Sheer Color Coordination Chart

COLOR LUX® SHEER SHADINGS

- Color Lux Sheer Shadings are a window shading of unique beauty and performance for the finishing touch to a beautiful window and room.
- Horizontal fabric vanes float between two layers of soft, knitted fabric sheers to soften your view outside.
- Color Lux Sheer Shadings are available to widths of 120″ and drops to 132″.
- Color Lux Sheer Shadings are available in 3-inch vane widths in both light filtering and room darkening fabrics.
- The sophisticated 25 patterns of white on white Color Lux Printed Sheer Shadings is designed to flatter your decor.
- All Color Lux Sheer Shadings , printed and solid colors, will have fabric wrapped head rail and bottom rail.
- Vanes glide from open to closed to out of sight with elegant hardware.
- Choose from multiple hardware options to customize your shading: traditional cord loop, retractable cord, cordless, PowerTouch with Touch and Go feature or Simplicity Integrated Rechargeable Motorization.
- Only the Omni-View cord system provides five distinctly different variations of vane position for numerous combinations of privacy, view and light control.
- Only with Color Lux Sheer Shadings, can you partially raise the shading with the fabric vanes in the open, view-through position so you keep your view and still feel the outdoor breeze.
- Create your customers own sophisticated look with the low light gap Designer Cassette Head Rail.
- Easy to install hardware and brackets allow for effortless installations and easy removal for cleaning.
- Color Lux Sheer Shadings may be ultrasonically or traditionally cleaned to stay bright and beautiful.
- A Limited Lifetime Warranty serves as a commitment to your satisfaction.

FABRIC COLLECTIONS

Color Lux Printed Sheer Shadings are available with different fabric collections.

COLLECTION	3″ Vanes
Light Filtering	•
Room Darkening	•

Please Note: Room Darkening fabrics are not blackout fabrics. Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

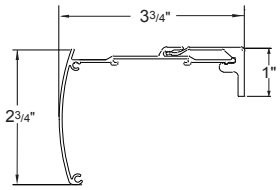
CORD LOOP SHADING HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Fabric Wrapped



Fabric Wrapped Designer Cassette Head Rail

- Depth of rail and bracket: 3¾"
- Height of rail: 2¾"
- Height of bracket: 1"

Bottom Rail Partly Opened

Bottom Rail Closed

(Bottom Rail is always fabric wrapped)

Hardware Features	
Standard Designer Cassette	Fabric Wrapped Designer Cassette is standard. Head rail endcap is fabric covered
Bottom Rail Color	Bottom rail is fabric wrapped with white end caps.
Head Rail Upgrades *(Bottom rail is always fabric wrapped)*	
Designer Metallic Upgrade (Smooth Face)	• Oil Rubbed Bronze • Onyx Black • Brushed Nickel

Mounting Dimensions	**Designer Cassette Head Rail**
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Width Side Mount	48" Max width side mount

Finished Dimensions	
Inside Mount	
	• Fabric will measure ordered width less: 1" • Head rail* will measure ordered width less: 3/16"
Side (End) Mount	
	• Fabric will measure ordered width less: 1½" • Head rail* will measure ordered width less: 11/16"
Outside Mount	
	• Fabric will measure ordered width less: 5/8" • Head rail* will measure ordered width plus: 3/16"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: 13/16" • Head rail* will measure ordered width
* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"	

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the opened position.

Color Lux® Sheer Shadings
CORD LOOP SHADING HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Head Rail Options
Fabric Wrapped Designer Cassette Head Rail is standard. End caps of the head rail are fabric covered.

Designer Metallic Upgrade is available. Colors available: Oil Rubbed Bronze, Onyx Black and Brushed Nickel. Bottom rail is always fabric wrapped.

Cord Type and Color
White, black or bronze loop cord coordinates with your hardware choice. Bead cord is optional in white, bronze, black or steel. Cord tensioners match your hardware choice (white, black or bronze). Lengths over 6 feet available in white only.

Reverse Roll
The braided cord does not have a reverse roll stop. If a shading with the Designer Cassette hardware is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Length Considerations with Shangri-La Shadings
Comfortex will fabricate your Shangri-La Window Shading to the length ordered, when the vanes are in the open position (Figure A).

- When the vanes are rotated to the closed position, the shading will become slightly longer.
- When closed on an inside mount,the shading will be slightly longer than ordered length.
- Rotating the vanes closed will cause the bottom rail to touch the window sill, before it begins to raise.

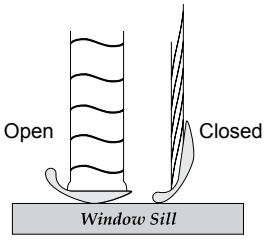


Figure A

Side By Side Alignment
When Shangri-La Window Shadings are installed side-by-side, vane alignment can be guaranteed within ¼" only if:

- The shadings are the same color and ordered at the same time.
- The sum total of the widths of all shadings needing alignment is less than 118".

Side-by-side lineup is specified when the order is placed.

Omni-View System
Shangri-La Shadings feature the Omni-View™ Cord System. The Omni-View System provides the ability to manipulate the shading into various viewing positions. There are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The following five modes can be obtained with standard shading operation when viewing the shading at eye level.

- **Closed top, open bottom:** By partially lowering the shading from the fully raised position, the upper portion of your window will become semi-opaque while allowing a clear view below.
- **Fully private:** When lowered completely, Shangri-La provides complete privacy and softly diffused light.
- **Partially open:** Opening Shangri-La slightly will gradually increase the level of light and allow varying levels of view through.
- **View-through when lowered:** By completely opening the vanes, Shangri-La provides a softened, veiled view to the outside.
- **View-through when raised:** From the open or view-through position, continuing to pull down on the back of the cord will raise the fabric allowing a clear view outside from below, and a veiled view above. This exclusive feature allows Shangri-La to be raised up to 24" in this mode.
- Comfortex recommends that you **do not** raise the shading more than 24" off the sill in the view-through when raised mode. Refer to warranty section below for more information.
- Omni-View capability is available with all Shangri-La Shadings except cordless.

Cord Information For Shangri-La Shadings
A braided cord loop is used to raise and lower the shading. White, black or bronze loop cord matches your hardware choice. Cord tensioner will match the hardware color.

Bead cord is available in black, white, bronze, nickel and steel. Lengths over 6 feet available in white only.

The cord loop will measure the length indicated below unless otherwise specified.

Shade Length	Standard Loop
16" to 26⅞"	1' (12")
27" to 39⅞"	2' (24")
40" to 59⅞"	3' (36")
60" to 83⅞"	4' (48")
84" to 107⅞"	5' (60")
108" and greater	6' (72")

Maximum cord length is 15 feet. Polyester cord can be ordered in custom lengths in 1 foot increments only.

Braided Cord Loop Warranty Information
The shadings built with a braided cord loop do not have a reverse roll stop. If a shading is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

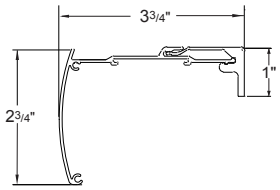
RETRACTABLE CORD HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Fabric Wrapped



Fabric Wrapped Designer Cassette Head Rail

- Depth of rail and bracket: 3¾"
- Height of rail: 2¾"
- Height of bracket: 1"

Hardware Features	
Standard Designer Cassette	Fabric Wrapped Designer Cassette is standard. Head rail endcap is fabric covered
Bottom Rail Color	Bottom rail is fabric wrapped with white end caps.
Head Rail Upgrades *(Bottom rail is always fabric wrapped)*	
Designer Metallic Upgrade (Smooth Face)	• Oil Rubbed Bronze • Onyx Black • Brushed Nickel

Mounting Dimensions	**Mounting and Finished Dimensions are the same as Cord Loop** **See Page 10**
Finished Dimensions	

Retractable Cord Shadings

The Retractable Cord option is a single cord design that provides easy one hand operation to raise, lower and open and close the vanes.

- Retractable Cord hardware is an alternative to conventional cord loop controls. The short retractable cord maintains a consistent length whether the shadings are raised or lowered. The elimination of cord loop enhances child and pet safety.
- Available with all fabrics with Designer Cassette.
- White, black or bronze cord and tassel coordinates your hardware color choice.
- Standard cord length is 40% the length of the shading. Cord may be shortened to match consumer operating preferences and to keep out of reach of children. Cord length can be easily modified in the field.
- Mounting a cord tensioner is not necessary. Cord cleat is recommended.

Overall Operation

When raising and lowering the shading, pull the cord down in long,even strokes. Allow the cord to fully retract into the head rail after each downward stroke.

To Lower The Shading And Open The Vanes

- Pull the cord down toward the center of the shading with long strokes. Continue until the shading is fully lowered and the vanes are open.
- Allow the cord to retract completely into the head rail after each downward stroke.
- The shading can be stopped at any point while lowering

To Tilt The Vanes And Raise Shading

- Pull the cord straight down or down and slightly out with long strokes. With each stroke the shading partially raises.
- Allow the cord to retract completely into the head rail after each downward stroke.
- Use multiple strokes until the shading reaches the desired position.
- The shading can be stopped at any point while raising.

Finished Dimensions	

Two-On-One Designer Cassette Head Rail

Two-On-One Head Rail shadings are two shadings sharing the same head rail; each shading operates independently.

- Two-On-One Head Rail can be combined with cord loop, PowerTouch Rechargeable, Simplicity Motorization and retractable cord hardware options. Price as two shadings (including upgrades) and add together. Pricing example on page 8.
- Two-On-One not available with cordless.
- Specify shading total width and two individual section widths. **Note:** The two individual sections must add up to the total width.
- Two on One Head Rail Shadings are available with bead cord or braided cord loop. See page 12 for more information.
- Controls will always be placed to the far left and far right.
- Available in widths up to 140" with Designer Cassette hardware.
- Minimum single section width is 12". Maximum single section width is 102". The center gap between shadings is ⅜".
- Side by side alignment is available if the two panels measure less than 120". Alignment must be specified when the order is placed.
- Shadings over 98" are subject to common carrier surcharge. See page 112 for more information on the freight policy.

	• Fabric will measure ordered width less: 11/16" • Head rail* will measure ordered width
* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"	

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the closed position.

Color Lux® Sheer Shadings
CORDLESS HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Cordless Shangri-La Shadings Head Rail
- The Standard Designer Cassette head rail is fabric wrapped.
- Designer Cassette head rail is also available in Oil Rubbed Bronze, Brushed Nickel and Onyx Black.
- Shangri-La Cordless Sheer Horizontal Shadings use quick-snap, no-light-gap brackets.

Cordless Shangri-La Shadings Bottom Rail
- Bottom rail includes a sliding weight to adjust fabric skewing if necessary.
  Bottom rail is always fabric wrapped.

Operating A Cordless Shangri-La Shading
Cordless Shangri-La Shadings utilize a roller catch mechanism in the head rail which allows for the vanes to be adjusted into various positions.

Pull the handle that is attached to the bottom rail until the shading reaches the desired length, allow catch mechanism to engage and lock shade in desired position.

To Open Or Close Vanes
Lower the shading all the way down and continue pulling down on the handle until the vanes open. The roller catch mechanism allows the vanes to be adjusted open, closed and to various positions in between.

When adjusting the vane position, release the catch by tugging on the handle, roll up the shading several inches (this resets the catch mechanism), then pull back down to the desired position.

- The Omni-View setting is not available with Shangri-La Cordless Shadings.

To Raise The Shading
Pull down on the handle to release the catch mechanism and let the shading rise. Tug the handle to lock the shade in the desired position.

When first learning to operate the shading, it may take a few tries to get the feel of the mechanism.

Color Lux® Sheer Shadings
SHANGRI-LA DOORSTYLES HARDWARE SYSTEM

Shangri-La DoorStyles Shadings

Shangri-La DoorStyles Shadings cover French doors, transoms and sidelights for a look of sheer perfection without a bulky head rail. They attach to the window frame or door with unobtrusive hinges and tilt open and closed with easy to install hardware. An operating handle allows the fabric to be tilted open and closed (Figure A).

Hardware used on DoorStyle Shadings may not match standard shadings.

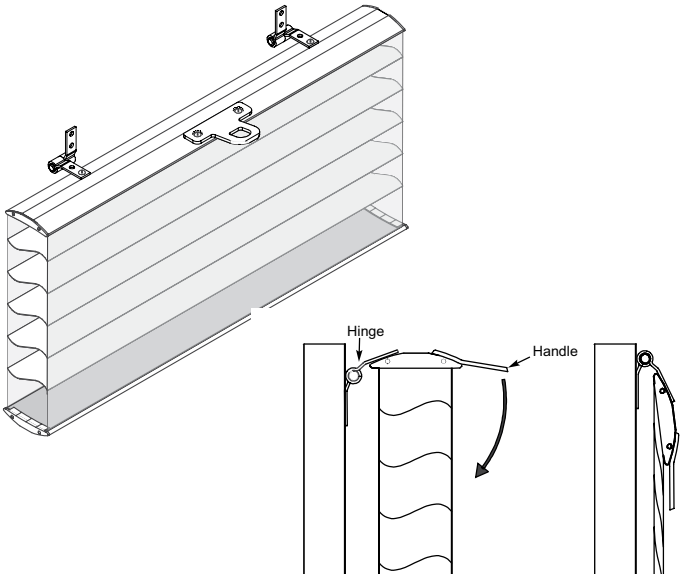

Figure A

Fabric

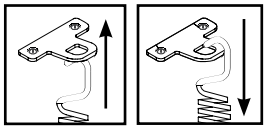
All 3″ light filtering and room darkening fabric collections are available as DoorStyle Window Shadings.

Rails and end caps on Shangri-La DoorStyles Shadings are coordinated to the fabric color.

Designer Metallic Hardware Upgrade: Not available with DoorStyles.

Operating Pole

An operating pole is available for hard to reach windows and doors. Please specify when ordering.



3 Foot Expandable Pole

5-10 Foot Expandable Pole

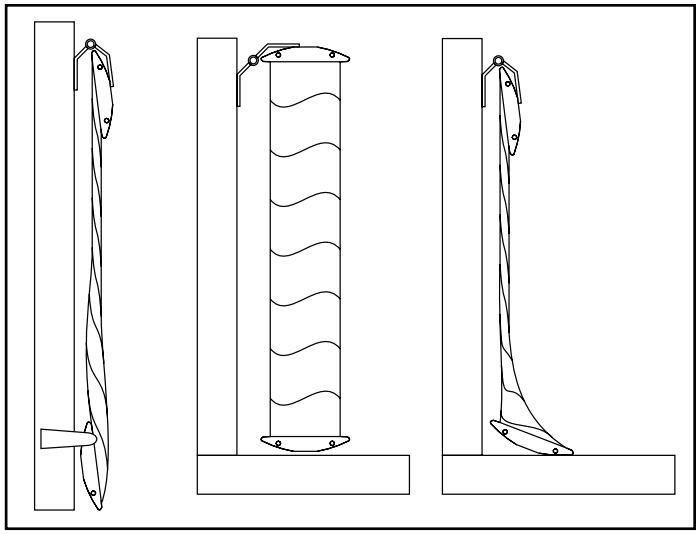
DoorStyles Shading Specifications

Minimum Width:	6″	Maximum Width:	72″
Minimum Length:	12″	Maximum Length:	72″*

*Maximum length varies by width.

DoorStyles are **not** available with 2½″ vane fabrics.

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the open or "view-through" position.



Length Considerations With Shangri-La DoorStyles

Comfortex will fabricate your Shangri-La DoorStyles to the length ordered when the vanes are in the open (or view through) position. When the vanes are tilted to the closed position, the shading will become 1¾″ longer.

When closed on an inside mount or when used with hold down brackets, a slight puckering may occur.

Benefits of Simplicity BlueTooth™ Motorization: Featuring the Free Color Lux Mobile App

- New "state of the art" 7.4v rechargeable motorization operates with both BlueTooth and Radio Frequency control technology.
- Download the new Color Lux Mobile Bluetooth App FREE on the Apple App Store for iPhone or the Google Play Store for Android.
- Optional Simplicity radio frequency remote control with choice of 5 channel, 6 channel with timer, or 14 channel remote.
- Optional Simplicity Smart Controller (NEO) for remote operation of shades which integrates with Amazon Alexa and Google Assistant devices.

Features of the Color Lux Mobile Bluetooth App:

- Controls your shade directly from your phone with Bluetooth control.
- Has a shade position display indicator. See screen to the right.
- Has a battery charge level indicator.
- Controls the shade using easy swipe or control buttons.
- Controls up to 5 shades simultaneously and no limit to the number of shades connected to a single account.
- Has timer and scene setting options.

