Cellular Shades

- Originally created as a solution to excessive heat loss or gain in greenhouses and solariums, Comfortex Cellular Shades are energy efficient and provide comfort in all seasons and climates.
- Durable, washable, dust resistant and light diffusing-our non-woven polyester cellular fabrics are a balance of dynamic form and life lasting function.
- Select what meets your creative desire for every room in your home knowing that all our light filtering cellular and blackout fabrics are pure white to the outside (except duotone fabrics).
- Color Coordinated components compliment the shade fabric for a cohesive look .
- Create a designer look with the Designer Oil Rubbed Bronze and Brushed Nickel Hardware on shades using standard or Deluxe Cord Lock Rail, Cord Loop and Cordless Ultra Hardware.
- In addition to superior insulation, Comfortex window shades eliminate virtually 100% of the ultraviolet light that can destroy the texture and color of your valuable home furnishings - yet our colors never fade.
- Comfortex Ovation allows select Energy Smart Double and Single Honeycomb Cellular Fabrics to be used in vertical applications where sliding window treatments are ideal: over doors, wide windows and as room dividers.
- Comfortex Cellular Shades with the Motorized Lift utilize the Simplicity System. The motors will fully operate the shades with radio frequency technology.
- Simplicity Shades can be powered by a discrete and easy to use custom rechargeable battery pack. Simplicity Shades can be operated for up to one full year on a single charge. And, you can recharge the batteries up to 500 times! Simply plug the charger into the charging port on the shade and plug into a standard household outlet to recharge overnight.
- Scotchgard™ protection exclusively from Comfortex available on Linen Weave Cellular shades. Comfortex Window Fashions provides a limited warranty for fabrics treated with 3M Scotchgard™ Protector against permanent stains for a period of one year from the date of original purchase.
- A limited lifetime warranty is our commitment to your satisfaction.

Cellular Shade

STANDARD CORD LOCK SHADES | *Prelude Hardware Page 94*

There are two sizes of the cord lock hardware: **Standard and Deluxe.**

Standard size hardware is used on all fabrics except ¾" Premiere, Linen Weave, Debut, Verona and Boutique Fabrics which use the Deluxe size.

- Standard Rectangular
- Two-On-One Head Rail
- Door Decor
- SlumberShades
- Top Down - Bottom Up
- Day-Night
- Specialty Shapes
- Balcony

Deluxe Hardware is standard on ¾" Premiere, Linen Weave, Debut, Verona and Boutique Fabrics.

- Standard Rectangular
- SlumberShades
- Two-On-One Head Rail
- Top Down - Bottom Up
- Specialty Shapes

Highlights Cornice Valance

Add a designer finishing touch to a cellular shade with a Highlights Cornice Valance. See page 118 for details.

Recommended Mounting Method for Side Mount Shades | Maximum Width 48"

Figure B

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 119 for details.

Things to Consider

- If child safety is a concern, consider cordless options: Cordless Ultra, Cordless Lift & Lock or Motorization.
- Larger shades can be difficult to operate. Consider Cord Loop, Cordless Ultra or Motorization hardware.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information Standard Cord Lock Shades

Standard Rectangular

- Specify IB or OB mount, rail color and left or right lift cord.

Top Down - Bottom Up

- Specify IB or OB mount and rail color. Middle rail will match the head and bottom rails.
- Top Down - Bottom Up Shades are made with two operating cord locks, one on the left and one on the right side of shade. The right cord operates the middle rail and left cord operates the bottom.

Two-On-One Head Rail

Two-On-One Head Rail Shades operate as two separate shades on one head rail.

- Specify IB or OB mount.
- Specify panel sizes.
- Maximum width in a single panel depends on fabric type. See page 11 for maximum single panel width.
- ⅜" Space between panels.
- Fabric wrapped Two-On-One Shades will have a seam in the center of the rail due to the wide width.

Specialties (Arches, Trapezoids, Octagons and Quarter Rounds)

See pages 75-79 for more information.

Balcony Skylight Shading System

See pages 84-85 for more information.

Door Decor

See pages 89-90 for more information.

Insulating SlumberShades

Cellular Shade

CORD LOOP HARDWARE SYSTEM | *Prelude Hardware Page 96*

Applications

- Standard Rectangular
- Two-On-One Head Rail
- Top Down - Bottom Up
- SlumberShades

Cord Loop Hardware System Features

Cord loops are available 2' to 15' lengths in 1' intervals. Please specify length when ordering. Standard loop sizes are as follows:

Shade Length	Standard Loop
Up to and including 26 ⁷ / ₈ "	1' (12")
27" to 39 ⁷ / ₈ "	2' (24")
40" to 59 ⁷ / ₈ "	3' (36")
60" to 83 ⁷ / ₈ "	4' (48")
84" to 107 ⁷ / ₈ "	5' (60")
108" and greater	6' (72")

Recommended Mounting Method for Side Mounting Shades

Width limit for side mount brackets is 48".

Cord Loop Hardware
Cordless Ultra Hardware
Cordless Ultra Top Down - Bottom Up Hardware

Figure A

Refer to the installation instructions on Comfortex.com/comfortex-dealers or the OnDemand Mobile Library for further details on side mounting shades.

Ordering Information for Cord Loop Hardware Shades

Standard Rectangular

- Specify IB or OB mount, rail color and left or right lift cord.
- Specify cord loop length when ordering.

Top Down - Bottom Up

- Specify IB or OB mount and rail color. Middle rail will match the top and bottom rails.
- Specify cord loop length when ordering.
- Controls are the right cord loop operates the middle rail and left cord loop operates the bottom. Reverse controls are not available.

Two-On-One Head Rail

- Two-On-One Head Rail Shades operate as two separate shades on one head rail.
- Specify IB or OB mount and rail color.
- Specify panel sizes.
- Specify cord loop length when ordering.
- Maximum width in a single panel depends on fabric type. See page 11 for maximum single panel width.
- ³/₈" Space between panels.
- Fabric wrapped Two-On-One Shades will have a seam in the center of the rail due to the wide width.

Insulating SlumberShades

See pages 73-74 for more information.

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 119 for details.

Cellular Shade

CORDLESS ULTRA HARDWARE SYSTEM | Prelude Hardware Page 98

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Insulating SlumberShades
- Two-On-One Head Rail

Highlights Cornice Valance

Add a designer finishing touch to a cellular shade with a Highlights Cornice Valance. See page 118 for details.

Things to Consider

- Is the top of your window out of reach? You can order an extension pole to reach but it can still be tricky. You may want to consider Cord Loop or Motorized hardware.
- For shades mounted on doors, you may want to order hold down brackets.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information for Cordless Ultra Hardware Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Top Down - Bottom Up

- Specify IB or OB mount and rail color. Middle rail will match the head and bottom rails.

Insulating SlumberShades

See pages 73-74 for more information.

Accessories

- 6' Expandable Pole: \$37.00
- 12' Expandable Pole: \$46.00

Specially designed pole end fits into the handle on the bottom rail and allows for easy operation.

Cordless Ultra and Cordless Ultra Top Down - Bottom Up Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Ultra and Cordless Ultra Top Down - Bottom Up Shades can be raised or lowered with a gentle push or pull on the rail handle.
- Cordless Ultra Top Down - Bottom Up Shades feature two moving rails.
- Order an operating pole for out of reach applications.

Cordless Ultra Shade Operation

Cordless shades should be operated from the handle located in the center of the bottom rail. Using the handle will aid in smooth and easy shade operation. Two handles are supplied on wider width shades.

To lower the shade, pull down on the handle which is secured to the bottom rail and guide the rail to desired position (Figure A). For out of reach applications, an optional extension pole should be used.

To raise the shade, push the bottom rail up using the handle on the bottom rail and guide the rail to the desired position. The shade will hold any position when the bottom rail is released. Raise the shade slowly and steadily to allow the shade to stack evenly (Figure B).

Figure A

Figure B

Clear Cordless Handle

Recommended Mounting Method for Side Mounting Shades

See Page 56.

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 119 for details.

Applications

- Standard Rectangular
- Top Down-Bottom Up

Standard size head rail hardware is used on 1/2" and 3/8" fabrics. These fabrics include: 1/2" Debut (all), Natural Linen Flax, 1/2" Premiere, Symphony, Symphony Blackout, Virtuoso, Virtuoso Blackout.

Deluxe size head rail hardware is used on 3/4" Premiere, Linen Weave, Verona, Boutique and 3/4" Debut and Baritone fabrics.

The bottom rail is the same size for all fabrics.

Highlights Cornice Valance

Add a designer finishing touch to a cellular shade with a Highlights Cornice Valance. See page 118 for details.

Important Operating Note on Cordless Lift & Lock Shades

- To operate a Cordless Lift & Lock Shade, the middle or bottom rails must be accessible. An extension pole is not available for Cordless Lift & Lock Shades.

Cordless Lift & Lock Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Lift & Lock Shades can be raised or lowered by pressing the button located on the bottom rail and guiding the rail into the desired location.

Leveling the Bottom Rails

Each Cordless Lift & Lock Shade includes a skew adjustment leveling tool hidden in the bottom rail of each shade.

To level the bottom rail, remove the bottom rail end cap to access the tool which allows you to adjust the bottom rail. Adjustment instructions are supplied with each shade.

Things to Consider

- Is the top of your window out of reach? To operate a Cordless Lift & Lock Shade, the bottom rail must be accessible. If the bottom or middle rail is not accessible, you may want to consider Cord Loop, Cordless Ultra or Motorized hardware. An extension pole is not available for Cordless Lift & Lock Shades.
- For shades mounted on doors, you may want to order hold down brackets.

