Bluetooth®

COLOR LUX SIMPLICITY BLUETOOTH MOTORS QUIETUDE™ TECHNOLOGY

Color Lux Simplicity Bluetooth motors now feature our exclusive Quietude™ technology. Our Quietude™ technology significantly reduces motor running noise, and delivers both performance and a user-friendly customer experience.

Color lux Simplicity Bluetooth motors, with Radio-Frequency, Bluetooth and SmartHub control options, are now are one of the quietest and most completely versatile offerings in the industry.

Quietude™ technology enables shades to operate at the same speed, so all shades perform consistently. The operating speeds can also be adjusted using our Color Lux Mobile app.

Color Lux Simplicity Bluetooth motors now also communicate daily with other Quietude™ motors in the proximity in order to synchronize schedules, as set in the Color Lux Mobile app.

FABRIC COLLECTIONS

Color Lux Printed Sheer Shadings are available with different fabric collections.

COLLECTION	3" Vanes
Light Filtering	•
Room Darkening	•

Please Note: Room Darkening fabrics are not blackout fabrics. Knitted fabric may experience minor weave variations due to heat, humidity and other room conditions. These variations can result in light bowing, puckering and dimpling of the Shangri-La material. This is considered normal and does not constitute a failure in either workmanship or materials. The possible variations are minor and have been shown through case study not to detract from the beauty of the product.

Bottom Rail Closed

(Bottom Rail is always fabric wrapped)

Hardware Features

Standard Designer Cassette	Fabric Wrapped Designer Cassette is standard. Head rail endcap is fabric covered
Bottom Rail Color	Bottom rail is fabric wrapped with white end caps.

Head Rail Upgrades *(Bottom rail is always fabric wrapped)*

Designer Metallic Upgrade (Smooth Face)	• Oil Rubbed Bronze • Onyx Black

Mounting Dimensions

Mounting Dimensions	Designer Cassette Head Rail
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Width Side Mount	48" Max width side mount

Finished Dimensions

Inside Mount

	• Fabric will measure ordered width less: 1" • Head rail* will measure ordered width less: 3⁄16"

Side (End) Mount

	• Fabric will measure ordered width less: 1½" • Head rail* will measure ordered width less: 11⁄16"

Outside Mount

	• Fabric will measure ordered width less: ⅝" • Head rail* will measure ordered width plus: 3⁄16"

Exact (End Cap to End Cap) Mount

	• Fabric will measure ordered width less: 13⁄16" • Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the opened position.

Color Lux® Sheer Shadings
CORD LOOP SHADING HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Head Rail Options
Fabric Wrapped Designer Cassette Head Rail is standard. End caps of the head rail are fabric covered.

Designer Metallic Upgrade is available. Colors available: Oil Rubbed Bronze and Onyx Black. Bottom rail is always fabric wrapped.

Cord Type and Color
White, black or bronze loop cord coordinates with your hardware choice. Bead cord is optional in white, bronze, black or steel. Cord tensioners match your hardware choice (white, black or bronze). Lengths over 6 feet available in white only.

Reverse Roll
The braided cord does not have a reverse roll stop. If a shading with the Designer Cassette hardware is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Length Considerations with Shangri-La Shadings
Comfortex will fabricate your Shangri-La Window Shading to the length ordered, when the vanes are in the open position (Figure A).

- When the vanes are rotated to the closed position, the shading will become slightly longer.

- When closed on an inside mount, the shading will be slightly longer than ordered length.

- Rotating the vanes closed will cause the bottom rail to touch the window sill, before it begins to raise.

Open   Closed

Window Sill
Figure A

Side By Side Alignment
When Shangri-La Window Shadings are installed side-by-side, vane alignment can be guaranteed within ¼" only if:

- The shadings are the same color and ordered at the same time.

- The sum total of the widths of all shadings needing alignment is less than 118".

Side-by-side lineup is specified when the order is placed.

Omni-View System
Shangri-La Shadings feature the Omni-View™ Cord System. The Omni-View System provides the ability to manipulate the shading into various viewing positions. There are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The following five modes can be obtained with standard shading operation when viewing the shading at eye level.

- **Closed top, open bottom:** By partially lowering the shading from the fully raised position, the upper portion of your window will become semi-opaque while allowing a clear view below.

- **Fully private:** When lowered completely, Shangri-La provides complete privacy and softly diffused light.

