COLOR LUX SIMPLICITY BLUETOOTH MOTORS QUIETUDE™ TECHNOLOGY

Color Lux Simplicity Bluetooth motors now feature our exclusive Quietude™ technology. Our Quietude™ technology significantly reduces motor running noise, and delivers both performance and a user-friendly customer experience.

Color lux Simplicity Bluetooth motors, with Radio-Frequency, Bluetooth and SmartHub control options, are now one of the quietest and most completely versatile offerings in the industry.

Quietude™ technology enables shades to operate at the same speed, so all shades perform consistently. The operating speeds can also be adjusted using our Color Lux Mobile app.

Color Lux Simplicity Bluetooth motors now also communicate daily with other Quietude™ motors in the proximity in order to synchronize schedules, as set in the Color Lux Mobile app.

Scotchgard™ Protection

Optional Scotchgard™ Protector is available with all Color Lux fabrics. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned.

Color Lux® Cellular Shades

Motorized shades less than 24" in width are limited to a maximum of 60" in length. Cordloop and cordless shades less than 24" in width are limited to 84" in length.

Maximum widths and lengths listed do not take into account square foot or weight limitations. Make sure to refer to shaded areas on price groups for maximum size availability by fabric style. * Minimum single panel is 8", maximum single panel is 108". ** Minimum single panel is 18", maximum single panel is 108". *** Split stack sliders are available 240", however if the width exceeds 120", the shade will be fabricated as two separate sliders. Supplied valance will create the appearance of a single slider. + Minimum for Motorized Top Down-Bottom Up is 24" IB and 23³/₈" OB. Minimum length and maximum length and width are the same as Simplicity motorization specs.

PRODUCT INFORMATION

See Page 47 for detailed information.

DESIGN UPGRADES

Scotchgard Stain Protector	Add \$48 per shade
Center Stack	Add \$108 Left or Right Stack Standard
Split Stack*	Price by dividing the full width measurement in half. Price as two separate units and add together.
Dual Panel**	Price as two separate units and add together.

* Split stack sliders are available in widths up to 240". If the width exceeds 120", it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider.

** A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified.

PRODUCT INFORMATION

See Page 47 for detailed information.

DESIGN UPGRADES

Scotchgard Stain Protector	Add \$48 per shade
Center Stack	Add \$108 Left or Right Stack Standard
Split Stack*	Price by dividing the full width measurement in half. Price as two separate units and add together.
Dual Panel**	Price as two separate units and add together.

* Split stack sliders are available in widths up to 240". If the width exceeds 120", it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider.

** A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified.

Non-Movable Starburst Product Information:

Templates required on non-perfect non-movable Starburst Arches. See page 75 for more information.

Fabric wrapped rail is standard. There will be a splice in the center. A decorative rosette is supplied to cover the splice.

Pricing Information:

Price according to the largest radius measurement. If the height is greater than the width, take height multiplied by 2 and use that number to determine pricing.

Color Lux® Cellular Shades
STANDARD CORD LOCK SHADES HARDWARE SYSTEM

Cord Lock Rail

- Depth of rail: 1 7/8"
- Depth of rail and bracket: 2 3/8"
- Height: 1/2"
- Height of bracket: 5/8"

Hardware Features	
Fabric Wrapped	Fabric used is same fabric as the shade. Back of rail is white to outside. Color coordinated end caps with white cord and tassel
Designer Metallic	• Oil Rubbed Bronze head and bottom rails with bronze colored tassel, end caps and white cord.
Mounting Dimensions	
Mounting Dimensions	Cord Lock Rail
Minimum Shallow Mount	3/4"
Minimum Flush Inside Mount	2 3/8"
Minimum Outside Mount	3/4"
Minimum Side Mount	1 3/8"
Recommended Side Mounting Method	<ul style="list-style-type: none"> • See figure B (pg 26) for recommended mounting method for side mount shades • Width limit for side mount brackets is 48"
Finished Dimensions	
Inside and Side Mount	
	<ul style="list-style-type: none"> • Fabric will measure ordered width less: 3/8" • Head rail* will measure ordered width less: 3/16"
Outside Mount	
	<ul style="list-style-type: none"> • Fabric will measure ordered width • Head rail* will measure ordered width plus: 3/16"
Exact (End Cap to End Cap) Mount

Color Lux® Cellular Shades

STANDARD CORD LOCK SHADES HARDWARE SYSTEM

Applications

- Standard Rectangular
- Day-Night
- Trapezoids and Octagons
- Top Down - Bottom Up
- Two-On-One Head Rail

Things to Consider

- If child safety is a concern, consider cordless options: Cordless Ultra, Cordless Lift & Lock or Motorization.
- Larger shades can be difficult to operate. Consider Cord Loop, Cordless Ultra or Motorization hardware.
- If privacy is an issue, consider Top Down-Bottom Up options.

Recommended Mounting Method for Side Mount Shades

Figure B

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 72 for details.

Day-Night Shades

See pages 69-70 for more information.

Specialties (Trapezoids and Octagons)

Color Lux® Cellular Shades

CORD LOOP HARDWARE SYSTEM

Applications

- Standard Rectangular
- Two-On-One Head Rail
- Top Down - Bottom Up

Cord Loop Hardware System Features

Cord loops are available 2' to 15' lengths in 1' intervals. Please specify length when ordering. Standard loop sizes are as follows:

Shade Length	Standard Loop
Up to and including 26 ⁷ / ₈ "	1' (12")
27" to 39 ⁷ / ₈ "	2' (24")
40" to 59 ⁷ / ₈ "	3' (36")
60" to 83 ⁷ / ₈ "	4' (48")
84" to 107 ⁷ / ₈ "	5' (60")
108" and greater	6' (72")

Cord loops over 6' in length will be white.

Recommended Mounting Method for Side Mounting Shades

Width limit for side mount brackets is 48".

