Scotchgard™ Protection

Optional Scotchgard™ Protector is available with all Color Lux fabrics. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned.

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"

Cellular Shade Collection

CORDLESS ULTRA HARDWARE SYSTEM

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Insulating SlumberShades
- Two-On-One Head Rail

Things to Consider

- Is the top of your window out of reach? You can order an extension pole to reach but it can still be tricky. You may want to consider Motorized hardware.
- For shades mounted on doors, you may want to order hold down brackets.
- If privacy is an issue, consider Top Down-Bottom Up options.

Ordering Information for Cordless Ultra Hardware Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Top Down - Bottom Up

- Specify IB or OB mount and rail color.
 Middle rail will match the head and bottom rails.

Insulating SlumberShades

See pages 66 for more information.

Accessories

- 3' Expandable Pole - Silver:
- 5-10' Expandable Pole - Black:

3' Pole

5-10' Pole End

Specially designed pole end fits into the handle on the bottom rail and allows for easy operation.

Cordless Ultra and Cordless Ultra Top Down - Bottom Up Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Ultra and Cordless Ultra Top Down - Bottom Up Shades can be raised or lowered with a gentle push or pull on the rail handle.
- Cordless Ultra Top Down - Bottom Up Shades feature two moving rails.
- Order an operating pole for out of reach applications.

Cordless Ultra Shade Operation

Cordless shades should be operated from the handle located in the center of the bottom rail. Using the handle will aid in smooth and easy shade operation. Two handles are supplied on wider width shades.

To lower the shade, pull down on the handle which is secured to the bottom rail and guide the rail to desired position (Figure A). For out of reach applications, an optional extension pole should be used.

To raise the shade, push the bottom rail up using the handle on the bottom rail and guide the rail to the desired position. The shade will hold any position when the bottom rail is released. Raise the shade slowly and steadily to allow the shade to stack evenly (Figure B).

Figure A

Figure B

New Sleek 3' Pole

Optional

Recommended Mounting Method for Side Mounting Shades

See Page 47.

EZ Level on Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. See page 91 for details.

Cellular Shade Collection

CORDLESS LIFT & LOCK HARDWARE SYSTEM

Cellular Shade Collection

CORDLESS LIFT & LOCK HARDWARE SYSTEM

Cordless Lift & Lock Shades Hardware System Bottom Rail Dimensions

- Depth of rail: 1 7/8"
- Height of rail: 1 1/8"

Applications

- Standard Rectangular
- Top Down-Bottom Up
- Two-On-One Headrail

Standard size head rail hardware is used on 1/2" and 3/8" fabrics. These fabrics include: 1/2" Debut (all), 1/2" Premiere, Symphony, and Symphony Blackout.

Deluxe size head rail hardware is used on 3/4" Premiere, Linen Weave, Verona, Boutique and 3/4" Debut.

The bottom rail is the same size for all fabrics.

- Two-On-One headrail price as 2 separate shades and add \$66 (not available in Top Down-Bottom Up)

Important Operating Note on Cordless Lift & Lock Shades

- To operate a Cordless Lift & Lock Shade, the middle or bottom rails must be accessible. An extension pole is not available for Cordless Lift & Lock Shades.

Cordless Lift & Lock Hardware Features

- Children and pets have safer surroundings in homes that have window shades without operating cords, reducing the risk of strangulation.
- Cordless Lift & Lock Shades can be raised or lowered by pressing the button located on the bottom rail and guiding the rail into the desired location.

Things to Consider

- Is the top of your window out of reach? To operate a Cordless Lift & Lock Shade, the bottom rail must be accessible. If the bottom or middle rail is not accessible, you may want to consider Cord Loop, Cordless Ultra or Motorized hardware. An extension pole is not available for Cordless Lift & Lock Shades.
- For shades mounted on doors, you may want to order hold down brackets.

Ordering Information for Cordless Lift & Lock Shades

Standard Rectangular

- Specify IB or OB mount and rail color.

Cordless Lift & Lock Shade Operation

Cordless Lift & Lock Shades are operated using the push button handle located in the center of the bottom rail.

To raise or lower the shade; press the button on the shade handle, and guide the rail to desired position. Release the button to lock the shade into place.

The shade will hold in any position when the button is released. Raise the shade slowly and steadily to allow the shade to stack evenly.