Ordering Information for Cordless Lift & Lock Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Cordless Lift & Lock Shade Operation

Cordless Lift & Lock Shades are operated using the push button handle located in the center of the bottom rail.

To raise or lower the shade; press the button on the shade handle, and guide the rail to desired position. Release the button to lock the shade into place.

The shade will hold any position when the button is released. Raise the shade slowly and steadily to allow the shade to stack evenly.

Cellular Shade

SIMPLICITY MOTORIZED CELLULAR SHADES | *Prelude Hardware Page 102*

Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

- Length measurements may vary +/- 1/8".

Applications

- Standard Rectangular

EZ Level

Learn about the EZ Level feature on page 119.

Simplicity Motorization Surcharges

The standard Simplicity Motorized Lift System surcharge includes a 12 volt battery wand with eight AA batteries. Remotes are needed to operate the shades. See pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

SIMPLICITY MOTORIZATION PRICING EXAMPLE:

Linen Weave	
Light Filtering 42" x 60" Shade:	\$364.00
Simplicity Motor Surcharge:	\$334.00
Simplicity Remote Control:	\$40.00
Total List Price:	\$738.00

Simplicity Battery Wand

Batteries are needed to operate Simplicity motors. The battery wand can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17 1/4", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand.

The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily will commonly have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase.

Simplicity Hand Held Remotes

The 5 Channel remote can operate up to five shades individually or 5 groups. **WHEN ORDERING PLEASE SPECIFY WHICH CHANNELS ARE ASSIGNED TO EACH SHADE OR GROUP OF SHADES.** For example; program line 1 to channel 1, line 2 and 3 to channel 2, etc. If no channels are assigned at time of order, all shades will be programmed to Channel 1. **To reprogram channel assignments, please refer to the installation instructions and/or view the video at comfortex.com/comfortex-dealers.**

Simplicity remotes and holders are black or white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

The Simplicity remote utilizes one 3V battery (CR2032). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase.

A **6 Channel (6C) timer remote** is also available. See page 65 for more information.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1 7/8" wide x 3 1/4" long x 1 1/4" deep

Cellular Shade

RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Standard Rectangular

EZ Level

Learn about the EZ Level feature on page 119.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18 1/2" x 1 1/2"

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Charging Port on Back of Head rail.

Retrofit Existing Standard Simplicity Motorized Shades with Rechargeable Batteries

Cellular shades made with Standard Simplicity Motorization can be retrofitted with the Rechargeable Simplicity Motorization Battery Wand. The Rechargeable battery wand is 22" long, comes with 10 NiMH batteries, and is white in color. Battery wands are charged at the factory.

To retrofit the rechargeable battery wand to an existing shade with a cassette head rail, you must have at least 24" between bracket centerlines to fit the battery wand. Otherwise, the wand must be placed elsewhere along the window. Wall mounting clips are provided with the wand.

Retrofit Ordering Requirements:

- Rechargeable battery wand with clips (one per shade)
- Rechargeable battery charger (one or more per order, or as needed)
- Charge port mounting base (optional)

Please contact customer service for more information.

Light Filtering 42" x 60" Shade:	\$364.00
Simplicity Rechargeable Surcharge:	\$334.00
Charger for Rechargeable :	\$27.00
Simplicity Remote Control:	\$40.00
Total List Price:	\$765.00

Cellular Shade

RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shades at the same intermediate position, follow instructions provided with installation manual.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Simplicity Motorized Shade Warranty

Please see pages 134-135 for complete Comfortex warranty information.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes 5 Channel Remote

The **5 Channel (5C) remote** can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote

The **6 Channel (6C) timer remote** combines the functionality of a six channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for 18 different scheduled actions.
- Manual function disables the timer so then the remote operates as a held remote.

Simplicity 6C remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity Motor Hand Held Remotes Operation

Press the up or down button on the remote to raise or lower the shade to your desired position.

To reprogram channel assignments, please refer to the installation instructions and/or view the video at: comfortex.com/comfortex-dealers.

The Simplicity remotes utilize one 3V battery. Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

Cellular Specialty Shades

SIMPLICITY MOTORIZED CELLULAR SHADES

Rechargeable Simplicity Motors

The Simplicity TDBU Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. If shades are less than 36" in width, an external snap-on battery pack is necessary.

(See picture to right)

Applications

- TDBU Rectangular

EZ Level

Learn about the EZ Level feature on page 57.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Ordering Information for Top Down-Bottom Up Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- 14 Channel TDBU Remote is required.
- Specify one or more battery chargers.

Please Note:

- Shades that are 24"-36" in width will have an external battery.
- Shades with an external battery and OB mounted will need spacer blocks.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Top Down-Bottom Up Simplicity Motor Hand Held 14 Channel Remote

The TDBU remote has 14-channels. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Rechargeable Battery Pack is concealed in the head rail. Minimum width of 36" is required otherwise battery wand must be mounted externally.

Charging Port on Back of Head rail.

Snap-On external battery for shades under 36" in width. Spacer block also shown, required for outside mount.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch). See page 87.

Cellular Shade Motorization Option SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2³/₈"
- Length of controller: 2¹⁵/₁₆"
- Height of controller: 1¹/₈"

Simplicity Smart Controller

- Works with Apple and Android devices
- FREE Downloadable Application
- Compatible with previously installed Simplicity Remote Control Shades
- Powered by NEO Smart Blinds App

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds App. onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control for it (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?

The app is a free download, However you must have at least one Simplicity Smart Controller (\$330) to serve as a bridge between the app and your shades.

Cellular Shade Head Rail Options

POWERTOUCH RECHARGEABLE MOTORIZED CELLULAR SHADES

PowerTouch™ Rechargeable Shades

Cellular Shades can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position. When the shading is fully lowered to the factory programmed lower limit.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. A "favorites" or intermediate stop position can be set once installed.

PowerTouch Rechargeable Surcharges

See page 9.

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail when installed.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options

- Shades with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

- The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

Mounting Requirements for PowerTouch Rechargeable Shades

- No special installation hardware or wiring requirements are needed.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shades Warranty

Please see page 135 for complete warranty information.

Cellular Shade

OVATION CELLULAR SLIDER | Prelude Hardware Page 109

Applications

- Standard Rectangular
- Opens and closes from side to side
- Four stacking options - see below.
- Dual Panel option with a center opening design with two fabrics, one on each side, each spanning the width of the window.

Ovation Stacking Options

Specify stacking configuration when ordering.

Left: Fabric stacks to the left side of the slider.

Right: Fabric stacks to the right side of the slider.

Center Stack: Center Stack Sliders fabric panels can move fully to the left or the right.

Split Stack: Fabric is split in the center of the slider forming two equal panels which open to opposite ends of the slider. Both panels will be of equal width unless otherwise specified. Split stack is not available with Gradient shades.

* Split stack sliders are available in maximum widths from 240" to 336" (maximum width depends on the fabric selected). If the width exceeds the maximum width of the fabric, it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider. Call Customer Service for assistance.

Dual Panel: A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified. Specify which fabric stacks to left and which fabric stacks to the right.

Ordering Information for Ovation Cellular Sliders

- Specify IB or OB mount.
- Specify stacking configuration.
 - On Dual Panel Shades, specify which fabric stacks to the left and right.
 - On Split Stack Shades, both panels will be of equal width unless specified.
- Specify valance width and return length.

Ovation Valance Specifications

- Every Ovation Slider is supplied with a painted aluminum valance to match your hardware color choice.
- The valance attaches to the head rail using a durable plastic clip system.

Ovation Valance Dimensions

All valance dimensions are measured on the flat, back side.

- Valance Height: 2³/₄"
- Standard Return Length (OB only): 3¹/₈"
- For each spacer block, 1/2" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.
- If the slider requires a non-flush inside mount, you must order a custom valance. Exact valance width and exact valance return length (minimum 1 1/2") must be specified in the Special Instructions section of the order form.
- Custom returns are available for IB non-flush and OB Cellular Sliders. Please specify return length upon ordering.

Things to Consider

- Since most Ovations are sold in large sizes, the shade will have a large fabric stack. On an outside mount, you may want to order the shade a few inches wider so that the fabric stack can be clear of the window. For more information on Ovation's stack height, see page 16 for information.
- Premiere Custom Design fabrics will be turned 90 degrees on Ovation Shades. The pattern orientation will be left to right since Ovation shades open side to side. Split stack is not available with Gradient shades.
- Symphony double honeycomb fabric may require additional care when opening or closing the shade. Double honeycomb fabric is generally stiffer than single honeycomb material and may offer minor resistance when opening and closing. If this is a concern, Comfortex recommends selecting a coordinating fabric from the Virtuoso or Baritone collections.

