pleat
Style Number: CLD7

Three Fingered Pinch Pleat

The Two Fingered or Three Finger Pinched Pleat is a traditional style that is formed into finger "flutes" and can be hung using drapery pins over a standard return rod or to a decorative rod using pins and rings.

Two Finger and Three Finger Pinched Pleat Specifications:
- Hand crafted two and three fold pleats with 4" buckram tacked from the bottom
- 5 pleats per width; 5 rings per width
- 3½" overlap is standard
- 3½" return is standard (returns are also available in 6")
- Pins can be inserted at the factory; available with ½" setting (recommended for use with rings) or 1½" setting (recommended for use with a traverse rod)
- The Two Fingered Pinch Pleat is recommended but not required if Blackout Lining is ordered.

General Specifications:
- Deluxe 2½ x 1 fullness
- Two Fingered Pinch Pleat - Seams will be hidden
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal), 1½" Venus (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:
- 4" double turned bottom hems standard (3" and 6" hem options are available)

- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

PANEL STYLES

Inverted Pleat
Style Number: CLD10

In the Inverted Pleat, the pleats are hidden from view by a flat front. This style provides a "full", unique look. It is hung from a drapery rod with pins.

Inverted Pleat Specifications:
- Double turned heading with 4" buckram for stability
- 5 pleats per width; 5 rings per width
- 3½" overlap is standard
- 3½" return is standard (returns are also available in 6")

General Specifications:
- Deluxe 2½ x 1 fullness
- Custom widths available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Matching Tie Backs are available in 24", 36" and 48"
- Use 1⅛" (metal), 1½" Venus (metal) or 1⅜" (wood) diameter decorative drapery rod with finials
- Dry Cleaning recommended

Hemming:
- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:
- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped liner is 100% cotton and is available as a replacement to the standard light filtering liner

PANEL STYLES

Ripplefold Drapery
Style Number: CLD11

Ripplefold draperies provide a more contemporary look than pleated draperies and are distinguishable by their soft ripples. All ripplefold draperies operate using a special traversing track. Please see pages 58 - 60 for track details and options. IT IS STRONGLY RECOMMENDED TO USE THE COMFORTEX RIPPLEFOLD TRACK FOR THE BEST RESULTS.

Ripplefold Drapery Specification

- The snap spacing on the snap tape is always 4¼" along the tape. Spacing between carriers is based on fullness factor. Select one below when ordering:
- No returns are standard (returns are available in 3½" and 6" options)
- 80% fullness has carrier spacing of 2⅜"
- 100" fullness has carrier spacing of 2⅛"
- 120" fullness has carrier spacing of 1⅞"
- See page 29 for stackback chart

General Specifications:

- Custom Widths Available
- Custom lengths available up to 180" (longer lengths available; call customer service)
- Sewn with color coordinated thread
- Weighted corners
- Use Comfortex Ripplefold track system in ⅛" (metal), or 1½" Venus (metal) (pages 119 and 129)
- Dry Cleaning recommended

Hemming:

- 4" double turned bottom hems standard (3" and 6" hem options are available)
- 1½" double turned side hems
- 4" double turned top hem is standard
- All hems blind stitched

Lining Options:

- Fully lined with 100% cotton privacy liner is standard –white or ivory (please specify)
- 100% Cotton Interlining is available as an upgrade option
- Blackout liner is 100% polyester and is available as an upgrade option
- Napped Lining is available as an alternative to standard lining. Cannot be used with other lining

DRAPERY SURCHARGES AND UPGRADES

Add 15% Surcharge to Grid Price for NEW Deluxe Linen

Grommet Surcharge: 1⅛" Rod: Add $121 to ordered width

Napped Lining: Add $255 to ordered width (not available with blackout liner or interlining)

Blackout Liner Surcharge: Add $255 to ordered width

Interlining Surcharge: Add $295 to ordered width

Matching Fabric Tieback Surcharge: Add $66 each

Please Note: Measurements should equal the exact width of the window, plus any frame. If ordering pleated draperies, adding a minimum of 4" to 6" on each side will provide ideal light control and privacy. We have made allowances for 3½" returns, overlaps and a 2½ x 1 fullness for pleated styles and 2x1 fullness for non-pleated styles.
Page 80 provides additional stackback and recommended rod width information.
Finished height includes bottom hems. Add a minimum of 4" to allow for adequate mounting area above the window. Keep in mind that rings and pins add length. ½" and 1½" pin settings are available.

Ornamental Block Patterns have a minimum length of 92" to ensure the full design is visible.

STATIONARY PANEL SURCHARGES AND UPGRADES

Grommet Surcharge: Add $61 per panel for 1⅛" rod

Napped Lining: Add $129 per panel

Blackout Liner Surcharge: Add $129 per panel

Interlining Surcharge: Add $147 per panel

Matching Fabric Tieback Surcharge: Add $66 each

Add 15% Surcharge to Grid Price for NEW Deluxe Linen

See page 30 for details on Fabric Wrapped Mounting Boards for Stationary Panels

Please Note: Stationary Panels are only available in widths of 20", 32" and 40". Pricing is by the single panel and is available with right return or left return. Panels can also be ordered as pairs. Custom heights are available. Napped Liner is not available with blackout liner or interlining.