Cord Loop Hardware
 Cordless Ultra Hardware
 Cordless Ultra Top Down -
 Bottom Up Hardware

Figure A

Refer to the installation instructions on Comfortex.com/comfortex-dealers or the OnDemand Mobile Library for further details on side mounting shades.

Ordering Information for Cord Loop Hardware Shades

Standard Rectangular

- Specify IB or OB mount, rail color and left or right lift cord.
- Specify cord loop length when ordering.

Top Down - Bottom Up

- Specify IB or OB mount and rail color. Middle rail will match the top and bottom rails.
- Specify cord loop length when ordering.
- Controls are the right cord loop operates the middle rail and left cord loop operates the bottom. Reverse controls are not available.

Two-On-One Head Rail

- Two-On-One Head Rail Shades operate as two separate shades on one head rail.
- Specify IB or OB mount and rail color.
- Specify panel sizes.
- Specify cord loop length when ordering.
- 3/8" Space between panels.
- Fabric wrapped Two-On-One Shades will have a seam in the center of the rail due to the wide width.

Ultra Feature:

Ultra - is a synthetic lift cord that allows cordless Color Lux cellular shades to more easily move up and down.

[More information on page 29.](#)

EZ Level on Comfortex Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:
 Standard Cord Lock, Cordless Ultra, Cord Loop Simplicity Motorized Systems

EZ Level is not available with Cordless Lift & Lock.

How does EZ Level work?

- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down. One quarter turn of the adjustment screw will move the bottom rail up or down 1/4".
- Lower the rail to check the level and make further adjustments if necessary.

Color Lux® Cellular Shades

CORDLESS ULTRA HARDWARE SYSTEM

Cordless Rail Dimensions

- Depth of rail: 2"
- Depth of rail and bracket: 2 1/4"
- Height of rail: 1 1/2"
- Height of bracket: 1 13/16"

Clear Cordless Handle

Hardware Features	
Fabric Wrapped	Fabric used is same fabric as the shade. Back of rail is white to outside. Frosted clear with fabric insert end caps with white cord.
Designer Metallic	<ul style="list-style-type: none"> • Oil Rubbed Bronze head and bottom rails with bronze colored end caps and cord.
Mounting Dimensions	
Minimum Shallow Mount	1/2"

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"	

Cordless Ultra Feature:

Ultra - is a synthetic lift cord that allows cordless Color Lux cellular shades to more easily move up and down.

Ultra Technology is standard on all Color Lux Cordless Ultra, cord loop, Top Down-Bottom Up, motorized and Lift & Lock shades.

The improved performance - quantified as a 25% reduction in pull force - is made possible by the lift cord's unsurpassed combination of slickness, toughness, and chemical resistance.

These qualities produce noticeably less friction as the lift cord moves, making it easier to raise and lower the shade, while also reducing wear on the shade's components.

Color Lux® Cellular Shades

CORDLESS ULTRA HARDWARE SYSTEM

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Two-On-One Head Rail
- Friction Fit - [See page 46 for details](#)

Things to Consider

- Is the top of your window out of reach? You can order an extension pole to reach but it can still be tricky. You may want to consider Cord Loop or Motorized hardware.
- For shades mounted on doors, you may want to order hold down brackets.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information for Cordless Ultra Hardware Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Top Down - Bottom Up

- Specify IB or OB mount and rail color.
 Middle rail will match the head and bottom rails.

Accessories

- 3' Expandable Pole - Silver:
- 5-10' Expandable Pole - Black:

Specially designed pole end fits into the handle on the bottom rail and allows for easy operation.

Note: The pole can not be used to raise only the middle rail on a top down-bottom up shade. If it is necessary to raise the middle rail with a pole, simply push up on the bottom rail so that the bottom and middle rails both raise. Once the middle rail is in the desired position, the pole may be used to lower the bottom rail.

New Sleek 3' Pole

Optional

Cordless Ultra and Cordless Ultra Top Down - Bottom Up Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Ultra and Cordless UltraSmooth Top Down - Bottom Up Shades can be raised or lowered with a gentle push or pull on the rail handle.
- Cordless Ultra Top Down - Bottom Up Shades feature two moving rails.
- Order an operating pole for out of reach applications.

Fabric Wrapped Head Rail and Designer Metallic Head Rails.

Cordless Ultra Shade Operation

Cordless shades should be operated from the handle located in the center of the bottom rail. Using the handle will aid in smooth and easy shade operation. Two handles are supplied on wider width shades.

To lower the shade, pull down on the handle which is secured to the bottom rail and guide the rail to desired position (Figure A). For out of reach applications, an optional extension pole should be used.

To raise the shade, push the bottom rail up using the handle on the bottom rail and guide the rail to the desired position. The shade will hold any position when the bottom rail is released. Raise the shade slowly and steadily to allow the shade to stack evenly (Figure B).

Figure A

Figure B

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 72 for details.

Color Lux® Cellular Shades

CORDLESS LIFT & LOCK HARDWARE SYSTEM

Applications

- Standard Rectangular
- Top Down-Bottom Up
- Two-On-One Head rail
- Friction Fit - [See page 45 for details](#)

Important Operating Note on Cordless Lift & Lock Shades

- To operate a Cordless Lift & Lock Shade, the middle or bottom rails must be accessible. An extension pole is not available for Cordless Lift & Lock Shades.
- If the bottom or middle rail is not accessible, you may want to consider Cord Loop, Cordless Ultra or Motorized hardware. An extension pole is not available for Cordless Lift & Lock Shades.

Cordless Lift & Lock Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Lift & Lock Shades can be raised or lowered by pressing the button located on the bottom rail and guiding the rail into the desired location.