Please Note: There are many factors affecting Bluetooth range

- Physical obstacles in the transmission path
- The antennas should be exposed for best performance
- Bluetooth 4.2 supports 10 meters indoor range (~33 feet).

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"	

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the open position.

Table of Contents

Color Lux® Sheer Shadings
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades
Sheer Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position. When the shading is fully lowered to the factory programmed lower limit, the bottom rail will be set in the level position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. Favorites position can be programmed on-site.

PowerTouch Rechargeable Surcharges
See page 8.

PowerTouch Appearance
- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options
- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location
The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length
The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings
- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shadings Warranty
Please see page 114 for complete warranty information.

Color Lux® Sheer Shadings
12V NON-RECHARGEABLE SIMPLICITY MOTORIZATION | DESIGNER CASSETTE HEAD RAIL

Non-Rechargeable Simplicity Motors
The non-rechargeable Simplicity Motor program features a battery powered motor utilizing a single battery wand that contains disposable AA batteries or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shadings. The Simplicity motor is concealed in the head rail.

See page 23 for information on Simplicity Rechargeable system version.

Simplicity Motors With Designer Cassette
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. See page 21 for mounting information.

Simplicity Battery Wand
The battery wand can be clipped to the Designer Cassette head rail. Can not be mounted on shadings under 25" wide. The battery wand is wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight alkaline batteries, and is white in color. The battery wand must be placed so it does not interfere with the mounting brackets.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement
Eight alkaline batteries are included with the wand.
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

DC Power Supply/Transformer
12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep. Extension wires are available if needed.

Important Simplicity Motorized Shading Operating and Installation Information
Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote
The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote also available
See page 24 for more information

14 Channel Remote
This remote has 14-channels. Each channel has a setting to operate the bottom rail. The ***14 Channel remote*** can operate up to fourteen shades individually or 14 groups.

14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.

Simplicity Battery Operated Motorized Shadings Warranty
Please see page 114 for complete Comfortex warranty information.

Bluetooth®

Bluetooth Simplicity Rechargeable Motors
The Rechargeable Simplicity Motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

PowerTouch Integrated Rechargeable Surcharges
See page 5 for shading standards and page 8 for surcharges and pricing example.

Simplicity Rechargeable Motors
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. No external battery wand is required. See page 21 for mounting information.

Rechargeable Simplicity Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Integrated Rechargeable Motor Battery Life
The rechargeable battery is consealed within the motor housing.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Integrated Rechargeable Motor Battery Charger
An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Integrated Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor. Required with Integrated Shading order. Sold separately.

The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote

The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote

The ***6 Channel (6C) timer remote*** combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for 18 different scheduled actions.
- Manual function disables the timer and the remote then operates as a hand held remote.

Simplicity (6C) remotes and holders are available in white. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

A ***14 Channel (14C) remote*** is also available. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. See page 23 for more information.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE NEW INTEGRATED RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

Solar Panel Recharge Option
Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).
See page 25.

Color Lux® Sheer Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Important Information about Integrated Rechargeable Simplicity Motor Shading Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Battery Operated Motorized Shadings Warranty

Please see page 114 for complete Comfortex warranty information.

NEW Simplicity Bluetooth Motorization

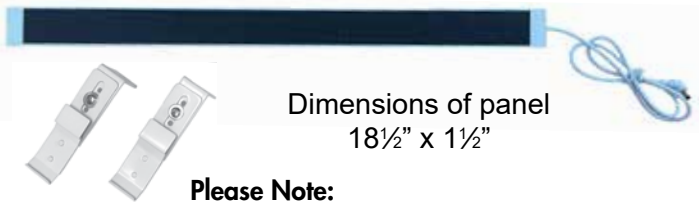
Learn about Simplicity Bluetooth motorization and Comfortex FREE Color Lux Mobile App on page 18.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.



Dimensions of panel
18½" x 1½"

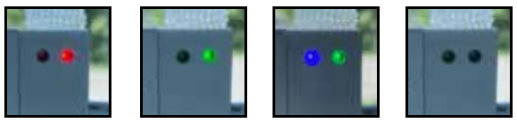
Please Note:
LED solar panel cord length is 24". Make sure to order 48" extension cord if needed.

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

Solar Panel LED Lights

Red Light: Indicates optimum direct sun exposure
Green Light: Indicates sunlight is enough to charge battery
Blue Light: Indicates battery is chargeing. Blue light is off when not charging (including when the battery is full)
No Lights: Night or very low sun

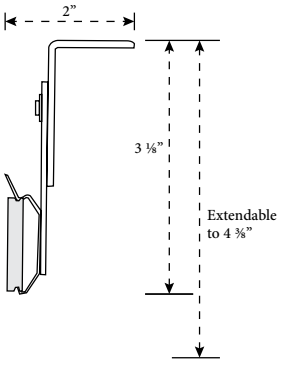


Red Light Green Light Blue Light No Light

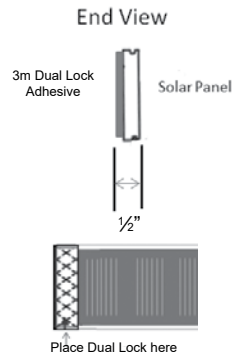
Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Bracket Method



Tape Method



Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

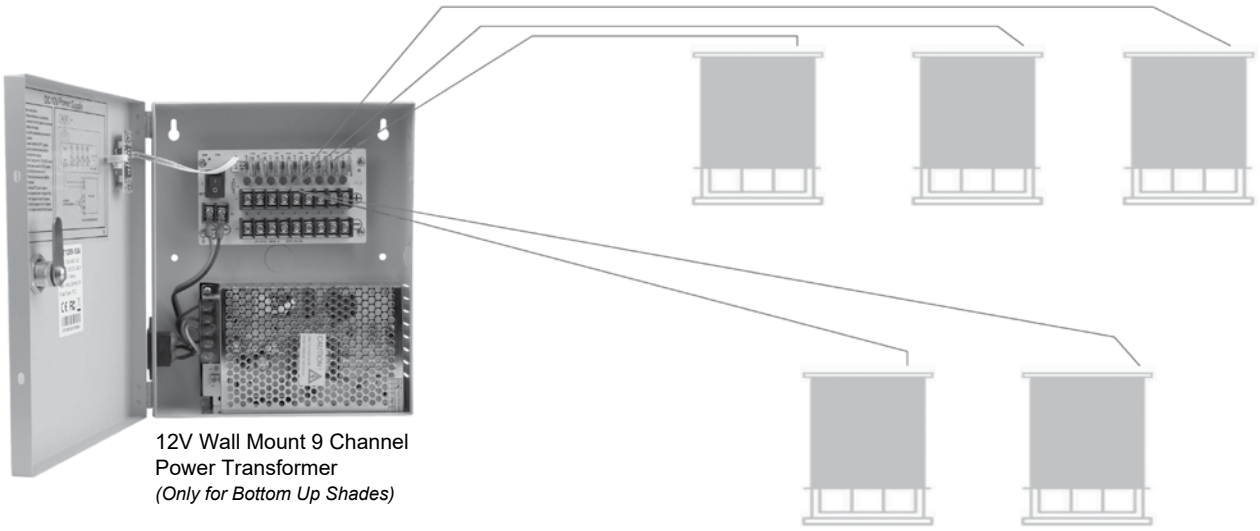
12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM



12V Wall Mount 9 Channel
Power Transformer
(Only for Bottom Up Shades)

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Roller Shades, Sheer Shadings and Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.
- **Product Description:**
  -12v10a 9ch
  -Input Voltage Range : AC90V-264V
  -Input Frequency Range : 50Hz-60Hz
  -Output Voltage Range : DC12V+/-5%
  -Output Current : 10 Ampere
  -Output Power : 120 Watt
  -Output Ripple&Noise : ≤42MV
  -Output Efficiency : ≥83%
  -Output Fuse Type : PTC
  -Output Fuse Rating : 2A
  -Environment Operating Amb.Temp : -30 ~45
  20%~90%RH
  -Environment Storage Temp : -40 ~85 10%~95%RH
  -Plugs into standard household outlet
  -Power cord is 56" in length

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2⅜″
- Length of controller: 2 15/16″
- Height of controller: 1⅛″

Simplicity Smart Controller	
	• Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Controlled Shades • Powered by NEO Smart Blinds App. • Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?

The App is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the App and your shades.

Color Lux® Sheer Shadings
GENERAL INFORMATION

Certified Fabrics | GREENGUARD® Fabrics

GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The Shangri-La fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems.

Flame Resistance

Shangri-La fabric may be processed with a topical treatment to resist flames and adhere to strict flammability codes. For more information, contact Customer Service at (800) 843-4151.

UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

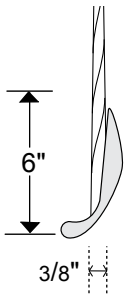
The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

Shangri-La fabrics have the following UV Protection ratings:

Light Filtering Fabrics	Open Vanes	87%
Room Darkening Fabric	Open Vanes	88%
All Fabrics	Closed Vanes	99%

Vane Closure

Shangri-La vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.



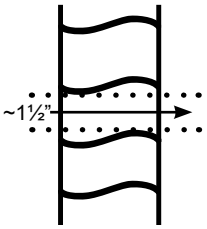
Vane closure is measured as the distance between the front and rear fabric sheers 6" up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅜" for shadings under 60" and ⅝" for shadings longer than 60". On room darkening fabrics, the distance is ⅜" regardless of shading length.

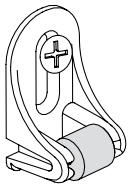
Vane Opening and Visibility

Vanes on the three styles of Shangri-La fabrics open to slightly different degrees. Consequently, there are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The variations among the products are shown in the below illustration when looking through the shading ¼ of the way up from the bottom.

3" Fabrics



Magnetic Hold-Down Brackets



Optional magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Please specify when ordering.

Extension Brackets

Extension or "L" brackets are available to project the back of the shading from the mounting surface. The extension brackets for Designer Cassette head rail projects it 3".

Spacer Blocks

Spacer blocks project the shading ⅜" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of the shading.

Leveling Shangri-La Sheer Shadings

Shangri-La Window Shadings are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure correct and balanced operation.

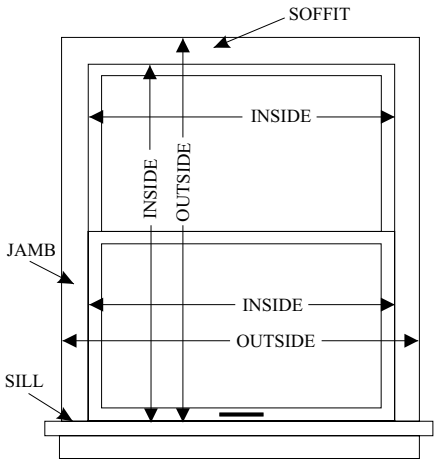
Child Safety

Please see page 111 for child safety information.

Table of Contents

Color Lux® Sheer Shadings
GENERAL INFORMATION

Measuring Instructions for Sheer Shadings



Important Measuring Guidelines for Sheer Shadings. Comfortex accepts measurements down to 1/16" increments.

Precise width and length measurements are critical. Fabric width cannot be altered after the shading is fabricated.

Please use a metal tape measure for accuracy.

The head rail must be installed perfectly level to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.

Inside Mount

Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.
Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount

Measure the exact width and length of the area to be covered. On the width, allow at least 1½" of an overlap on each side. An overlap of 3" on each side is recommended. Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

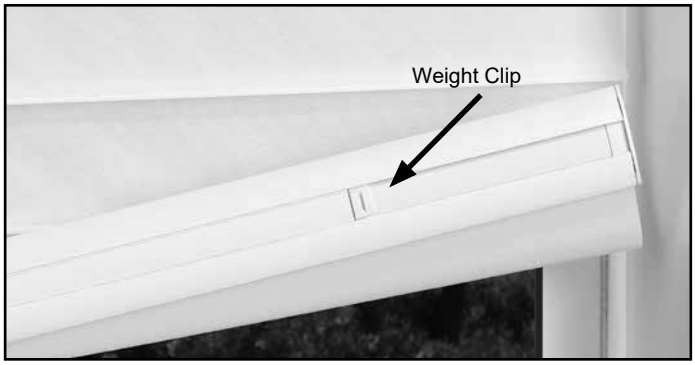
Side Mount

Side mount is not available with DoorStyles Shadings.
Shangri-La may be side mounted using "L" brackets. For side mounts, follow the instructions for inside mounts. An additional ½" will be taken off the standard inside mount deduction to allow room for the "L" brackets.
The maximum shading width utilizing the side mount option is 48".

Skew Adjusting Bottom Rail

After installation, windows that are not square and level may cause the shadings to shift to one side as it rolls up, requiring adjustment of the bottom rail. If the brackets are not level it may be necessary to adjust the bottom rail weight.

- To access the bottom rail weight, release the weight clip on the bottom rail by using a flat blade screwdriver. Insert it into the weight clip in the bottom rail and turn clockwise.
- Move the weight in 1" increments toward the side where the fabric is gathering.
- Secure the weight clips in position by turning them counterclockwise after making the adjustment.



Cleaning and Care

Shangri-La Shadings are made from a sturdy, knitted polyester fabric which can be feather dusted or vacuumed at a low setting. Spots or stains can be lightly rubbed clean with a damp sponge and mild soap. To avoid discoloration of the material, we recommend against the use of chemical cleaners.

Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure to salt air through open windows and doors will accelerate fabric deterioration over time.

Important: Do not clean the fabric using electrostatic wipes such as Swiffer® or Pledge Grab-It®.

Ultrasonic Cleaning

Shangri-La Shadings can be ultrasonically cleaned. Adco OnSite Fabricare provides shading and blind cleaning services. For more information, visit www.onsitefabricare.com. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

For additional advice on care or cleaning, please contact the Comfortex Technical Service Department at 800-843-4151.

SHANGRI-LA® SHEER HORIZONTAL WINDOW SHADINGS

- Shangri-La is a window shading of unique beauty and performance for the finishing touch to a beautiful window and room.
- Horizontal fabric vanes float between two layers of soft, knitted fabric sheers to soften your view outside.
- Shangri-La is available to widths of 120" and drops to 13 2" to provide visual elegance to the widest of windows.
- Shangri-La is available in 2-inch, 2½-inch and 3-inch vane widths in both light filtering and room darkening fabrics.
- Shangri-La's 3-inch vane fabrics provide greater view through with our most popular colors.
- Vanes glide from open to closed to out of sight with elegant hardware.
- Choose from multiple hardware options to customize your shading: traditional cord loop, retractable cord, cordless, cordless PowerTouch with Touch and Go feature or Simplicity Integrated Rechargeable Motorization.
- Only the Omni-View cord system provides five distinctly different variations of vane position for numerous combinations of privacy, view and light control.
- Only with Shangri-La, can you partially raise the shading with the fabric vanes in the open, view-through position so you keep your view and still feel the outdoor breeze.
- A weight system in the bottom rail allows for on-the-spot skew adjustment for a balanced appearance in the window.
- The sophisticated array of Shangri-La colors is designed to flatter your decor.
- Create your customers own sophisticated look with the low light gap Designer Cassette Head Rail.
- A low side light gap provides minimal light leakage on shading sides and above the head rail for increased privacy.
- Easy to install hardware and brackets allow for effortless installations and easy removal for cleaning.
- Shangri-La Shadings may be ultrasonically or traditionally cleaned to stay bright and beautiful.
- A Limited Lifetime Warranty serves as a commitment to your satisfaction.
- **Now Available:** Color Lux Shangri-La Sheer Horizontal Shadings. 3" Vanes available in 25 printed patterns and hundreds of colors. Visualization and swatches available on **www.colorluxwindowsolutions.com** Complete program details available in the Color Lux Manufacturer's Price List and Reference Guide.

FABRIC COLLECTIONS

Shangri-La Sheer Horizontal Window Shadings are available with different fabric collections.