NOTE: Lift and Lock shades do not utilize the EZ Level plugs like other Comfortex rectangular shade hardware systems. The bottom rail equalization can be adjusted using the tie-off plugs on the top of the headrail. Middle rail of TDBU has an adjusting tool inside the rail. Access by removing the right side endcap.

Cellular Shade Head Rail Options

12V NON-RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Cellular Shade

12V NON-RECHARGEABLE SIMPLICITY MOTORIZED CELLULAR SHADES

Simplicity Motors

The Simplicity Motor program features a battery powered 12V motor utilizing a single battery wand or plug-in DC transformer. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

- Length measurements may vary +/- 1/8".

Applications

- Standard Rectangular
- Two-On-One Head Rail Bottom Up

EZ Level

[Learn about the EZ Level feature on page 91.](#)

Simplicity Motorization Surcharges

The standard Simplicity Motorized Lift System surcharge includes a 12 volt battery wand with eight AA alkaline batteries. Remotes are needed to operate the shades. See pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Simplicity Battery Wand

Batteries are needed to operate Simplicity motors. The battery wand can be clipped to the head rail or wall or ceiling mounted utilizing white battery wand clips. The 12 volt battery wand measures 17 1/4", and comes with eight AA alkaline batteries, and is white in color.

The battery wire is 10" long. A 48" extension wire is available.

Simplicity Motor Battery Life and Replacement

Eight alkaline batteries are included with the wand. The battery life will vary based on the type of window covering selected, the size and weight of the window covering and the number of times you operate the shade on a daily basis. For example, a 36" x 60" single honeycomb shade operated twice daily will commonly have a battery life which lasts up to 18 months.

Comfortex will warranty batteries for up to 3 months from date of purchase.

Simplicity Hand Held Remote 14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

DC Power Supply/Transformer

12 Volt DC power supply/transformer is available and requires a standard power outlet to power the motor. The transformer is an alternative to a battery wand. Each transformer can power a single shading. The power supply must plug in to the motor. The DC power supply is black and comes with a 80" wire. The dimensions are 1 7/8" wide x 3 1/4" long x 1 1/4" deep

7.4V RECHARGEABLE SIMPLICITY MOTORIZED HARDWARE SYSTEM

Rechargeable Simplicity Motors

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Rechargeable Motorized Lift Systems are not offered on sizes within the shaded area on the Standard Rectangular price grids.

Applications

- Standard Rectangular
- Top Down-Bottom Up see page 57
- Two-On-One Head Rail Bottom Up

EZ Level

Learn about the EZ Level feature on page 91.

Rechargeable Simplicity Motorization Surcharges

The Rechargeable Simplicity Motorized Lift System surcharge includes a rechargeable battery. Remotes are needed to operate the shades. Refer to pricing pages.

Important Simplicity Motorized Shade Operating and Installation Information

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Charging Port on Back of Head rail.

RECHARGEABLE SIMPLICITY PRICING EXAMPLE:

Debut 1/2"	
Light Filtering 42" x 60" Shade:	\$417.00
Simplicity Rechargeable Surcharge:	\$300.00
Charger for Rechargeable :	\$30.00
Simplicity Remote Control:	\$50.00
Solar Panel & Mounting Brackets:	\$120.00
Total List Price:	\$917.00

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18 1/2" x 1 1/2"

- Solar Panel with Mounting Brackets: \$120.00

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.
- Avoid any obstructions including mullions and screens.

Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Bracket Method

Tape Method

Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets also. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Cellular Shade Collection

7.4V RECHARGEABLE SIMPLICITY MOTORIZED HARDWARE SYSTEM

Simplicity Rechargeable Battery Life

Rechargeable batteries are included with the motor.

The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis.

The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Ordering Information for Rechargeable Motorized Cellular Shades

Simplicity Motor Option

- Specify IB or OB mount and rail color.
- Specify remote and other accessories if needed.
- Specify one or more battery chargers.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. If the homeowner wants to set several shades at the same intermediate position, follow instructions provided with installation manual.
- Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.
- The Simplicity remotes utilize one 3V battery. Batteries are included. Comfortex will warranty batteries for up to 3 months from date of purchase.
- **REMEMBER: Order at least one charger if ordering rechargeable motors.**

Simplicity Motorized Shade Warranty

Please see Policy PDF for complete Comfortex warranty information.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

Simplicity Hand Held Remote

14 Channel Remote

The TDBU remote has 14-channels. This remote is required for TDBU motorization but can be utilized on all Simplicity motorized shades. Each channel has a setting to operate the middle rail and a setting to operate the bottom rail. The TDBU remote is required for TDBU motors. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white or black in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Simplicity Motor Hand Held Remotes Operation

Press the up or down button on the remote to raise or lower the shade to your desired position.