Finished height includes bottom hems. Add a minimum of 4" to allow for adequate mounting area above the window. Keep in mind that rings and pins add length. ½" and 1½" pin settings are available.

FR Treated Stationary Panels and Draperies: Topical FR treatment can be applied to all drapery fabrics. Rating is based on NFPA No. 701 (Test 1, Small Scale) and CA Title 19 - Public Safety, Section 1237.

Add 20% surcharge to finished product list price. Additional handling time will be required for all FR orders.

Ornamental Block Patterns have a minimum length of 92" to ensure the full design is visible.

RIPPLEFOLD DRAPERY SURCHARGES AND UPGRADES

Napped Liner Surcharge: Add $255 to ordered width (not available with blackout liner or interlining)

Blackout Liner Surcharge: Add $255 to ordered width

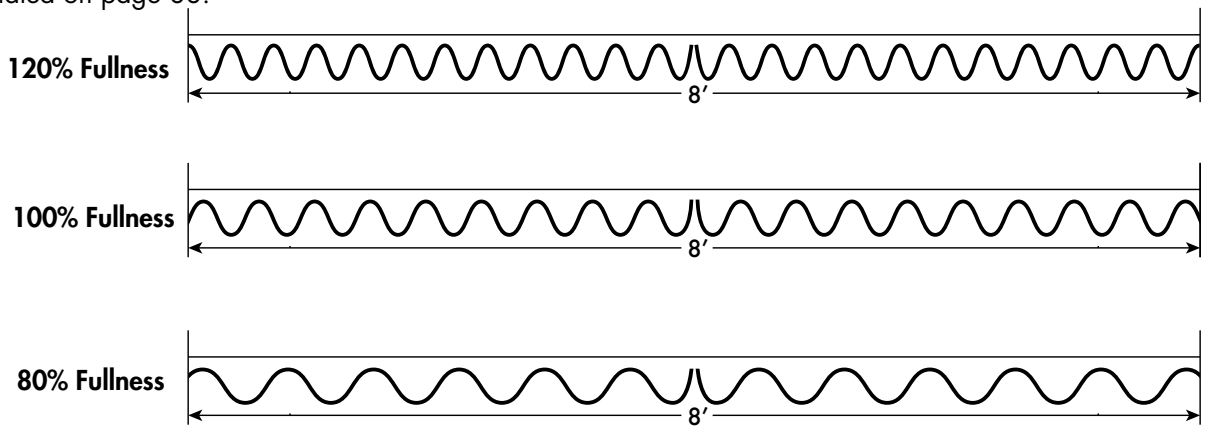
Interlining Surcharge: Add $295 to ordered width

Measuring Note: When providing ripplefold width to Comfortex, provide the finished rod width only. The ordered height is the length of the fabric panel only, NOT including the track hardware. The Comfortex Ripplefold track adds at least 1⅜" to the ordered height. Mounting brackets found on page 118 indicate the necessary deductions to take from the ordered height.

Ornamental Block Patterns have a minimum length of 92"

Fullness Factor

Ripplefold fullness factors are available to order in 80%, 100% or 120% fullness. Stackback dimensions are estimated on page 88.



Seam Exposure

Ripplefold draperies, depending on the fullness factor chosen, may have visible seams. The higher the fullness factor the less likely a seam will be visible.

Butting Vs. Overlap

When ordering, please specify if the center pleats should be made to overlap or butt together. See illustration below. Overlap is ideal for blackout applications

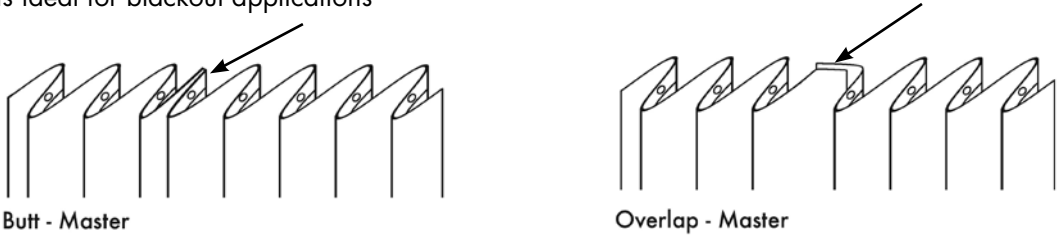


Table of Contents

Color Lux® Designer Window Solutions Draperies and Stationary Side Panels

RIPPLEFOLD STACKBACK CHART

The below stackback charts are estimates only, and can vary based on selecting overlap-master or butt-master and liner type. If choosing butt-master, subtract 2-3 inches from fabric stack back number below.

Rod Width

180-183			47
184-186			48
187-190			49 3/4

How to Use Stack Back Chart

1) Decide which ripplefold fullness is desired. Example: 100%
2) Select finished face width of draperies under the desired fullness column. Example: 84"
3) The total fabric stack back is 22", 11" per side for split draw.