Fabric Wrapped Head Rail with White End Caps

Fabric Wrapped Bottom Rail with White push button/handle

Oil Rubbed Bronze Head Rail and End Caps

Oil Rubbed Bottom Rail and push button/handle

Ordering Information for Cordless Lift & Lock Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Cordless Lift & Lock Shade Operation

Cordless Lift & Lock Shades are operated using the push button handle located in the center of the bottom rail.

To raise or lower the shade; press the button on the shade handle, and guide the rail to desired position. Release the button to lock the shade into place.

The shade will hold any position when the button is released. Raise the shade slowly and steadily to allow the shade to stack evenly.

Recommended Mounting Method for Side Mounting Shades

See Page 26.

Ultra Feature:

Ultra - is a synthetic lift cord that allows cordless Color Lux cellular shades to more easily move up and down.

[More information on page 29.](#)

NOTE: Lift and Lock shades do not utilize the EZ Level plugs like other Comfortex rectangular shade hardware systems. The bottom rail equalization can be adjusted using the tie-off plugs on the top of the headrail. Middle rail of TDBU has an adjusting tool inside the rail. Access by removing the right side endcap.

Benefits of Simplicity BlueTooth™ Motorization: Featuring the Free Color Lux Mobile App

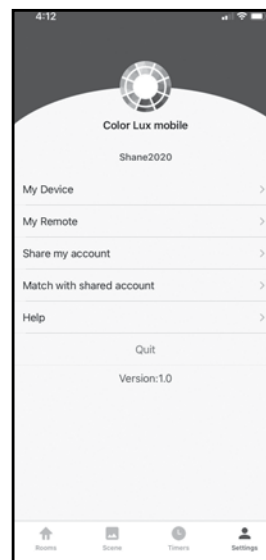

- New “state of the art” 7.4v rechargeable motorization operates with both BlueTooth and Radio Frequency control technology.
- Download the new Color Lux Mobile Bluetooth App FREE on the Apple App Store for iPhone or the Google Play Store for Android.
- Optional Simplicity radio frequency remote control with choice of 5 channel, 6 channel with timer, or 14 channel remote.
- Optional Simplicity Smart Controller (NEO) for remote operation of shades which integrates with Amazon Alexa and Google Assistant devices.

Features of the Color Lux Mobile Bluetooth App:

- Controls your shade directly from your phone with Bluetooth control.
- Has a shade position display indicator. See screen to the right.
- Has a battery charge level indicator.
- Controls the shade using easy swipe or control buttons.
- Controls up to 5 shades simultaneously and no limit to the number of shades connected to a single account.
- Has timer and scene setting options.

Please Note: There are many factors affecting Bluetooth range

- Physical obstacles in the transmission path
- The antennas should be exposed for best performance
- Bluetooth 4.2 supports 10 meters indoor range (~33 feet).

Cellular Shade

12V NON-RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

- Length measurements may vary +/- 1/8".

Applications

- Standard Rectangular
- Two-On-One Head Rail
- Friction Fit - See page 46 for details

EZ Level

Learn about the EZ Level feature on page 72.

Simplicity Motorization Surcharges

The standard Simplicity Motorized Lift System surcharge includes a 12 volt battery wand with eight AA batteries. Remotes are needed to operate the shades. See pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

NEW Simplicity Bluetooth Motorization

Learn about Simplicity Bluetooth motorization and Comfortex FREE Color Lux Mobile App on page 33.

Simplicity Battery Wand

Batteries are needed to operate Simplicity motors. The battery wand can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17 1/4", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand.

The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily will commonly have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase.

Simplicity Hand Held Remote 14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is black and comes with a 80" wire. The dimensions are 1 7/8" wide x 3 1/4" long x 1 1/4" deep

Color Lux® Cellular Shades

7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM WITH QUIETUDE™ TECHNOLOGY

Bluetooth Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. New "state of the art" 7.4v rechargeable motorization operates with both BlueTooth and Radio Frequency control technology.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Standard Rectangular
- Friction Fit - [See page 46 for details](#)

Please Note

- Motorized shades less than 24" in width are limited to a maximum of 60" in length.

EZ Level

Learn about the EZ Level feature on page 72.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Front Access Control

All Color Lux Cellular Shades with Rechargeable Simplicity motors come with a front-facing, flip-top cover for convenient access to the charging port, reset button, and on/off switch.

Shades with front control access include an auxiliary charging port in the back. This port is ideal for a solar panel charging kit or for shades where a top treatment may limit access to the front-side port.

A) Front Control
B) Back of Head rail.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

SIMPLICITY RECHARGEABLE BATTERY WAND
PRICING EXAMPLE: Page 8

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

Please Note:

LED solar panel cord length is 24". Make sure to order 48" extension cord if needed.

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

Solar Panel LED Lights

Red Light: Indicates optimum direct sun exposure

Green Light: Indicates sunlight is enough to charge battery

Blue Light: Indicates battery is charging. Blue light is off when not charging (including when the battery is full)

No Lights: Night or very low sun

Red Light Green Light Blue Light No Light

Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Color Lux® Cellular Shades

7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

WITH QUIETUDE™ TECHNOLOGY

Bluetooth Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shades at the same intermediate position, follow instructions provided with installation manual.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Important Simplicity Motorized Shade Operating and Installation Information

Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.

Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Simplicity Motorized Shade Warranty

Please see Policy PDF for complete Comfortex warranty information.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable Shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Hand Held Remote

14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Motor Hand Held Remotes Operation

Press the up or down button on the remote to raise or lower the shade to your desired position.

To reprogram channel assignments, please refer to the installation instructions and/or view the video at: comfortex.com/comfortex-dealers.

The Simplicity remotes utilize one 3V battery. Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

7.4V RECHARGEABLE MOTORIZED TOP DOWN-BOTTOM UP WITH QUIETUDE™ TECHNOLOGY

Bluetooth Simplicity Rechargeable Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. If shades are 36" or less in width, an external snap-on battery pack is necessary. (See page 129)

Applications

- Rectangular
- Friction Fit - See page 46 for details

EZ Level

Learn about the EZ Level feature on page 72.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. 14 channel remotes are needed to operate the shades. Refer to pricing pages.