COLLECTION	2″ Vanes	2½″ Vanes	3″ Vanes
Light Filtering	•	•	•
Room Darkening	•	•	•
Linen Light Filtering	•	NA	NA

Please Note: Room Darkening fabrics are not blackout fabrics. Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

Sheer Horizontal Window Shadings
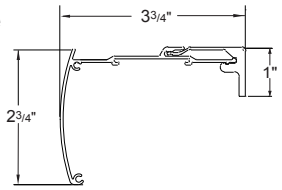
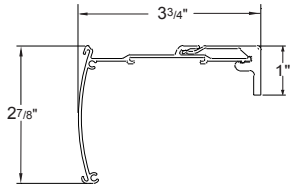
CORD LOOP SHADING HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Smooth Face



Fabric Insert



Smooth Face Designer Cassette Head Rail

- Depth of rail and bracket: 3¾"
- Height of rail: 2¾"
- Height of bracket: 1"

Fabric Insert Designer Cassette Head Rail

- Depth of rail and bracket: 3¾"
- Height of rail: 2⅞"
- Height of bracket: 1"

Hardware Features	
Standard Designer Cassette	Choose from coordinating Fabric Insert or painted Smooth Face rail. Default head rail color is White or Ivory based on shading vane color.
Bottom Rail Color	Color coordinated rail with White/Ivory head rail. Bottom rail will be matched to Oil Rubbed Bronze or Onyx Black when metallic upgrade is selected. With Brushed Nickel Head rail, bottom rail will be coordinated to fabric.
Upgrades	
Designer Metallic Upgrade (Fabric Insert/Smooth Face)	• Oil Rubbed Bronze • Onyx Black • Brushed Nickel

Mounting Dimensions	Designer Cassette Head Rail
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Width Side Mount	48" Max width side mount

Finished Dimensions	
Inside Mount	
	• Fabric will measure ordered width less: 1" • Head rail* will measure ordered width less: 3/16"
Side (End) Mount	
	• Fabric will measure ordered width less: 1½" • Head rail* will measure ordered width less: 11/16"
Outside Mount	
	• Fabric will measure ordered width less: 5/8" • Head rail* will measure ordered width plus: 3/16"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: 13/16" • Head rail* will measure ordered width
* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"	

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the closed position.

Hardware Features	
Standard Designer Cassette	Choose from coordinating Fabric Insert or painted Smooth Face rail. Default head rail color is White or Ivory based on shading vane color.
Bottom Rail Color	Color coordinated rail with White/Ivory head rail. Bottom rail will be matched to Oil Rubbed Bronze or Onyx Black when metallic upgrade is selected.
Upgrades	
Designer Metallic Upgrade (Fabric Insert/Smooth Face)	• Oil Rubbed Bronze • Onyx Black

Mounting Dimensions	
Finished Dimensions	Mounting and Finished Dimensions are the same as Cord Loop See Page 44

Retractable Cord Shadings

The Retractable Cord option is a single cord design that provides easy one hand operation to raise, lower and open and close the vanes.

- Retractable Cord hardware is an alternative to conventional cord loop controls. The short retractable cord maintains a consistent length whether the shadings are raised or lowered. The elimination of cord loop enhances child and pet safety.
- Available with all fabrics with Designer Cassette.
- White, black or bronze cord and tassel coordinates your hardware color choice.
- Standard cord length is 40% the length of the shading. Cord may be shortened to match consumer operating preferences and to keep out of reach of children. Cord length can be easily modified in the field.
- Mounting a cord tensioner is not necessary. Cord cleat is recommended.

Overall Operation

When raising and lowering the shading, pull the cord down in long,even strokes. Allow the cord to fully retract into the head rail after each downward stroke.

To Lower The Shading And Open The Vanes

- Pull the cord down toward the center of the shading with long strokes. Continue until the shading is fully lowered and the vanes are open.
- Allow the cord to retract completely into the head rail after each downward stroke.
- The shading can be stopped at any point while lowering

To Tilt The Vanes And Raise Shading

- Pull the cord straight down or down and slightly out with long strokes. With each stroke the shading partially raises.
- Allow the cord to retract completely into the head rail after each downward stroke.
- Use multiple strokes until the shading reaches the desired position.
- The shading can be stopped at any point while raising.

Hardware Features	
Standard Designer Cassette	Choose from coordinating Fabric Insert or painted Smooth Face rail. Default head rail color is White or Ivory based on shading vane color.
Bottom Rail Color	Color coordinated rail with White/Ivory head rail. Bottom rail will be matched to Oil Rubbed Bronze or Onyx Black when metallic upgrade is selected. Hinged handle is clear. With Brushed Nickel Head rail, bottom rail will be coordinated to fabric.
Upgrades	Available for all Designer Cassette Head Rails
Designer Metallic Upgrade (Fabric Insert/Smooth Face)	• Oil Rubbed Bronze • Onyx Black • Brushed Nickel

Mounting Dimensions	**Designer Cassette Head Rail**
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Maximum Side Mount	48"

Finished Dimensions	
Inside Mount	
	• Fabric will measure ordered width less: ⅞" • Head rail* will measure ordered width less: 3⁄16"
Side (End) Mount	
	• Fabric will measure ordered width less: 1⅜" • Head rail* will measure ordered width less: 11⁄16"
Outside Mount	
	• Fabric will measure ordered width less: ½" • Head rail* will measure ordered width plus: 3⁄16"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: 11⁄16" • Head rail* will measure ordered width
* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"	

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the closed position.

Sheer Horizontal Window Shadings
CORDLESS HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Cordless Shangri-La Shadings Head Rail

- The Standard Designer Cassette head rail is with white or ivory aluminum with a coordinating fabric insert or Smooth Face.
- Designer Cassette head rail is also available in Oil Rubbed Bronze, Brushed Nickel and Onyx Black.
- Shangri-La Cordless Sheer Horizontal Shadings use quick-snap, no-light-gap brackets.

Cordless Shangri-La Shadings Bottom Rail

- Bottom rail includes sliding weight to adjust fabric skewing if necessary.
  Please note: On Cordless Shangri-La Shadings the bottom rail is color coordinated to the fabric (not matched to the head rail). Hinged handle is clear.

Operating A Cordless Shangri-La Shading

Cordless Shangri-La Shadings utilize a roller catch mechanism in the head rail which allows for the vanes to be adjusted into various positions.

Pull the handle that is attached to the bottom rail until the shading reaches the desired length, allow catch mechanism to engage and lock shade in desired position.

To Open Or Close Vanes

Lower the shading all the way down and continue pulling down on the handle until the vanes open. The roller catch mechanism allows the vanes to be adjusted open, closed and to various positions in between.

When adjusting the vane position, release the catch by tugging on the handle, roll up the shading several inches (this resets the catch mechanism), then pull back down to the desired position.

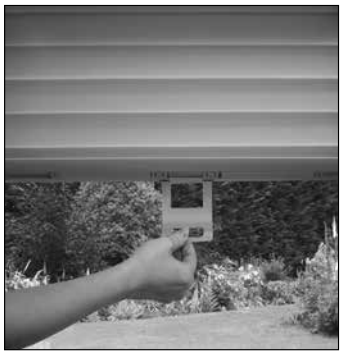
- The Omni-View setting is not available with Shangri-La Cordless Shadings.

To Raise The Shading

Pull down on the handle to release the catch mechanism and let the shading rise. Tug the handle to lock the shade in the desired position.

When first learning to operate the shading, it may take a few tries to get the feel of the mechanism.

Cordless Handle



Cordless Handle Being Pulled Down

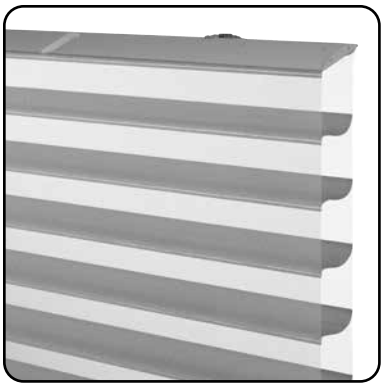
Sheer Horizontal Window Shadings
SHANGRI-LA DOORSTYLES HARDWARE SYSTEM



Limited color selection, see page 49.

Hardware Features	
Standard Hardware	Hardware used on DoorStyles Shadings may not match standard shadings.
Bottom Rail Color	Rails and end caps on Shangri-la DoorStyles Shadings are coordinated to the fabric color. With Brushed Nickel Head rail, bottom rail will be coordinated to fabric.
Upgrades	DoorStyles
Designer Metallic Upgrade	Not Available
Hinges & Handle	Polished Brass

Mounting Dimensions	**DoorStyles Hardware**
Minimum Shallow Mount	1½"
Minimum Flush Inside Mount (including brackets)	2⅝"
Minimum Outside Mount	¾"

Finished Dimensions	
Inside Mount	
	• Fabric will measure ordered width less: 5/16" • Head rail* will measure ordered width less: 3/16"
Outside Mount	
	• Fabric will measure ordered width • Head rail* will measure ordered width plus: 3/16"
Exact (End Cap to End Cap) Mount	
	• Fabric will measure ordered width less: 3/16" • Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛" **Side Mount is not available for DoorStyles**

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated.

Sheer Horizontal Window Shadings
SHANGRI-LA DOORSTYLES HARDWARE SYSTEM

Shangri-La DoorStyles Shadings

Shangri-La DoorStyles Shadings cover French doors, transoms and sidelights for a look of sheer perfection without a bulky head rail. They attach to the window frame or door with unobtrusive hinges and tilt open and closed with easy to install hardware. An operating handle allows the fabric to be tilted open and closed (Figure A). Hardware used on DoorStyle Shadings may not match standard shadings.

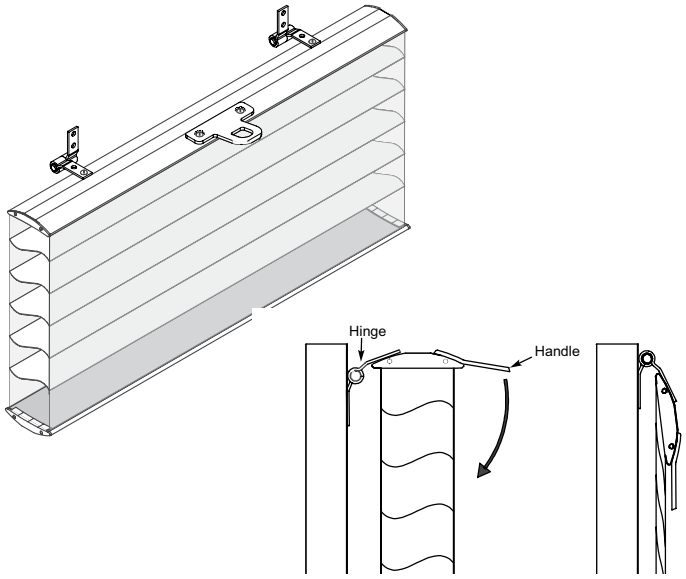


Figure A

Fabric

Only listed 2″ and 3″ light filtering and room darkening fabrics are available as DoorStyle Window Shadings. See chart below.

DoorStyles are **not** available with 2½″ fabrics.

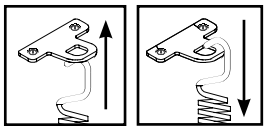
Rails and end caps on Shangri-La DoorStyles Shadings are coordinated to the fabric color.

2″ VANE	3″ VANE
1000 Powder	31000 Powder
1001 Vellum	31001 Vellum
3001 Vellum Aura™	33001 Vellum Aura™
2100 Starlight	32100 Starlight
2200 Cloud White	32200 Cloud White

Designer Metallic Hardware Upgrade: Not available with DoorStyles.

Operating Pole

An operating pole is available for hard to reach windows and doors. Please specify when ordering.



3 Foot Expandable Pole

5-10 Foot Expandable Pole

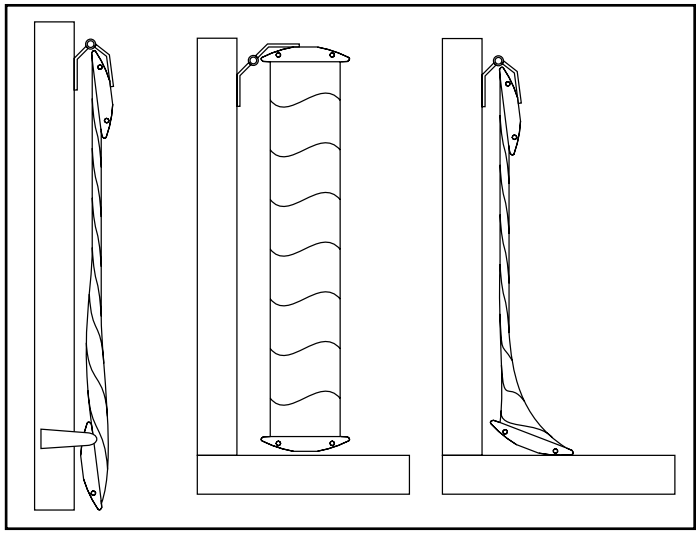
DoorStyles Shading Specifications

Minimum Width:	6″	Maximum Width:	72″
Minimum Length:	12″	Maximum Length:	72″*

*Maximum length varies by width.

DoorStyles are **not** available with 2½″ vane fabrics.

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the open or "view-through" position.



Length Considerations With Shangri-La DoorStyles

Comfortex will fabricate your Shangri-La DoorStyles to the length ordered when the vanes are in the open (or view through) position. When the vanes are tilted to the closed position, the shading will become 1¾″ longer.

When closed on an inside mount or when used with hold down brackets, a slight puckering may occur.

Sheer Horizontal Window Shadings
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades
Sheer Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position. When the shading is fully lowered to the factory programmed lower limit, the bottom rail will be set in the level position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits can easily be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. Favorites position can be programmed on-site.

PowerTouch Rechargeable Surcharges
See page 37.

PowerTouch Appearance
- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options
- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location
The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length
The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings
- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

PowerTouch Rechargeable Battery Life
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shadings Warranty
Please see page 114 for complete warranty information.

Sheer Horizontal Window Shadings
12V SIMPLICITY MOTORIZATION | DESIGNER CASSETTE HEAD RAIL

Simplicity Motors
The Simplicity Motor program features a battery powered motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shadings. The Simplicity motor is concealed in the head rail.

See page 50 for information on Simplicity Rechargeable system version.

Simplicity Motors With Designer Cassette
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. See page 52 for mounting information.

Simplicity Battery Wand
The battery wand can be clipped to the Designer Cassette head rail. Can not be mounted on shadings under 25" wide. The battery wand is wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight alkaline batteries, and is white in color. The battery wand must be placed so it does not interfere with the mounting brackets.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement
Eight alkaline batteries are included with the wand.

The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

DC Power Supply/Transformer
12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep. Extension wires are available if needed.

Important Simplicity Motorized Shading Operating and Installation Information
Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote

The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote also available
See page 24 for more information

14 Channel Remote

This remote has 14-channels. Each channel has a setting to operate the bottom rail. The ***14 Channel remote*** can operate up to fourteen shades individually or 14 groups.

14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.

Simplicity Battery Operated Motorized Shadings Warranty
Please see page 114 for complete Comfortex warranty information.

Sheer Horizontal Window Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Simplicity Rechargeable Motors
The Rechargeable Simplicity Motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

PowerTouch Integrated Rechargeable Surcharges
See page 35 for shading standards and page 37-38 for surcharges and pricing example.

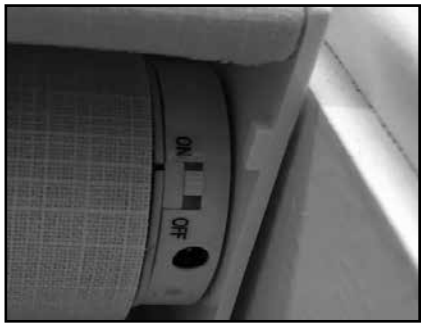
Simplicity Rechargeable Motors
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. No external battery wand is required.

Rechargeable Simplicity Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.



Charging Port

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Integrated Rechargeable Motor Battery Charger
An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Integrated Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor. Sold separately.

The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote

The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote also available
See page 24 for more information

14 Channel Remote

This remote has 14-channels. Each channel has a setting to operate the bottom rail. The ***14 Channel remote*** can operate up to fourteen shades individually or 14 groups.

14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:
- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE NEW INTEGRATED RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

Solar Panel Recharge Option
Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).
See page 56.

Dimensions of panel
18½" x 1½"

Sheer Horizontal Window Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Important Information about Integrated Rechargeable Simplicity Motor Shading Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Battery Operated Motorized Shadings Warranty

Please see page 114 for complete Comfortex warranty information.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

- Solar Panel with Mounting Brackets: $160.00

Solar panel wire measures 56" in length. Extra wire can be tucked up behind the shade with tie wraprs that come with the solar panel.

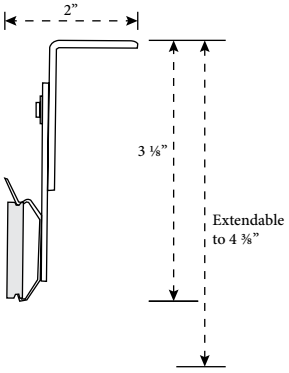
Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

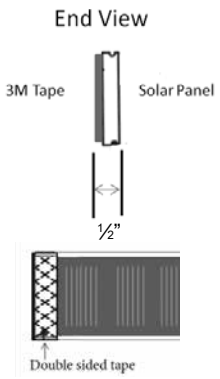
Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Bracket Method



Tape Method



Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets also. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

7.4V EZ Charge Extension Wand

Finished Dimensions	

Two-On-One Designer Cassette Head Rail

Two-On-One Head Rail shadings are two shadings sharing the same head rail; each shading operates independently.