Pricing Example for Ripplefold Draperies (Page 28):

1) Select fabric Type: Linen, Sateen Matte, Sateen Luster
2) Select Color Lux Pattern or Color Lux Solid
3) Measure rod width. Example: 96"
4) Measure panel length (excluding track hardware). Example: 110"
   96" x 110" Ripplefold Drapery = **$2,170**
5) Select Fullness: 80%, 100%, 120%
6) Select whether to overlap or butt two panels when drawn.
7) Select Draw type: One way left, One way right, Split

Optional Steps Include:

8) Select Lining type if changing Standard Light Filtering: Napped, Blackout or Interlining
   Interlining Surcharge = **$295**
9) Select Return Size: 3½" standard or 6". No Return is Standard
10) Select Bottom Hem Size: 3", 4" standard or 6"

TOTAL LIST PRICE = $2,465

Pricing Example for Drapery with 2 Fingered Euro Pleat (Page 27):

Rod Width = 120" (this includes trim and any additional width desired)
Length = 96" (finished length with hem size included)
Drapery List Price (Split or Single Panel)= **$2,001**
Six widths of fabric will be used
Add Blackout Lining = **$255**

TOTAL LIST PRICE = $2,256

Pricing Example for Pair of Stationary Panels with Grommets (Page 27):

Panel Width = 32"
Length = 96" (finished length with hem included)
Stationary Panel List Price = $508 (single panel)
$493 x 2 panels = **$1,016**
Add Grommet Surcharge = $61 (single panel)
$59 x 2 panels = **$122**
Add Napped Lining Surcharge = $129 (single panel)
$125 x 2 panels = **$258**

TOTAL LIST PRICE = $1,396

Color Lux® Designer Window Solutions Draperies and Stationary Side Panels

UPGRADE GENERAL INFORMATION

Blackout Lining Option / Upgrade

A blackout lining is perfect when additional light control is needed. It greatly reduces the transmission of light into a room, and is ideal for bedrooms and media rooms.

- There will be some light penetration at the top and outside edges.
- Some light marks may show where the panels are stitched. Be aware that small pinholes of light may appear where there is stitching.
- A panel with blackout lining will not hold soft folds like a standard lining. Blackout lining is stiffer but will relax slightly when hung.
- Two Fingered pleats are recommended if blackout lining is required due to the stiffness of the material.
- Interlining is not recommended in combination with Blackout Lining.
- Available in White or Ivory. Please specify.
- **PLEASE NOTE REGARDING LIGHT COLORED DRAPERIES WITH BLACKOUT LINER:** Light colored solid draperies with Blackout Liner will have visible black stitches in the top pleats due to blackout liner contents.

Napped Lining Option / Upgrade

- 100% Cotton
- 7.5 oz napped lining is a replacement for standard light filtering lining, and provides more body to the panel. Napped lining cannot be used in conjunction with interlining or blackout lining.

Interlining Option / Upgrade

Interlining is a soft brushed 100% cotton fabric that provides extra body and added protection UV-ray damage.

- The 5 oz. interlining is placed between the regular lining and the face fabric.
- Consider heavy duty and fully enclosed brackets for stronger support on these heavier panels.

Fabric Wrapped Mounting Board for Pleated Stationary Panels

Stationary Panels for all pleated styles can be mounted on a fabric wrapped board, eliminating the need for hardware. Eye hooks are placed and spaced to match the pleated stationary panel ordered. ½" pin placement is recommended when using fabric wrapped mounting boards to help conceal the board.

Linings: All stationary panels come standard with a light filtering liner. Blackout Lining, Napped Lining and Interlining is available as an upgrade and can be used with Fabric Wrapped Mounting Boards.

Size: Stationary Panels are available at 20", 32" and 40" finished widths. All Fabric Wrapped Mounting Boards will match the width ordered of the stationary panel.

Returns are standard at 3½" with 6" or no return as optional. If a right, left or pair of stationary panels are ordered, returns on the board will be made to match the panel. Please indicate in special instructions if **Both Returns** or **No Returns** is desired.

Left Return
The left side of the panel fabric returns to the wall

Right Return
The right side of the panel fabric returns to the wall

Fabric Wrapped Mounting Board for Pleated Stationary Panels have perfectly spaced eye-hooks to match the ordered stationary panel

Both Returns
Both sides of the panel fabric return to the wall

Both Mitered/No Returns
Neither side of the panel fabric returns to the wall

Returns also have eye-hooks for easy installation and attachment

VALANCE STYLES

Soft Fold Valance (CLB1)

This soft roman valance with cascading folds that wrap around the corners features a sophisticated tailored look that works well in both contemporary and casual décor. Every hobble in the Soft Fold Valance is evenly spaced.

Specifications:

- **Construction:** Board mounted
- **Mount:** Outside mount with returns
- **Widths:** Custom widths available
- **Heights:** 14", 16" (standard), 18" and 20"
- **Returns:** 3½" returns are standard (2½" and 6" available)
- **Fabrics:** Available in all fabrics, patterns and color-ways
- **Lining:** Blackout lining only, White or Ivory
- **Side legs** are standard with the Soft Fold Valance. Each leg measures ¾" thick. Inside measurement is 1½" narrower between the two legs

Minimum width = 12"
Maximum width = 192"

Color Lux® Designer Window Solutions Valances

GENERAL INFORMATION

For All Valances and Cornices: Ordered Width is face width and does not include returns

Measuring and Mounting Notes for Classic Cornice, Contoured Cornice and Soft Wave Cornice:

- Outside Mount Only
- Cornices are constructed with fabric wrapped wood legs for returns. Add a minimum of 3" to the width to allow for their thickness.
- Cornices are installed using "L" brackets provided.
- Cornices cannot be hinged.
- The inside measurement of a cornice is 1¾" less than the ordered width

Measuring and Mounting Notes for All Other Board Mounted Valances:

- All Board Mounted Valances are tacked to ¾" wood boards.
- All board mounted valances are hinged after 96" wide.
- Boards are wrapped with white drapery lining (can be wrapped in matching fabric; call customer service.)
- "L" brackets are included with order; 2 are standard and additional brackets are added every 24".