Ordering Information for Top Down-Bottom Up Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- 14 Channel TDBU Remote is required.
- Specify one or more battery chargers.

Please Note:

- Shades that are 24"-36" in width will have an external battery.
- Shades with an external battery and OB mounted will need spacer blocks.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits set on both moving rails.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Top Down-Bottom Up Simplicity Motor Hand Held 14 Channel Remote

The TDBU remote has 14-channels. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Front Access Control

All Color Lux Cellular Shades with Rechargeable Simplicity motors come with a front-facing, flip-top cover for convenient access to the charging port, reset button, and on/off switch.

Shades with front control access include an auxiliary charging port in the back. This port is ideal for a solar panel charging kit or for shades where a top treatment may limit access to the front-side port.

A) Front Control

B) Back of Head rail.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¼" deep.

Solar Panel Recharge Option

Cellular Shade Collection

12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Roller Shades, Sheer Shadings and Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

- **Product Description:**

- 12v10a 9ch
- Input Voltage Range : AC90V-264V
- Input Frequency Range : 50Hz-60Hz
- Output Voltage Range : DC12V+/-5%
- Output Current : 10 Ampere
- Output Power : 120 Watt
- Output Ripple&Noise : ≤42MV
- Output Efficiency : ≥83%
- Output Fuse Type : PTC
- Output Fuse Rating : 2A
- Environment Operating Amb.Temp : -30 ~45
20%~90%RH
- Environment Storage Temp : -40 ~85 10%~95%RH
- Plugs into standard household outlet
- Power cord is 56" in length

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2³/₈"
- Length of controller: 2⁵/₁₆"
- Height of controller: 1¹/₈"

Simplicity Smart Controller

- Works with Apple and Android devices
- FREE Downloadable Application
- Compatible with previously installed Simplicity Remote Control Shades
- Powered by NEO Smart Blinds App
- Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?

The App is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the App and your shades.

Color Lux® Cellular Shades

7.4V RECHARGEABLE POWERTOUCH MOTORIZED HARDWARE SYSTEM

PowerTouch™ Rechargeable Shades

Cellular Shades can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. A "favorites" or intermediate stop position can be set once installed.

PowerTouch Rechargeable Surcharges

[See page 9.](#)

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail when installed.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options

- Shades with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

- The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

Mounting Requirements for PowerTouch Rechargeable Shades

- No special installation hardware or wiring requirements are needed.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shades Warranty

Please see Policy PDF for complete warranty information.

Ultra Feature:

Ultra - is a synthetic lift cord that allows cordless Color Lux cellular shades to more easily move up and down.

Color Lux® Cellular Shades

FRICITION FIT MOUNTING HARDWARE SYSTEM

FRICITION FIT MOUNTING SYSTEM

The Friction Fit Mounting System is the perfect solution for hard to drill materials and where drilling is not desired or allowed. There is **NO BRACKET INSTALLATION REQUIRED**.

This pressure mounted system utilizes an aluminum rail designed with a high tension spring that is pre-fabricated with your ordered shade. **INSTALLATION BRACKETS** for your ordered shade **ARE PRE-ATTACHED AT THE FACTORY** for easy installation on site.

White Friction Fit Rail

To install, simply insert the Friction Fit rail within the window opening and secure the lever. This increases the pressure to the ends of the rail, allowing for a snug fit in the window opening.

Friction Fit Surcharge: \$93

Friction Fit is ideal for many applications, such as:

- Brick
- Concrete
- Cinderblock
- Steel*
- Aluminum*
- Tile*
- Popcorn and other textured finishes
- Wood

* Smooth surfaces will require use of included double-sided adhesive.

LEVER LOCATION

The lever will always be on the right side of head rail.

SHADE SPECIFICATIONS

- Minimum mounting depth is 2 1/8".
- Maximum width and length for all mounting systems is 84".
- Available with all fabric styles but limited in sizes and mounting systems.
- Friction Fit is not available for sizes in the shaded area on price grids.

OPERATION TYPES *Inside Mount Only*

- Motorization (Rechargeable, Non-Rechargeable, PowerTouch and Hardwired)~
- Cordless Ultra, including Top Down-Bottom Up
- Lift & Lock, including Top Down-Bottom Up

~ Not available on motorized Top Down-Bottom Up shades less than 36" wide.

~ External battery wands for non-rechargeable motorized shades can not be mounted to back of the shade head rail.

COLOR OPTIONS

Friction Fit Mounting System is available in white and black.

Color Lux® Cellular Shades

OVATION CELLULAR SLIDER HARDWARE SYSTEM

Applications

- Standard Rectangular
- Opens and closes from side to side
- Four stacking options - see below.
- Dual Panel option with a center opening design with two fabrics, one on each side, each spanning the width of the window.

Ovation Stacking Options

Specify stacking configuration when ordering.

Left: Fabric stacks to the left side of the slider.

Right: Fabric stacks to the right side of the slider.

Center Stack: Center Stack Sliders fabric panels can move fully to the left or the right.

Split Stack: Fabric is split in the center of the slider forming two equal panels which open to opposite ends of the slider. Both panels will be of equal width unless otherwise specified. Split stack is not available with Gradient shades.

* Split stack sliders are available in maximum widths from 240" to 336" (maximum width depends on the fabric selected). If the width exceeds the maximum width of the fabric, it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider.

Dual Panel: A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified. Specify which fabric stacks to left and which fabric stacks to the right.

Ordering Information for Ovation Cellular Sliders

- Specify IB or OB mount.
- Specify stacking configuration.
 On Dual Panel Shades, specify which fabric stacks to the left and right.
 On Split Stack Shades, both panels will be of equal width unless specified.
- Specify valance width and return length.

