# THE LONG VIEW

*Whether for intense temperature control or an intense decorative statement, Vertical Blinds take a linear approach. Sensible, yes. Boring, never.*

## WHEN TO CHOOSE VERTICAL BLINDS

- Blinds that glide to the side make for easy access with those expansive sliding glass doors.
- To see or not to see, that is the question. And with just the twist of a wrist, you can decide.
- Vinyl options are the ultimate in minimal maintenance. Wipe and go.
- Decorative textile choices mimic soft drapes without the dry cleaner.
- Choose our interlocking S-curve option for even more privacy, more energy efficiency and more, well... darkness. AKA blackout.
- Our heavy-duty headrail system keeps the vanes aligned in harmony and traversing quietly for a very long time.

## *Alta Advantage* ENERGY EFFICIENCY

Vertical blinds boost energy efficiency over large spans of glass, and the interlocking design of S-Curve vanes helps keep both the room and your budget at more comfortable levels.

## VANE STYLES

### S-CURVE

The S-shape design provides an elegant, drapery-like appearance. The interlocking vanes block out more light than traditional curved vanes.

### VINYL

Available in embossed, matte, smooth and deep-textured options. Vinyls are unique—providing total light control, privacy, functionality and fashion.

### FABRIC

Choose from a variety of light-filtering fabrics for a gentle ambiance or insert into groovers and that same beautiful textile does double-duty as a blackout.

Ultrasonically **sealed-in weights** are standard on all fabric free hang blinds. Bottom chains are available on any free hang fabric or vinyl upon request, free of charge.

**Optional vinyl insert groovers** maintain the soft fabric look while increasing privacy, light control and energy efficiency. Neutral appearance from the outside—available in white and ivory.

## MOUNTING OPTIONS

A standard rounded-corner valance with matching vinyl or fabric insert conceals the operating mechanism, adds elegance and provides a more tailored look.

## CONTROL OPTIONS

Rotate vanes open and closed and move the blinds side to side across the window with a sturdy wand. Easy to use and ideal in homes with children and pets.

Chain rotates vanes open and closed; cord moves the blind side to side across the window. The cord secures to the wall for safety.

### **! WARNING**

Window Blind Cord Can **STRANGLE** Your Child. To prevent strangulation, purchase cordless products or products with inaccessible cords.

*All blinds with cords include a non-removable warning label.*

## STACKING OPTIONS

Blinds draw to the left and stack on the left. Choose left or right side control position for standard; wand is right control.

Blinds open in the middle and vanes stack on both left and right sides. Choose left or right control position. Note: wand is not available for this stack.

Blinds draw to the right and stack on the right. Choose left or right side control position for standard; wand is left control.

Child safety is serious business, which is why we use warning tags, labels, and other methods to communicate the potential hazards of corded window coverings. The warning shown here communicates the important message about cords being a potential strangulation hazard and suggest choosing cordless alternatives or products with inaccessible cords.