Side Legs

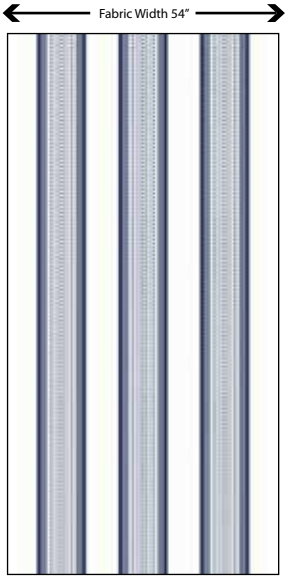
- Side legs are wood returns designed for valances that may flair at the sides. Side legs are available on the Soft Wave and Soft Fold Valances. Each leg is ¾" thick, so the inside measurement is 1½" narrower than the outside measurement.
- If treatment has side legs, recommend adding 3" minimum to width to account for thickness of sidelegs.

Return Board Sizes

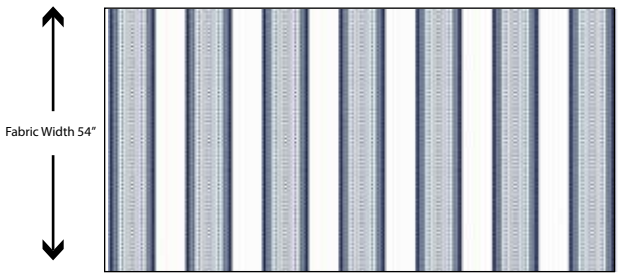
- A 3½" board/return size is standard.
- 2½" and 6" board/returns are also available.

Seamless Valances and Cornices

All patterns for all valances and cornices will be run in the direction as sampled.



Patterns can be rotated on the fabric as shown. The direction of the pattern remains the same, so cornices can be seamless up to their full ordered width.



Color Lux® Designer Window Solutions Valances

FABRIC CORNICE

The Color Lux Fabric Cornice is a new light weight cornice that is a perfect option to accessorize hard treatments or draperies. This beautiful cornice is currently available on **NEW** Deluxe Linen, Linen, Sateen Matte and Sateen Luster fabrics in all Color Lux Solids and Designer patterns.

The Color Lux Fabric Cornice features:

- Available as outside mount only
- The soft upholstered look of a traditional cornice
- Recessed and removable dust cover standard with every shade
- Available up to 216″ wide with keystone
- Varying heights and return sizes for any application
- No visible staples
- Light weight design makes installation easy
- Brackets provide easy installation without the need to drill through the cornice
- Visit ColorLuxWindowSolutions.com to view ways to harmonize the Color Lux Fabric Cornice with draperies, roller, cellular and soft roman shades.

Available with various height and return size options

Specifications

Cornice Width with Keystone: Maximum cornice width is 216″. Keystone is required for widths over 88″ with 3″ returns, and for widths 80″ or larger with 7″ returns.

A dustcover is standard on all Color Lux Cornices with return sizes 3″ and over. All dust covers are white. Dust covers are installed separately and sit recessed by ½″ on top of the cornice.

Cornice Heights:

- 6″
- 8″
- 10″
- 12″
- 14″
- 16″

FABRIC CORNICE

Keystone for widths over at least 84"

Measuring Guide for Cornice

- Measure the width of the window you wish to cover. Be sure to add extra space if you have window trim or extra wall space you'd like to cover.
- Next, determine the length of your desired returns. Use the chart on page 99 for the mounting depth required and inside valance depth clearance provided for each return size.

Outside Mount

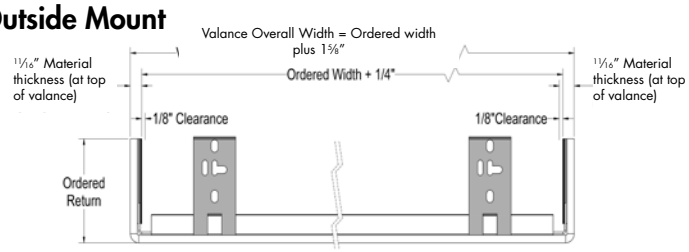

Figure A

Recessed Dustcover is included with all return sizes

Pattern Alignment and Centering

- Please note that pattern centering cannot be guaranteed on some patterns.
- Keystones are not guaranteed to line up with cornice pattern.

Valance Returns

- Five return size options are available when ordering a Color Lux Cornice as a stand alone product.

Return Sizes: To determine a return length, add the component dimensions (mounting brackets, etc.) up to the wall. Subtract the measurements from any protrusions (molding, etc.), then choose from one of the pre-determined return sizes (from the chart on page 99 that best fits your application.