Ovation Valance Specifications

- Every Ovation Slider is supplied with a painted aluminum valance to match your hardware color choice.
- The valance attaches to the head rail using a durable plastic clip system.

Ovation Valance Dimensions

All valance dimensions are measured on the flat, back side.

- Valance Height: 3¼"
- Standard Return Length (OB only): 3⅞"
- For each spacer block, ½" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.
- If the slider requires a non-flush inside mount, you must order a custom valance. Exact valance width and exact valance return length (minimum 1½") must be specified in the Special Instructions section of the order form.
- Custom returns are available for IB non-flush and OB Cellular Sliders. Please specify return length upon ordering.

Things to Consider

- Since most Ovations are sold in large sizes, the shade will have a large fabric stack. On an outside mount, you may want to order the shade a few inches wider so that the fabric stack can be clear of the window.
- **Minimum Ovation Stack:** Ovation's minimum fabric stack measures 6½" regardless of the ordered width. Minimum fabric stacking dimensions are determined by the slider's hardware, not ordered width.

The Ultimate Blackout Color Lux® Cellular Shade

INSULATING SLUMBERSHADES HARDWARE SYSTEM

	<ul style="list-style-type: none"> • Fabric will measure ordered width less: 7/8" • Head rail and bottom rail will measure ordered width less: 1 1/16" • Sidetrack length will measure ordered length less: 1/8"

The widest width of the window cannot exceed the narrowest width of the window by more than 1/4".

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest 1/16" and provide the NARROWEST width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom.

The Ultimate Blackout Color Lux® Cellular Shade

INSULATING SLUMBERSHADES HARDWARE SYSTEM

Applications

- Standard Rectangular • Top Down - Bottom Up
- Cordless and Cordless Top Down - Bottom Up
- Cord Loop and Top Down - Bottom Up
- Motorization

SlumberShades are for inside mount applications only.

Insulating SlumberShade Fabric

Light Filtering fabrics are available as SlumberShades, however the best light control is achieved by using a blackout cellular fabric. Not available in Boutique fabric.

Ordering Information for Insulating SlumberShades

SlumberShades are for inside mount applications only.

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest $\frac{1}{16}$ " and provide the NARROWEST width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom. The widest width of the window cannot exceed the narrowest width of the window by more than $\frac{1}{4}$ ".

If you have questions about ordering SlumberShades, contact Comfortex Technical Services at 800-843-4151.

Accessories

- 3' Expandable Pole - Silver: (See page 26)
- 5-10' Expandable Pole - Black:

Specially designed pole end fits into the handle on the Cordless Ultra bottom rail and allows for easy operation.

Note: Pole operation with Slumbertrack can cause the rail to tilt and can make smooth operation difficult.

Insulating SlumberShades Features

Use SlumberShades to provide the darkest sleeping environment by sealing out the highest percentage of light.

Energy Saving Blackout Sidetracks

Energy saving blackout sidetracks are made from a durable window grade PVC. The blackout sidetracks seal off the light gap between the blackout cellular shade and the window. The blackout sidetracks feature a black interior lining to absorb light and prevent it from entering the room.

On Top Down - Bottom Up Shades, an extra two-cell fabric gasket attached to the top head rail and acts as a seal to eliminate light leakage between the head rail and middle rail when the shade is closed.

Insulating SlumberShades Large Track Dimensions

Used with all fabrics that utilize the deluxe sized head rail.

Large Track

- Width of track: $1 \frac{1}{8}$ "
- Height of track: $\frac{7}{8}$ "

SlumberShades are easy to install, and feature removable sidetracks that are attached to the window frame with magnets. The sidetracks can be removed for window cleaning. The UV stable, window grade PVC sidetracks are available in white, tan and bronze to match your existing trim.

Please Note: When properly installed, SlumberShades block 99% of all visible light. In certain installations with intense sunlight, a very small amount of light may reflect around the edges of the honeycomb fabric along each side of the shade. This is a normal attribute of the SlumberShade system.

Insulating SlumberShade End Caps

The specially designed notched bottom rail end caps fit over the blackout sidetracks and allow for smooth movement when raising and lowering the shade.

Head and Bottom Rail Seals

To ensure a perfectly dark sleeping environment, additional fuzz bar are supplied to be placed along the shade's bottom rail and between the head rail and the window frame if needed. These barriers provide a complete light stop all the way around the window to keep all exterior light out. Also, these additional seals provide a very effective barrier against heat loss along your windows.

Magnets and fuzz bar are standard on Cordless and Cordless Top Down-Bottom Up Shades to ensure closure between the bottom rail and window sill.

Energy Efficiency

Independent testing has shown SlumberShades provide an R-value greater than 7.0* when installed over a double paned vinyl window. The testing also indicates that the R-value of a SlumberShade is 2.5 to 3 times higher than that of the same shade without sidetracks. The insulating cellular fabric, sidetracks, and fuzz bar all ensure that the SlumberShades provides superior energy efficiency.

* Independent testing provided by Consortium for Advanced Residential Buildings (CARB), a U.S. Department of Energy Building America research team. Learn more at comfortex.com.

Color Lux® Cellular Shades STRATAVIEW™ HARDWARE SYSTEM

StrataView™

StrataView is a dual panel shade featuring your choice of either a sheer or ColorLux fabric panel and Color Lux fabric as the second panel.

Hardware Options

- Cord Loop
- Cordless Ultra
- TDBU Simplicity Rechargeable Motorization
- Friction Fit - [See page 46 for details](#)

Cord Loop Hardware System

See page 27 for details.

Cordless Ultra Hardware System

See page 29 for details.

Simplicity Rechargeable Motorized Hardware System

See page 36 for details.

Recommended Mounting Method for Side Mounting Shades

See Page 26.

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. Middle rail can also be adjusted in the field. See page 72 for details.

StrataView Fabric Specifications

Sheer fabric is available on the top of the shade.