The Ultimate Blackout Cellular Shade Head Rail Options

INSULATING SLUMBERSHADES

Standard Head Rail

Deluxe Head Rail

Cord Loop & Cordless Ultra Head Rail (Standard & Top Down-Bottom Up)

Standard Cord Lock Rail

- Depth of rail: 1 7/16"
- Depth of rail and bracket: 1 7/8"
- Height of rail: 1/2"
- Height of bracket: 5/8"

Deluxe Cord Lock Rail

- Depth of rail: 1 7/8"
- Depth of rail and bracket: 2 3/8"
- Height: 1/2"
- Height of bracket: 5/8"

Cord Loop & Cordless Ultra Rail

- Depth of rail: 2"
- Depth of rail and bracket: 2 1/4"
- Height of rail: 1 1/2"
- Height of bracket: 1 13/16"

Hardware Features		
Hardware colors for all Cellular fabrics	Color coordinated head, middle, bottom rails and end caps	
Blackout Sidetrack Colors Available	White, Tan and Bronze	
Upgrades		
Fabric Wrapped Upgrade	Fabric used is same fabric as the shade. Back of rail is white to outside.	
Designer Metallic Upgrade	• Oil Rubbed Bronze and Brushed Nickel head, middle, bottom rails and end caps.	
Mounting Dimensions (inside mount only)		
	Standard Head Rail	Deluxe Head Rail
Standard Cord Lock (Standard Retangular and Top Down-Bottom Up)		
Minimum Inside Mount	1 1/2"	1 1/2"
Minimum Flush Inside Mount	2"	2 3/8"
Cord Loop & Cordless Ultra (Standard Retangular and Top Down-Bottom Up)		
Minimum Inside Mount	1 5/8"	NA
Minimum Flush Inside Mount	2 1/4"	NA
Outside, shallow and side mounts are not available. The shade's light blocking ability is compromised by using any other mount than a fully flush mount application.		
Finished Dimensions		
Inside Mount		
	<ul style="list-style-type: none"> • Fabric will measure ordered width less: 7/8" • Head rail and bottom rail will measure ordered width less: 1 1/16" • Sidetrack length will measure ordered length less: 1/8" 	

The widest width of the window cannot exceed the narrowest width of the window by more than 1/4".

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest 1/16" and provide the **NARROWEST** width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom.

The Ultimate Blackout Cellular Shade Head Rail Options

INSULATING SLUMBERSHADE SHADES

Insulating SlumberShades Small Track Dimensions Used with all fabrics standard size head rail.

Small Track

- Width of track: 1"
- Height of track: 7/8"

Insulating SlumberShades Large Track Dimensions Used with all fabrics that utilize the deluxe sized head rail.

Large Track

- Width of track: 1 1/8"
- Height of track: 7/8"

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Cordless and Cordless Top Down - Bottom Up
- Cord Loop and Top Down - Bottom Up

SlumberShades are for inside mount applications only.

Insulating SlumberShade Fabric

Light Filtering fabrics are available as SlumberShades, however the best light control is achieved by using a blackout cellular fabric.

Ordering Information for Insulating SlumberShades

SlumberShades are for inside mount applications only.

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest 1/16" and provide the **NARROWEST** width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom. The widest width of the window cannot exceed the narrowest width of the window by more than 1/4".

If you have questions about ordering SlumberShades, contact Comfortex Technical Services at 800-843-4151.

Accessories

- 6' Expandable Pole: \$37.00
- 12' Expandable Pole: \$46.00

Specially designed pole end fits into the handle on the Cordless Ultra bottom rail and allows for easy operation.

Insulating SlumberShades Features

Use SlumberShades to provide the darkest sleeping environment by sealing out all the light

Energy Saving Blackout Sidetracks

Energy saving blackout sidetracks are made from a durable window grade PVC. The blackout sidetracks seal off the light gap between the blackout cellular shade and the window. The blackout sidetracks feature a black interior lining to absorb light and prevent it from entering the room.

SlumberShades are easy to install, and feature removable sidetracks that are attached to the window frame with magnets. The sidetracks can be removed for window cleaning. The UV stable, window grade PVC sidetracks are available in white, tan and bronze to match your existing trim.

Please Note: When properly installed, SlumberShades block 99% of all visible light. In certain installations with intense sunlight, a very small amount of light may reflect around the edges of the honeycomb fabric along each side of the shade. This is a normal attribute of the SlumberShade system.

Insulating SlumberShade End Caps

The specially designed notched bottom rail end caps fit over the blackout sidetracks and allow for smooth movement when raising and lowering the shade.

Head and Bottom Rail Seals

To ensure a perfectly dark sleeping environment, additional fuzzy seals are supplied to be placed along the shade's bottom rail and between the head rail and the window frame if needed. These barriers provide a complete light stop all the way around the window to keep all exterior light out. Also, these additional seals provide a very effective barrier against heat loss along your windows.

Magnets and fuzzy bar are standard on Cordless and Cordless Top Down-Bottom Up Shades to ensure closure between the bottom rail and window sill.

Energy Efficiency

Independent testing has shown SlumberShades provide an R-value greater than 7.0* when installed over a double paned vinyl window. The testing also indicates that the R-value of a SlumberShade is 2.5 to 3 times higher than that of the same shade without sidetracks. The insulating cellular fabric, sidetracks, and fuzzy seal all ensure that the SlumberShades provides superior energy efficiency.

* Independent testing provided by Consortium for Advanced Residential Buildings (CARB), a U.S. Department of Energy Building America research team. Learn more at comfortex.com/comfortex-dealers.

Finished Dimensions		
Inside and Side Mount		
<ul style="list-style-type: none"> • Fabric will measure ordered width less: 3/8" • Head rail* will measure ordered width less: 3/16" 	<ul style="list-style-type: none"> * Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8" 	

Applications

- Stationary Fan Style Arch
 - Movable Fan Style Arch
- Movable Starburst Arch shades are for inside and shallow mount applications only.

Stationary Starburst Features (Figure A)

- **All non-perfect Stationary Starburst arches require a template made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000, See page 131
- A perfect arch is twice as wide as it is high.
- Stationary Starburst shades which are not perfect half circles must have a height that equals half the width +/- 5".
- Price according to the largest radius measurement. If the height is greater than the width, take height X 2 and use that number to determine pricing.
- When ordering arches as perfect half-circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)

Movable Starburst Features (Figure B)

- Starburst Movable archtop shades are cut to perfect half circles only and do not require a template. The height must be exactly 1/2 the diameter.
- A perfect arch is twice as wide as it is high.
- When ordering arches as perfect half circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)
- The hinge gap (gap between the two rails) is not centered in the window. The moving rail is always smaller than the stationary rail to provide proper movement within the window.

Accessories

- 6' Expandable Pole: \$37.00
- 12' Expandable Pole: \$46.00

Specially designed pole end fits into the handle on movable Starburst Shades for easy operation.

- Movable Arch

Ordering Information for Sunset Shades

- Specify IB or OB mount and rail color.
- Include a template if the shade is wider than 58".

Accessories

- 6' Expandable Pole: \$37.00
- 12' Expandable Pole: \$46.00

Specially designed pole end fits into the ball on Sunset Shades for easy operation.

Cellular Specialty Shades

SUNSET ARCHES | Prelude Hardware Page 112

Sunset Features and Ordering Notes (Figure A)

- Sunset shades have horizontal pleats that stack at the bottom, on a stationary sill rail. Sunset shades are operated by a continuous cord that runs through a top mount guide block and back down through the stationary rail. A moving metal ball attached to the cord is used to raise and lower the shade. (See Figure E).
- **All Sunset arches which are not perfect half circles require a template if shade is wider than 58".** A perfect arch is twice as wide as it is high. See page 131 for template instructions.
- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- Sunset shades which are not perfect half circles must have a height which is equal to or greater than 25% of the width.
- When ordering Sunset shades that are perfect half circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B) on page 74.
- **Size Limitations:** Though our maximum width is 84" and our maximum length is 72", there are limitations on some larger sizes due to excessive weight. If the Sunset width exceeds 66", the maximum length is 60". If the Sunset width exceeds 72", the maximum length is 48".
- **Stringing Method:** Depending on the curvature of a particular arch, it may be necessary to use the two string method (See Figure C) to ensure proper fit and operation of your Sunset shade. Comfortex will determine the best stringing method after examination of the template.
- **For Symphony (All), Premiere 1/2" Fabrics, and Debut 1/2" single:** If Sunset shades exceed 65" in width or 50" in length, two pieces of mono filament cord are included to help stabilize the shade once installed.
- **For Debut 1/2" double, Debut 3/4" Fabrics and Linen Weave fabrics:** If Sunset shades exceed 45" in width or in length, two pieces of mono filament cord are included to help stabilize the shade once installed.
- **Arch Styles:** Sunset arches are available in a variety of styles including: palladium, eyebrow and bullet shaped arches. (See Figure D).

- 12' Expandable Pole: \$46.00

Specially designed pole end fits into the handle of Balcony shades for easy operation at any angle.

Ordering Information for Balcony Shading System

- Specify rail color.
- Specify when ordering: Application angle: Angled, Horizontal or Vertical.

Cellular Specialty Shades BALCONY SHADING SYSTEM

Balcony Shading System Features

- Balcony Shades work in three orientations applications: Angled, Horizontal and Vertical.
Horizontal works on slope angles 0 to 15 degrees.
Angled works on slope angles 15 to 75 degrees.
Vertical works on slope angles 75 to 90 degrees.
- Balcony shades can be mounted on their side. (See Figure A). Use the vertical measurement as your width (max. 36") and the horizontal measurement as your length (max. 48").
- Polycarbonate track system provides superior insulation and light blocking. The enclosed sides provide full privacy.
- No exposed cords, eliminates risk of injury to children.

Balcony Vertical Applications

Balcony shades can be mounted on their side. Use the vertical measurement as your width (max. 36") and the horizontal measurement as your length. (Max. 48") See page 13 for fabric availability.

Cellular Specialty Shades

MEZZO MOTORIZED SKYLIGHT SHADES

Applications

- Horizontal, Angled and Vertical motorized skylight shades.
- Mezzo Motorized Skylight Shades are for inside mount applications only.

Mezzo Power Options

- Simplicity Rechargeable Motor

RECHARGEABLE SIMPLICITY MOTORS

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Charging Port on Back of Head rail.