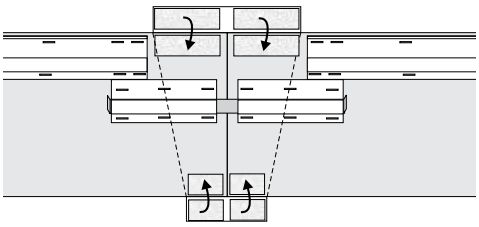
Clearances

Outside Mount Bracket

- 3" Return provides an inside valance clearance of 2 3/16".
- 4" Return provides an inside valance clearance of 3 3/16".
- 5" Return provides an inside valance clearance of 4 3/16".
- 6" Return provides an inside valance clearance of 5 3/16".
- 7" Return provides an inside valance clearance of 6 3/16".

Keystone Specification

- All keystones will automatically be wrapped with matching Color Lux Drapery Fabric.
- Available in Linen and Sateen fabrics
- Keystones will be provided separately and installed on site.
- Ordering two optional keystones is currently not available. Two keystones may be required for some wider width valances.
- Valance panels are divided in half when the Keystone option is ordered. Custom locations for keystone placement is not available.
- Optional Keystone is not available.



Rear view of the Color Lux Cornice Keystone. Not visible to room side.

30" - 48"	$65
48" - 84"	$73
66" - 120"	$94

Recommend ordering traverse rods one size wider when on outer range of rod width. Example: For 82" wide opening, order a 66" - 120" instead of a 48" - 84" to reduce the need for full extension.

1½" pin setting is recommended when using the basic traverse rod

Traverse Rods are only available in white with a white wand

Mounting Brackets for Traverse Rods (Front and Back)

Support Brackets for Traverse Rods (Front and Back)

General Information for Telescoping Traverse Rods

Hardware:
All mounting hardware is included
30" - 48" rods include 10 glides
48" - 84" rods include 20 glides with 1 support bracket
66" - 120" rods include 30 glides with 2 support brackets
84" - 156" rods include 38 glides with 3 support brackets
156" - 228" rods include 56 glides with 4 support brackets

Projection:
All traverse rods have a projection of 2¾" to 4½"

Basic Ripplefold and Traversing Track System - Pricing and Information

The Basic Ripplefold and Traversing Track System is perfect for applications where the drapery hardware needs to blend in with the decor. Many styles of rooms achieve the best look with draperies mounted close to the ceiling, or for pleated and ripplefold draperies beneath a top treatment.

COLOR LUX® WINDOW SOLUTIONS GENERAL INFORMATION

COLOR LUX®
Designer Window Solutions

Color Lux® Designer Window Solutions
GENERAL INFORMATION

There are a lot of decisions that need to be made when working with soft treatments and all the options available to you. Color Lux Window Solutions is a simple program designed to make the most challenging decision easier. The following information will help guide you in the decision making progress no matter what your style or taste.

Draperies vs. Stationary Panels

When ordering draperies, it is important to know how they are going to be used. Will they be drawn across a window opening to block out light? Or will they be decorative side panels that will always remain stationary?

Stationary Side Panels are available either 20", 32" or 40" wide and are not meant to be drawn across a window. Stationary panels are a great option to coordinate with beautiful Color Lux Cellular or Roller Shades.

Fullness

The fullness of a drapery is a measure of how full or how much fabric is on the drapery rod. If a drapery panel is made exactly to your window width, the drapery will be perfectly flat when drawn across the opening. This may not be the desired look. A typical fullness is 2½X, which means the drapery panel will be made 2½ times as wide as the window width. Comfortex Grommet Draperies have a 2X fullness and pleated draperies have a 2½x fullness.

Lining Style

Lining refers to the fabric sewn to the back of your drapery. Depending on your choice, benefits may include added sun protection, improved insulation or increased light control. Choose from three different styles: Privacy Lining, Blackout Lining, or Interlining with either Privacy or Blackout lining.

Privacy Lining

- Provides privacy and greater light control
- Adds body and weight, and protects the material from fading.

Blackout Lining

- Blocks 99% of light for complete privacy and insulation.
- Adds body and weight, and protects the material from fading.
- Ideal for rooms where blackout is preferred, like bedrooms and media rooms.
- Note for light colored draperies that the blackout liner content can be pulled through when sewing, leaving darker threads at the tops of the draperies.

Interlining

- Provides additional body and fullness to the drapery
- The interlining is between the back lining and the front fabric to provide more insulation.
- An interlining with a privacy liner provides more light control without going to blackout

Drapery Hardware

Our Drapery Hardware program offers a wide range of options to select from to make Color Lux Window Solutions a one stop shopping experience for all of your soft treatment needs.

Drapery Rods

- Rods are available at custom lengths.
- Available in both metal (1⅛" & 1½") and wood finishes (1⅜" and 2"), there is a wide variety of rod colors and sizes to choose from.

Finials

- Finials are distinctive ornaments that are mounted to the ends of a drapery rod.
- Finials are great for accenting architectural styles or favorite furniture or elements in a room. Large finials are great for larger spaces, while small finials complement the scale of smaller rooms.
- End caps are also offered for drapery rods butted together or for a more subtle look

Brackets

- Standard brackets need to be selected when selecting drapery rod hardware.
- Heavy duty brackets are recommended for all drapery lengths longer than 94".
- The longer the rod, the more brackets are needed.

Rings

- Our rings for the 1⅛" drapery rod comes with an easy glide acrylic insert that makes traversing across the rod smooth and quiet. Available in all matching colors
- Rings are recommended for soft top drapery options and are positioned by the decorator or installer.