- **Partially open:** Opening Shangri-La slightly will gradually increase the level of light and allow varying levels of view through.

- **View-through when lowered:** By completely opening the vanes, Shangri-La provides a softened, veiled view to the outside.

- **View-through when raised:** From the open or view-through position, continuing to pull down on the back of the cord will raise the fabric allowing a clear view outside from below, and a veiled view above. This exclusive feature allows Shangri-La to be raised up to 24" in this mode.

- Comfortex recommends that you **do not** raise the shading more than 24" off the sill in the view-through when raised mode. Refer to warranty section below for more information.

- Omni-View capability is available with all Shangri-La Shadings except cordless.

Cord Information For Shangri-La Shadings
A braided cord loop is used to raise and lower the shading. White, black or bronze loop cord matches your hardware choice. Cord tensioner will match the hardware color.

Bead cord is available in black, white, bronze and steel. Lengths over 6 feet available in white only.

The cord loop will measure the length indicated below unless otherwise specified.

| Shade Length	Standard Loop
16" to 26⅞"	1' (12")
27" to 39⅞"	2' (24")
40" to 59⅞"	3' (36")
60" to 83⅞"	4' (48")
84" to 107⅞"	5' (60")
108" and greater	6' (72")

Maximum cord length is 15 feet. Polyester cord can be ordered in custom lengths in 1 foot increments only.

Braided Cord Loop Warranty Information
The shadings built with a braided cord loop do not have a reverse roll stop. If a shading is raised above 24" in the reverse roll mode, there is a possibility of the fabric rubbing on the head rail. Comfortex reserves the right NOT to warrant wear and tear of fabric if damaged by roll-up in excess of 24".

Mounting Dimensions	Mounting and Finished Dimensions are the same as Cord Loop
Finished Dimensions	*See Page 9*

Retractable Cord Shadings

The Retractable Cord option is a single cord design that provides easy one hand operation to raise, lower and open and close the vanes.

- Retractable Cord hardware is an alternative to conventional cord loop controls. The short retractable cord maintains a consistent length whether the shadings are raised or lowered. The elimination of cord loop enhances child and pet safety.

- Available with all fabrics with Designer Cassette.

- White, black or bronze cord and tassel coordinates your hardware color choice.

- Standard cord length is 40% the length of the shading. Cord may be shortened to match consumer operating preferences and to keep out of reach of children. Cord length can be easily modified in the field.

- Mounting a cord tensioner is not necessary. Cord cleat is recommended.

Overall Operation

When raising and lowering the shading, pull the cord down in long, even strokes. Allow the cord to fully retract into the head rail after each downward stroke.

## To Lower The Shading And Open The Vanes

- Pull the cord down toward the center of the shading with long strokes. Continue until the shading is fully lowered and the vanes are open.

- Allow the cord to retract completely into the head rail after each downward stroke.

- The shading can be stopped at any point while lowering

To Tilt The Vanes And Raise Shading

- Pull the cord straight down or down and slightly out with long strokes. With each stroke the shading partially raises.

- Allow the cord to retract completely into the head rail after each downward stroke.

- Use multiple strokes until the shading reaches the desired position.

- The shading can be stopped at any point while raising.

Two-On-One Designer Cassette Head Rail

Two-On-One Head Rail shadings are two shadings sharing the same head rail; each shading operates independently.

- Two-On-One Head Rail can be combined with cord loop, PowerTouch Rechargeable, Simplicity Motorization and retractable cord hardware options. Price as two shadings (including upgrades) and add together. Pricing example on page 6.
- Two-On-One not available with cordless.
- Specify shading total width and two individual section widths. **Note:** The two individual sections must add up to the total width.
- Two on One Head Rail Shadings are available with bead cord or braided cord loop.

- Controls will always be placed to the far left and far right.
- Available in widths up to 140" with Designer Cassette hardware.
- Minimum single section width is 12". Maximum single section width is 102". The center gap between shadings is ⅜".
- Side by side alignment is available if the two panels measure less than 120". Alignment must be specified when the order is placed.
- Shadings over 98" are subject to common carrier surcharge. See Policy PDF for more information on the freight policy.