See fabric samples of the 4 sheer fabrics for the top of the StrataView in the Color Lux Sample Book.

BOTTOM FABRICS

CELLULAR	Width		Length	
	Min	Max	Min	Max
Cordless	18" OB 18¾" IB	96"	8"	84"
Cordloop	22"	108"	8"	120"
Motorized	24" OB 24¾" IB	108"	8"	120"

Motorized StrataView Shades less than 36" in width require an external mounted battery.

MOTORIZED STRATAVIEW TOP DOWN-BOTTOM UP PRICING EXAMPLE:

Ordering Information for StrataView Shades

Cord Loop StrataView

- Specify IB or OB mount and rail color.
- Middle and bottom rail will match the bottom fabric. Top rail can match top or bottom fabric, your choice.
- Specify cord loop length when ordering.
- Controls are the right cord loop operates the middle rail and left cord loop operates the bottom. Reverse controls are not available.

Cordless Ultra StrataView

- Specify IB or OB mount and rail color.
- Middle and bottom rail will match the bottom fabric. Top rail can match top or bottom fabric, your choice.

Accessories

- 3' Expandable Pole - Silver: (see page 26)
- 5-10' Expandable Pole - Black:

Specially designed pole end fits into the handle on the Cordless Ultra bottom rails and allows for easy operation.

Simplicity Rechargeable StrataView

- Specify IB or OB mount and rail color.
- Middle and bottom rail will match the bottom fabric. Top rail can match top or bottom fabric, your choice.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

StrataView Simplicity Motor Hand Held Remote 14 Channel Remote

The TDBU remote has 14-channels. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for StrataView motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

REMEMBER: Order at least one charger if ordering rechargeable motor

STARBURST ARCHES HARDWARE SYSTEM

Stationary Starburst

Figure A

Movable Starburst

Figure B

Figure C

Hardware Features | See Page 25 for Rail Dimensions

Standard Hardware	Fabric wrapped rail is standard. The fabric will be spliced in the center of the rail. A decorative rosette is supplied to conceal the splice.
Designer Metallic	<ul style="list-style-type: none"> Oil Rubbed Bronze rails with bronze colored end caps.

Mounting Dimensions

Mounting Dimensions	Standard Cord Lock Rail
Minimum Shallow Mount	3/4"
Minimum Flush Inside Mount	2 3/8"
Recommended Side Mounting Method	<ul style="list-style-type: none"> See figure B, pg 26 for recommended mounting method for side mount shades Width limit for side mount brackets is 48"

Finished Dimensions

Inside and Side Mount

<ul style="list-style-type: none"> Fabric will measure ordered width less: 3/8" Head rail* will measure ordered width less: 3/16" 	<ul style="list-style-type: none"> * Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"
---	--

Applications

- Stationary Fan Style Arch
 - Movable Fan Style Arch
- Movable Starburst Arch shades are for inside and shallow mount applications only.

Stationary Starburst Features (Figure A)

- All non-perfect Stationary Starburst arches require a template made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000, See page 75
- A perfect arch is twice as wide as it is high.
- Stationary Starburst shades which are not perfect half circles must have a height that equals half the width +/- 5".
- Price according to the largest radius measurement. If the height is greater than the width, take height X 2 and use that number to determine pricing.
- When ordering arches as perfect half-circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)

Movable Starburst Features (Figure B)

- Starburst Movable archtop shades are cut to perfect half circles only and do not require a template. The height must be exactly 1/2 the diameter.
- A perfect arch is twice as wide as it is high.
- When ordering arches as perfect half circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)
- The hinge gap (gap between the two rails) is not centered in the window. The moving rail is always smaller than the stationary rail to provide proper movement within the window.

Accessories

- 5-10' Expandable Pole - Black:

Specially designed pole end fits into the handle on movable Starburst Shades for easy operation.

Color Lux® Cellular Specialty Shades

QUARTER ROUNDS HARDWARE SYSTEM

Movable Quarter Round

Applications

- Movable Arch

Ordering Information for Sunset Shades

- Specify IB or OB mount and rail color.
- Include a template if the shade is a non-perfect arch.

Accessories

- 3' Expandable Pole - Silver: (see page 26)
- 5-10' Expandable Pole - Black

Specially designed pole end fits into the ball on Sunset Shades for easy operation.

Color Lux® Cellular Specialty Shades SUNSET ARCHES HARDWARE SYSTEM

Sunset Features and Ordering Notes

(Figure A, pg 56)

- Sunset shades have horizontal pleats that stack at the bottom, on a stationary sill rail. Sunset shades are operated by a continuous cord that runs through a top mount guide block and back down through the stationary rail. A moving metal ball attached to the cord is used to raise and lower the shade. (See Figure E).
- **All Sunset arches which are not perfect half circles require a template.** A perfect arch is twice as wide as it is high. See page 75 for template instructions.
- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- Sunset shades which are not perfect half circles must have a height which is equal to or greater than 25% of the width.
- When ordering Sunset shades that are perfect half circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B).
- **Stringing Method:** Depending on the curvature of a particular arch, it may be necessary to use the two string method (See Figure C) to ensure proper fit and operation of your Sunset shade. Comfortex will determine the best stringing method after examination of the template.
- **Arch Styles:** Sunset arches are available in a variety of styles including: palladium, eyebrow and bullet shaped arches. (See Figure D).