To reprogram channel assignments, please refer to the installation instructions and/or view the video at: comfortex.com/comfortex-dealers.

Cellular Shade Collection

12V SIMPLICITY LOW VOLTAGE HARDWIRING SYSTEM

12V Low Voltage Hard Wired

Low Voltage hardwire powered motors are available for Cellular bottom up shades. The system offers a maintenance-free power option for Simplicity Motorized Shades. Our Simplicity power transformer mounts in a safe dry location (such as your basement), out of sight, and provides power for up to nine individual shades per box.

2 Conductor wires (not included) should be pre-installed by a licensed contractor according to local building codes, to connect power from the transformer to the shades.

Simply connect the wire adapters provided to connect the power wire to the Simplicity motor power input on the back of the shade, then connect the pre-run wires to the (+ / -) terminal block in the transformer box, and flip on the power switch.

- Product Dimension: 7.875" wide, 9.4" Tall, 2.45" deep
- Converts incoming 120V AC to outgoing 12V to up to 9 shades.

- **Product Description:**

- 12v10a 9ch
- Input Voltage Range : AC90V-264V
- Input Frequency Range : 50Hz-60Hz
- Output Voltage Range : DC12V+/-5%
- Output Current : 10 Ampere
- Output Power : 120 Watt
- Output Ripple&Noise : ≤42MV
- Output Efficiency : ≥83%
- Output Fuse Type : PTC
- Output Fuse Rating : 2A
- Environment Operatiing Amb.Temp : -30 ~45
20%~90%RH
- Envioment Storage Temp : -40 ~85 10%~95%RH
- Plugs into standard household outlet

2 Conductor Wires (not included) running to basement 12V Power Transformer

SIMPLICITY SMART CONTROLLER

Simplicity Smart Controller Dimensions

- Width of controller: 2³/₈"
- Length of controller: 2¹⁵/₁₆"
- Height of controller: 1¹/₈"

Simplicity Smart Controller

- Works with Apple and Android devices
- FREE Downloadable Application
- Compatible with previously installed Simplicity Remote Control Shades
- Powered by NEO Smart Blinds App
- Compatible with Amazon Alexa, Google Assistant systems, Control4 and Savant systems

Simplicity Smart Controller

The Simplicity Smart Controller is a small device that you install in your home that allows you to set automatic opening and closing times for all Simplicity motorized shades as well as the ability to control your motorized shades from a phone, tablet or PC from anywhere in world.

The Simplicity Smart Controller will work with any Comfortex remote motorized shade with Simplicity remote control motors purchased after 2012.

The Simplicity Smart Controller plugs into a standard electrical outlet and connects to WiFi and sends signals to your shades using the same radio frequencies as a normal remote control.

How Does The NEO Smart Blinds App Work?

The app uses WiFi or cellular data to send commands over the internet to the Simplicity Smart Controller.

Do I Need Any Other Equipment?

Yes, The location where your shades are installed must have WiFi in order for the Simplicity Smart Controller to work. Additionally, you must have a smartphone or tablet running Android or iOS (eg. iPhone, iPad, Samsung Galaxy S7) and have the NEO Smart Blinds app. installed.

Why Would I Want A Simplicity Smart Controller?

There are two main ways the Simplicity Smart Controller adds additional value to your motorized shades. First, once all of your shades have been added, you can use your smartphone as a single remote for all of your shades that will work anywhere you are regardless of distance from the shade. Secondly, the device allows you to set schedules so your motorized shades automatically open and close without needing to do anything on a day to day basis.

Do I Need To Buy More Than 1 Controller?

The normal use for the Simplicity Smart Controller is to plug it in out of the way and forget it. Since it has roughly the same range as a remote you will want enough devices to allow all shades to be operated without moving the controller. So depending on the layout of the home and location of the shade, you might want multiple devices to have convenient full home coverage.

How Far Is The Range Of A Controller?

