All Allure fabrics are primarily Polyester for easy care and cleaning. FR coating is available for all Allure fabrics.

Note: For Small and Large Cassette 2-On-1 Headrail option, Maximum width is 156". For Couplitaire 2-On-1 Headrail option, Maximum width equals maximum width of Allure shade fabric.

Due to the woven horizontal vanes and the front to back panel configuration, the front panel of Allure Transitional Shades may sometimes appear to have deflection. This deflection may be more apparent in certain fabric types and in larger width shades. This is not a defect, but inherent to the construction of the shade.

* The Unique geometry of the Flirt pattern limits the ability to align the front and back vanes perfectly.

† The exclusive processes used in weaving these materials create distinctive variations and you may see various threads or slubs woven into the fabric creating light or dark colors intermittently dispersed throughout. These variations are intentional and add to the beauty and truly unique appearance of each shade.

Shade Operation

The transition of light is created with dual layers of fabric alternating between sheer and semi-opaque or opaque horizontal fabric vanes. As the fabric moves the layers bypass on the window creating different levels of light-filtering options. You can raise and lower your shades while still controlling the amount of light and your view.

Size Standards

See Size Standards on page 3

Important Child Safety Note

The revised American National Standard for Safety of Corded Window Covering products requires that shades with cord loops must be mounted with functioning cord tensioners that have not been modified from original specifications.

 - Extension Brackets
 - Hardware Color Substitution
 - Magnetic Hold Down Brackets
 - Optional Chain Lengths - See Standard Chain Drops Chart above
- Surcharge
 - Mixed Metal Designer Accents - See page 24
 - Metal Bead Chain
 - Fabric Wrapped Bottom Rail
 - FR Coating - See page 24

Ordering Notes

- Available as Outside Mount Only
- **Exclusions:** 2-On-1 Headrail, Motorization, Inside Mount
- To price, add the Allure fabric base price to the Sundown fabric surcharge.

Caution

- When transitioning from light-filtering to room-darkening fabric, the bottom rail will drop below the ordered length. Once completely lowered, the bottom rail will raise back to its ordered length. The extra drop experienced during transition can distort and damage the fabric if the bottom rail hits the window sill.
- Fabric Covered Sundown Cassette - Will have sheer and solid fabric layered to create a unique appearance (See photo below). Therefore a Small Cassette and Sundown cassette will not have the same appearance within a room.

Mounting Requirements

- Outside Mount (OB) ONLY
 - Minimum Mounting Depth: 3 5/16"

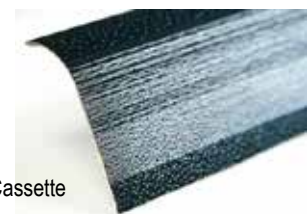

Sundown Cassette

Finished Dimensions

 - ♦ Control Side: 3/4"
 - ♦ Non-Control Side: 7/16"

Shade Operation

Pull on the back of the chain to lower the shade. Once the shade reaches the full length, the view can be adjusted. Continue pulling until the Sundown material is exposed. The view can be adjusted to show all or part of the Sundown material by pulling on front of beaded chain.

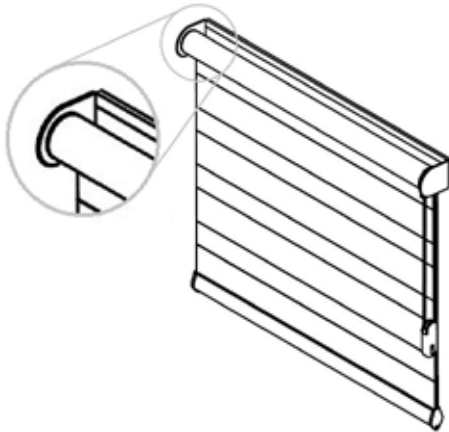

Sundown Cassette

Ordering Notes

- Vane Alignment - Alignment of the semi-opaque or opaque fabric vanes can be guaranteed within 1/4" if shades are ordered at the same time, in the **identical style, color and height, and room number specified.** (Not available for pattern Flirt)
Must be requested at time of order.
- Headrail color must be requested at time of order.
- Allure transitional shades will come set to stop in the closed position at ordered length.
- Exclusions: 2-On-1 Headrail, Sure-Lift, Auto-Wand, and EZ Charge