Simplicity Hand Held Remotes

The **5 Channel (5C) remote** can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

A **6 Channel (6C) timer remote** is also available. See page 65 for more information

Simplicity remotes and holders are black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

The Simplicity remote utilizes one 3V battery (CR2032). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

Solar Recharge Optimum Application

- Full direct sunlight (minimum 4-6 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Solar panel will charge batteries even without direct sunlight. Ambient light will charge the batteries but at a slower rate.
- Excessive duration of cloudy weather will impact the rate of charge.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Cellular Specialty Shades

MEZZO MOTORIZED SKYLIGHT SHADES

For Locations North of Washington, DC (39° Latitude)

For Locations South of Washington, DC (39° Latitude)

- Assumptions:** 1) Window area free from shadows 9 AM to 3 PM.
2) Glazing is double pane, clear.

Excessive shading or tinted glass will impact the solar charging capability of the system.

-  Indicates orientations which may require periodic manual recharge with Plug In Charger.
-  Indicates orientations which are optimum for solar recharge (wireless systems).

Retrofit Existing Standard Simplicity Motorized Shades with Rechargeable Batteries

Cellular shades made with Standard Simplicity Motorization can be retrofitted with the Rechargeable Simplicity Motorization Battery Wand. The Rechargeable battery wand is 22" long, comes with 10 NiMH batteries, and is white in color. Battery wands are charged at the factory.

Battery Wand for Rechargeable Simplicity Retrofit

See page 64 for further details. Please contact customer service for more information.

Important Simplicity Motorized Shades Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Cellular Specialty Shades

FRENCH DOOR DÉCOR

Applications

- Stationary Door Décor
- Movable Door Décor
- Top Down - Bottom Up Door Décor
- Cover french doors, transoms, and side lights.

French Door Décor Hardware Features

- Features two non-moving rails which are mounted in the window or door. A tension control system enables the movable rail to be easily moved with the touch of a finger. The only visible cords are the ones that hold the movable middle rail in place.
- The widest width of the window cannot exceed the narrowest width of the window by more than $\frac{3}{8}$ ".

Stationary Non-Movable French Door Décor Shades

- Top and bottom rails are mounted to the window and are stationary.

Movable French Door Décor Shades

- Top and bottom rails are mounted to the window, one middle movable rail raises from the bottom.

Top Down - Bottom Up Option

- Top and bottom rails are mounted to the window, two movable rails allow the shade to lower from the top and raise from the bottom.
- The non-movable top and bottom rails are attached to the window or door.
- Ideal for entry ways with narrow windows next to doors and other narrow windows that are easily accessible.

Ordering Information for French Door Décor

- Specify IB or OB mount and rail color.
 - Specify stationary, movable or Top Down - Bottom Up.
- You may want to specify hold down brackets if mounting on a door.

Accessories

- 6' Expandable Pole: \$37.00
- 12' Expandable Pole: \$46.00

Specially designed pole end allows for easy operation of French Door Décor Shades.

CUSTOM GRAPHICS

Custom Graphics

With Custom Graphics, you can print anything on a Cellular Shade. From logos to personal photos, theme room graphics or advertising for your storefront, anything you envision can be featured on a Custom Graphics Cellular Shade.

Hardware | Mounting | Finished Dimensions

See Page 53

Available Fabrics

Custom Graphics are available with the following fabrics:

- Premiere 1/2" and 3/4" Light Filtering Fabrics
- Premiere 1/2" and 3/4" Blackout Fabrics

Custom Graphics can work for any window.

Advertising and Store Identification

Contact local businesses and explain how you can to turn their window space into advertising!

Decorative and Personal Photos

Customers can now convert their special photos into a highly personalized room!

Printing Information and Options

Custom Graphics will look different from fabric to fabric. The color vibrancy on cellular shades will be muted due to the density of the fabrics and the printing process.

To view the color differences on Cellular Shades, visit the Custom Graphic section of the Comfortex Dealers website.

Single Sided Printing:

Cellular Custom Graphics are available as single-sided only. Double-sided graphics are not available.

You can choose to have Side A face the room side or the street side.

Ordering Information for Custom Graphics Cellular Shades

Step 1. Fill out the Custom Graphics Cellular Shades

Order Form. This form includes your fabric and hardware selections. Fax the completed order form to (800) 336-4580 to place your order.

Custom Graphic orders can only be placed by faxing this form.

Step 2. Receive your Comfortex Work Order Confirmation

number. Be sure to reference this number when submitting you artwork in Step 3.

Step 3. Send your graphic files via email to:

CustomGraphics@Comfortex.com

Or ship a CD containing your graphics to:

Custom Graphics
Comfortex Window Fashions
21 Elm Street
Maplewood, NY 12189

Graphic File Specifications

Preferred Formats:

- Adobe Illustrator
- EPS

Other Accepted Formats:

- TIFF
- JPEG
- PSD

- All typography should be converted to paths when submitting an Illustrator or EPS file.
- TIFF and JPEG files should be submitted at the largest size possible, 300 DPI is preferred. We will size your graphics according to your shade size and specifications.
- Contact Comfortex Customer Care at 800-843-4151 with all questions regarding Custom Graphic Orders.
- Comfortex will not print any copyrighted custom graphics without appropriate permission.

Step 4. The Custom Graphic Team will email a PDF proof of your shade order for you to approve. Once the artwork is approved, it will take two weeks for your order to be printed, assembled, and shipped.

Prelude Cellular

STANDARD CORD LOCK SHADES

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Two-On-One Head Rail
- Three-On-One Head Rail

Things to Consider

- If child or pet safety is a concern, consider Cordless Ultra.
- Larger shades can be difficult to operate. Consider Cord Loop hardware.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information for Standard Cord Lock Shades

Standard Rectangular

- Specify IB or OB mount, and left or right lift cord.

Top Down - Bottom Up

- Specify IB or OB mount.
Top Down - Bottom Up Shades are made with two operating cord locks, one on the left and one on the right side of shade. The right cord lowers the middle rail and left cord raises the bottom.
- On Top Down - Bottom Up Shades, an extra two-cell fabric gasket attached to the top head rail and acts as a seal to eliminate light leakage between the head rail and middle rail when the shade is closed.

Two-On-One Head Rail

Two-On-One Head Rail Shades operate as two separate shades on one head rail.

- Specify IB or OB mount.
- Specify panel sizes.
- Maximum width in a single panel depends on fabric type. See page 3 for maximum single panel width.
- ¼" to maximum ½" Space between panels.

Prelude Cellular CORDLESS LIFT & LOCK SHADES

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Two-On-One Head Rail
- Three-On-One Head Rail

Ordering Information for Cordless Lift & Lock Hardware Shades Standard Rectangular

- Specify IB or OB mount and rail color.

Top Down - Bottom Up

- Specify IB or OB mount.

Things to Consider

- To operate a Cordless Lift & Lock Shade, the middle or bottom rails must be accessible. An extension pole is not available for Cordless Lift & Lock Shades.
- For shades mounted on doors, you may want to order hold down brackets.
- If privacy is an issue, consider Top Down-Bottom Up options.

Cordless Lift & Lock Shade Operation

Cordless Lift & Lock Shades are operated using the push button handle located in the center of the bottom rail.

To raise or lower the shade; press the button on the shade handle, and guide the rail to desired position. Release the button to lock the shade into place.

The shade will hold in any position when the button is released. Raise the shade slowly and steadily to allow the shade to stack evenly.

Prelude Cellular SIMPLICITY MOTORIZED CELLULAR SHADES

Applications

- Standard Rectangular

Simplicity Motorization Surcharges

The standard Simplicity Motorized Lift System surcharge includes a 12 volt battery wand with eight AA batteries. Remotes are needed to operate the shades.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Ordering Information for Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.

Motorized Cellular Blinds Warranty Simplicity Motors

See page 135

Simplicity Battery Wand

Batteries are needed to operate Simplicity motors. The battery wand can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand. The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily typically will have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase.

Simplicity Hand Held Remotes

The 5 Channel remote can operate up to five shades individually or 5 groups. **WHEN ORDERING PLEASE SPECIFY WHICH CHANNELS ARE ASSIGNED TO EACH SHADE OR GROUP OF SHADES.** For example; program line 1 to channel 1, line 2 and 3 to channel 2, etc. If no channels are assigned at time of order, all shades will be programmed to Channel 1. **To reprogram channel assignments, please refer to the installation instructions and/or view the video at comfortex.com/comfortex-dealers.**

Simplicity remotes and holders are black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

The 5C Simplicity remote utilizes one 3V battery (CR2032). Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep

Prelude Cellular

RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Standard Rectangular

EZ Level

Learn about the EZ Level feature on page 119.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

RECHARGEABLE SIMPLICITY PRICING EXAMPLE:

Linen Weave	
Light Filtering 42" x 60" Shade:	\$364.00
Simplicity Rechargeable Surcharge:	\$334.00
Charger for Rechargeable :	\$27.00
Simplicity Remote Control:	\$40.00
Total List Price:	\$765.00

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Charging Port on Back of Head rail.

Retrofit Existing Standard Simplicity Motorized Shades with Rechargeable Batteries

Cellular shades made with Standard Simplicity Motorization can be retrofitted with the Rechargeable Simplicity Motorization Battery Wand. The Rechargeable battery wand is 22" long, comes with 10 NiMH batteries, and is white in color. Battery wands are charged at the factory.