You should see a range of approximately 150 ft. However this number might be less depending on the layout of your home. In general we recommend one per a floor of a normal sized home.

Can I Control My Shades From Multiple Devices?

Yes! You can download the NEO Smart Blinds App onto multiple devices, After installing the App. on a new device simply log in with the same email/password on each device and you will have access to control your shades.

Can It Be Used With Already Installed Shades?

Yes! Simply follow the directions in the NEO Smart Blinds app. to add a shade. At the pairing step you can put the shade in pairing mode using the primary remote control (or by accessing the button on the shades motor). Adding the shade to the NEO Smart Blinds App. will not affect the normal remote operation.

How Much Does The NEO Smart Blinds App Cost?

The App is a free download, However you must have at least one Simplicity Smart Controller to serve as a bridge between the App and your shades.

Cellular Shade Collection

7.4V RECHARGEABLE POWERTOCH MOTORIZED HARDWARE SYSTEM

**Simplicity Motorized Rail Dimensions**

- Depth of rail: 2"

Cellular Shade Collection

7.4V RECHARGEABLE POWERTOCH MOTORIZED HARDWARE SYSTEM

PowerTouch™ Rechargeable Shades

Cellular Shades can be fabricated with the PowerTouch Rechargeable Push Button Control option. The PowerTouch Rechargeable option is an easy, cord free motorized operation for the budget savvy homeowner. PowerTouch Rechargeable uses Simplicity motors and components.

PowerTouch Rechargeable Shades Operation

Press the up or down button on the pendant to raise or lower the shading to your desired position.

No programming is required with PowerTouch™, all programming is set at the factory. Upper and lower limits can easily be adjusted in the field if desired. Please refer to the installation instructions at comfortex.com/comfortex-dealers. A "favorites" or intermediate stop position can be set once installed.

PowerTouch Rechargeable Surcharges

See page 15.

PowerTouch Appearance

- The PowerTouch wand and pendant is attached to the head rail when installed.
- The wand and pendant hangs down the front of the shades from the head rail. The wand does not touch the fabric.
- Pendant is 2½" long.
- The pendant does not need to be mounted to the wall to operate the shade.

PowerTouch Rechargeable Color Options

- Shades with Black or Oil Rubbed Bronze hardware will be built with black wand and pendants standard. All other colors will use white wand and pendants.

White

Black Shown with Plug-In Charger

PowerTouch Wand and Pendant Location

The standard location for the wand and pendant is on the right. Please specify location when ordering.

PowerTouch Rechargeable Wand Length

- The standard length of the wand will measure the indicated below unless otherwise specified.

Shading Length	Standard Wand Length
Up to 30"	1' (12")
>30" to 52"	2' (24")
>52" to 78"	3' (36")
>78" to 100"	4' (48")
>100" to 120"	5' (60")

Mounting Requirements for PowerTouch Rechargeable Shades

- No special installation hardware or wiring requirements are needed.

Battery Charger

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

PowerTouch Rechargeable Shades Warranty

Please see Policy PDF for complete warranty information.

Cellular Shade Collection

OVATION CELLULAR SLIDER HARDWARE SYSTEM

Ovation Hardware Rail Dimensions

- Depth of rail: 3"
- Depth of rail and bracket: 3 1/8"
- Depth of rail, bracket & valance: 3 3/4"
- Height: 1 3/4"

Hardware Features	
Standard Hardware Color	Aspen White #785
Optional Hardware Colors	Ivory, beige, tan and gray rails are available as an option. Visit comfortex.com to view color options <ul style="list-style-type: none"> • Gardenia White #862 • White Tierra #661 • Silverado #276
Mounting Dimensions	
	Ovation Hardware System
Minimum Inside Mount	3/4"
Minimum Flush Mount	3 5/8"
Minimum Outside Mount	5/8"
Finished Dimensions	
Inside Flush Mount	
Track Width:	
Right or Left Stack	3/16" less than ordered width
Split Stack	3/16" less than ordered width
Center Stack	3/16" less than ordered width
Finished Slider Length	1/2" less than ordered length
Valance	3/16" less than ordered width
Outside Mount	
Track Width	Ordered width
Finished Slider Length	Ordered length - No reductions will be made
Valance	Ordered width plus 1 1/4"
Valance Returns	Will measure 3 1/8" (standard)

Cellular Shade Collection

OVATION CELLULAR SLIDER HARDWARE SYSTEM

Applications

- Standard Rectangular
- Opens and closes from side to side
- Four stacking options - see below.
- Dual Panel option with a center opening design with two fabrics, one on each side, each spanning the width of the window.