Shade Operation

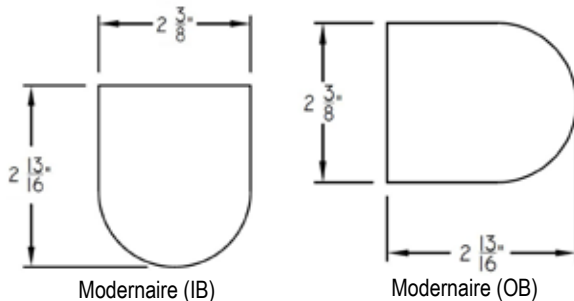

The transition of light is created with dual layers of fabric alternating between sheer and semi-opaque or opaque horizontal fabric vanes. As the fabric moves the layers bypass on the window creating different levels of light-filtering options. You can raise and lower your shades while still controlling the amount of light and your view.

Caution

With light filtering fabrics there may be a light gap between the shade and the bottom of the mounting board on inside mount.

As the fabric moves the layers bypass on the window creating different levels of light-filtering options. You can raise and lower your shades while still controlling the amount of light and your view. The EZ-Lift system is lowered by pulling shade or giving a slight tug to lift.

Caution

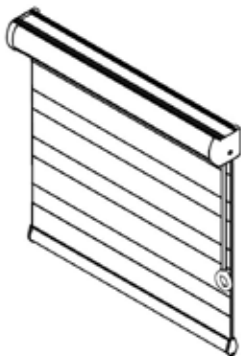

- Fabric Covered Valance - Will have sheer and solid fabric layered to create a unique appearance - [See page 3](#) for fabrics
- Maximum Width of Allure shade will be dependent on maximum width of Privacy fabric selected. Maximum width will be the smaller width of the two selected.
- 2-On-1 Headrail applies to Allure Transitional shade only. Will have a single privacy shade so max width will still apply.
- For 2-On-1 headrail, controls must be on left and right side.

Shade Operation

The transition of light is created with dual panels of fabric alternating between sheer and semi-opaque or opaque vertical fabric vanes. As the panels move, the layers bypass on the window creating different levels of light-filtering options. You can raise and lower your shades while still controlling the amount of light and your view.

Caution

- Vertical Vane Alignment - Full solid vane on both ends of shade may not be guaranteed.
- Fabric Covered Headrail - On certain fabrics (see page 3), headrail will have sheer and solid fabric layered to create a unique appearance.

Product Information

Design Options Information

Board Mounted Shade with Fabric Wrapped Valance

In place of a cassette, the shade can be mounted to a board. The roller is hidden by a valance covered in the matching Allure fabric and attaches to the board with velcro.

- Board Mounted Shade with Fabric Wrapped Valance is wrapped in shade material
- 4 1/2" high valance, fabric has velcro attachment to the board.
- 4 1/2" returns unless specified
- Maximum Width is 84"

Fabric Wrapped Bottom Rail

- Bottom Rail is wrapped in shade material
- Fabric does not cover the entire back side of the bottom rail in order to comply with the CPSC child safety label requirements
- **Not available with fabric Covert**

Front

Back

Mixed Metal Designer Accents

In place of the fabric covered cassette, the face of the cassette can be covered with one of the six Designer Accent materials. The front and back of the bottom rail is also wrapped in the same selection.