To retrofit the rechargeable battery wand to an existing shade with a cassette head rail, you must have at least 24" between bracket centerlines to fit the battery wand. Otherwise, the wand must be placed elsewhere along the window. Wall mounting clips are provided with the wand.

Retrofit Ordering Requirements:

- Rechargeable battery wand with clips (one per shade)
- Rechargeable battery charger (one or more per order, or as needed)
- Charge port mounting base (optional)

Please contact customer service for more information.

Battery Wand for Rechargeable Simplicity Retrofit

Prelude Cellular

RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shades at the same intermediate position, follow instructions provided with installation manual.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Simplicity Motorized Shade Warranty

Please see pages 134-135 for complete Comfortex warranty information.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Motor Hand Held Remotes 5 Channel Remote

The **5 Channel (5C) remote** can operate up to five shades individually or 5 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Motor Hand Held Remotes Operation

Press the up or down button on the remote to raise or lower the shade to your desired position.

To reprogram channel assignments, please refer to the installation instructions and/or view the video at: comfortex.com/comfortex-dealers.

The Simplicity remotes utilize one 3V battery. Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

POWERTOCH RECHARGEABLE MOTORIZED CELLULAR SHADES

PowerTouch™ Rechargeable Shades

Cellular Shades can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shade to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits easily can be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/ comfortex-dealers. A "favorites" or intermediate stop position can be set once installed.

PowerTouch Rechargeable Surcharges

See page 9.

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail when installed.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options

- Shades with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

- The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

Mounting Requirements for PowerTouch Rechargeable Shades

- No special installation hardware or wiring requirements are needed.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shades Warranty

Please see page 135 for complete warranty information.

Prelude Cellular OVATION CELLULAR SLIDER

Ovation Hardware Rail Dimensions

- Depth of rail and bracket: 3 1/8"
- Valance Height: 2 3/4"
- For each spacer block 1/2" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.

Hardware Features	
Standard Hardware colors for Comfortex Prelude	Coordinating rail colors have been preselected for each fabric. More colorful fabrics are coordinated to white and off-white rail colors.
Ovation Valance	Every Ovation Slider comes with a painted aluminum valance. The valance attaches to the head rail using a durable plastic clip system.
Mounting Dimensions	
Minimum Inside Mount, Installation Bracket	1 5/16"
Minimum Flush Mount	3 5/8"
Minimum Outside Mount	5/8"
Mounting Specs	
	<ul style="list-style-type: none"> • For each spacer block, 1/2" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed. • Specify Inside Mount (IB) or Outside Mount (OB) when ordering. If the slider requires a non-flush inside mount, you must order a custom valance. • Exact valance width and exact valance return length (minimum 1 1/2") must be specified in the Special Instructions section of the order form.
Finished Dimensions	
Inside Flush Mount	
Track Width:	
Right or Left Stack	3/16" less than ordered width
Split Stack	3/16" less than ordered width
Center Stack	3/16" less than ordered width
Finished Slider Length	1/2" less than ordered width
Valance	3/16" less than ordered width
Outside Mount	
Track Width	3/16" less than ordered width
Finished Slider Length	Ordered length - No reductions will be made
Valance	Ordered width plus 1"
Valance Returns	Will measure 3 1/8" (standard)

Prelude Hardware

Prelude Cellular

OVATION CELLULAR SLIDER

Applications

- Standard Rectangular
- Opens and closes from side to side
- Four stacking options - see below.

Ovation Stacking Width

Width	up to 84"	up to 96"	up to 108"	up to 120"
Stack	6½"	7¼"	8"	8¾"

Minimum Ovation Stack

Ovation's fabric stack measures 6½" regardless of the ordered width. Fabric stacking dimensions are determined by the slider's hardware, not ordered width.

Things to Consider

- Since most Ovations are sold in large sizes, the shade will have a large fabric stack. On an outside mount, you may want to order the shade a few inches wider so that the fabric stack can be clear of the window.

Ordering Information for Ovation Cellular Sliders

- Specify IB or OB mount.
- Specify stacking configuration.
On Split Stack Shades, both panels will be of equal width unless specified.
- Specify valance width and return length.

Ovation Valance Specifications

- Every Ovation Slider is supplied with a painted aluminum valance.
- The valance attaches to the head rail using a durable plastic clip system.

Ovation Valance Dimensions

All valance dimensions are measured on the flat, back side.

- Valance Height: 2¾"
- Standard Return Length (OB only): 3⅛"
- For each spacer block, ½" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.

Vertical Stacking Options

Specify stacking configuration when ordering.

Left: Fabric stacks to the left side of the slider.

Right: Fabric stacks to the right side of the slider.

Center Stack: Center Stack Sliders fabric panels can move fully to the left or the right.

Split Stack: Fabric is split in the center of the slider forming two equal panels which open to opposite ends of the slider. Both panels will be of equal width unless otherwise specified.

Finished Dimensions	
Inside and Side Mount	
<ul style="list-style-type: none"> Fabric will measure ordered width less: 3/8" Head rail* will measure ordered width less: 3/16" 	<ul style="list-style-type: none"> * Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"

Prelude Hardware

Applications

- Stationary Fan Style Arch
 - Movable Fan Style Arch
- Movable Starburst Arch shades are for inside and shallow mount applications only.

Stationary Starburst Features (Figure A)

- All non-perfect Stationary Starburst arches require a template. See page 131 to for template instructions.
- All templates should be made from brown craft paper. Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- A perfect arch is twice as wide as it is high.
- Stationary Starburst shades which are not perfect half circles must have a height that equals half the width +/- 5".
- Price according to the largest radius measurement. If the height is greater than the width, take height X 2 and use that number to determine pricing.
- When ordering arches as perfect half-circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)

Movable Starburst Features (Figure B)

- Starburst Movable archtop shades are cut to perfect half circles only and do not require a template. The height must be exactly 1/2 the diameter.
- A perfect arch is twice as wide as it is high.
- When ordering arches as perfect half circles make sure the radius of the arch remains constant to ensure a proper fit. (See Figure C)
- The hinge gap (gap between the two rails) is not centered in the window. The moving rail is always smaller than the stationary rail to provide proper movement within the window.

Ordering Information for Sunset Shades

- Specify IB mount and rail color.
- Include a template if the shade is a non-perfect arch.

Accessories

- 6' Expandable Pole: \$37.00

Specially designed pole end fits into the handle on movable Starburst Shades for easy operation.

Ordering Information for Sunset Shades

- Include a template if the shade is a non-perfect arch.

Accessories

- 6' Expandable Pole: \$37.00

Specially designed pole end fits into the ball on Sunset Shades for easy operation.

Prelude Cellular SUNSET ARCHES

Sunset Features and Ordering Notes (Figure A)

- Sunset shades have horizontal pleats that stack at the bottom, on a stationary sill rail. Sunset shades are operated by a continuous cord that runs through a top mount guide block and back down through the stationary rail. A moving metal ball attached to the cord is used to raise and lower the shade. (See Figure D).
- **All Sunset arches require a template.** A perfect arch is twice as wide as it is high. See page 131 for template instructions.
- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- Sunset shades which are not perfect half circles must have a height which is equal to or greater than 25% of the width.
- When ordering Sunset shades that are perfect half circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B).
- **Stringing Method:** Depending on the curvature of a particular arch, it may be necessary to use the two string method (See Figure C) to ensure proper fit and operation of your Sunset shade. Comfortex will determine the best stringing method after examination of the template.

Applications

- Movable Trapezoids
- Movable Octagons

Ordering Information for Trapezoid Shades

- Specify IB or OB mount and rail color.
- **Trapezoid orders must be faxed in with a diagram. Please provide measurements for all four sides when ordering.**

Ordering Information for Octagon Shades

- Specify IB or OB mount and rail color.
- **The width, length and one side are required measurements when ordering.**

Prelude Cellular TRAPEZOIDS AND OCTAGONS

Trapezoids (Figure A)

- Trapezoid orders must be faxed in with a diagram. Please provide measurements for all four sides when ordering. Template is required.
- The maximum slope of the top rail is 30 degrees from horizontal. Slope is the angle between slope and a horizontal line. The slope angle must be measured with a protractor.
- Sides of trapezoid must be parallel.
- Sill must be level for proper installation and operation of a trapezoid shade.
- Operating cord must be placed on the short side.
- See Figure B for trapezoid shade operation.

Octagons

- The width, length and one side are required measurements when ordering.
- Octagon shades raise only to the point where the top angle begins. (See Figure C)

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"	

Applications

- Horizontal, Angled and Vertical rectangular windows and skylights. Skylight Shading Systems are for inside mount applications only.

Ordering Information for Skylight Shading System

- Specify when ordering: Application angle: Angled, Horizontal or Vertical.

Accessories

- 6' Expandable Pole: \$37.00

Specially designed pole end fits into the handle of Skylight shades for easy operation at any angle.

Skylight Shading System Features

- Shades can be mounted on their side. (See Figure A). Use the vertical measurement as your width (max. 36") and the horizontal measurement as your length (max. 48").
- Track system provides superior insulation and light blocking. The enclosed sides provide full privacy.
- Shades over 30" wide require support cords.
- Fabric gasket attached to moving rail to eliminate light leakage when shade is closed.

Cellular Shade Options

HIGHLIGHTS CORNICE VALANCE

Highlights Cornice Valances

Elevate your windows to a whole new level of design with the Highlights Cornice Valance. Coordinate with other design elements in your room. Add a finishing touch to the top of any window treatment.

The Highlights Cornice Valance is versatile and beautiful at a price point that won't leave you wondering how to cover the rest of your windows!