Ovation Stacking Options

Specify stacking configuration when ordering.

Left: Fabric stacks to the left side of the slider.

Right: Fabric stacks to the right side of the slider.

Center Stack: Center Stack Sliders fabric panels can move fully to the left or the right.

Split Stack: Fabric is split in the center of the slider forming two equal panels which open to opposite ends of the slider. Both panels will be of equal width unless otherwise specified. Split stack is not available with Gradient shades.

* Split stack sliders are available in maximum widths from 240" to 336" (maximum width depends on the fabric selected). If the width exceeds the maximum width of the fabric, it will be fabricated as two separate sliders. The supplied valance will create the appearance of a single slider. Call Customer Service for assistance.

Dual Panel: A Dual Panel Stack Slider has a center opening design with a different fabric on each side, each of which can span the full width of the window. Both panels will be of equal width unless otherwise specified. Specify which fabric stacks to left and which fabric stacks to the right.

Ordering Information for Ovation Cellular Sliders

- Specify IB or OB mount.
- Specify stacking configuration.
On Dual Panel Shades, specify which fabric stacks to the left and right.
On Split Stack Shades, both panels will be of equal width unless specified.
- Specify valance width and return length.

Ovation Valance Specifications

- Every Ovation Slider is supplied with a painted aluminum valance to match your hardware color choice.
- The valance attaches to the head rail using a durable plastic clip system.

Ovation Valance Dimensions

All valance dimensions are measured on the flat, back side.

- Valance Height: 3¼"
- Standard Return Length (OB only): 3⅞"
- For each spacer block, ½" will be added to the length of the valance returns. For extension brackets, 2" will be added unless otherwise instructed.
- If the slider requires a non-flush inside mount, you must order a custom valance. Exact valance width and exact valance return length (minimum 1½") must be specified in the Special Instructions section of the order form.
- Custom returns are available for IB non-flush and OB Cellular Sliders. Please specify return length upon ordering.

Things to Consider

- Since most Ovations are sold in large sizes, the shade will have a large fabric stack. On an outside mount, you may want to order the shade a few inches wider so that the fabric stack can be clear of the window. For more information on Ovation's stack height, see pages 77-78 for information.
- Premiere Custom Design fabrics will be turned 90 degrees on Ovation Shades. The pattern orientation will be left to right since Ovation shades open side to side. Split stack is not available with Gradient shades.
- Symphony double honeycomb fabric may require additional care when opening or closing the shade. Double honeycomb fabric is generally stiffer than single honeycomb material and may offer minor resistance when opening and closing. If this is a concern, Comfortex recommends selecting a coordinating fabric from the Virtuoso or Baritone collections.

The Ultimate Blackout Cellular Shade

INSULATING SLUMBERSHADES HARDWARE SYSTEM

Cordless Ultra Rail

- Depth of rail: 2"
- Depth of rail and bracket: 2 1/4"
- Height of rail: 1 1/2"
- Height of bracket: 1 13/16"

Hardware Features		
Hardware colors for all Cellular fabrics	Color coordinated head, middle, bottom rails and end caps	
Blackout Sidetrack Colors Available	White, Tan and Bronze	
Upgrades		
Fabric Wrapped Upgrade	Fabric used is same fabric as the shade. Back of rail is white to outside.	
Designer Metallic Upgrade	• Oil Rubbed Bronze head, middle, bottom rails and end caps.	
Mounting Dimensions (inside mount only)	Standard Head Rail	Deluxe Head Rail
Standard Cord Lock (Standard Rectangular and Top Down-Bottom Up)		
Minimum Inside Mount	1 1/2"	1 1/2"
Minimum Flush Inside Mount	2"	2 3/8"
Cord Loop & Cordless Ultra (Standard Rectangular and Top Down-Bottom Up)		
Minimum Inside Mount	1 5/8"	NA
Minimum Flush Inside Mount	2 1/4"	NA
Outside, shallow and side mounts are not available. The shade's light blocking ability is compromised by using any other mount than a fully flush mount application.		
Finished Dimensions		
Inside Mount		
	<ul style="list-style-type: none"> • Fabric will measure ordered width less: 7/8" • Head rail and bottom rail will measure ordered width less: 1 1/16" • Sidetrack length will measure ordered length less: 1/8" 	

The widest width of the window cannot exceed the narrowest width of the window by more than 1/4".