Applications

- Movable Trapezoids
- Movable Octagons

Ordering Information for Octagon Shades

- Specify IB or OB mount and rail color.
- The width, length and one side are required measurements when ordering.**

Ordering Information for Trapezoid Shades

- Specify IB or OB mount and rail color.
- Trapezoid orders must be faxed or emailed in with a diagram. Please provide measurements for all four sides when ordering. No template is required.**

Color Lux® Cellular Specialty Shades

TRAPEZOIDS AND OCTAGONS HARDWARE SYSTEM

Trapezoids (Figure A)

- Trapezoid orders must be faxed in with a diagram. Please provide measurements for all four sides when ordering. No template is required.
- The maximum slope of the top rail is 30 degrees from horizontal. Slope is the angle between slope and a horizontal line. The slope angle must be measured with a protractor.
- Sides of trapezoid must be parallel.
- Sill must be level for proper installation and operation of a trapezoid shade.
- Operating cord must be placed on the short side.
- See Figures B and C for trapezoid shade operation.
- Max top rail width = 48"

Octagons

- The width, length and one side are required measurements when ordering.
- Octagon shades raise only to the point where the top angle begins. (See Figure D)
- See Figure F on page 57 for recommend mounting method for side shades.
- Width limit for side mount brackets is 48".

Ordering Information for Mezzo Motorized Skylight Shades

- Specify inside mount dimensions.
- Specify fabric color and style.
- Specify remote and other accessories if needed.

Ultra Feature:

Ultra - is a synthetic lift cord that allows cordless Color Lux cellular shades to more easily move up and down.

[More information on page 29.](#)

Color Lux® Cellular Specialty Shades

MEZZO MOTORIZED SKYLIGHT HARDWARE SYSTEM

WITH QUIETUDE™ TECHNOLOGY

Applications

- Angled and Vertical motorized skylight shades.
- Mezzo Motorized Skylight Shades are for inside mount applications only.
- **Skylights with Simplicity motorization will not operate properly if installed in a completely horizontal application. The minimum recommended slope is 5 degrees.**
- Must be mounted with fabric stack at the top.

Mezzo Power Options

- Simplicity Rechargeable Motor

Front Access Control

All Color Lux Cellular Shades with Rechargeable Simplicity motors come with a front-facing, flip-top cover for convenient access to the charging port, reset button, and on/off switch.

Shades with front control access include an auxiliary charging port in the back. This port is ideal for a solar panel charging kit.

A) Front Control
B) Back of Head rail.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Simplicity Hand Held Remote

14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable shade. The charger plugs into the charger port. The charger is black and comes with a 156" (13') wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Important Simplicity Motorized Shades Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.
- Make sure to leave the top of the shade head rail open (motor exposed), do not cover; especially with metal materials. This could result in a reduced radio frequency range for the remote control or the shade may not operate at all, depending on the application.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

Please Note:

LED solar panel cord length is 24". Make sure to order 48" extension cord if needed.

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

Color Lux® Cellular Specialty Shades

MEZZO MOTORIZED SKYLIGHT HARDWARE SYSTEM

WITH QUIETUDE™ TECHNOLOGY

Solar Panel LED Lights

Red Light: Indicates optimum direct sun exposure

Green Light: Indicates sunlight is enough to charge battery

Blue Light: Indicates battery is charging. Blue light is off when not charging (including when the battery is full)

No Lights: Night or very low sun

Red Light

Green Light

Blue Light

No Light

Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Cellular Specialty Shades

SOPRANO SKYLIGHT & GREENHOUSE HARDWARE SYSTEM

Soprano Rail Dimensions

Applications

- Horizontal*, Angled and Vertical rectangular windows and skylights. Balcony Shading Systems are for inside mount applications only.

Accessories

- 3' Expandable Pole - Silver: (see page 26)
- 5-10' Expandable Pole - Black

Specially designed pole end fits into the handle of Balcony shades for easy operation at any angle.

Ordering Information for Balcony Shading System

- Specify rail color.
- Specify when ordering: Application angle: Angled, Horizontal or Vertical.

Cellular Specialty Shades

BALCONY SHADING HARDWARE SYSTEM

Balcony Shading System Features

- Balcony Shades work in three orientations applications: Angled, Horizontal and Vertical.
Horizontal works on slope angles 5 to 15 degrees.
Angled works on slope angles 15 to 75 degrees.
Vertical works on slope angles 75 to 90 degrees.
- Balcony shades can be mounted on their side. (See Figure A). Use the vertical measurement as your width (max. 36") and the horizontal measurement as your length (max. 48").
- Polycarbonate track system provides superior insulation and light blocking. The enclosed sides provide full privacy.
- No exposed cords, eliminates risk of injury to children.

Balcony Vertical Applications

Color Lux® Cellular Specialty Shades

FRENCH DOOR DÉCOR HARDWARE SYSTEM

Applications

- Stationary Door Décor
- Movable Door Décor
- Top Down - Bottom Up Door Décor
- Cover French doors, transoms, and side lights.

French Door Décor Hardware Features

- Features two non-moving rails which are mounted in the window or door. A tension control system enables the movable rail to be easily moved with the touch of a finger. The only visible cords are the ones that hold the movable middle rail in place.
- The widest width of the window cannot exceed the narrowest width of the window by more than $\frac{3}{8}$ ".

Stationary Non-Movable French Door Décor Shades

- Top and bottom rails are mounted to the window and are stationary.

Movable French Door Décor Shades

- Top and bottom rails are mounted to the window, one middle movable rail raises from the bottom.

Top Down - Bottom Up Option

- Top and bottom rails are mounted to the window, two movable rails allow the shade to lower from the top and raise from the bottom.
- The non-movable top and bottom rails are attached to the window or door.
- Ideal for entry ways with narrow windows next to doors and other narrow windows that are easily accessible.

EZ Level

Making A Template

Measuring

Child Safety

Cleaning & Care

Color Lux® Cellular Shades

EZ LEVEL

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:

- Standard and Deluxe Cord Lock
- Cordless Ultra
- Cord Loop
- SlumberShades
- Simplicity Motorized Systems

EZ Level is not available with Lift & Lock Cordless.

How does EZ Level work?

- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down. One quarter turn of the adjustment screw will move the bottom rail up or down $\frac{1}{4}$ ".
- Lower the rail to check the level and make further adjustments if necessary.