Choose from any fabric in our Envision™ and PERSONA™ line and customize the valance with our 7 available return sizes to best fit your application.

Easy assembly and quick installation, with the Highlights Cornice Valance, more beautiful windows are within your reach.

Refer to your Envision price list for pricing and specifications.

Fabric Characteristics

Natural Linen Flax Cellular Fabric Characteristics

Natural Linen Flax fabrics are sheer and are created from flax fibers which allow the most amount light into the room. Interior shade cords and objects in the room may be clearly seen through the shades.

Variations in the fabric weave, slubs, and texture are all enhancements that add to the natural beauty and character of the shade; therefore no two shades will look exactly the same.

Weave

Slub

Texture

Cut-Outs

Cut-outs are available with all cellular fabrics. Cut-outs are \$52.00 per side and are subject to approval by the Comfortex Technical Service department.

There are no limits on cut out lengths. There are limits on cut out widths:

Cellular shade widths 18" or less	3" maximum width
Cellular shade widths greater than 18"	5" maximum width
Pleated shades	2" maximum width

Scotchgard™ and Certified Fabrics

Scotchgard Protection

Scotchgard™ Protector is available with all cellular Shades. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned. Both sides of the fabric are treated with Scotchgard.

Greenguard Certified Fabrics

GREENGUARD Indoor Air Quality Certified® Fabrics
The GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The following fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems:

- Symphony (All)
- Virtuoso (All)
- Baritone (All)
- Premiere (All)
- Natural Linen Flax
- Debut (All)
- Linen Weave

The following fabrics have the passed GREENGUARD Children & SchoolsSM product certification program for low emitting interior building materials, furnishings, and finish systems used in educational (day care and K-12) environments:

- Symphony Light Filtering
- Symphony Blackout

Symphony Flame Resistant Fabrics

Symphony Flame Resistant Fabrics have been registered as a Flame Resistant Products by the California State Fire Marshall for products identified in section 13115, California Health and Safety Code (California CHSC). Copies of the certificates are located on the Comfortex.com/comfortex-dealers web site or on the On Demand Mobile library.

Color Selection

Use the current Cellular Shades Collection sample book to select colors from the Symphony light filtering fabric collection. All thirty colors are available in 3/8" Symphony light filtering double cell and 3/4" light filtering single cell.

Ordering Flame Resistant Shades

The SKU structure for Symphony Flame Resistant material is: 3012 05 XXX (XXX representing the color number).

To order Symphony Flame Resistant Shades: Use the SKU number listed on the decks.

The SKU structure for the 3/4" Symphony Flame Resistant material is: 2512 05 XXX

To order 3/4" Symphony Flame Resistant Shades:

Use the Symphony three digit color number to identify your desired color.

In this example:
2512 05 108

EZ Level on Comfortex Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:

- Standard and Deluxe Cord Lock
- Cordless Ultra
- Cord Loop
- SlumberShades
- Simplicity Motorized Systems

EZ Level is not available with Lift & Lock Cordless.

How does EZ Level work?

- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down.

One quarter turn of the adjustment screw will move the bottom rail up or down 1/4".

- Lower the rail to check the level and make further adjustments if necessary.

Cleaning and Care

While beautiful and pleasing to the eye, all Comfortex products are designed to be durable, easily cared for and easily cleaned. Our non-woven fabrics are inherently anti-static and repel dust, but occasional feather dusting or vacuuming may be necessary to keep the fabrics clean and bright. Comfortex Cellular fabrics may be ultrasonically cleaned.

Cleaning Virtuoso Blackout, Baritone Blackout and Symphony Blackout Fabrics:

Our blackout fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. To spot clean, use a cloth or sponge dipped in a light solution of lukewarm water and clear dish detergent and lightly dab. Do not scrub the surface. Rinse thoroughly.

Cleaning all other Comfortex Cellular or Pleated Fabrics:

Our light filtering and room darkening fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. Spills and stains can be lightly blotted with a cloth or damp sponge. More difficult stains may require soaking in water with mild soap. For this, remove the shades from the window and soak in warm water. Complete immersion of hardware is not recommended.

DO NOT submerge the Cordless Ultra head rail in water. When damp, lay flat to dry or place back in window and raise tightly to recrisp pleats. Please test any stronger cleaners on an unobtrusive portion of the shade before using.

For additional advice on care or cleaning, please contact our Technical Services Department.

Scotchgard™ Treated Shades

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.

- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not overwet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Odysee Cellular Blinds

Odysee Cellular Blinds Features at a Glance

- Odysee Insulating Blinds provide the same energy saving benefits as classic cellular shades, but with the enhanced versatility of fully functional vanes.
- The Odysee vanes expand and compress to create several innovative views. Expanded vanes offer complete privacy, energy efficiency and hidden lift cords. Compressed vanes provide variable light control and substantial view through -like a wood blind.
- All Odysee Blinds are built with a PowerTouch™ system as standard.
- Odysee vanes are available with light filtering or room darkening fabric.
- Odysee provides the convenient operation of a blind with soft fabric look of a shade.
- All Odysee vanes are white to the outside for a uniform exterior appearance.
- A limited lifetime warranty serves as a commitment to your satisfaction.

Odysee Cellular Blinds

Odysee Cellular Blinds HARDWARE SYSTEM

Odysee Cellular Blind Rail Dimensions

- Depth of head rail: 2⁵/₈"
- Height of head rail: 2¹/₈"
- Height of cell: 1¹/₂"
- Depth of bottom rail: 1³/₄"
- Height of bottom rail: 1/4"

Hardware Features

Hardware colors for all Odysee Cellular Blinds	<ul style="list-style-type: none"> • White head rail and bottom rail. The head rail includes a color matched fabric head rail insert strip. • PowerTouch Wand is white • Operating cord and cord tensioner are white. • There may be a gap from the head rail to the top vane (when the vanes are fully expanded) could be up to 3/16". The lip on the back of the head rail will prevent "view through" to the outside.
--	--

Mounting Dimensions

Odysee Cellular Blind Hardware System

Inside Mount

Minimum Shallow Mount	1 1/4"
Minimum Flush Inside Mount	2 7/8"
Minimum Rear Vane Clearance	1/8"

Outside Mount

Minimum Shallow Mount	1"
Minimum Flush Inside Mount	2"
Minimum Outside Mount	1/8"

Side Mount

Minimum Shallow Mount	1 1/2"
Minimum Flush Inside Mount	2 5/8"
Minimum Outside Mount	1/8"

Finished Dimensions

Odysee Cellular Blind Hardware System

Inside Mount

- Head rail* unit ordered width less: 3/16"
- Blind length up to 1 5/8" more than ordered length; bottom vane may not fully extend when blind is fully lowered
- Fabric width ordered width less 1/2"

Outside Mount

- Head rail* unit ordered width plus: 3/8"
- Blind length up to 1 5/8" more than ordered length
- Fabric width ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"

Odysee Cellular Blinds HARDWARE SYSTEM

Applications

- Standard Rectangular
- PowerTouch™ Rechargeable is standard for shades up to 72" x 84"

Fabric Collections

You can select fabrics from two collections:

- **Standard and Natural Textures Collection:** Solid and patterned light filtering and room darkening colors.

Operating Cords (Optional)

- The cord loop is made of white nylon.
- Standard cord placement is right. Please specify location when ordering.
- Cord Loop System cords come in 2 foot to 15 foot lengths in 1 foot intervals. Please specify length when ordering.

Standard loop sizes are as follows:

Blind Length	Standard Loop
Up to 36"	2' (24")
36" to 60"	3' (36")
60" to 84"	4' (48")
84" to 108"	5' (60")
108" to 120"	6' (72")

Vane Stack

Odysee Blinds are designed for both function and aesthetics with the opening and closing of the vanes, providing a view-through to the outside. While an Odysee Blind can be raised and lowered, a raised blind may result in a wavy stack resulting from the accumulation of aluminum lifters located on the cords. The aluminum lifters allow the vanes to be opened and closed

Stack Height

All measurements include head and bottom rails.

Blind Length	Stacking Height
Up to 12"	3¼"
12½" to 24"	4¼"
24½" to 36"	5¼"
36½" to 48"	6¼"
48½" to 60"	7¼"
60½" to 72"	8¼"
72½" to 84"	9¼"
84½" to 96"	10¼"
96½" to 108"	11¼"
108½" to 120"	12¼"

Odysee Vane Characteristics

What size is a vane?

A vane is 1" high.

Vane Flare

A certain level of flare is common on the sides of the vane. This characteristic is designed into the blind to assist in closure when the vanes are fully expanded.

Vane Gap

It is not uncommon to have very small gaps between the vanes; however, the gaps should not be large enough for you to "view through" to the outside.

Bottom Vane

The bottom vane is designed to stay flat and may appear extra. In addition, some blinds may need an extra vane in order for the blind to reach the bottom sill. When the vanes are expanded, the extra vane may be partially compressed because of the size of the window.

What do I do if an expanded vane is pushed in?

If the vane is pushed in, do not raise the blind. Carefully push the vane out with your finger or the eraser end of a pencil.

What do I do if the vanes do not expand or compress uniformly?

If one or more vanes hang up when opening or closing the blind, you can reset the vanes by toggling the cord loop back and forth.

Are there color differences between Light Filtering and Room Darkening Vanes?

Due to the differences between the light filtering and room darkening base material, slight color variations may exist. These slight color variations are within established industry standards and should be expected.