- Two-On-One Head Rail can be combined with cord loop, PowerTouch Rechargeable, Simplicity Motorization and retractable cord hardware options. Price as two shadings (including upgrades) and add together. Pricing example on page 38.
- Two-On-One not available with cordless.
- Specify shading total width and two individual section widths. **Note:** The two individual sections must add up to the total width.
- Two on One Head Rail Shadings are available with all vane sizes.
- Two on One Head Rail Shadings are available with bead cord or braided cord loop. See page 57 for more information.
- Controls will always be placed to the far left and far right.
- Available in widths up to 140″ with Designer Cassette hardware.
- Minimum single section width is 12″. Maximum single section width is 102″. The center gap between shadings is ⅜″.
- Side by side alignment is available if the two panels measure less than 120″. Alignment must be specified when the order is placed.
- Shadings over 98″ are subject to common carrier surcharge. See page 112 for more information on the freight policy.

Table of Contents

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Head Rail Inserts
Fabric head rail inserts are used on Designer Cassette Head Rail Shadings when specified.

We use the light filtering fabric insert strips on all shadings including room darkening colors. The color of the fabric insert coordinates with fabric used on the shading.

Cord Type and Color
White, black or bronze loop cord coordinates with your hardware choice. Bead cord is optional in white, bronze, black or steel. Cord tensioners match your hardware choice (white, black or bronze). Lengths over 6 feet available in white only.

Reverse Roll
The braided cord does not have a reverse roll stop. If a shading with the Designer Cassette hardware is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Length Considerations with Shangri-La Shadings
Comfortex will fabricate your Shangri-La Window Shading to the length ordered, when the vanes are in the closed position (Figure A).

- When the vanes are rotated to the open position, the shading will become slightly longer.
- When opened on an inside mount,the shading will be slightly longer than ordered length.
- A slight puckering may occur when the vanes are in the open position. Rotating the vanes closed will cause the bottom rail to touch the window sill, before it begins to raise.

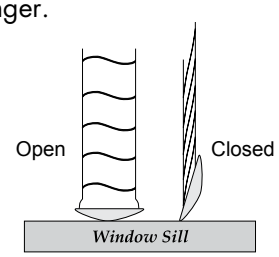

Figure A

Side By Side Alignment
When Shangri-La Window Shadings are installed side-by-side, vane alignment can be guaranteed within ¼" only if:

- The shadings are the same color and ordered at the same time.
- The sum total of the widths of all shadings needing alignment is less than 118".

Side-by-side lineup is specified when the order is placed.

Omni-View System
Shangri-La Shadings feature the Omni-View™ Cord System. The Omni-View System provides the ability to manipulate the shading into various viewing positions. There are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The following five modes can be obtained with standard shading operation when viewing the shading at eye level.

- **Closed top, open bottom:** By partially lowering the shading from the fully raised position, the upper portion of your window will become semi-opaque while allowing a clear view below.
- **Fully private:** When lowered completely, Shangri-La provides complete privacy and softly diffused light.
- **Partially open:** Opening Shangri-La slightly will gradually increase the level of light and allow varying levels of view through.
- **View-through when lowered:** By completely opening the vanes, Shangri-La provides a softened, veiled view to the outside.
- **View-through when raised:** From the open or view-through position, continuing to pull down on the back of the cord will raise the fabric allowing a clear view outside from below, and a veiled view above. This exclusive feature allows Shangri-La to be raised up to 24" in this mode.
- Comfortex recommends that you **do not** raise the shading more than 24" off the sill in the view-through when raised mode. Refer to warranty section below for more information.
- Omni-View is only available with Shangri-La Shadings built with braided cord loop.

Cord Information For Shangri-La Shadings
A braided cord loop is used to raise and lower the shading. White, black or bronze loop cord matches your hardware choice. Cord tensioner will match the hardware color.

Bead cord is available in black, white, bronze, nickel and steel. Lengths over 6 feet available in white only.

The cord loop will measure the length indicated below unless otherwise specified.

Shade Length	Standard Loop
16" to 26⅞"	1' (12")
27" to 39⅞"	2' (24")
40" to 59⅞"	3' (36")
60" to 83⅞"	4' (48")
84" to 107⅞"	5' (60")
108" and greater	6' (72")

Maximum cord length is 15 feet. Polyester cord can be ordered in custom lengths in 1 foot increments only.

Braided Cord Loop Warranty Information
The shadings built with a braided cord loop do not have a reverse roll stop. If a shading is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Certified Fabrics | GREENGUARD® Fabrics

GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The Shangri-La fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems.

Flame Resistance

Shangri-La fabric may be processed with a topical treatment to resist flames and adhere to strict flammability codes. For more information, contact Customer Service at (800) 843-4151.

UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

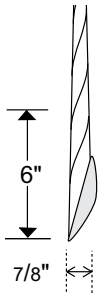
The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

Shangri-La fabrics have the following UV Protection ratings:

Light Filtering Fabrics	Open Vanes	87%
Room Darkening Fabric	Open Vanes	88%
All Fabrics	Closed Vanes	99%

Vane Closure

Shangri-La vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.



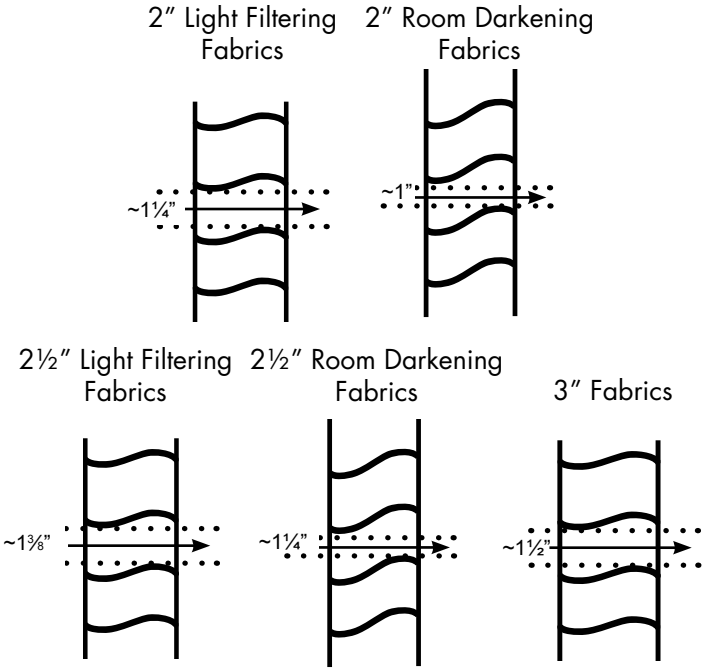
Vane closure is measured as the distance between the front and rear fabric sheers 6" up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅝" for shadings under 60" and ⅞" for shadings longer than 60". On room darkening fabrics, the distance is ⅝" regardless of shading length.

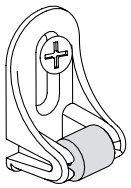
On all 3" fabrics, the distance is equal to or less than 1".

Vane Opening and Visibility

Vanes on the three styles of Shangri-La fabrics open to slightly different degrees. Consequently, there are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The variations among the products are shown in the below illustration when looking through the shading ¼ of the way up from the bottom.



Magnetic Hold-Down Brackets



Optional magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Please specify when ordering.

Extension Brackets

Extension or "L" brackets are available to project the back of the shading from the mounting surface. The extension brackets for Designer Cassette head rail projects it 3".

Spacer Blocks

Spacer blocks project the shading ⅜" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of the shading.

Leveling Shangri-La Sheer Shadings

Shangri-La Window Shadings are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure correct and balanced operation.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Skew Adjusting Bottom Rail

After installation, windows that are not square and level may cause the shadings to shift to one side as it rolls up, requiring adjustment of the bottom rail. If the brackets are not level it may be necessary to adjust the bottom rail weight.

- To access the bottom rail weight, release the weight clip on the bottom rail by using a flat blade screwdriver. Insert it into the weight clip in the bottom rail and turn clockwise.
- Move the weight in 1" increments toward the side where the fabric is gathering.
- Secure the weight clips in position by turning them counterclockwise after making the adjustment.

PARADISE™ SHEER SHADINGS

- Paradise Sheer Shadings are a window shading of unique beauty and performance for the finishing touch to a beautiful window and room.
- Horizontal fabric vanes float between two layers of soft, knitted fabric sheers to soften your view outside.
- Features both light filtering and room darkening fabrics, these fabrics filter out up to 88% of harmful UV rays when open and 99% when closed.
- Paradise Sheer Shadings are the perfect way to provide the privacy and light control that any home needs.
- Vanes glide from open to closed to out of sight with elegant hardware.
- A weight system in the bottom rail allows for on-the-spot skew adjustment for proper performance and a balanced appearance in the window.
- The sophisticated array of Paradise Sheer Shadings colors is designed to flatter your decor.
- Easy to install hardware and brackets allow for effortless installations and easy removal for cleaning.
- Paradise Sheer Shadings may be ultrasonically or traditionally cleaned to stay bright and beautiful.
- A Limited Lifetime Warranty serves as a commitment to your satisfaction.

Expanded Paradise Color Offering

Paradise Sheer Shadings utilize Shangri-La Sheer Horizontal Shadings pricing and colors. Paradise 2", 2½" & 3" vanes offer sophistication without distracting from other fabrics or furnings. Elegant, yet casual, Paradise shades enrich the ambiance of any room with light filtering or room darkening options. Paradise Sheer shadings are offered in all the colors available in the Shangri-La collection with the exception of 9 colors.

Paradise™ Sheer Shadings
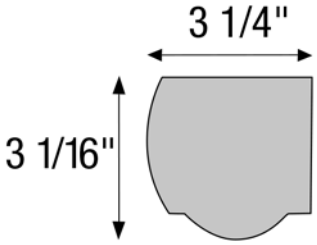
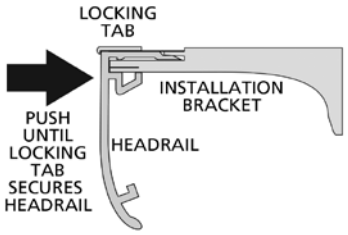
CORD LOOP HARDWARE SYSTEM



Cord Loop Rail Dimensions

- Depth of cassette: 3¼″
- Height of cassette: 3 1⁄16″



Hardware Features	
Hardware colors for all Paradise fabrics	Choose from coordinating Fabric Insert or painted Smooth Face rail. Painted aluminum cassette head rail will be pre-coordinated to the fabric selection.
Cord	A color coordinated nylon cord is standard.
Upgrades- No Charge	
Head Rail Insert	Fabric head rail fabric inserts are optional. The color of the fabric insert coordinates with fabric used on the shading and is not necessarily an exact match to the vane material. Color Coordinated endcaps.

Mounting Dimensions	Cord Loop Hardware System
Minimum Depth Inside Mount	1″
Minimum Depth Flush Inside Mount	3⅜″
Minimum Rear Fabric Clearance Inside Mount	⅛″
Minimum Surface Height Outside Mount	1″
Outside Mount Recommended Overlap Per Side	3″
Minimum Rear Fabric Clearance Outside Mount	⅛″

Finished Dimensions	
Inside Mount	
	• Fabric will measure ordered width less: 1″ • Head rail* will measure ordered width less: ⅛″*
Outside Mount	
	• Fabric will measure ordered width minus: ¾″ • Head rail will measure ordered width • Fabric height will measure ordered length less: ⅛″

* Head rail measurements include endcaps.

Please Note: Due to variations in fabric weave and environmental conditions, the finished dimensions for both width and length may vary, plus or minus ⅛″ from your order measurements.

Paradise™ Sheer Shadings
CORD LOOP HARDWARE SYSTEM

Applications

- Standard Rectangular

Cord Information

A nylon cord loop is used to raise and lower Paradise Sheer Shadings.

Select desired control side of the shade when ordering.

Shade Height	Loop Drop
16″ to 26⅞″	12″ loop
27″ to 39⅞″	24″ loop
40″ to 59⅞″	36″ loop
60″ to 83⅞″	48″ loop
84″ to 107⅞″	60″ loop
108″ to 120″	72″ loop

Optional Cord Drops *(White Cord Only)*

Cord Drop	Increments
6′ to 12′	6″ Increments
12′ to 16′	12″ Increments

Note: 18″ white only cords available upon request

Length Considerations

Paradise Sheer Shadings are fabricated to the exact length ordered, when the vanes are in the closed position (Figure A).

- When the vanes are rotated to the open position, the shading will become slightly longer.
- When opened on an inside mount, the shading will be slightly longer than ordered length.
- A slight puckering may occur when the vanes are in the open position. Rotating the vanes closed will cause the bottom rail to touch the window sill, before it begins to raise.

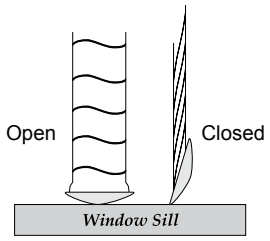


Figure A

Side By Side Alignment

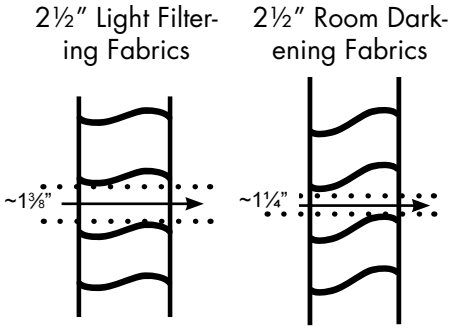
When Paradise Sheer Shadings are installed side-by-side, vane alignment can be guaranteed within ¼″ only if:

- The shadings are the same color and ordered at the same time.
- The sum total of the widths of all shadings needing alignment is less than 102″.
- Side-by-side lineup is specified when the order is placed.

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is up to 1⅜″

Vane Opening



Vane Closure (Figure B)

Paradise vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.

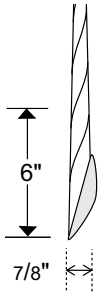


Figure B

Vane closure is measured as the distance between the front and rear fabric sheers 6″ up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

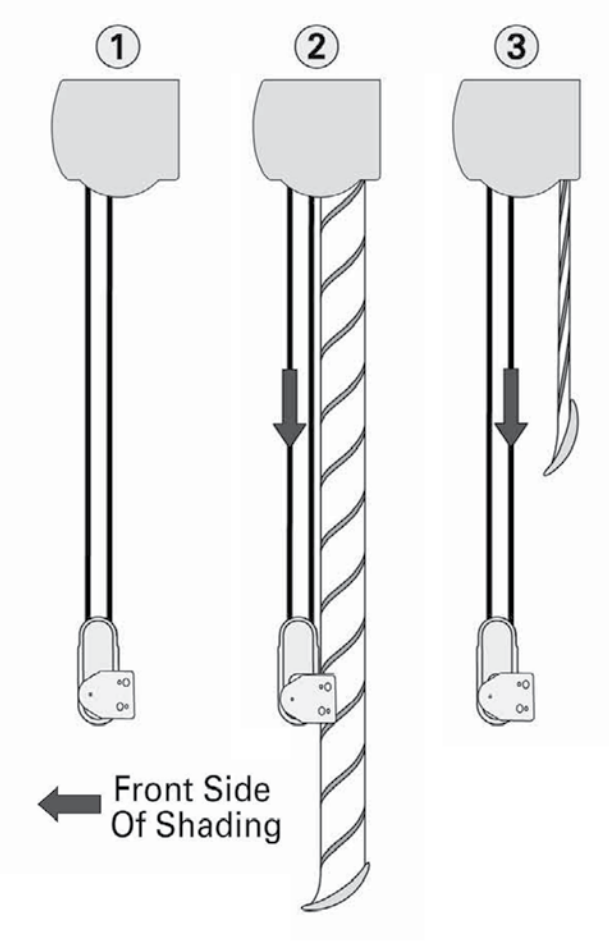
On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅝″ for shadings under 60″ and ⅞″ for shadings longer than 60″. On room darkening fabrics, the distance is ⅝″ regardless of shading length.

Paradise™ Sheer Shadings
CORD LOOP HARDWARE SYSTEM

Standard Operation

Refer to illustration below.

- Illustration 1: The shading is in the fully raised position.
- Illustration 2: Pull down on rear half of nylon cord loop to lower shading and open fabric vanes.
- Illustration 3: Pull down on front half of nylon cord loop to close vanes and raise shading



Omni-View System

The Omni-View System is exclusive to Shangri-La Sheer Horizontal Shadings and Color Lux Sheer Shadings. Omni-View is not available on Paradise Sheer Shadings.