Mounting Dimensions	Designer Cassette Head Rail
Minimum Shallow Mount	1"
Minimum Flush Inside Mount (including brackets)	3¾"
Minimum Outside Mount	1"
Minimum Side Mount	1¼"
Maximum Side Mount	48"

Finished Dimensions

Inside Mount

- Fabric will measure ordered width less: ⅞"
- Head rail* will measure ordered width less: ³⁄₁₆"

Side (End) Mount

- Fabric will measure ordered width less: 1⅜"
- Head rail* will measure ordered width less: ¹¹⁄₁₆"

Outside Mount

- Fabric will measure ordered width less: ½"
- Head rail* will measure ordered width plus: ³⁄₁₆"

Exact (End Cap to End Cap) Mount

- Fabric will measure ordered width less: ¹¹⁄₁₆"
- Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- ⅛"

Please Note: Once ordered and manufactured, the width of the Shangri-La fabric cannot be altered. Comfortex makes deductions to the width depending on the type of mounting indicated. For all mounting types, fabric will measure exactly the length ordered when the vanes are in the closed position.

Color Lux® Sheer Shadings
CORDLESS HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

Cordless Shangri-La Shadings Head Rail
- The Standard Designer Cassette head rail is fabric wrapped.
- Designer Cassette head rail is also available in Oil Rubbed Bronze and Onyx Black.
- Shangri-La Cordless Sheer Horizontal Shadings use quick-snap, no-light-gap brackets.

Cordless Shangri-La Shadings Bottom Rail
- Bottom rail includes a sliding weight to adjust fabric skewing if necessary.
  Bottom rail is always fabric wrapped.

Operating A Cordless Shangri-La Shading
Cordless Shangri-La Shadings utilize a roller catch mechanism in the head rail which allows for the vanes to be adjusted into various positions.

Pull the handle that is attached to the bottom rail until the shading reaches the desired length, allow catch mechanism to engage and lock shade in desired position.

To Open Or Close Vanes
Lower the shading all the way down and continue pulling down on the handle until the vanes open. The roller catch mechanism allows the vanes to be adjusted open, closed and to various positions in between.

When adjusting the vane position, release the catch by tugging on the handle, roll up the shading several inches (this resets the catch mechanism), then pull back down to the desired position.

- The Omni-View setting is not available with Shangri-La Cordless Shadings.

To Raise The Shading
Pull down on the handle to release the catch mechanism and let the shading rise. Tug the handle to lock the shade in the desired position.
When first learning to operate the shading, it may take a few tries to get the feel of the mechanism.

Benefits of Simplicity BlueTooth™ Motorization: Featuring the Free Color Lux Mobile App

- New "state of the art" 7.4v rechargeable motorization operates with both BlueTooth and Radio Frequency control technology.
- Download the new Color Lux Mobile Bluetooth App FREE on the Apple App Store for iPhone or the Google Play Store for Android.
- Optional Simplicity radio frequency remote control with choice of 5 channel, 6 channel with timer, or 14 channel remote.
- Optional Simplicity Smart Controller (NEO) for remote operation of shades which integrates with Amazon Alexa and Google Assistant devices.

Features of the Color Lux Mobile Bluetooth App:

- Controls your shade directly from your phone with Bluetooth control.
- Has a shade position display indicator. See screen to the right.
- Has a battery charge level indicator.
- Controls the shade using easy swipe or control buttons.
- Controls up to 5 shades simultaneously and no limit to the number of shades connected to a single account.
- Has timer and scene setting options.

Please Note: There are many factors affecting Bluetooth range
- Physical obstacles in the transmission path
- The antennas should be exposed for best performance
- Bluetooth 4.2 supports 10 meters indoor range (~33 feet).

Color Lux® Sheer Shadings
7.4V RECHARGEABLE POWERTOUCH HARDWARE SYSTEM | DESIGNER CASSETTE HEAD RAIL

PowerTouch™ Rechargeable Shades

Sheer Shadings can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position. When the shading is fully lowered to the factory programmed lower limit, the bottom rail will be set in the level position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. Favorites position can be programmed on-site.

PowerTouch Rechargeable Surcharges

See page 5.

PowerTouch Appearance

- The PowerTouch Rechargeable wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

Wand

Pendant

PowerTouch Rechargeable Color Options

- Shadings with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

- Wand length is in 1 foot increments. 1 foot - 5 foot

Mounting Requirements for PowerTouch Rechargeable Shadings

- No special installation hardware or wiring requirements are needed.
- The wand and pendant do not need to be mounted to operate the shading.

