Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width (or Vertical Applications over 90" in height) are considered oversize. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

Care Method 1

Dusting with a feather, or synthetic, non-abrasive, material duster is recommended for all Honeycomb Shade surfaces which are lightly soiled.

Care Method 2

Wiping with a soft, damp sponge or cloth, of non-abrasive material, with lukewarm water is recommended for all Honeycomb Shade surfaces which need spot cleaning.

Care Method 3

Vacuuming with a soft bristle vacuum cleaner brush attachment is recommended for all Honeycomb Shade surfaces which are heavily soiled.

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening. Darker colored materials tend to provide stronger screening than lighter colored materials in this category.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout slats and vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

FEATURES & BENEFITS

- The beautiful combination of a sheer pleated shade on top and honeycomb or 2" Hybrid Pleat shade on the bottom provides maximum versatility in a single window covering.
- Wide array of color options from whites, neutrals, and muted tones to bold colors and exclusive prints.
- Four sheer pleated styles in multiple colors to meet most decorating tastes.
- Semi-opaque and blackout fabrics are available in multiple sizes, providing a choice for every window size and desired light and privacy control.
- Honeycomb fabric provides superior insulation for reduced heating and cooling bills. It also absorbs sound, making rooms more comfortable.
- The continuous cord loop option lifts any shade – even large or hard-to-reach – and positions it exactly where you want without any dangling cords.
- The Cordless and Cordless Lift & Lock option provide safe, simple operation by raising and lowering the shade using handles instead of cords. Ideal in homes with children and pets.

SELECTING A TRILIGHT SHADE

1. Choose a fabric, cell size and color for the bottom shade.
Note: TriLight Shades are not available with 3/8" single cell, 3/4" sheer/semi-sheer, 1-1/4", or Dimensions.
2. Choose a sheer pleated fabric for the top shade.
See Sheer Pleated Color Chart.
3. Refer to the honeycomb and 2" Hybrid Pleat price grids on pages 9-24 to determine your bottom shade price.
4. Refer to the sheer pleated grids on page 28 to find your top shade price. Add the bottom shade, sheer pleated and control option prices together to determine your final price.
 - TriLight Shades are available as standard rectangle only.
 - Continuous cord loop system – right operates the middle rail; left operates the bottomrail. Reverse controls are available; grouped controls are NOT available.

CLASSIC SKYLIGHT CONFIGURATION SPECIFICATIONS

NOTE: Use metal tape measure for all measurements. Measures to 1/8 inch.

CLASSIC SKYLIGHT

This easy to operate system holds shades in place. Perfect for skylights and other windows beyond reach.

- Hardware color: Aspen White (785)
- Manually operated with handle
- Ends of headrail, moving rail and anchor rail are enclosed by side tracks
- Features a two-cell fabric gasket attached to the headrail; eliminates light leakage when shade is closed
- 5' adjustable extension pole – extends to 10'

Note: Pleats will have a vertical orientation when side stack is ordered.

Optional Extension Pole
Extends 5' to 10'

SKYLIGHT WITH AUTOMATION CONFIGURATION SPECIFICATIONS

NOTE: Use metal tape measure for all measurements. Measures to 1/8 inch.

SKYLIGHT WITH AUTOMATION

Skylights with Automation are different than Classic Skylight.

Key differences include:

- Headrail and Bottomrail are identical and are the same rail used with standard Motorized shades.

Bliss and SOMFY Automation:

- Fabric stacks to the top of the window – between the moving rail and headrail

Features

- Inside Mount only
- White Tiara (661) aluminum head and bottom rails. White vinyl side rails
- Use radio frequency controlled Bliss Automation or Somfy motors
- Wireless remote control operates individual or groups of shades

Operation & Installation Tips

- Skylight with Bliss and Somfy Automation have the option of an external battery pack that can be installed on the back of the headrail. Consider adding 48" Extension Cable (Part #62207000) to the order for installation flexibility. The part may be daisy-chained for additional flexibility.
- Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Make sure to leave the top of the headrail open (motor exposed), do not cover; especially with metal materials. This could result in a reduced radio frequency range for the remote control or the shade may not operate at all.
- Motorized Skylights will NOT operate properly if installed in a completely horizontal application. The minimum recommended slope is 5%.