- Available for Small and Large Cassette, Sundown and Sure-Lift
- Hardware is color-coordinated to Allure material unless specified.
- Colors available: Brushed Sterling, Brushed Titanium, Brushed Graphite, Bronze Shimmer, Radiant Cashmere, and Bronze Pearl. (Colors shown in sample book)

Flame Retardant (FR) Coating or Antimicrobial

A flame retardant or antimicrobial coating is available for all Allure fabrics and is done through an external facility. The Allure shade is fabricated then sent to an external facility for the flame coating or antimicrobial process. Allow four to six weeks extra delivery time for this service. Standard shipping is included. Contact Customer Service for a quote.

Magnetic Hold Downs

- Metal is inserted at the ends of the bottom rail; hold down magnets are attached to the window frame to hold the bottom rail in place when shade is lowered.

Exposed Roller

- Allure transitional shades will come set to stop in the closed position at ordered length. The exposed roller option has the stop set to come past order length and allow for minor adjustments.

Bottom Rail
The shape is designed
to keep the two fabric
layers closer together
as they move through
the bottom rail.

Best Practices for Measuring

- Always use a steel tape or a metal ruler for measuring.
- Always measure every window even though they look the same.
- Check for obstructions that could affect operation of the shade.
- For Inside Mount (jamb to jamb in a window or door, wall to wall, in a room), give exact inside to inside width measurements, and top to bottom length measurements of the area to be covered.
- Measure the width in at least three places and specify the narrowest width.
- Measure the length in at least three places and specify the shortest length.
- Take two diagonal measurements. If there is a greater than 3/8" difference in diagonal measurements, outside mount is strongly recommended to avoid irregular light gaps.
- For Outside Mount, measure the exact width and height of the area to be covered.

Measuring for Allure Shades

- All shade pricing is based on the width and the window opening height. Orders are accepted for inside or outside dimensions, to the nearest 1/16".
- It is critical that the shade brackets be mounted so that the shade is level when installed.
- For an Inside Mount, measure the exact width between the jambs (inside) where the shade is to be mounted. If the end caps are not tightly secured it is possible the shade will not fit in the opening.
- For an Outside Mount, we recommend that the brackets be placed to allow a minimum of 1 1/2" to 2" overlap on each side of the casement. Measure between the point where the brackets are to be placed and specify that as an outside width.
- For Length, measure the full length of the window opening from the top frame to the lower sill to determine your window length.

Oeko-Tex™ Rating for Mirage Fabric

The Oeko-Tex Standard 100 provides the textile and clothing industry with a globally uniform standard for the objective assessment of harmful substances. Raw materials, intermediate and end products at all stages of processing throughout the manufacturing chain, including accessories, are tested and certified. Certification is obtained by application in writing from the manufacturer to one of the authorized test institutes or official offices around the globe. The samples submitted are tested exclusively in the member institutes in Europe and Japan in order to ensure a consistently high level of testing. The mark "Confidence in Textiles - Test for harmful substances according to Oeko-Text Standard 100" states that the marked product fulfills the conditions specified in this standard, are under the supervision of an institute belonging to the International Association for Research and Testing in the field of Textile Ecology (Oeko-Tex). The mark is not a quality label. The mark relates only to the as-produced state of the textile and says nothing about other properties of the product such as e.g. fitness for use, reaction to cleaning processes, physiological behaviour in respect to clothing, properties relating to use in buildings, burning behaviour etc.

General Advisories

Please examine all merchandise and packages for accuracy and make sure all parts, brackets, etc. are included **before** sending them to be installed. While we constantly strive to make sure each order is exact and complete, we do occasionally make mistakes, and **we cannot be responsible for trip charges or reinstallation charges. Repairs or remakes must be requested within 30 days of invoice date.**

Allure Care & Cleaning

The operating system of the Allure Transitional Shade dusts the fabric when the panel is rotated thereby reducing the care necessary for the shade. The shade can be feather dusted or vacuumed at a low setting. Allure fabrics are primarily Polyester. Spots can be cleaned with a damp sponge and mild soap. To avoid discoloration, do not use chemical cleaners. Ultrasonic cleaning is not recommended.