Integrated Rechargeable Motor Battery Life

Rechargeable battery is included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. Must specify charger when ordering a Simplicity PowerTouch Rechargeable Shading. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Color Lux® Sheer Shadings
12V NON-RECHARGEABLE SIMPLICITY MOTORIZATION | DESIGNER CASSETTE HEAD RAIL _____

Non-Rechargeable Simplicity Motors
The non-rechargeable Simplicity Motor program features a battery powered motor utilizing a single battery wand that contains disposable AA batteries or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shadings. The Simplicity motor is concealed in the head rail.

See page 20 for information on Simplicity Rechargeable system version.

Simplicity Motors With Designer Cassette
No special installation hardware or wiring requirements are needed to install motorized Shangri-La Shadings with Designer Cassette Head Rail. See page 18 for mounting information.

Simplicity Battery Wand
The battery wand can be clipped to the Designer Cassette head rail. Can not be mounted on shadings under 25" wide. The battery wand is wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight alkaline batteries, and is white in color. The battery wand must be placed so it does not interfere with the mounting brackets.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement
Eight alkaline batteries are included with the wand.
The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

DC Power Supply/Transformer
12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is black and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep. Extension wires are available if needed.

Important Simplicity Motorized Shading Operating and Installation Information
Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application

Simplicity Motor Hand Held Remotes

IMPORTANT: Simplicity Rechargeable Motorized Shadings are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **before** linking it to the remote.

Simplicity Hand Held Remote
14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The 1*4 Channel TDBU remote* can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:
• Not all motors run at the same rate of speed.
• Simplicity motors have a "Favorites" or "MY" position setting. If the homeowner wants to set several shadings at the same intermediate position, follow instructions provided with installation manual.

WITH QUIETUDE™ TECHNOLOGY

Important Information about Integrated Rechargeable Simplicity Motor Shading Operation and Installation

- Simplicity Motorized Shadings installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending control.
- Be mindful of when your shade starts to slow down during operation. It is a good indicator the shade needs to be recharged.

Simplicity Battery Operated Motorized Shadings Warranty

Please see Policy PDF for complete Comfortex warranty information.

NEW Simplicity Bluetooth Motorization

Learn about Simplicity Bluetooth motorization and Comfortex FREE Color Lux Mobile App on page 15.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

Please Note:
LED solar panel cord length is 24". Make sure to order 48" extension cord if needed.

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.

Solar Panel LED Lights

Red Light: Indicates optimum direct sun exposure
Green Light: Indicates sunlight is enough to charge battery
Blue Light: Indicates battery is chargeing. Blue light is off when not charging (including when the battery is full)
**No Lights:** Night or very low sun

| Red Light | Green Light | Blue Light | No Light |

Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Bracket Method

2"

3 ⅛"

Extendable to 4 ⅜"

Tape Method

End View

3m Dual Lock Adhesive

Solar Panel

½"

Place Dual Lock here

Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Color Lux® Sheer Shadings
7.4V RECHARGEABLE SIMPLICITY HARDWARE SYSTEM

EZ Charge Extension Wand Option

EZ Charge Extension Wand is the newest innovation in rechargeable motorization. Easily charge your hard to reach Simplicity Rechargeable Shades with the EZ Charge Extension Wand. The wand extends up to 31″ in length.

Simple to use! Place the magnetized wand tip on the receiving port to attach. Then plug the charger into the base of the wand. It is that simple!

- EZ Charge Extension Wand can be easily concealed by a valance or drapery panel.

- Great for out of reach windows

EZ Charge Wall Mount Receiver

- The EZ Charge Wall Mount Receiver includes screws and anchors. These can be used for wood or drywall mounting.

- Extension cable plugs into charging port of Simplicity Rechargeable shades.
EZ Charge Wall Mount Receiver Kit | CKIT078
One kit per Simplicity Motorized shade is needed.

EZ Charge Wand

- Wand is 9½″ and extends to 31″
  Magnetized tip makes connection quick and easy.

- Once wand is in place plug the 8.4v charger into the bottom of the extension wand for charging.

Battery Charger - SOLD SEPARATELY

You must specify charger when ordering a Simplicity Rechargeable Motorized Shade. The charger plugs into the wand base. The 8.4 Volt charger requires a standard power outlet to recharge the motor. The charger is black and comes with a 156″ wire. The dimensions are 1″ wide x 2½″ length x 1¾″ deep.