Odysee Cellular Blinds

CORDLESS POWERTOUC

Cordless PowerTouch Push Button Control Applications

- Standard Rectangular
- PowerTouch™ Rechargeable is standard for shades up to 72" x 84"

Odysee Cellular Blinds can be fabricated with the Cordless PowerTouch Push Button Control option.

The PowerTouch option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch uses Simplicity motors and components.

PowerTouch Operation

Press and hold the up or down button on the pendant to adjust the blind position. Release the button to stop the blind at your desired position. No programming is required.

The PowerTouch system is most convenient for adjusting the vanes between open and closed; but can also be used to raise and lower the blind.

All fabrics will use white wand and pendants.
All standard Odysee discounts apply to PowerTouch Blinds.

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail and requires no additional mounting.
- The wand and pendant hangs down the front of the blinds from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the blind.

PowerTouch Rechargeable NiMH Battery Wand is Standard

Please see page 128 for more information.

PowerTouch Color Options

- All Odysee Blinds will use white wand and pendants.

PowerTouch Wand Length

- The standard length of the wand will measure half the ordered length of the blind.
- Maximum wand length is 56" including the pendant.
- Custom wand lengths are available in 1" increments up to 56", specify when ordering. Custom wand length surcharge of \$31.00 applies.

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

Mounting Requirements for Odysee Cordless PowerTouch Blinds

- No special installation hardware or wiring requirements are needed to install Odysee Cordless PowerTouch Blinds.
- The wand and pendant do not need to be mounted to operate the blind.

Cordless PowerTouch Blinds Reloadable Battery Wand (Optional)

The battery wand is wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

PowerTouch Wand Battery Life and Replacement

Eight alkaline batteries are included with the battery wand. The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the blind on a daily basis.

Comfortex will warranty batteries for up to 3 months from date of purchase.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single blind. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep.

Odysee Cordless PowerTouch Blinds Warranty

Please see page 135 for complete warranty information.

Odysee Cellular Blinds

SIMPLICITY MOTORIZED ODYSSEE CELLULAR BLINDS

Motorized Odysee Cellular Blinds

Odysee Cellular Blinds can be motorized with Simplicity Radio Controlled Motors.

Simplicity Motor Program

The Simplicity Motor program features a battery powered motor utilizing a single 12 volt battery wand or DC (Plug-in) transformer. Simplicity motors are compact and use a radio controlled remote to raise or lower the blinds.

Mounting Requirements For Motorized Odysee Cellular Blinds

No special installation hardware or wiring requirements are needed to install motorized Odysee Blinds. See page 124 for mounting information.

PowerTouch Rechargeable NiMH Battery Wand is Standard

Please see page 128 for more information.

Simplicity Reloadable Battery Wand (Optional)

Batteries are needed to operate Simplicity motors. The battery wand is can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17¼", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand.

The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily will have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase. Batteries are not covered by the warranty.

Simplicity Motor Hand Held Remotes

5 Channel Remote

The **5 Channel (5C) remote** can operate up to five shades individually or in groups. **WHEN ORDERING PLEASE SPECIFY WHICH CHANNELS ARE ASSIGNED TO EACH SHADING OR GROUP OF Shades.**

For example; program line 1 to channel 1, line 2 and 3 to channel 2, etc. If no channels are assigned at time of order, all shades will be programmed to Channel 1.

Simplicity 5C remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

6 Channel Timer Remote

The **6 Channel (6C) timer remote** combines the functionality of a fifteen channel hand-held control with the convenience of a programmable timer.

- The 6C timer remote allows for 18 different scheduled actions each day of the week.
- Manual function disables the timer and the remote then operates as a 1-channel hand held remote.

WHEN ORDERING PLEASE SPECIFY WHICH CHANNELS ARE ASSIGNED TO EACH SHADING OR GROUP OF SHADES.

For example; program line 1 to channel 1, line 2 and 3 to channel 2, etc. If no channels are assigned at time of order, all shades will be programmed to Channel 1.

Simplicity remotes and holders come in white. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is white and comes with a 80" wire. The dimensions are 1⅞" wide x 3¼" long x 1¼" deep

Odysee Cellular Blinds

Odysee Cellular Blind RECHARGEABLE SIMPLICITY MOTORIZED BLINDS

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery wand. Simplicity motors are compact and use a radio controlled remote to raise or lower the shades.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Standard Rectangular

Simplicity Rechargeable Battery Wand

The wand will be concealed in the head rail on shades over 28" wide. The battery wand measures 22", comes with NiMH rechargeable batteries, and is white in color. For blinds less than 28" wide, the rechargeable battery wand can be clipped to the wall or ceiling mounted utilizing supplied battery wand clips.

Rechargeable battery wand comes fully charged from the factory.

Rechargeable Battery Wand Concealed in Head rail.
(Minimum width of 28" required)

Simplicity Motor Hand Held Remotes

The same remotes used for Simplicity motorized blinds can be used for Rechargeable Motorized Odysee Cellular Blinds, see page 127 for more information and options.

Mounting Requirements

No special installation hardware or wiring requirements are needed. See page 124 for mounting information.

Battery Charger

14 Volt charger requires a standard power outlet to recharge the battery wand. Must specify charger when ordering a Simplicity Rechargeable Wand Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1 7/8" wide x 3 1/4" length x 1 3/4" deep.

Charging Port on Back of Head rail

Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of a single charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the cellular blind is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Retrofit Existing Standard Simplicity Motorized Shades with Rechargeable Batteries

Cellular shades made with Standard Simplicity Motorization can be retrofitted with the Rechargeable Simplicity Motorization Battery Wand. The Rechargeable battery wand is 22" long, comes with 10 NiMH batteries, and is white in color. Battery wands are charged at the factory.

Retrofit Ordering Requirements:

- Rechargeable battery wand with clips (one per shade)
- Rechargeable battery charger (one or more per order, or as needed)
- Charge port mounting base (optional)

Please contact customer service for more information.

Operating Odysee Blinds

- A single cord loop and clutch combination is used to raise and lower the blinds, as well as open and close the vanes.
- To compress the vanes or lower the blind, pull on the rear of the cord loop. To expand the vanes or raise the blind, pull on the front of the cord loop.

Privacy Position
(Vanes expanded)

View-Through Position
(Vanes compressed)

If at any time the vanes do not expand or compress uniformly you can reset the vanes by toggling the cord loop. Opening and closing the vanes should re-align them with uniform expansion or compression.

Bottom Rail

Odysee Cellular Blinds feature a creamy white bottom rail.

When the vanes are expanded (closed), the bottom rail touches the window sill. When the vanes are compressed (open), the bottom rail may lift off the sill slightly. This is normal.

Odysee Certified Fabrics

The GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

Odysee fabrics have earned the following certifications:

- GREENGUARD Indoor Air Quality Certified® certification for low emitting interior building materials, furnishings, and finish systems.
- GREENGUARD Children & SchoolsSM product certification for low emitting interior building materials, furnishings, and finish systems used in educational (day care and K-12) environments.

Measuring Instructions for Odysee Cellular Blinds

Comfortex accepts measurements down to 1/16" increments.

Inside or Side Mount

Use a steel tape to measure the opening at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the vanes narrower so they will not rub against the window casing. Measure the height of the window from the top (soffit) down to the sill.

Outside Mount

Use a steel tape to measure the exact height and width of the area to be covered. It is recommended that the blinds overlap the window by at least 1 1/2" on each side. When installation has no sill, allow the blind to overlap the bottom of the window casing by at least 1 1/2". Blind fabric will measure width indicated on the order form.

Cleaning and Care of Odysee Cellular Blinds

Regular feather dusting or vacuuming will keep Odysee Cellular Blinds looking new for years.

Odysee Cellular Blinds can be spot cleaned. Gently blot the stain with a clean, non-alcohol baby wipe. Instead of a baby wipe, you may use a clean white cloth with a mild cleaning solution. Support the fabric from behind using another clean, dry cloth. Clean the fabric using a gentle blotting action. Do not rub the fabric. Any abrasive action may cause the fabric to pill or distort. Allow the fabric to air dry with vanes expanded.

Forced air can also be used to blow out dirt and debris from within the vanes using clean compressed air or a hair dryer on the COOL setting.

Odysee Cellular Blinds can also be ultrasonically cleaned. Do not immerse the head rail. Comfortex acknowledges these cleaning methods as being safe and effective. We cannot attest to the quality of equipment or services provided by any independent cleaning facility.

Cellular Shade

MEASURING INSTRUCTIONS

Comfortex accepts measurements down to $\frac{1}{16}$ " increments.

Inside Mount

Use a steel tape to measure the opening at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade $\frac{3}{16}$ " narrower so it will not rub against the window casing. Measure the height of the window from the top (soffit) down to the sill.

Outside or Ceiling Mount

Use a steel tape to measure the exact height and width of the area to be covered. It is recommended that the shades overlap the window by at least $1\frac{1}{2}$ " on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least $1\frac{1}{2}$ ". Shade fabric will measure width indicated on the order form.

Measuring for Specialty Shapes

Templates are required with some specialty shade orders. Consult the individual product sections of this guide for specifics regarding accurate measurements and mounting information.

Arches and Quarter Round Circles

- Measure the window height and width appropriately for an inside or outside mount.
- With perfect arches, the height will be one half the width. With perfect quarter rounds, height will equal width. If the arch or quarter round is perfect, **a template is not required.**
- Windows with imperfect arch measurements do not maintain the height/width relationship. Templates **are required** for these windows.