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest 1/16" and provide the **NARROWEST** width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom.

The Ultimate Blackout Cellular Shade

INSULATING SLUMBERSHADES HARDWARE SYSTEM

Insulating SlumberShades Small Track Dimensions

Used with all fabrics standard size head rail.

Small Track

- Width of track: 1"
- Height of track: 7/8"

Insulating SlumberShades Large Track Dimensions

Used with all fabrics that utilize the deluxe sized head rail.

Large Track

- Width of track: 1 1/8"
- Height of track: 7/8"

Applications

- Standard Rectangular
- Top Down - Bottom Up
- Cordless and Cordless Top Down - Bottom Up
- Cord Loop and Top Down - Bottom Up
- Motorization

SlumberShades are for inside mount applications only.

Insulating SlumberShade Fabric

Light Filtering fabrics are available as SlumberShades, however the best light control is achieved by using a blackout cellular fabric.

Ordering Information for Insulating SlumberShades

SlumberShades are for inside mount applications only.

Precise width measurements are critical to proper performance of SlumberShade products. Make sure to measure to the nearest 1/16" and provide the **NARROWEST** width measurement along the length of the window. Be sure to measure the top, middle and bottom of the opening. It is very common for the width of a window to vary from top to bottom. The widest width of the window cannot exceed the narrowest width of the window by more than 1/4".

If you have questions about ordering SlumberShades, contact Comfortex Technical Services at 800-843-4151.

Accessories

- 3' Expandable Pole - Silver: (see pg 26)
- 5-10' Expandable Pole - Black:

Specially designed pole end fits into the handle on the Cordless Ultra bottom rail and allows for easy operation.

Note: Pole operation with Slumbertrack can cause the rail to tilt and can make smooth operation difficult.

Insulating SlumberShades Features

Use SlumberShades to provide the darkest sleeping environment by sealing out all the light

Energy Saving Blackout Sidetracks

Energy saving blackout sidetracks are made from a durable window grade PVC. The blackout sidetracks seal off the light gap between the blackout cellular shade and the window. The blackout sidetracks feature a black interior lining to absorb light and prevent it from entering the room.

Motorization Options

Learn about the motorization options on pages 129-142.

SlumberShades are easy to install, and feature removable sidetracks that are attached to the window frame with magnets. The sidetracks can be removed for window cleaning. The UV stable, window grade PVC sidetracks are available in white, tan and bronze to match your existing trim.

Please Note: When properly installed, SlumberShades block 99% of all visible light. In certain installations with intense sunlight, a very small amount of light may reflect around the edges of the honeycomb fabric along each side of the shade. This is a normal attribute of the SlumberShade system.

Insulating SlumberShade End Caps

The specially designed notched bottom rail end caps fit over the blackout sidetracks and allow for smooth movement when raising and lowering the shade.

Head and Bottom Rail Seals

To ensure a perfectly dark sleeping environment, additional fuzz seals are supplied to be placed along the shade's bottom rail and between the head rail and the window frame if needed. These barriers provide a complete light stop all the way around the window to keep all exterior light out. Also, these additional seals provide a very effective barrier against heat loss along your windows.

Magnets and fuzz bar are standard on Cordless and Cordless Top Down-Bottom Up Shades to ensure closure between the bottom rail and window sill.

Energy Efficiency

Independent testing has shown SlumberShades provide an R-value greater than 7.0* when installed over a double paned vinyl window. The testing also indicates that the R-value of a SlumberShade is 2.5 to 3 times higher than that of the same shade without sidetracks. The insulating cellular fabric, sidetracks, and fuzzy seal all ensure that the SlumberShades provides superior energy efficiency.

* Independent testing provided by Consortium for Advanced Residential Buildings (CARB), a U.S. Department of Energy Building America research team. Learn more at comfortex.com/comfortex-dealers.