Color Lux® Sheer Shadings
FRICTION FIT MOUNTING SYSTEM | DESIGNER CASSETTE

FRICTION FIT MOUNTING SYSTEM

The Friction Fit Mounting System is the perfect solution for hard to drill materials and where drilling is not desired or allowed. There is NO BRACKET INSTALLATION REQUIRED.

This pressure mounted system utilizes an aluminum rail designed with a high tension spring that is pre-fabricated with your ordered shade. INSTALLATION BRACKETS for your ordered shade ARE PRE-ATTACHED AT THE FACTORY for easy installation on site.

To install, simply insert the rail within the window opening and secure the lever. This increases the pressure to the ends of the rail, allowing for a snug fit in the window opening.

Manufacturer's List Price: $94

Friction Fit is ideal for many applications, such as:

- Brick
- Concrete
- Cinderblock
- Steel*
- Aluminum*
- Tile*
- Popcorn and other textured finishes
- Wood

* Smooth surfaces will require use of included double-sided adhesive.

LEVER LOCATION

The lever will always be on the clutch side for cordloop shades. For cordless and motorized, it will always be on the right.

Deductions for Cordless and Designer Cassette shades will be unchanged.

Minimum Mounting Depth is 2⅛"

Maximum width for all mounting systems is 84".

COLOR OPTIONS

Friction Fit Mounting System is available in white and black.

Color Lux® Sheer Shadings
12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Wall Mount 9 Channel
Power Transformer
(Only for Bottom Up Shades)

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Roller Shades, Sheer Shadings and Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply use the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V for up to 9 shades.

- **Product Description:**
  -12v10a 9ch
  -Input Voltage Range : AC90V-264V
  -Input Frequency Range : 50Hz-60Hz
  -Output Voltage Range : DC12V+/-5%
  -Output Current : 10 Ampere
  -Output Power : 120 Watt
  -Output Ripple&Noise : ≤42MV
  -Output Efficiency : ≥83%
  -Output Fuse Type : PTC
  -Output Fuse Rating : 2A
  -Environment Operating Amb.Temp : -30 ~45
    20%~90%RH
  -Environment Storage Temp : -40 ~85 10%~95%RH
  -Plugs into standard household outlet

Color Lux® Sheer Shadings
SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions
- Width of controller: 2⅜"
- Length of controller: 2¹⁵⁄₁₆"
- Height of controller: 1⅛"

Simplicity Smart Controller	
	• Works with Apple and Android devices • FREE Downloadable Application • Compatible with previously installed Simplicity Remote Controlled Shades • Powered by NEO Smart Blinds App. • Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?
The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?
Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?
There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?
The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?
You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?
Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?
Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?
The App is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the App and your shades.

GENERAL INFORMATION

Certified Fabrics | GREENGUARD® Fabrics

GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The Shangri-La fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems.

Flame Resistance

Shangri-La fabric may be processed with a topical treatment to resist flames and adhere to strict flammability codes. For more information, contact Customer Service at (800) 843-4151.

UV Protection

Ultraviolet light, entering the home as sunlight, damages furnishings. In time it fades wood floors, furniture, upholstery, draperies, carpeting and artwork. Prolonged exposure to sunlight causes natural, undyed fabrics to turn yellow, weakening their fibers and making them look old and worn prematurely.

The right window covering can be very effective in blocking ultraviolet rays. Such effectiveness is measured in terms of a "% UV blockage" rating. The higher the rating, the greater the UV protection.

Shangri-La fabrics have the following UV Protection ratings:

Light Filtering Fabrics	Open Vanes	87%
Room Darkening Fabric	Open Vanes	88%
All Fabrics	Closed Vanes	99%

Vane Closure

Shangri-La vanes are not designed to close tightly. The inherent nature of the fabric will cause a slight increase in the distance from the front sheer to back sheer as you move further down the shading. These vanes do not form a perfect seal against light leakage which is most visible toward the bottom of the shading. Vane overlap ensures that privacy is not compromised.
Vane closure is measured as the distance between the front and rear fabric sheers 6" up from the lowest point of the bottom rail, with the shading fully lowered and the vanes closed.

On light filtering fabrics, the maximum distance from the front sheer to the back sheer when closed is equal to or less than ⅜" for shadings under 60" and ⅝" for shadings longer than 60". On room darkening fabrics, the distance is ⅜" regardless of shading length.