Batons

- Batons are used to help move the drapery across the rod without having to touch the fabric
- Can be connected to a loop ring
- Available with a surcharge

Tie Backs

- Used to pull fabric away from the window in a stylish drape.
- Available with matching fabric or as a metal tie back when selecting the 1⅛" hardware collection
- Available with a surcharge

How to Measure for Color Lux Window Solutions Draperies

Draperies can hang from a window in a few different ways, so the first decision before any measuring begins, is to determine which look is preferred.

1. Tailored Draperies

2. Standard Puddle Draperies

3. Full Puddle Draperies

Determine the Proper Length for the Desired Look

Our drapery length reflects the full length of fabric, from the top edge to the bottom hem.

- For grommet top, measure from the point where you want the top of the drapery to be.
- Drapery rods are typically installed 4" above the window frame (center image above) or closer to the ceiling (left image above). Rods mounted closer to the ceiling gives the illusion of a higher ceiling.
- For a tailored, more casual look: Measure the distance from the bottom of the installed drapery rod or drapery rings, to the floor. Subtract ½" to get the panel length you need. The finished look is option 1 above.
- For longer, more formal drapes that puddle on the floor in luxurious folds: Add 1" - 10" to the height measurement.
- Keep in mind, there are different looks achieved when ordering different lengths:
  - No Puddle: Also called a "break" or "trouser break". Drapery is just touching the floor (Tailored Draperies Above)
  - 2" - 6" Puddle: A standard puddle, with just a slight spill of fabric (Style 2 above)
  - 5" - 10" Puddle: A true puddle with enough extra fabric to fan it out onto the floor (Style 3 above).
- Puddling is not recommended for drapery that will be opened and closed regularly, as the bottoms will get dirty very quickly.

Measuring Tips

- Color Lux Window Solutions offers custom widths for all drapery styles, up to 192" wide.
- Custom pricing on any length or width drapery is available. Call customer service.
- Precise measurements are key
- Use a steel tape measure, measuring to the nearest ¼" in width and to the nearest 1" in length.
- Recommended clearance for functional drapes that close is ½" above floor.
- Measure each window and doorway individually (note: windows and doors that appear to be the same size often are not).
- Instructions are provided with all of our drapery hardware for installation on most surfaces.

Color Lux® Designer Window Solutions

GENERAL INFORMATION

How to Measure for Color Lux Window Solutions Draperies

Determine Drapery Rod Width

- Measure the width of your window, taking into account whether you'd like a trim-mounted rod (i.e. rod placed directly on the window trim) or wall-mounted rod.
- If your drapery will open and close, allow 3" - 12" on either side of the window frame for the panels to rest when they are open. See below for an estimate on stackback and the recommended rod length for given window openings.
- When providing a finished width (or ordered width) to Comfortex, please include the rod width only. The workroom will add any ordered overlaps and returns.
- Consider the extra wall space needed for decorative finials.

Decide Whether or Not to Use Drapery Rings

- Draperies that are hung from rings requires the drapery rods to be installed at a height greater than the length of the drapery.

Determine Rod Placement

- Drapery rings are recommended for ease of opening and closing drapery panels.
- Drapery rings do add a few extra inches to your rod placement.
- To determine proper rod height if using drapery rings: With the drapery attached to the rings, measure the distance from the bottom of the rod to the top of the drapery fabric; add this measurement to the drapery length.
- To determine proper rod height if not using drapery rings: Simply measure the distance from bottom of rod to floor and install the rod at that height.
- For low light-filtration, mount the rod 6" above the trim and allow the rod width to extend at least 3" beyond either side of the window frame.
- To add visual height to a room, mount the rod closer to the ceiling. When hanging Rod Pocket drapery, there is some rod "take-up" when the material is gathered onto the pole. Typically, you will need to install rods 1" lower than the finished length, while rods with a 2" diameter or more will need to be installed approximately 2" lower.