Light Control

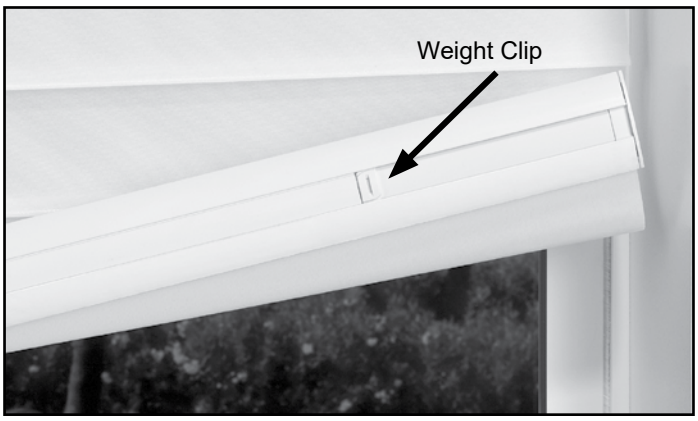
With the shading in the fully lowered position, the nylon cord loop is used to adjust the fabric vanes from open to closed, and anywhere in between.

Please Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.

Shading Adjustment

After installation, windows that are not square and level may cause the shadings to shift to one side as it rolls up, requiring adjustment of the bottom rail. If the brackets are not level it may be necessary to adjust the bottom rail weight.

- To access the bottom rail weight, release the weight clip on the bottom rail by inserting a flat blade screwdriver into the weight clip in the bottom rail and turn clockwise.
- Move the weight in 1" increments toward the side where the fabric is gathering.
- Secure the weight clips in position by turning them counterclockwise after making the adjustment.



UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

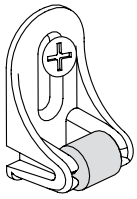
Paradise Sheer Shadings fabrics have the following UV Protection ratings:

Light Filtering Fabrics	Open Vanes	88%
Room Darkening Fabric	Open Vanes	88%
All Fabrics	Closed Vanes	99%

Paradise™ Sheer Shadings
CORD LOOP HARDWARE SYSTEM

Magnetic Hold-Down Brackets

Optional magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Please specify when ordering.



Extension Brackets

Extension or "L" brackets are available to project the back of the shading from the mounting surface. Brackets will project 2½".

Spacer Blocks

Spacer blocks project the shading ⅜" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of the shading.

Measuring Instructions

See page 110 for measuring instructions.

Child Safety

See page 111 for child safety information.

Limited Lifetime Warranty

See page 113 for warranty information.

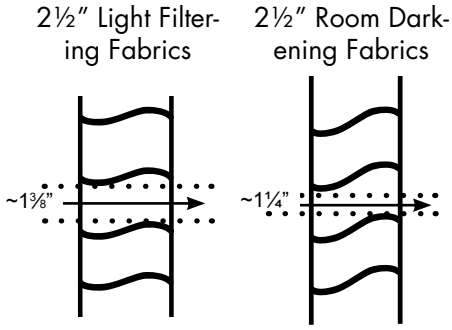
- The shadings are the same color and ordered at the same time.
- The sum total of the widths of all shadings needing alignment is less than 102".
- Side-by-side lineup is specified when the order is placed.

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is up to 1⅜"

Vane Opening



Vane Closure (Figure B)

Paradise vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.

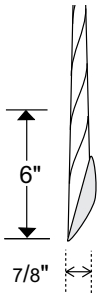


Figure B

Vane closure is measured as the distance between the front and rear fabric sheers 6" up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅝" for shadings under 60" and ⅞" for shadings longer than 60". On room darkening fabrics, the distance is ⅝" regardless of shading length.

Bottom Rail with Vanes Closed

Bottom Rail with Vanes Opened

To Lower Cordless Paradise Shading

Pull down on the hinged pull until the shade is at the desired height.

To Raise Cordless Paradise Shading

Gently pull down on the hinged pull. To raise the shade completely, simply release the pull and the shade will roll up fully into the head rail. To raise the shade partially, when the shade is at the desired height, gently pull on the tassel to stop the shade from raising.

Paradise™ Sheer Shadings
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades
Paradise Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Favorites position can be programmed on-site. Please refer to the installation instructions at comfortex.com/comfortex-dealers.

PowerTouch Rechargeable Surcharges
See page 97.

PowerTouch Appearance
- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.

PowerTouch Rechargeable Color Options
- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location
The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length
Size and color must be specified when ordered. Below is a recommended size chart.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings
- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

PowerTouch Rechargeable Battery Life
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shadings Warranty
Please see page 114 for complete warranty information.

NEW Simplicity Bluetooth Motorization
Learn about Simplicity Bluetooth motorization and Comfortex FREE Color Lux Mobile App on page 18.

Paradise™ Sheer Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Simplicity Rechargeable Motors
The Rechargeable Simplicity Motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

PowerTouch Integrated Rechargeable Surcharges
See page 62 for shading standards and page 62 for surcharges and pricing example.

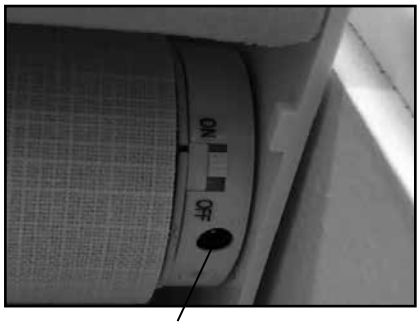
Simplicity Rechargeable Motors
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. No external battery wand is required.

Rechargeable Simplicity Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.



Charging Port

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Integrated Rechargeable Motor Battery Charger
An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Integrated Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor. Required with Integrated Shading order. Sold separately.

The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote
The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

14 Channel Remote
This remote has 14-channels. Each channel has a setting to operate the bottom rail. The ***14 Channel remote*** can operate up to fourteen shades individually or 14 groups.

14 Channel remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE NEW INTEGRATED RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY Charger** information.

Solar Panel Recharge Option
Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch).
See page 56.

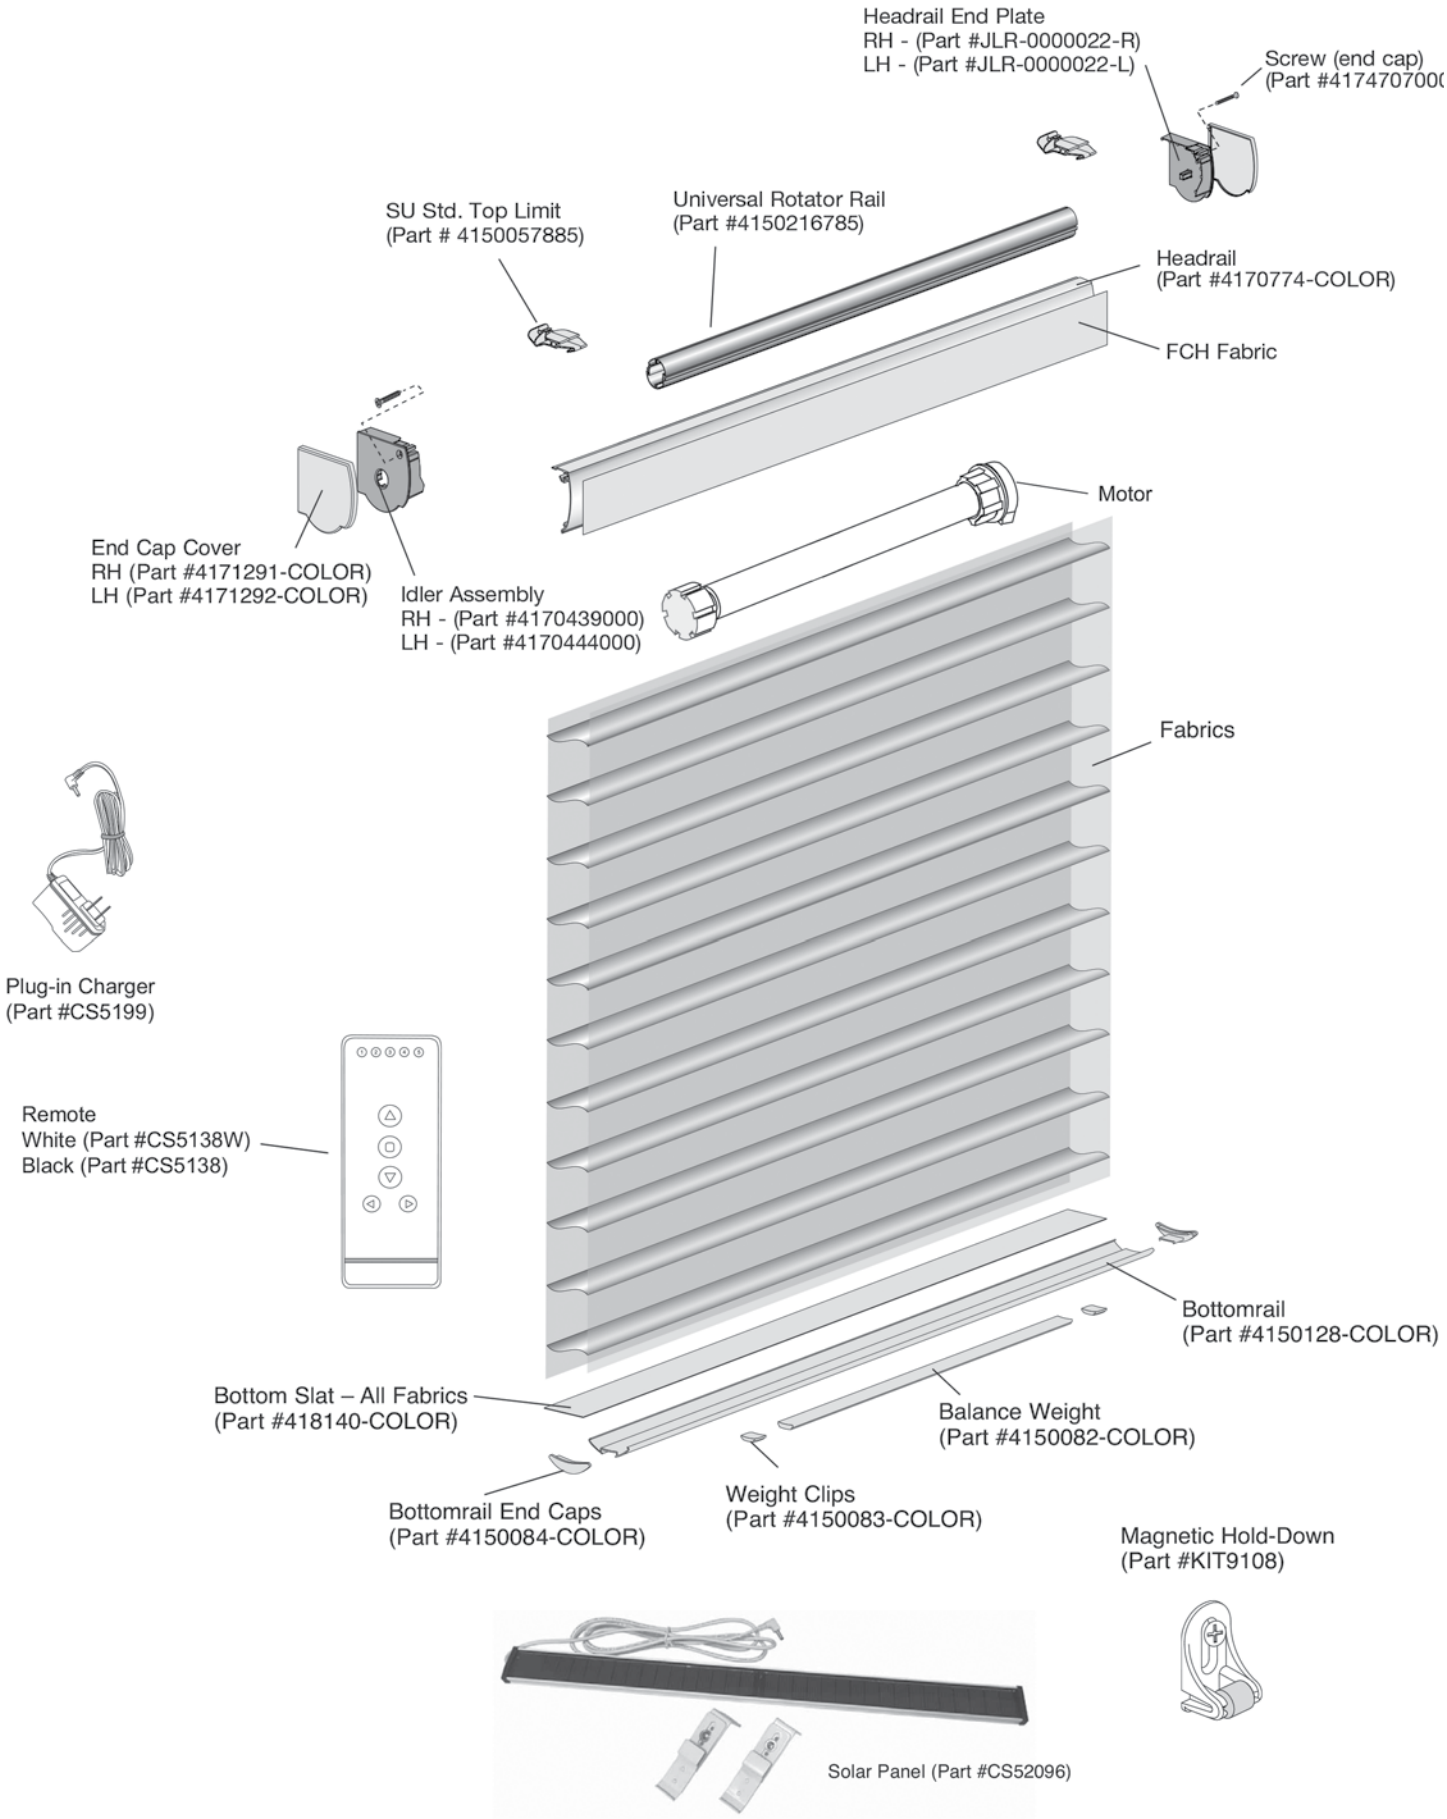
18½" x 1½"

Paradise™ Sheer Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

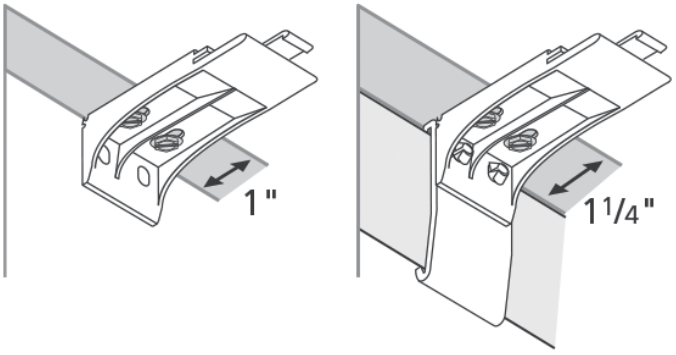


Paradise™ Sheer Shadings
OPTIONS | ADDITIONAL NOTES

Optional Back Cover (Inside Mount)

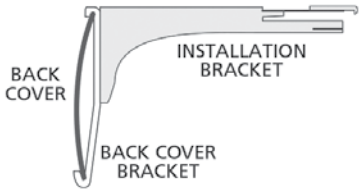
Used with inside mounts to conceal the open rear side of the headrail for a more pleasing exterior look. Use of the back cover adds ¼" to minimum inside mounting depths.

Minimum Inside Mounting Depth



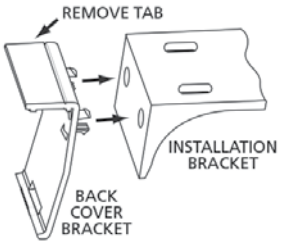
Without Back Cover *Back Cover*

The back cover is secured in place by a back cover bracket attached to the installation bracket.



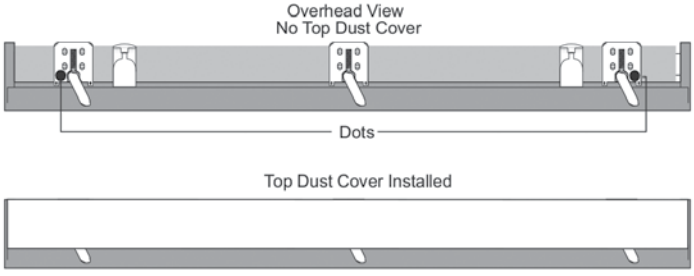
Back Cover Bracket

When a back cover is used, attach back cover brackets to the installation brackets before mounting them. Remove the tab from the top of the back cover brackets and both tabs at the rear of the installation brackets. After mounting the installation brackets, install the back cover.