- Fabric will measure ordered width less: 3/16"
- Head rail* will measure ordered width

* Head rail measurements include endcaps. Width and length measurements may vary +/- 1/8"

Applications

- Stationary Fan Style Quarter Round
- Movable Fan Style Quarter Round

Accessories

- 5-10' Expandable Pole - Black

Specially designed pole end fits into the handle on movable Quarter Round Shades for easy operation.

Ordering Information for Quarter Rounds Shades

- Specify IB or OB mount and rail color.
- Include a template if the shade is a non-perfect quarter round.

Cellular Specialty Shades

QUARTER ROUNDS HARDWARE SYSTEM

Quarter Rounds Features (Figure A) pg 71

All Quarter Round Shades which are not perfect quarter circles require a template. Price according to the largest radius measurement.

- See page 93 for template instructions.
- **All templates should be made from brown craft paper.** Comfortex offers template kits. Please contact Customer Service to order. Stock number: 751000
- The horizontal (moving) rail of a Movable Quarter Round shade **must be smaller** than the vertical (stationary) rail to allow clearance for the moving rail. The shade will stack in the vertical position.
- When ordering arches as perfect quarter circles, make sure the radius of the arch remains constant to ensure a proper fit. (See Figure B) pg 71

Operation

Moveable Quarter Round

Pull the cord down to bring the shade to a stacked position.

The shade stacks against the vertical rail.

Push the button in on the cord cleat to release the cord and lower the shade across the window.

WARNING: To avoid possible strangulation, keep cords out of reach of children.

Specially designed pole end fits into the handle of Balcony shades for easy operation at any angle.

Cellular Specialty Shades

BALCONY SHADING HARDWARE SYSTEM

Balcony Shading System Features

- Balcony Shades work in three orientations applications: Angled, Horizontal and Vertical.
Horizontal works on slope angles 0 to 15 degrees.
Angled works on slope angles 15 to 75 degrees.
Vertical works on slope angles 75 to 90 degrees.
- Balcony shades can be mounted on their side. (See Figure A). Use the vertical measurement as your width (max. 36") and the horizontal measurement as your length (max. 48").
- Polycarbonate track system provides superior insulation and light blocking. The enclosed sides provide full privacy.
- No exposed cords, eliminates risk of injury to children.

Balcony Vertical Applications

All Mezzo Shades with Rechargeable Simplicity motors come with a front-facing, flip-top cover for convenient access to the charging port, reset button, and on/off switch.

More information and pictures on page 81.

Ordering Information for Mezzo Motorized Skylight Shades

- Specify inside mount dimensions.
- Specify fabric color and style.
- Specify remote and other accessories if needed.

Cellular Specialty Shades

7.4V MEZZO RECHARGEABLE MOTORIZED SKYLIGHT HARDWARE SYSTEM _____

Applications

- Angled and Vertical motorized skylight shades.
- Mezzo Motorized Skylight Shades are for inside mount applications only.
- Skylights with Simplicity motorization will not operate properly if installed in a completely horizontal application. The minimum recommended slope is 5 degrees.
- Must be mounted with fabric stack at top.

RECHARGEABLE SIMPLICITY MOTORS

The Simplicity Motor program features a battery powered motor utilizing a rechargeable battery hidden inside the shade head rail. Simplicity motors are compact and use a radio frequency remote to raise or lower the shades.

Simplicity Rechargeable Battery

The rechargeable battery is concealed in the head rail of the shade. A charger is required for the rechargeable battery. The rechargeable battery comes fully charged from the factory.

Shades with width of 18"- 20" require the battery wand to be mounted externally.

Charging Port on Back of Head rail.

Snap-On external battery for Mezzo shades under 20" in width.

Top Down-Bottom Up Simplicity Motor Hand Held 14 Channel Remote

The TDBU remote has 14-channels. Each channel has a setting able to operate the middle rail and a setting able to operate the bottom rail. The TDBU remote is required for TDBU motors, but can be used with other motors as well. The **14 Channel TDBU remote** can operate up to fourteen shades individually or 14 groups. Simplicity Rechargeable Motorized Cellular Shades are programmed at the factory with the "up and down" limits. The shades are **UNLINKED** from the remote so they are not able to operate during shipping. Each shade should be installed **after** linking it to the remote.

Simplicity TDBU remotes and holders are white in color. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet. A **14 Channel (14C) remote** can be utilized on all Simplicity motorized shades.