Vane Opening and Visibility

Vanes on the three styles of Shangri-La fabrics open to slightly different degrees. Consequently, there are variations in visibility through the shadings when the vanes are tilted to their maximum open positions. The variations among the products are shown in the below illustration when looking through the shading ¼ of the way up from the bottom.

3" Fabrics
Magnetic Hold-Down Brackets

Optional magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Please specify when ordering.
Extension Brackets

Extension or "L" brackets are available to project the back of the shading from the mounting surface. The extension brackets for Designer Cassette head rail projects it 3".
Spacer Blocks

Spacer blocks project the shading ⅜" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of the shading.

Leveling Shangri-La Sheer Shadings

Shangri-La Window Shadings are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure correct and balanced operation.
Bracket Shims

Bracket shims may be used whenever the mounting surface is uneven in order to mount the blind level. Shims are a no-charge option, but must be specified when ordering your shades.

Inside Mount

5/8" minimum for shallow mount
3 3/16" minimum for flush inside mount

Use shims if necessary to ensure that the headrail is mounted level (included).

Color Lux® Sheer Shadings
GENERAL INFORMATION

Measuring Instructions for Sheer Shadings

Important Measuring Guidelines for Sheer Shadings. Comfortex accepts measurements down to ¹⁄₁₆" increments.

Precise width and length measurements are critical. Fabric width cannot be altered after the shading is fabricated.

Please use a metal tape measure for accuracy.

The head rail must be installed perfectly level to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.

Inside Mount
Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.
Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount
Measure the exact width and length of the area to be covered. On the width, allow at least 1½" of an overlap on each side. An overlap of 3" on each side is recommended. Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

Side Mount
**Side mount is not available with DoorStyles Shadings.**
Shangri-La may be side mounted using "L" brackets. For side mounts, follow the instructions for inside mounts. An additional ½" will be taken off the standard inside mount deduction to allow room for the "L" brackets.
The maximum shading width utilizing the side mount option is 48".

Skew Adjusting Bottom Rail

After installation, windows that are not square and level may cause the shadings to shift to one side as it rolls up, requiring adjustment of the bottom rail. If the brackets are not level it may be necessary to adjust the bottom rail weight.

- To access the bottom rail weight, release the weight clip on the bottom rail by using a flat blade screwdriver. Insert it into the weight clip in the bottom rail and turn clockwise.
- Move the weight in 1" increments toward the side where the fabric is gathering.
- Secure the weight clips in position by turning them counterclockwise after making the adjustment.
Cleaning and Care

Shangri-La Shadings are made from a sturdy, knitted polyester fabric which can be feather dusted or vacuumed at a low setting. Spots or stains can be lightly rubbed clean with a damp sponge and mild soap. To avoid discoloration of the material, we recommend against the use of chemical cleaners.

Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure to salt air through open windows and doors will accelerate fabric deterioration over time.

Important: Do not clean the fabric using electrostatic wipes such as Swiffer® or Pledge Grab-It®.

Ultrasonic Cleaning
Shangri-La Shadings can be ultrasonically cleaned. Adco OnSite Fabricare provides shading and blind cleaning services. For more information, visit www.onsitefabricare. com. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

For additional advice on care or cleaning, please contact the Comfortex Technical Service Department at 800-843-4151.

GENERAL INFORMATION
| ⚠**WARNING**	⚠**ADVERTENCIA**
Window Blind Cord Can STRANGLE Your Child. To prevent strangulation, purchase cordless products or products with inaccessible cords.	La cuerda ciega de la ventana puede ESTRANGULAR su niño. Para evitar el estrangulamiento, compre alternativas inalámbricas o productos con cables inaccesibles.

Child Safety

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for Safety of Window Covering Products.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

Cord Tensioners

Cord tensioners used on Shangri-La and Soft Tones Shadings continuous cord loops keep the continuous cord loops taut to prevent children and pets from becoming entangled and subsequently injuring themselves. Cord tensioners must be used with Shangri-La and Soft Tones Shadings to comply with the Consumer Product Safety Commission (CPSC) and WCMA Child Safety Guidelines.
Cord Tensioner

Shangri-La Shadings with Retractable Cord Hardware

Retractable Cord hardware is safe alternative to conventional cord loop controls by retracting and limiting the cord length. We recommend using cord cleats.