Optional Dust Cover (Outside Mount)

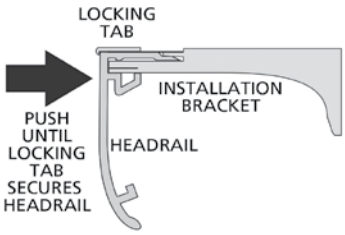
Shields the fabric and internal headrail components from dirt, dust, and other contaminants.



Shading Installation

Used with inside mounts to conceal the open rear side of To mount the shading, insert the top of the headrail into the brackets between the locking tab and the bracket flange. Push the headrail into the brackets until the locking tab clicks in place.

To remove the shading, lift the locking tab to release the headrail, rotate the headrail forward, and pull it straight out.



VERTICAL SHEER SHADINGS

- Vertical Sheer Shadings combine the elegance and softness of sheer shadings with the light control of vertical blinds giving you unlimited ways to control light.
- Vertical Sheer Shadings are available up to 192" wide and to heights up 120". Vertical Sheer Shadings are perfect for wide expanses of windows and doors.
- Vertical Sheer Shadings are available in six neutral colors, all made of 100% polyester that is durable yet soft to the touch.
- To ensure child safety, a combination wand and cord and moving wand operating systems have no dangling cords.
- For a coordinated look, Vertical Sheer Shadings can be paired with Shangri-La® Sheer Horizontal Window Shadings.
- Our Vertical Sheer Shadings are beautiful and smart with the added benefit of 99% UV protection to protect artwork and home furnishings from the damaging effects of the sun.
- Vertical Sheer Shadings are custom crafted and assembled in the U.S. and backed by the Comfortex Lifetime Guarantee.

Vertical Sheer Shadings
SIZE STANDARDS

		Wand/Cord	Moving Wand*
Vertical Sheer Shadings	Minimum Width	12″	12″
	Minimum Length	24″	24″
MAXIMUMS			
Vertical Sheer Shadings	Maximum Width	192″	144″
	Maximum Length	120″	100″

Please Note: Two side stack shadings (one left and one right) may be abutted to achieve larger maximum widths. This is not recommended with moving wands.
*Moving wand is only available with outside mount side stack shadings.

Vertical Shadings Panel Design

Comfortex Vertical Sheer Shadings features contoured sheer fabric columns with soft 3½″ fabric vanes attached.

The top of the Vertical Sheer Shadings features a 5¼″ fabric header that conceals the hardware.

Choose from light filtering or room darkening vanes.

Vertical Sheer Shadings
GENERAL INFORMATION

Vertical Sheer Shadings Fabrics and Vanes

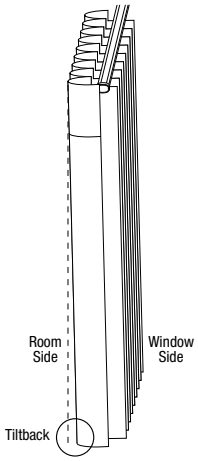
Vertical Sheer Shadings are a beautiful option for covering a variety of windows. However, they are a textile product which will never be perfect. By understanding some of the qualities of the fabric used in Vertical Sheer Shadings, you will be able to set clear expectations during the sales process.

Fabric and Vanes

- Vertical Sheer Shadings are 100% polyester for durability and easy care. The 3½" stationary vanes are permanently bonded to the rear of the face fabric, are a neutral white, providing a uniform appearance to the home's exterior.
- Color is carried by the sheer fabric; vanes are white. Vanes available in two opacities: light filtering and room darkening.
- The Vertical Sheer Shadings fabrics are subject to the variations associated with all textiles, such as slight wrinkles or puckers.

Tiltback

Additional weight of the face fabric in front causes the fabric to hang at a slight angle, called "tiltback." This is an inherent characteristic of the product and may be more noticeable on shorter panels.



Puckering

Tilt Back

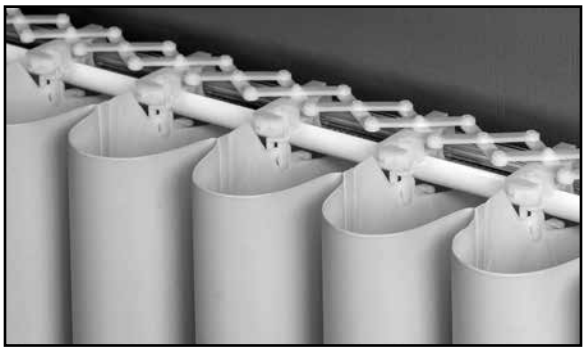
Vertical Sheer Shadings
GENERAL INFORMATION

Vertical Sheer Shadings Hardware

Vertical Sheer Shadings use a proven scissor track system. Track system is white and hidden behind the fabric header.

Scissors expand when the sheer is drawn closed and compress when the sheer is drawn open.

Vane realignment is easy — rotate the vanes first to one side and then the other.



Controls and Control Placement

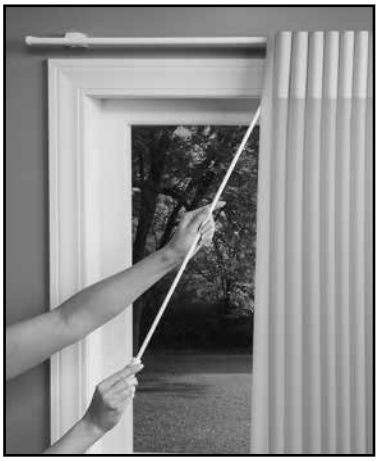
Vertical Sheer Shadings are operated with wand/cord combination or a moving wand option.

Wand/Cord Control

- With the wand/cord, pull the cord to traverse the fabric and twist the wand to rotate the vanes. Be sure to use both hands to avoid twisting the cord.
- Wand/cord placement: the shading stacks on same side as wand/cord; for split stack or offset stack, choose left or right control.
- See the next column for standard wand/cord lengths.

Moving Wand

- The moving wand is a cordless wand control system that traverses the fabric and rotates the vanes.
- Moving wand is available with **outside mount shadings only**.
- The placement of moving wand is opposite side of stack.
- See the next column for standard wand lengths.



Wand/Cord Lengths

- Wand/cord length is measured from top of fabric to bottom of wand.
- **Placement:** Wand/cord: the shading stacks on same side as wand/cord; for split stack or offset stack, choose left or right control.

Ordered Shading Length	Standard Wand/Cord Length
24″ to 40″	24″
40⅛″ to 60	36″
60⅛″ to 96″	48″
96⅛″ to 108″	60″
108⅛″ to 120″	72″

- Custom lengths for the wand/cord may be specified when ordering. Choose from 24″, 36″, 48″, 60″ and 72″ lengths at no additional charge.
- Non-standard wand/cord lengths are not available.

Moving Wand Length

- Wand length is measured from top of fabric to bottom of wand.
- **Placement:** Moving wand: the shading stacks on opposite side of wand; available on outside (OB) mount side stack only.

Ordered Shading Length	Wand Length
24″ to 48″	23″
48⅛″ to 84″	30″
84⅛″ to 100″	40″

Vertical Sheer Shadings
GENERAL INFORMATION

Vertical Sheer Shadings Design and Operation

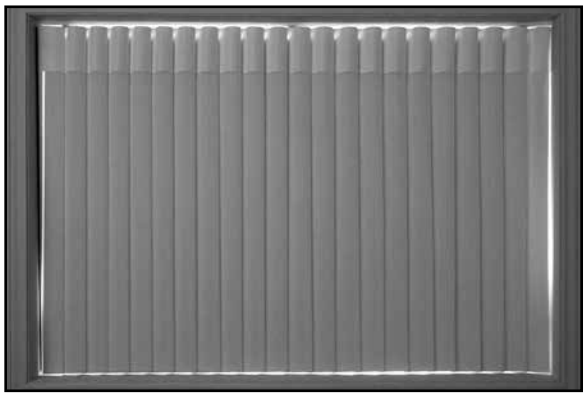
Outside Mount Installation

Specifying Vertical Sheer Shadings as outside mounts is ideal because the vanes and fabric are allowed to operate freely.

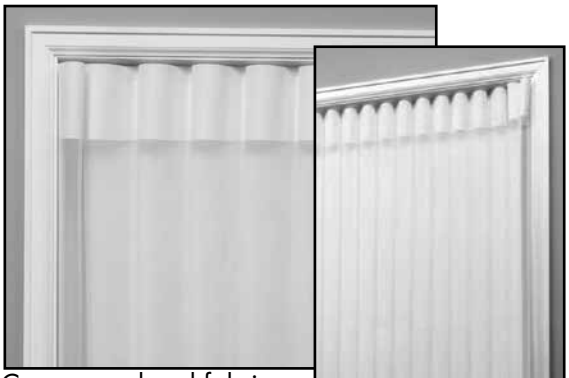
- Outside mounts provide complete fabric coverage and enhance light control and privacy features.
- Outside mounts allow the shading to be stacked back off of the window opening for an unobstructed view.

WHY INSIDE MOUNTS ARE NOT RECOMMENDED

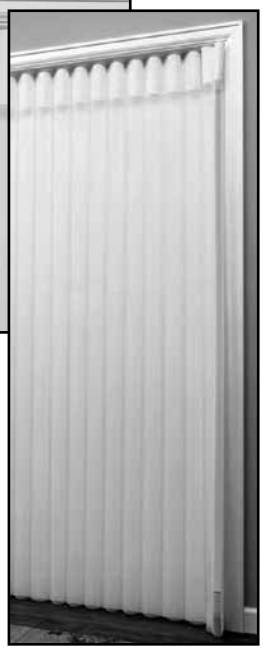
- Vertical Sheer Shadings are not recommended as inside mounts due to light gaps that occur on the sides of the sheer when the vanes are closed.
- Inside mounting prevents the end treatments from rotating with the vanes This results in light gaps on the sides of the sheer when the vanes are closed, as well as compressed end fabrics.



Light gaps around the window frame that occur with Inside Mount Shadings



Compressed end fabrics



Light gap when vanes are closed

Vane Closure Gap

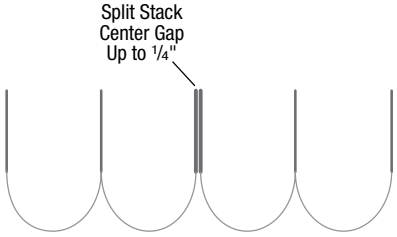
The closed vanes of Vertical Sheer Shadings are designed to overlap for privacy when viewed straight on.

- Light leakage may occur due to the vane closure gap, which may increase with the length of the shading.
- The vane closure gap is most visible when viewed from the side. It is a normal, inherent characteristic of the product and should not be considered a defect.
- Vane closure is tighter in one direction than the other when the vanes are rotated closed.

Vertical Sheer Shadings
GENERAL INFORMATION

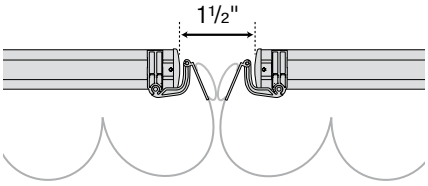
Split Stack Center Gap

- The maximum distance between fabric panels of a split stack design is ¼".



Side-By-Side (Abutted) Applications

- Outside-mounted side stack shadings may be abutted at the non-control ends to achieve wider widths up to 384".
- Abutted applications utilize two independent head rails and will appear and function differently than a split stack application utilizing a single head rail.
- No deductions or special order entries are necessary.
- At installation, position the ends of the rails 1½" apart for optimal appearance and function.
- **Please Note:** The moving wand is not recommended for abutted applications.

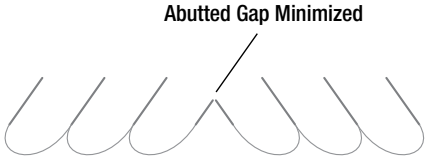


Non-Control End/Non-Control End

Abutted Gap

- For best closure on shadings with abutted installations, the vanes should be rotated in opposite directions to minimize the abutted gap, as shown below.

Vanes Rotated In Same Direction



Vanes Rotated In Opposite Directions

Return Gaps

Outside mount applications have return gaps, which is the distance between the end treatments and the wall.

Gap Dimensions

Return Gap — Side Stack

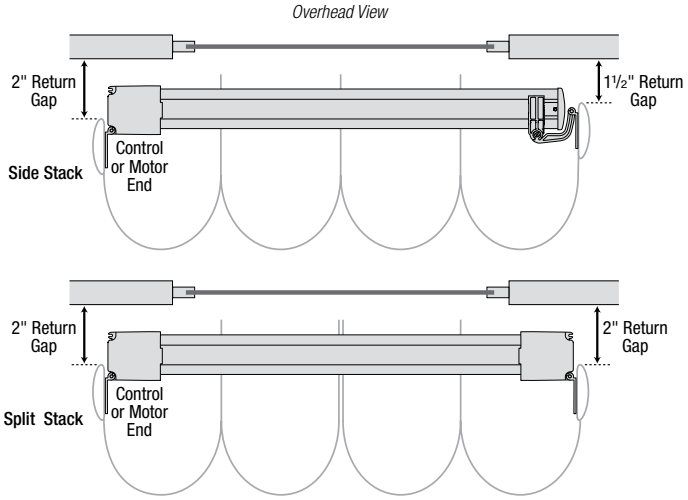
Control (wand/cord) end 2"
Non-control (traveling) end 1½"

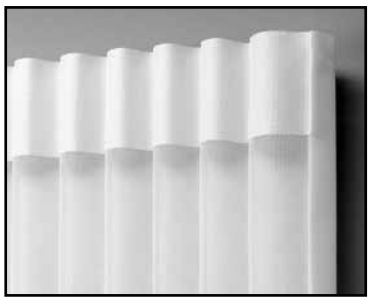
Return Gap — Split Stack

Both ends 2"

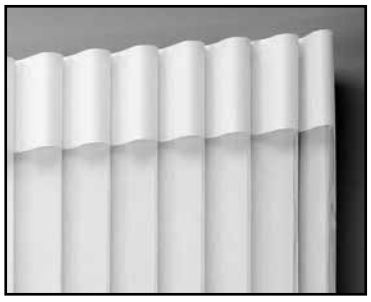
Center Gap

Split stack up to ¼"





Return gap



All vanes fully rotate

Vertical Sheer Shadings
GENERAL INFORMATION

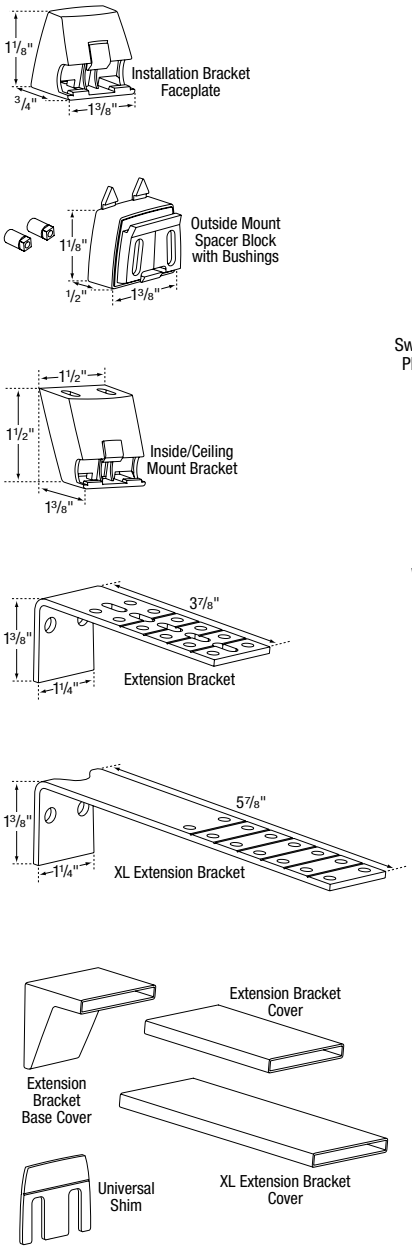
Measuring, Mounting Requirements and Installation Information

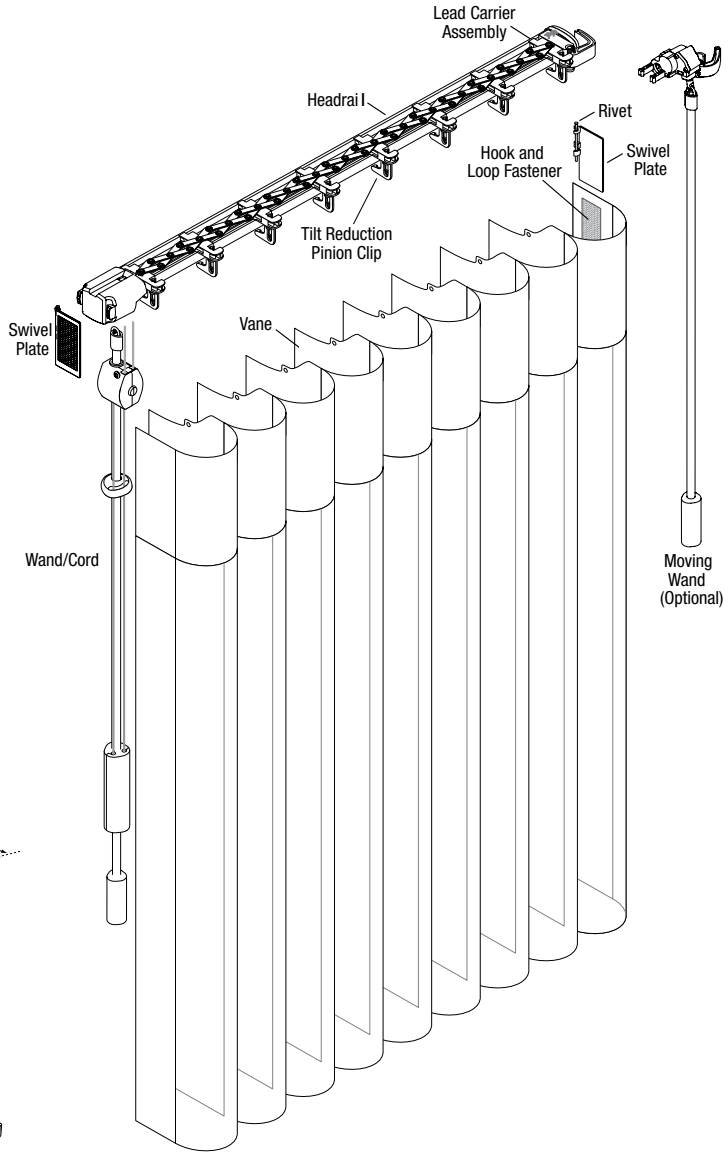
- Outside mount applications are highly recommended. Inside mount installations **are not recommended** due to the light gaps that occur when the vanes are closed.
- Moving wands control option is only available with outside mount side stack shadings.
- **Top clearance is required for head rail installation.** The rail must be tilted upward to fit into the installation bracket faceplate.