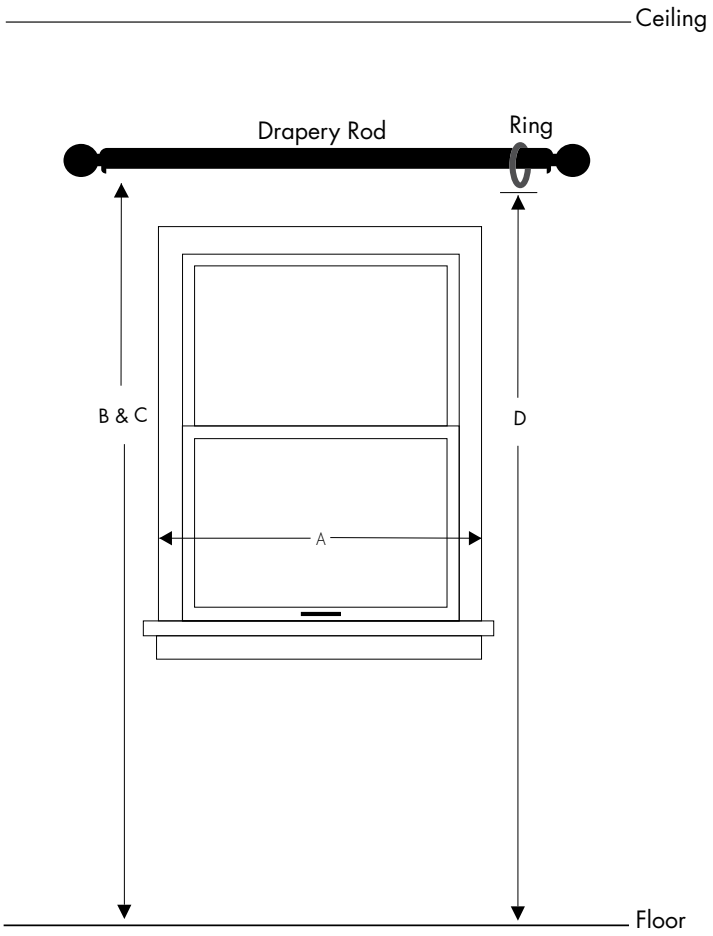
Determine Bracket Placement

- Install brackets a maximum of 60" apart to provide the drapery rod with maximum support. A center bracket is needed for longer rods.
- A connection seam requires a center bracket. For any rod over 96", two equal-length rods will connect to achieve the total length (1 center bracket); for rods over 120", three equal rods will connect (2 brackets).

Window Opening	Stackback*	Rod Width
24"	21"	45"
30"	23"	53"
36"	25"	61"
42"	26"	68"
48"	29"	77"
54"	30"	84"
60"	31"	91"
66"	32"	98"
72"	34"	106"
78"	36"	114"
84"	37"	121"
90"	38"	128"
96"	39"	135"
102"	42"	144"
108"	44"	152"
114"	45"	159"
120"	48"	168"

* Stackback sizes are estimates. Liner options can alter this measurement. These are for instances when you want to clear your window opening completely

Worksheet for Measuring Color Lux Window Solutions Draperies



1. DETERMINE SPACE NEEDED FOR DRAPERY ROD

- Measure outside window frame to outside frame (see A).
- Add 3"-12" to the drapery rod for panels to rest on either side of window frame when open.
- Add the extra inches needed for decorative finials.
- The total from the 3 measurements above is the amount of horizontal space needed for your drapery rod.

2. DETERMINE ROD PLACEMENT

- If not using drapery rings: Measure from bottom of rod to floor (see B).
- If using drapery rings: With the drapery attached to the rings, measure the distance from bottom of rod to top of drapery fabric; add this measurement to the drapery length to determine rod placement.

3. DETERMINE DRAPERY LENGTH

- If not using drapery rings: Measure from bottom of rod or top of window sill down to the floor, depending on desired window coverage (C).
- If using drapery rings: With rings attached to rod, measure from bottom of rings to top of floor or top of window sill, depending on desired window coverage (D).
- If you want drapery to "puddle" on the floor: Decide the amount of puddling desired, and add that measurement to your panel length. This is the overall panel length needed.

4. DETERMINE DRAPERY WIDTH

- Measure overall window width (see A).
- Add 2" to 8" for increased overlaps to reduce light gaps as desired.
- Our custom drapery styles are designed with fullness built in.

⚠WARNING	⚠ADVERTENCIA
 Window Blind Cord Can STRANGLE Your Child. To prevent strangulation, purchase cordless products or products with inaccessible cords.	La cuerda ciega de la ventana puede ESTRANGULAR su niño. Para evitar el estrangulamiento, compre alternativas inalámbricas o productos con cables inaccesibles.

Child Safety

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for Safety of Window Covering Products.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them.
To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the shade, simply wrap the excess cord around the cleat.

Cord tensioners keep the continuous cord loops taut to prevent children and pets from becoming entangled and subsequently injuring themselves. Cord tensioners must be used with all Soft Roman and Traverse Rod Shades and Systems to comply with the Window Covering Manufacturers Association Cord Safety Guidelines.

Cleaning and Care

While beautiful and pleasing to the eye, all Comfortex products are designed to be durable, easily cared for and easily cleaned. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. Spills and stains can be lightly blotted with a cloth or damp sponge.

For additional advice on care or cleaning, please contact our Technical Services Department.

Conditions of Sale

All Comfortex products are custom fabricated to your specifications. We cannot accept responsibility for errors in ordering or cancellations and charges after the order is in production.

Policies

Our policies are designed to provide a guide for doing business with Comfortex. Our first priority and number one policy is to provide the highest level of service and total satisfaction.

Freight Policy - Effective January 18, 2021

Freight Policy for Fabricated Drapery,Valances, Fabric By the Yard, Cornices and Hardware

Comfortex will ship all orders for fabricated shades or blinds freight free via FedEx UPS Ground or other similar method within the Continental United States.

A transportation surcharge of $8 per unit will be added to all fabricated product orders shipping within the Continental U.S. with a minimum charge of $25 per order.

The applicable fee will be the higher figure of the per unit charge and the minimum charge. For example, if you order four shades, you will be charged a total of $32 for shipping (4 units x $8 per unit). If you order two shades, you will be charged a total of $25 for shipping ($25 minimum cost).

Color Lux "Green Fabric" made to exact size will incur a $2.50 per unit transportation surcharge. In addition to the $2.50 fee, fabrics 90" wide or greater will also incur a $50 per order oversize fee.

This rate structure will apply to shades/blinds, vane packs, individual vanes, tracks, verticals, valances, and cut yardage orders.