Cellular Shade Collection GENERAL INFORMATION

Scotchgard™ and Certified Fabrics

Scotchgard Protection

Scotchgard™ Protector is available with all cellular Shades. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned. Both sides of the fabric are treated with Scotchgard.

GREENGUARD Certified Fabrics

GREENGUARD Indoor Air Quality Certified® Fabrics
The GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The following fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems:

- Symphony (All)
- Virtuoso (All)
- Baritone (All)
- Premiere (All)
- Natural Linen Flax
- Debut (All)
- **Linen Weave**

The following fabrics have the passed GREENGUARD Children & SchoolsSM product certification program for low emitting interior building materials, furnishings, and finish systems used in educational (day care and K-12) environments:

- Symphony Light Filtering
- Symphony Blackout

Cleaning and Care

While beautiful and pleasing to the eye, all Comfortex products are designed to be durable, easily cared for and easily cleaned. Our non-woven fabrics are inherently anti-static and repel dust, but occasional feather dusting or vacuuming may be necessary to keep the fabrics clean and bright. Comfortex Cellular fabrics may be ultrasonically cleaned.

Cleaning all other Comfortex Cellular Fabrics:

Our light filtering and room darkening fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. Spills and stains can be lightly blotted with a cloth or damp sponge. More difficult stains may require soaking in water with mild soap. For this, remove the shades from the window and soak in warm water. Complete immersion of hardware is not recommended.

DO NOT submerge the Cordless Ultra head rail in water. When damp, lay flat to dry or place back in window and raise tightly to recrisp pleats. Please test any stronger cleaners on an unobtrusive portion of the shade before using.

For additional advice on care or cleaning, please contact our Technical Services Department.

Scotchgard™ Treated Shades

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.

- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not overwet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Cellular Shade Collection GENERAL INFORMATION

Cellular Shade MEASURING INSTRUCTIONS

Comfortex accepts measurements down to $\frac{1}{16}$ " increments.

Inside Mount

Use a steel tape to measure the opening at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade $\frac{3}{16}$ " narrower so it will not rub against the window casing. Measure the height of the window from the top (soffit) down to the sill.

Outside or Ceiling Mount

Use a steel tape to measure the exact height and width of the area to be covered. It is recommended that the shades overlap the window by at least $1\frac{1}{2}$ " on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least $1\frac{1}{2}$ ". Shade fabric will measure width indicated on the order form.

Measuring for Specialty Shapes

Templates are required with some specialty shade orders. Consult the individual product sections of this guide for specifics regarding accurate measurements and mounting information.

Arches and Quarter Round Circles

- Measure the window height and width appropriately for an inside or outside mount.
- With perfect arches, the height will be one half the width. With perfect quarter rounds, height will equal width. If the arch or quarter round is perfect, **a template is not required.**
- Windows with imperfect arch measurements do not maintain the height/width relationship. Templates **are required** for these windows.

Trapezoids

- Measure the window height and width appropriately for an inside or outside mount. For outside mounts, remember to add the desired amount of overlap.
- Measure all four sides for accurate fabrication. Provide all measurements. **Templates are not required.**
- The slope angle must be measured with a protractor. Slope is the angle between slope and a horizontal line. The maximum slope is 30 degrees.

Octagons

- Measure the window height and width appropriately for an inside or outside mount. Be sure to measure the width at the shade's widest point.
- Provide the width, length and the length of one side when ordering.

Cellular Shade Collection

GENERAL INFORMATION

Making the Perfect Template

Tape brown craft paper over the window opening. Be sure to allow plenty of overlap and check to see that the paper is smooth and pulled taut. Do not use newspaper as the ink can rub off on fabric. Do not use paper that has been folded. Notice the outline of the framework superimposed on the template as the light filters through the window. You may create the template in one of two ways:

Trace the outline of the window with a pencil and continue along the side of the window frame. Once the window is completely traced, remove the craft paper from the window. Cut out the traced shape with a pair of scissors.

You may choose to skip tracing the window outline with a pencil and cut out the shape immediately with a razor knife.

Once your template is cut, double check its width and height with your initial measurements. Test the template by placing it in the window. Check for light gaps, uneven cutting of curves etc. Trim or remake if necessary.

With arch top shades, fold the template in half. Check the outline of the curve for smoothness, light gaps and curve continuity. Place the template in the window and check it for light gaps or uneven cutting of curve. Trim or remake it if necessary.

On the front of the template, mark the shade measurements along with your company name, account number, sidemark, shade style and color. Be sure to indicate inside or outside mount, the room side and which ends of the template are top and bottom. Do not take any deductions on inside mount shades. The factory will make all necessary allowances for inside mounts.

Remember: The quality of the finished shades depends heavily on the quality of the template supplied. Do not hesitate to remake a template if you feel uncomfortable of the quality of your first attempt.

Template Kits: Comfortex offers template kits which includes brown craft paper, razor knife, instructions and order form. Please contact Customer Service or visit www.comfortex.com to order. Stock number: 751000

Cut-Outs

Cut-outs are available with all cellular fabrics.

Cut-outs are \$69.00 per side and are subject to approval by the Comfortex Technical Service department.

There are no limits on cut out lengths.

There are limits on cut out widths.

Cellular shade widths 18" or less: maximum 3" width cut-out

Cellular shade widths greater than 18": maximum 5" width cut-out

Cellular Shade Collection GENERAL INFORMATION

⚠️ WARNING

Window Blind Cord Can
STRANGLE Your Child.

To prevent strangulation, purchase
cordless products or products with
inaccessible cords.

⚠️ ADVERTENCIA

La cuerda ciega de la ventana
puede ESTRANGULAR su niño.

Para evitar el estrangulamiento,
compre alternativas inalámbricas o
productos con cables inaccesibles.

Child Safety

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for safety of corded window coverings.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them.

To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the blind, simply wrap the excess cord around the cleat.