Installation Brackets

- Installation bracket faceplates with spacer blocks are used for outside mounts.
- Inside/ceiling mount brackets are used for inside and ceiling mounts. These brackets are also used with extension brackets for outside mounts needing extra clearance.

Ordered Width	Installation Brackets Required
Up to 40″	2
40⅛″ to 70″	3
70⅛″ to 96″	4
96⅛″ -155″	6
155⅛″ -192″	8





Vertical Sheer Shadings
GENERAL INFORMATION

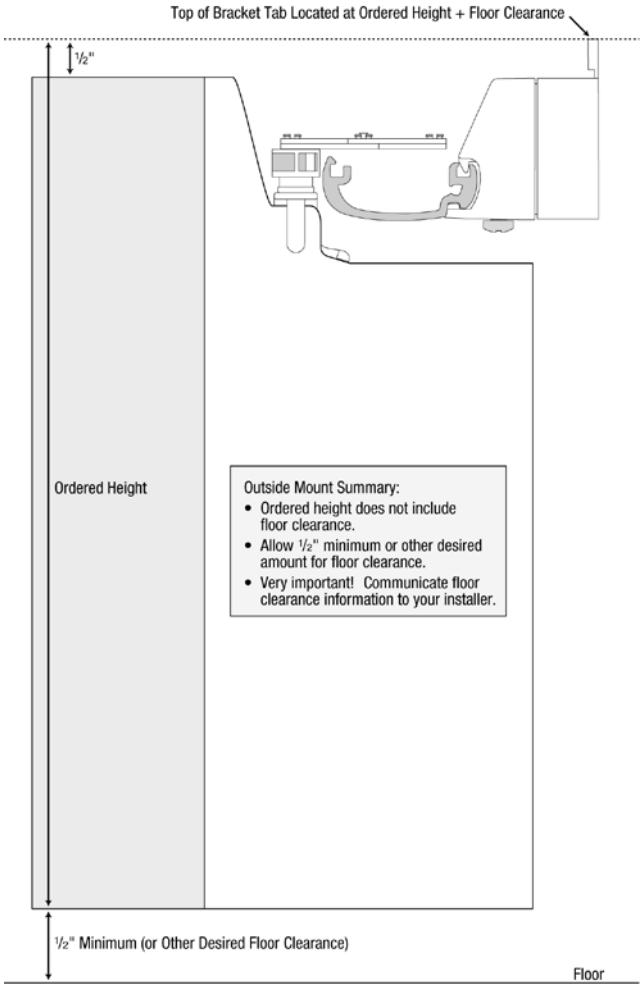
Measuring, Mounting Requirements and Installation Information

Outside Mount

- Minimum mounting surface height with Standard Bracket: 1⅛″
- Minimum mounting surface height with Extension Bracket: 1⅜″
- Recommended top overlap 5″
- Recommended minimum overlap per side (and bottom overlap when product does not hang to floor) 5″
- Recommended bottom clearance when product hangs to floor (deduct before ordering) ½″

Outside Mount Ordered Height

- Outside mount ordered height is the distance from the bottom of the fabric to ½″ above the top of the fabric, where the top of the bracket tab will be located.
- When measuring, plan on the bottom of the fabric being located a minimum of ½″ above the floor for operating clearance.
- Allow the recommended amount of top overlap and check that the bracket can be mounted on a 1⅛″ flat, not curved, vertical surface.



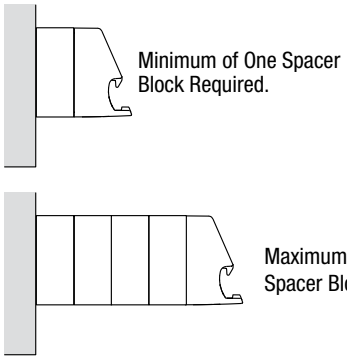
Inside/Ceiling Mount

Inside/ceiling mount brackets are used for inside and ceiling mounts. These brackets are also used with extension brackets for outside mounts needing extra clearance.

- Minimum mounting depth 1″
- Minimum mounting depth, fully recessed 6¼″

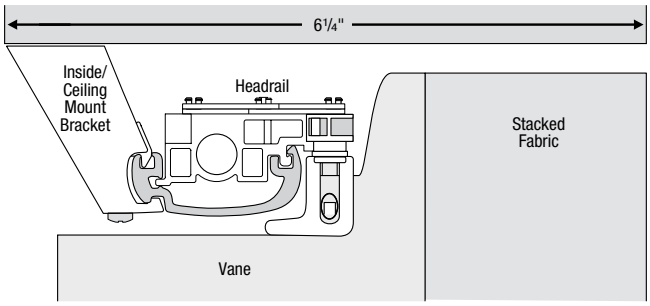
Spacer Blocks

- Each spacer block projects an outside mount installation bracket ½″ away from the mounting surface.
- There must be sufficient rear clearance for proper operation.
- One spacer block is required for the 3½″ vane size.



Extension Brackets

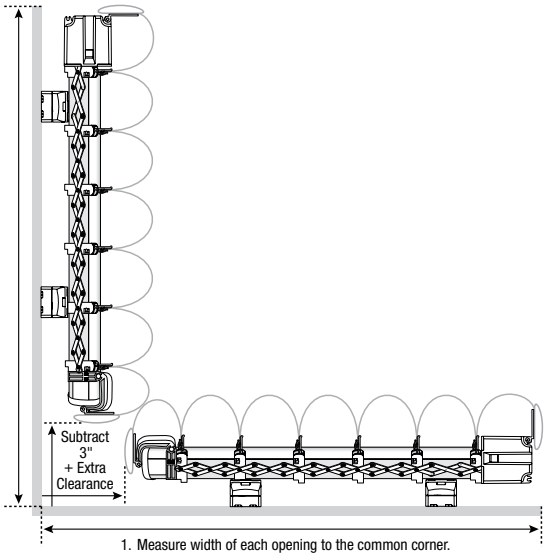
- Standard extension brackets can provide up to 3½″ of clearance.
- Extra Large extension brackets can provide up to 5½″ of clearance.



Vertical Sheer Shadings
GENERAL INFORMATION

Measuring for Corner Windows

- Measure the width of both openings to the common corner.
- Deduct the depth of the treatment from the width of each measurement so they will meet in the corner but not overlap. Deduct 3".
- If additional spacer blocks or extension brackets will be used for extra clearance on outside mounts, add the amount of extra clearance to the deduction.
- Order the width less the deduction for each window.



1. Measure width of each opening to the common corner.
2. Subtract 3" for vane size plus any extra clearance.

How to Avoid Common Ordering Errors

- If an outside mounted Vertical Sheer Shading hangs to the floor, allow for a minimum of ½" for floor clearance.

  — Allow for more clearance, if needed (with thick pile carpet, for example).

  — Be sure the installer understands your floor clearance allowance so that he or she mounts the brackets at the proper height.
- Be sure to measure for the recommended outside mount height and width overlaps. Include Stackback, if desired (see pages 94-95).
- With side stack Vertical Sheer Shadings, specify the correct stacking side.

  — If a sliding glass door opens on the right side (slides to the left), order a left stack.

  — If it opens on the left side (slides to the right), order a right stack.

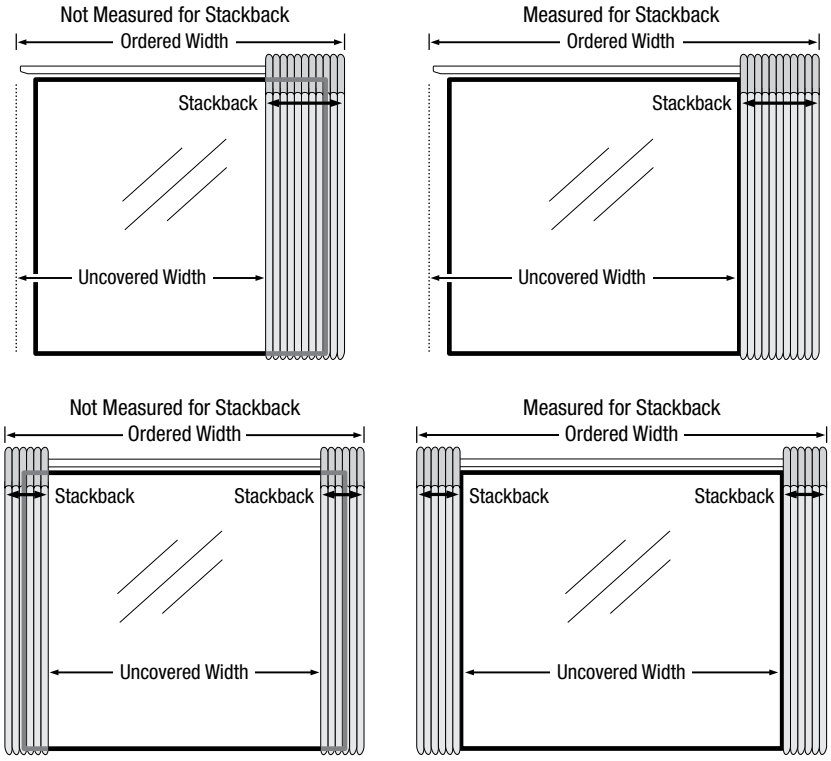
Vertical Sheer Shadings
GENERAL INFORMATION

Stackback

- Outside mounted shadings may be ordered so that the window opening is completely uncovered when the fabric is drawn open, as shown in the illustrations at the bottom of the page.
- Refer to the Stackback charts on page 95.
- Stackback is measured at the top of the shading.

Using the Stackback Charts

- Determine the desired uncovered width when the shading is drawn fully open.
  - With side stack designs, be sure to include in your uncovered width measurement the desired fabric overlap on the side opposite the fabric stack.
- Locate that width on the Stackback chart.
- Move across the row to find the correct ordered width.
- The Stackback dimension is shown in the column between the uncovered width and ordered width.
- Determine the desired uncovered width when the shading is drawn fully open.



UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

Vertical Sheer Shading fabrics have the following UV Protection ratings:

Open Vanes	88%
Closed Vanes	99%

Vertical Sheer Shadings
GENERAL INFORMATION

Stackback Charts

- The Stackback charts account for the typical stacking of the scissor track. As with any textile product, some variation is typical.
- On side stack shadings, include in your uncovered width measurement the desired amount of fabric overlap on the side opposite the fabric stack.
- Moving wand is not available in a split stack configuration.

Table of Contents

OVERTONES™ DUAL SHEER SHADES

The Overtones Dual Sheer Shades are a window shading of unique beauty and performance. The dual panels, with alternating horizontal solid and sheer vanes, add the perfect finishing touch for beautiful luminous windows.

- Overtones Dual Sheer Shades incorporate dual layers of alternating solid and sheer horizontal vanes that can "open and close".
- In the closed position, the fabric allows softly diffused light and offers full privacy.
- In the open position, the vanes are aligned and light filters through the sheers for gentle illumination.
- The Overtones panels can be raised up and out of sight into the integrated valance.
- The head rail has a matching fabric insert strip and color coordinated cord loop mechanism.
- Overtones Dual Sheer Shades are available to widths of 100" and drops to 120" (fabric dependent) to provide visual elegance to wide windows and doors.
- A Limited Lifetime Warranty serves as a commitment to your satisfaction.

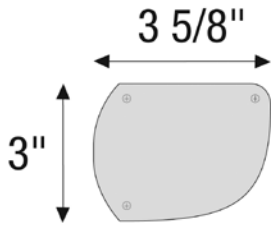
Product Attributes: Environmental condition, such as heat, humidity, etc. may result in light bowing, puckering and dimpling of the fabric which is considered normal. Some fabrics may lightly fray which is considered normal and within specifications.

Overtones™ Dual Sheer Shades
CORD LOOP HARDWARE SYSTEM



Cord Loop Rail Dimensions

- Depth of cassette: 3⅝″
- Height of cassette: 3″

Hardware Features	
Hardware colors for all Overtones fabrics	**Integrated cassette head rail and bottom rail will be pre-coordinated to the fabric selection.** **Matching fabric insert is standard.** **Fabric wrapped bottom rail is standard.**
Cord Loop	Cord color will coordinate with your shade fabric.

Mounting Dimensions	Cord Loop Hardware System
Minimum Depth Inside Mount (shallow mount)	1½″
Minimum Depth Flush Inside Mount including brackets	3¾″
Minimum Surface Outside Mount	1½″

Finished Dimensions

Inside Mount	
	• Fabric will measure ordered width less: 1¼″ • Fabric will measure ordered length • Head rail* will measure ordered width less: ¼″* • Tube will measure ordered width less: 1⅛″ • Bottom rail outter width will measure ordered width less: 1³⁄₁₆″ • Bottom rail inner width will measure ordered width less: 1⅜″
Outside Mount	
	• Fabric will measure ordered width less: 1″ • Fabric will measure ordered length • Head rail will measure ordered width • Tube will measure ordered width less: ⅞″ • Bottom rail outter width will measure ordered width less: ¹⁵⁄₁₆″ • Bottom rail inner width will measure ordered width less: 1⅛″
	* Head rail measurements includes plastic endcaps. **Length Considerations:** Comfortex will fabricate your Overtones Sheer Shades to the exact length ordered, plus or minus ⅛″. The vanes will be in the closed position when the shade is at its full ordered length as seen in Figure B on page 102.

Information for Ordering

- Follow basic measuring instructions
- Specify left or right cord loop
- Extension brackets and spacers are available at no extra charge
- Specify hold down brackets if required
- Side mount brackets are NOT available

Measuring Instructions

See page 110 for measuring instructions.

Child Safety

See page 111 for child safety information.

Limited Lifetime Warranty

See page 113 for warranty information.

Table of Contents

Overtones™ Dual Sheer Shades
CORD LOOP HARDWARE SYSTEM

Applications

- Standard Rectangular

Overtones Dual Sheer Shades Specifications

Once ordered and manufactured, the width of the Overtones fabric cannot be altered. Comfortex makes deductions to the width of Overtones Dual Sheer Shades depending on the type of mounting indicated. For all mounting types, the fabric will measure exactly the length ordered when the shade is fully lowered and the vanes are in the closed position.

Loop Cord Information

Overtones Dual Sheer Shades utilize a looped cord to operate the shade. The cord color will coordinate with your shade fabric. The cord loops will measure the length indicated below from 2 feet to 8 feet at 1 foot intervals unless otherwise specified. Lengths over 6 feet available in white only.