Custom Drapery	$25 per window
Stationary Panels	$25 per window
Fabric By The Yard	$15 per bolt
Valances (Board Mounted)	$25 per window
Valances (Rod Mounted)	$25 per window
Cornices up to 96"	$25 per window
Cornices over 96" (*Cornices cannot be hinged)	$25 per window + surcharge*
Hardware with Rod (**Includes all ordered hardware for a specific opening i.e. finials, brackets)	$25 per opening**
Hardware without Rod	$5.50 per opening

The following are the exceptions:

***Oversized Shipments (widths of 90 inches or greater):** Oversized Rods will arrive spliced, Board Mounted Valances will be hinged to avoid oversized shipping costs. In addition to the $8 transportation surcharge per unit, (minimum of $25), a $50 per unit Common Carrier surcharge will be added to all oversized fabricated products shipping within the Continental U.S., including shades/blinds, Vertical Sheer Shadings, Ovation Cellular Slider, Panel Track systems, valances, vane packs, individual vanes, and tracks. Oversized products will have a minimum charge of $80 per order.

Hawaii and Alaska: Shipments to Hawaii and Alaska will incur transportation surcharges of $27 per unit. In addition, a $140 per unit Common Carrier surcharge for oversized shades/blinds (over 90") and an $80 per order oversize fee for Cut Fabric orders over 90" will be added to orders shipping to these two states.

Canada (all amounts are USD): Shipments to Canadian dealers will incur an $8.75 per unit transportation surcharge. There will also be an overall minimum charge of $25 per order. In addition, an $80 per unit Common Carrier surcharge for oversized shades/blinds (90" or greater) and a $40 per order oversize fee for Cut Fabric orders 90" or greater will be added to orders shipping to Canada.

Other Countries: All Dealers requesting orders to be shipped outside the United States must provide a Freight Forwarder.

Please Note: Comfortex reserves the right to select another carrier, modify shipping terms or change freight policies without notice.

Service and Repair

Service may be obtained by contacting our Customer Service Department. No products, parts, components or other materials will be authorized for return or repair without prior approval from Comfortex. A Return Authorization (RA) may be obtained by contacting our Technical Service Department. In order to provide the quickest service possible, please have your Comfortex Work Order number and original order information available when you call.

Components and Fabric

Comfortex will prepay all freight charges on shipments of component and fabric orders over $3,500 in value within the Continental US. Fabric and component orders less than $3,500 will be subject to freight charges.

Charged Marketing Materials

All charged marketing materials will incur freight charges. **EXCEPTION:** Manufacturer's Price List and Reference Guides and Price List Binders will ship freight free. Marketing materials may ship on separate days, from different locations. Freight charges are calculated per package, not per order.

Specifications

All Comfortex products are designed and tested to perform as intended within established, published parameters. Requests for "custom fabrication" of products outside of our published specifications may be considered, but are at the discretion of the Comfortex Technical Services department. Restrictions and additional charges apply.

Download installation instructions, order forms or additional price list copies on the Comfortex OnDemand Library or www.comfortex.com/comfortex-dealers in the Dealers Resource Center.

Color Lux Window Solutions Limited Lifetime Warranty Information

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The Limited Lifetime Warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The Warranty does not include any conditions or damages resulting from accidents, alterations, misuse, abuse, misapplication, improper handling, installation, repairs, operation, cleaning, exposure to any and all natural and manufactured excessive heat sources. (Excessive heat sources include, but not limited to; magnification of sun light through cubes of glass, heaters of any kind, ovens, candles, lighting fixtures, etc.) This warranty does not cover variation in fabric color or loss of pleating if product is not being cycled (held in the raised position a portion of the time). Variation in grain or texture in natural wood products is normal. Excessive warping of wood or faux wood slats in high humidity areas are not covered under this warranty. Normal wear and tear is not covered.

All moving parts, such as cords and strings (internal and external), will eventually wear out on all blinds and shades, and fabric may fray. Comfortex considers these things as normal wear and tear and will carry a five year Limited Warranty.
All fabric, including fabric vanes, panels, inserts, and shades carry a five year Warranty. Fabric cell separation is covered for a lifetime. See Comfortex Standard Return and Repair Policy for more details.

This Limited Warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this Limited Warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this Limited Warranty.

To obtain service, contact the Dealer from whom you purchased the product.

This Warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages are not allowable. Comfortex Dealers and Fabricators must use safety devices supplied by Comfortex in accordance with Window Covering Safety Counsel guidelines.

This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This Limited Warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this Warranty.

This Limited Warranty supersedes any previous versions.

Motorized Color Lux Soft Roman Shades Warranty

Simplicity Rechargeable Motors

We offer a 5 year warranty on all motors and controls. Specifically, we warrant the Simplicity motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Simplicity product fails within this 5 year period, we will repair or replace it free of charge through your end product supplier. Batteries are not covered by the warranty.

Color Lux Color Warranty

Comfortex utilizes state of the art technology to provide you Color Lux Shades within 2 Delta-E (DE) of the sample fabrics found in the Color Lux Sample Book. When viewed under different lighting sources such as fluorescent, incandescent, halogen, ultraviolet and others, fabrics may appear different to the eye. Comfortex utilizes the worldwide lighting standards of Daylight 65 (D65) as our official standard for measuring and qualifying color accuracy, because D65 daylight bulbs best represent actual "daylight" illumination. Slight color variations (under 2 DE) are within established industry standard and should be expected.
This warranty is in addition to Comfortex limited lifetime warranty.