Trapezoids

- Measure the window height and width appropriately for an inside or outside mount. For outside mounts, remember to add the desired amount of overlap.
- Either the top or bottom of the shade is sloped or angled.
- Measure all four sides for accurate fabrication. Provide all measurements. **Templates are not required.**
- The slope angle must be measured with a protractor. Slope is the angle between slope and a horizontal line. The maximum slope is 30 degrees.

Octagons

- Measure the window height and width appropriately for an inside or outside mount. Be sure to measure the width at the shade's widest point.
- Provide the width, length and the length of one side when ordering.

Making the Perfect Template

Tape brown craft paper over the window opening. Be sure to allow plenty of overlap and check to see that the paper is smooth and pulled taut. Do not use newspaper as the ink can rub off on fabric. Do not use paper that has been folded. Notice the outline of the framework superimposed on the template as the light filters through the window. You may create the template in one of two ways:

Trace the outline of the window with a pencil and continue along the side of the window frame. Once the window is completely traced, remove the craft paper from the window. Cut out the traced shape with a pair of scissors.

You may choose to skip tracing the window outline with a pencil and cut out the shape immediately with a razor knife.

Once your template is cut, double check its width and height with your initial measurements. Test the template by placing it in the window. Check for light gaps, uneven cutting of curves etc. Trim or remake if necessary.

With arch top shades, fold the template in half. Check the outline of the curve for smoothness, light gaps and curve continuity. Place the template in the window and check it for light gaps or uneven cutting of curve. Trim or remake it if necessary.

On the front of the template, mark the shade measurements along with your company name, account number, sidemark, shade style and color. Be sure to indicate inside or outside mount, the room side and which ends of the template are top and bottom. Do not take any deductions on inside mount shades. The factory will make all necessary allowances for inside mounts.

Remember: The quality of the finished shades depends heavily on the quality of the template supplied. Do not hesitate to remake a template if you feel uncomfortable of the quality of your first attempt.

Template Kits: Comfortex offers template kits which includes brown craft paper, razor knife, instructions and order form. Please contact Customer Service or visit www.comfortex.com to order. Stock number: 751000

Child Safety

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.

Cord Cleat

Cord Tensioner

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for safety of corded window coverings.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them.

To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the blind, simply wrap the excess cord around the cleat.

Conditions of Sale

All Comfortex products are custom fabricated to your exact specifications. We cannot accept responsibility for errors in ordering or cancellations and charges after the order is in production.

Policies

Our policies are designed to provide a guide for doing business with Comfortex. Our first priority and number one policy is to provide the highest level of service and total satisfaction.

Freight

Comfortex will ship all orders for fabricated shades or blinds freight free via UPS, FedEx Ground or other similar method within the continental United States*.

A \$3.75 per unit transportation surcharge will be added to all fabricated product orders, within the continental United States, including shades/blinds, vane packs, individual vanes, tracks, valance and cut yardage orders.

In addition, a \$70.00 Common Carrier surcharge** will be added for all orders shipped within the continental United States*, that include shades, blinds or valances with widths of 98" or more and are required to ship by motor freight. Exception: Verticals with lengths of 84" or more, and Roman Shades with widths of 94" or more are required to ship by motor freight.

***Hawaii:** Shipments to Hawaii will incur a freight charge of \$50.00 per unit when shipped from within the Continental US.

****In Addition,** a \$110.00 Common Carrier surcharge for

! WARNING

The cords on this product present a potential strangulation hazard.

For child safety, consider cordless alternatives or products with inaccessible cords.

! ADVERTENCIA

Los cordones de este producto representan un peligro potencial de estrangulamiento.

Para la seguridad de los niños, utilice alternativas sin cordón o productos cuyos cordones sean inaccesibles.

! MISE EN GARDE

Les câbles de ce produit représentent un danger potentiel de strangulation.

Pour la sécurité des enfants, pensez au sans fil, ou procurez-vous des produits dont les câbles ne sont pas accessibles.

oversized shipments will be added to orders shipping to Hawaii.

***Alaska:** Shipments to Alaska will incur an \$8.00 per unit transportation surcharge when shipped from within the Continental US.

****In addition,** a \$110 Common Carrier surcharge for oversized shipments will be added to orders shipping to Alaska from within the Continental US.

Canada: Shipments to Canadian Dealers will incur a \$6.00 per unit transportation surcharge when shipped from within the Continental US. In addition, a \$110 Common Carrier surcharge for oversized shipments will be added to orders shipping to Canada from within the Continental US.

Freight continued

Comfortex Mexico Plant: All shipments from our Mexico plant to Alaska, Hawaii or anywhere outside the Continental US will incur all freight charges (freight forwarder needed if shipping to another country).

All Other Countries: All United States dealers requesting to ship orders outside the United States must provide a freight forwarder for Comfortex to ship to within the continental United States. Comfortex cannot ship directly to your customers located outside the United States.

Please Note: Comfortex reserves the right to select another carrier, modify shipping terms or change freight policies without notice.

Service and Repair

Service may be obtained by contacting our Customer Service Department. No products, parts, components or other materials will be authorized for return or repair without prior approval from Comfortex. A Return Authorization (RA) may be obtained by contacting our Technical Service Department. In order to provide the quickest service possible, please have your Comfortex Work Order number and original order information available when you call.

Charged Marketing Materials

All charged marketing materials will incur freight charges. Marketing materials may ship on separate days, from different locations. Freight charges are calculated per package, not per order.

Specifications

All Comfortex products are designed and tested to perform as intended within established, published parameters. Requests for "custom fabrication" of products outside of our published specifications may be considered, but are at the discretion of the Comfortex Technical Services department. Restrictions and additional charges apply.

Download installation instructions, order forms or additional price list copies on the Comfortex OnDemand Library or www.comfortex.com/comfortex-dealers in the Dealers Resource Center.

Odysee Fabric Color Variations

Due to the differences between the light filtering and room darkening base material, slight color variations may exist. These slight color variations are within established industry standards and should be expected.

Custom Graphics Cellular Shades Color

Warranty

Comfortex utilizes state of the art technology to provide you Custom Graphics Shades within 2 Delta-E (DE) of the sample fabrics found in the Comfortex Collections Cellular and Pleated Sample Book. When viewed under different lighting sources such as fluorescent, incandescent, halogen, ultraviolet and others, fabrics may appear different to the eye. Comfortex utilizes the worldwide lighting standards of Daylight 65 (D65) as our official standard for measuring and qualifying color accuracy, because D65 daylight bulbs best represent actual "daylight" illumination. Slight color variations (under 2 DE) are within established industry standard and should be expected.

This warranty is in addition to Comfortex limited lifetime warranty.

Scotchgard™ Warranty

Comfortex Window Fashions provides a limited warranty for fabrics treated with Scotchgard™ Protector against permanent stains for a period of 1 year from the date of original purchase.

This warranty excludes conditions or damages resulting from accidents, alterations, exposure to the elements, and exposure to any and all natural and manufactured excessive heat sources, or failure to follow the Installation and Care instructions. This warranty also excludes fabric submerged in water or cleaning solutions, or treated with household products that may alter or deplete the effectiveness of the treated fabric. In addition, the following types of stains are excluded from this limited warranty: pet stains, bodily fluids, stains caused by wine, bleach, plant fertilizers, acne medication, misuse or abuse. This warranty is not a cleaning contract and does not cover the cleaning of fabrics that are soiled or discolored through daily use. This warranty coverage is limited to residential use and is not transferable.

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.

- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not overwet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Should the results of the cleaning and care instructions not result in the removal of permanent stains covered by this limited warranty, Comfortex will retreat or replace the fabric, at its discretion, for a period of 1 year from the date of original purchase. Customer must provide proof of purchase and provide proof the stain occurred during the warranty period. Shipping and handling costs to send the window treatment back to Comfortex are the responsibility of the customer.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Cellular, Pleated and Prelude Shades Odyssey Cellular Blinds Warranty Information

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The Limited Lifetime Warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The Warranty does not include any conditions or damages resulting from accidents, alterations, misuse, abuse, misapplication, improper handling, installation, repairs, operation, cleaning, exposure to any and all natural and manufactured excessive heat sources. (Excessive heat sources include, but not limited to; magnification of sun light through cubes of glass, heaters of any kind, ovens, candles, lighting fixtures, etc.) This warranty does not cover variation in fabric color, grain, or texture in natural wood products nor excessive warping of wood slats in high humidity areas. Loss of pleating is not covered if the product is not being cycled (held in the raised position a portion of the time). Normal wear and tear is not covered.

All moving parts, such as cords and strings (internal and external), will eventually wear out and fabric may fray. Comfortex considers these things as normal wear and tear and will carry a three year Limited Warranty. All fabric, including fabric vanes, panels, inserts, and shades carry a five year Warranty. Fabric cell separation is covered for a lifetime. See Comfortex Standard Return and Repair Policy for more details.

This Limited Warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this Limited Warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this Limited Warranty.

To obtain service, contact the Dealer from whom you purchased the product.

This Warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages

are not allowable. Comfortex Dealers and Fabricators must use safety devices supplied by Comfortex in accordance with Window Covering Safety Counsel guidelines.

This Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This Limited Warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this Warranty.

This Limited Warranty supersedes any previous versions.

Motorized Cellular and Pleated Shades and Odysee Cellular Blinds Warranty

Simplicity Motors including PowerTouch and Rechargeable Simplicity Motorization

We offer a 5 year warranty on all motors and controls. Specifically, we warrant the Simplicity motors and controls to be free from defects in material and workmanship under normal and proper use for a period of 5 years commencing with the date stamped on each product. If the Simplicity product fails within this 5 year period, we will repair or replace it free of charge through your end product supplier. Batteries are not covered by the warranty.