Shade Height	Standard Loop
24″ to 39⅞″	2′ (24″)
40″ to 59⅞″	3′ (36″)
60″ to 83⅞″	4′ (48″)
84″ to 107⅞″	5′ (60″)
108″ to 120″	6′ (72″)

Side By Side Alignment

When Overtones Dual Sheer Shades are installed side-by-side, vane alignment can be guaranteed within ¼″ only if:

- The shades are the same color and ordered at the same time.
- The sum total of the widths of all shades needing alignment is less than the maximum shade width of the fabric style ordered. See page 97.
- Side-by-side lineup is specified when the order is placed.

Cleaning and Care of Overtones Fabrics

Overtones fabric is made from a sturdy, woven polyester fabric which can be feather dusted or vacuumed at a low setting. Spots or stains can be lightly rubbed clean with a damp sponge and mild soap. To avoid discoloration of the material, we recommend against the use of chemical cleaners.

For additional care and cleaning information, please contact the Comfortex Technical Services Department at 800-843-4151.

Operation

Overtones Dual Sheer Shades incorporate dual layers of alternating solid and sheer horizontal vanes. By aligning the sheer or the solid portion of the fabric, you can control the amount of light that enters the room.

Figure A

The dual layers of solid and sheer horizontal vanes continually cross over each other as the shade is raised or lowered. This allows users to control the amount of incoming light and the view-through effect with the shade partially raised at various points throughout the window as seen in Figure A.

Figure B

When the Overtones Shade is fully lowered, the vanes are overlapped.

When in the closed position, Overtones fabric diffuses incoming light, providing a warm glow. The vanes will be in the closed position when the shade is at its full ordered length as seen in Figure B.

Overtones™ Dual Sheer Shades
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades
Sheer Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation
Press the up or down button on the pendant to raise or lower the shading to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Favorites position can be programmed on-site. Please refer to the installation instructions at comfortex.com/comfortex-dealers.

PowerTouch Rechargeable Surcharges
See page 97.

PowerTouch Appearance
- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½″ long.

PowerTouch Rechargeable Color Options
- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location
The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length
Size and color must be specified when ordered. Below is a recommended size chart.

Shading Length	Standard Wand Length
Up to 30″	1′ (12″)
>30″ to 52″	2′ (24″)
>52″ to 78″	3′ (36″)
>78″ to 100″	4′ (48″)
>100″ to 120″	5′ (60″)

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings
- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

PowerTouch Rechargeable Battery Life
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

Battery Charger
8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156″ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep.

PowerTouch Rechargeable Shadings Warranty
Please see page 114 for complete warranty information.

Overtones™ Dual Sheer Shades
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

Simplicity Rechargeable Motors
The Rechargeable Simplicity Motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the roller tube.

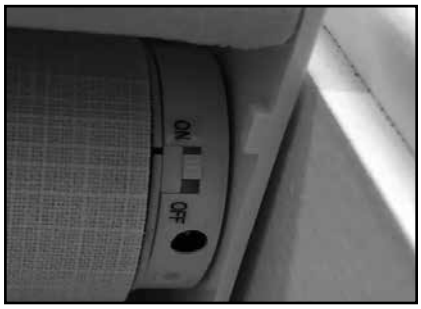
Simplicity Rechargeable Motors
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. No external battery wand is required.

Rechargeable Simplicity Motor Batteries
The battery for the integrated rechargeable simplicity motor system is integrated within the motor casing and is fully concealed by the roller tube.

Rechargeable battery comes fully charged from the factory.

Integrated Rechargeable Motor Battery Life
Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.



Charging Port

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Integrated Rechargeable Motor Battery Charger
An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering an Integrated Rechargeable Simplicity Motorized shade. The charger plugs into the charging port of the motor. Required with Integrated Shading order. Sold separately.

The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes
IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

5 Channel Remote
The ***5 Channel (5C) remote*** can operate up to five shadings simultaneously, individually or in groups.

Simplicity (5C) remotes and holders are black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.
- **WHEN ORDERING THE NEW INTEGRATED RECHARGEABLE, PLEASE ORDER THE NECESSARY BATTERY CHARGER.**

Important Information about Integrated Rechargeable Simplicity Motor Shading Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Battery Operated Motorized Shadings Warranty
Please see page 114 for complete Comfortex warranty information.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Highlights Cornice Valances

Elevate your windows to a whole new level of design with the Highlights Cornice Valance. Coordinate with other design elements in your room and add a finishing touch to the top of any window treatment. The Highlights Cornice Valance is versatile and beautiful at a price point that won't leave you wondering how to cover the rest of your windows!

Choose from any color in the Color Lux Roller line and customize the valance with our 7 available return sizes to best fit your application.

Easy assembly and quick installation, with the Highlights Cornice Valance, more beautiful windows are within your reach.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Color Lux Sheer Shadings, Shangri-La Sheer Shadings, Paradise Sheer Shadings, and Overtones Dual Sheer Shades

Cleaning and Care

Shangri-La, Paradise, Overtones and Soft Tones Sheer Shadings are made from a sturdy, knitted polyester fabric which can be feather dusted or vacuumed at a low setting. Spots or stains can be lightly rubbed clean with a damp sponge and mild soap. To avoid discoloration of the material, we recommend against the use of chemical cleaners.

Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure to salt air through open windows and doors will accelerate fabric deterioration over time.

Important: Do not clean the fabric using electrostatic wipes such as Swiffer® or Pledge Grab-It®.

Ultrasonic Cleaning

Color Lux Sheer Shadings, Shangri-La, Paradise, and OverTones Sheer Shadings can be ultrasonically cleaned. Adco OnSite Fabricare provides shading and blind cleaning services. For more information, visit www.onsitefabricare.com. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

For additional advice on care or cleaning, please contact the Comfortex Technical Service Department at 800-843-4151.

Scotchgard™ Treated Shades

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.

- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not over wet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Vertical Sheer Shadings

Cleaning and Care

The Vertical Sheer Shadings sheer, valance, and vane fabric are 100% polyester. They are resilient, anti-static, and dust resistant.

As part of the final step of installation, light steaming may be required. Steam the sheer so its contours are round, full and free of wrinkles; use short vertical strokes and steam from behind whenever possible.

Feather dusting or light vacuuming is usually all the customer needs to do to keep the sheer looking good.

Shadings can be spot cleaned any using a clothing pre-treatment solution. Blot the soiled area as you support it from behind with another cloth. Let dry, then blot with distilled or bottled water to rinse.

Ultrasonic Cleaning

For deep cleaning, both injection/extraction and ultrasonic cleaning methods are recommended for Vertical Sheer Shadings. Adco OnSite Fabricare provides shading and blind cleaning services. For more information, visit www.onsitefabricare.com. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

For additional advice on care or cleaning, please contact the Comfortex Technical Service Department at 800-843-4151.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

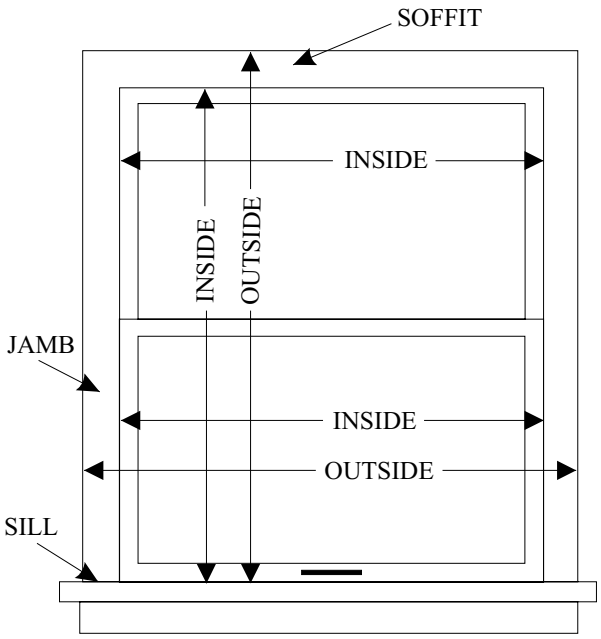
Sheer Shadings
MEASURING INSTRUCTIONS

Important Measuring Guidelines for Sheer Shadings, Soft Tones, Vertical Sheer Shadings. Comfortex accepts measurements down to 1/16" increments.

Precise width and length measurements are critical. Fabric width cannot be altered after the shading is fabricated.

Please use a metal tape measure for accuracy.

The head rail must be installed perfectly level to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.



Inside Mount

Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.

Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount

Measure the exact width and length of the area to be covered. On the width, allow at least 1½" of an overlap on each side. An overlap of 3" on each side is recommended. Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

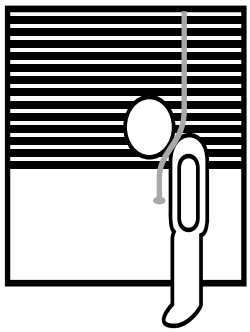
Side Mount

Side mount is not available with DoorStyles Shadings.

Shangri-La may be side mounted using "L" brackets. For side mounts, follow the instructions for inside mounts. An additional ½" will be taken off the standard inside mount deduction to allow room for the "L" brackets.

The maximum shading width utilizing the side mount option is 48".

Sheer Horizontal Window Shadings
GENERAL INFORMATION

⚠WARNING	⚠ADVERTENCIA
	


Window Blind Cord Can STRANGLE Your Child.	La cuerda ciega de la ventana puede ESTRANGULAR su niño.
To prevent strangulation, purchase cordless products or products with inaccessible cords.	Para evitar el estrangulamiento, compre alternativas inalámbricas o productos con cables inaccesibles.

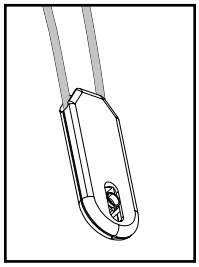
Child Safety

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for Safety of Window Covering Products.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

Cord Tensioners

Cord tensioners used on Shangri-La and Soft Tones Shadings continuous cord loops keep the continuous cord loops taut to prevent children and pets from becoming entangled and subsequently injuring themselves. Cord tensioners must be used with Shangri-La and Soft Tones Shadings to comply with the Consumer Product Safety Commission (CPSC) and WCMA Child Safety Guidelines.



Cord Tensioner

Shangri-La Shadings with Retractable Cord Hardware

Retractable Cord hardware is safe alternative to conventional cord loop controls by retracting and limiting the cord length. We recommend using cord cleats.

Vertical Sheer Shadings

The combination wand/cord option integrates both tilt and traverse functions into one easy-to-use control that keeps the cord taut. The moving wand option used on Vertical Sheer Shadings allows all functions to be controlled by a single wand without the need for operating cords.

Conditions of Sale

All Comfortex products are custom fabricated to your exact specifications. We cannot accept responsibility for errors in ordering or cancellations and charges after the order is in production.

Policies

Our policies are designed to provide a guide for doing business with Comfortex and are subject to change. Our first priority and number one policy is to provide the highest level of service and total satisfaction.

Freight Policy - Effective January 18, 2021

Fabricated Shades/Blinds

Comfortex will ship all orders for fabricated shades or blinds freight free via FedEx UPS Ground or other similar method within the Continental United States.

A transportation surcharge of $8 per unit will be added to all fabricated product orders shipping within the Continental U.S. with a minimum charge of $25 per order.

The applicable fee will be the higher figure of the per unit charge and the minimum charge. For example, if you order four shades, you will be charged a total of $32 for shipping (4 units x $8 per unit). If you order two shades, you will be charged a total of $25 for shipping ($25 minimum cost).

Color Lux "Green Fabric" made to exact size will incur a $2.50 per unit transportation surcharge. In addition to the $2.50 fee, fabrics 90" wide or greater will also incur a $50 per order oversize fee.

This rate structure will apply to shades/blinds, vane packs, individual vanes, tracks, verticals, valances, and cut yardage orders.

The following are the exceptions:

Oversized Shipments (widths of 90 inches or greater): In addition to the $8 transportation surcharge per unit, (minimum of $25), a $50 per unit Common Carrier surcharge will be added to all oversized fabricated products shipping within the Continental U.S., including shades/blinds, Vertical Sheer Shadings, Ovation Cellular Slider, Panel Track systems, valances, vane packs, individual vanes, and tracks. Oversized products will have a minimum charge of $80 per order.

Hawaii and Alaska: Shipments to Hawaii and Alaska will incur transportation surcharges of $27 per unit. In addition, a $140 per unit Common Carrier surcharge for oversized shades/blinds (over 90") and an $80 per order oversize fee for Cut Fabric orders over 90" will be added to orders shipping to these two states.

Canada (all amounts are USD): Shipments to Canadian dealers will incur an $8.75 per unit transportation surcharge. There will also be an overall minimum charge of $25 per order. In addition, an $80 per unit Common Carrier surcharge for oversized shades/blinds (90" or greater) and a $40 per order oversize fee for Cut Fabric orders 90" or greater will be added to orders shipping to Canada.

Other Countries: All Dealers requesting orders to be shipped outside the United States must provide a Freight Forwarder.

Components and Fabric

Comfortex will prepay all freight charges on shipments of component and fabric orders over $3,500 in value within the Continental US. Fabric and component orders less than $3,500 will be subject to freight charges.

Charged Marketing Materials

All charged marketing materials will incur freight charges. **EXCEPTION:** Manufacturer's Price List and Reference Guides and Price List Binders will ship freight free. Marketing materials may ship on separate days, from different locations. Freight charges are calculated per package, not per order.

Specifications

All Comfortex products are designed and tested to perform as intended within established, published parameters. Requests for "custom fabrication" of products outside of our published specifications may be considered, but are at the discretion of the Comfortex Technical Services department. Restrictions and additional charges apply.

Download installation instructions, order forms or additional price list copies on the Comfortex OnDemand Library or www.comfortex.com/comfortex-dealers in the Dealers Resource Center.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Sheer Horizontal & Vertical Shadings Warranty Information

Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

Warranty Information Regarding the Braided Cord on Shangri-La Sheer Shadings and Soft Tones Shadings with Designer Cassette Hardware:

Designer Cassette Shadings built with a braided cord do not have a reverse roll stop. If a Shangri-La or Soft Tones Shading with the Designer Cassette Head Rail is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Shangri-La, Soft Tones, Vertical Sheer Shadings, Paradise Sheer Shadings and Overtones Limited Lifetime Warranty

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The Limited Lifetime Warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The Warranty does not include any conditions or damages resulting from accidents, alterations, misuse, abuse, misapplication, improper handling, installation, repairs, operation, cleaning, exposure to any and all natural and manufactured excessive heat sources. (Excessive heat sources include, but not limited to; magnification of sun light through cubes of glass, heaters of any kind, ovens, candles, lighting fixtures, etc.) This warranty does not cover variation in fabric color or loss of pleating if product is not being cycled (held in the raised position a portion of the time). Variation in grain or texture in natural wood products is normal. Excessive warping of wood or faux wood slats in high humidity areas are not covered under this warranty. Normal wear and tear is not covered.

All moving parts, such as cords and strings (internal and external), will eventually wear out on all blinds and shades, and fabric may fray. Comfortex considers these things as normal wear and tear and will carry a five year Limited Warranty.

All fabric, including fabric vanes, panels, inserts, and shades carry a five year Warranty. Fabric cell separation is covered for a lifetime. See Comfortex Standard Return and Repair Policy for more details.

This Limited Warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this Limited Warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this Limited Warranty.

To obtain service, contact the Dealer from whom you purchased the product.

This Warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages are not allowable. Comfortex Dealers and Fabricators must use safety devices supplied by Comfortex in accordance with Window Covering Safety Counsel guidelines.

This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This Limited Warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this Warranty.

This Limited Warranty supersedes any previous versions.

Sheer Horizontal Window Shadings
GENERAL INFORMATION

Motorized Shadings Warranty

Simplicity Motors including PowerTouch Shadings and Integrated Rechargeable Motorization

We offer a 5 year warranty on all motors and controls. Specifically, we warrant the Simplicity motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Simplicity product fails within this 5 year period, we will repair or replace it free of charge through your end product supplier. Batteries are not covered by the warranty.

Color Lux Color Warranty

Comfortex utilizes state of the art technology to provide you Color Lux Shades within 2 Delta-E (DE) of the sample fabrics found in the Color Lux Sample Book. When viewed under different lighting sources such as fluorescent, incandescent, halogen, ultraviolet and others, fabrics may appear different to the eye. Comfortex utilizes the worldwide lighting standards of Daylight 65 (D65) as our official standard for measuring and qualifying color accuracy, because D65 daylight bulbs best represent actual "daylight" illumination. Slight color variations (under 2 DE) are within established industry standard and should be expected.
This warranty is in addition to Comfortex limited lifetime warranty.