Solar Panel Recharge Option

Plugs in to any Simplicity Rechargeable Remote control shade (does not work with PowerTouch)

Provides constant trickle charge to 7.4v Li-Ion Rechargeable battery packs. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.

Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

Dimensions of panel
18½" x 1½"

- Solar Panel with Mounting Brackets: \$120.00

Solar Recharge Optimum Application

- Full direct sunlight (minimum 2 hours per day) to maintain full charge. Based on one operation cycle per day (one open, one close).
- Excessive duration of cloudy weather will impact the rate of charge.
- Avoid any obstructions including mullions and screens.

Solar Panel Mounting

Bottom portion of the bracket may be lowered if needed for more sun exposure. Bracket can be mounted behind or next to shade mounting bracket.

Tape goes on the face (black side) of the panel.

If the solar panel is mounted directly behind the headrail at the top of the window, you need to make sure that the solar panel does not interfere with the shade mounting brackets also. The solar panel can go between brackets spaced apart, or behind brackets if the depth of the window casing allows.

Cellular Specialty Shades

7.4V MEZZO RECHARGEABLE MOTORIZED SKYLIGHT HARDWARE SYSTEM _____

**Battery Charger**

8.4 Volt charger requires a standard power outlet to recharge the battery. You must specify charger when ordering a Simplicity Rechargeable Shade. The charger plugs into the charger port. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2½" length x 1¾" deep.

**Important Simplicity Motorized Shades Operating and Installation Information**

- Simplicity Motorized Shades installed into windows with metal casings may have a reduced radio frequency range, or may not operate at all, depending on the application.
- Do not let the antenna on the motor touch any metal objects. This may interfere with signals from the remote control.

Front Access Control

All Mezzo Shades with Rechargeable Simplicity motors come with a front-facing, flip-top cover for convenient access to the charging port, reset button, and on/off switch.

Shades with front control access include an auxiliary charging port in the back. This port is ideal for a solar panel charging kit or for shades where a top treatment may limit access to the front-side port.

Cellular Specialty Shades

FRENCH DOOR DÉCOR HARDWARE SYSTEM

Applications

- Stationary Door Décor
- Movable Door Décor
- Top Down - Bottom Up Door Décor
- Cover french doors, transoms, and side lights.

French Door Décor Hardware Features

- Features two non-moving rails which are mounted in the window or door. A tension control system enables the movable rail to be easily moved with the touch of a finger. The only visible cords are the ones that hold the movable middle rail in place.
- The widest width of the window cannot exceed the narrowest width of the window by more than $\frac{3}{8}$ ".

Stationary Non-Movable French Door Décor Shades

- Top and bottom rails are mounted to the window and are stationary.

Movable French Door Décor Shades

- Top and bottom rails are mounted to the window, one middle movable rail raises from the bottom.

Top Down - Bottom Up Option

- Top and bottom rails are mounted to the window, two movable rails allow the shade to lower from the top and raise from the bottom.
- The non-movable top and bottom rails are attached to the window or door.
- Ideal for entry ways with narrow windows next to doors and other narrow windows that are easily accessible.

Ordering Information for French Door Décor

- Specify IB or OB mount and rail color.
- Specify stationary, movable or Top Down - Bottom Up.

Comfortex
WINDOW FASHIONS

Custom Graphic Shades

CELLULAR SHADE FEATURES & GENERAL INFORMATION

Custom Graphics

With Custom Graphics, you can print anything on a Cellular Shade. From logos to personal photos, theme room graphics or advertising for your storefront, anything you envision can be featured on a Custom Graphics Cellular Shade.

Hardware | Mounting | Finished Dimensions

[See Page 45](#)

Available Fabrics

Custom Graphics are available with the following fabrics:

- Premiere ½" and ¾" Light Filtering Fabrics
- Premiere ½" and ¾" Blackout Fabrics

Custom Graphics can work for any window.

Advertising and Store Identification

Contact local businesses and explain how you can turn their window space into advertising!

Decorative and Personal Photos

Customers can now convert their special photos into a highly personalized room!

Printing Information and Options

Custom Graphics will look different from fabric to fabric. The color vibrancy on cellular shades will be muted due to the density of the fabrics and the printing process.

To view examples on Cellular Shades, visit the Custom Graphic section of the Comfortex website.

Single Sided Printing:

Cellular Custom Graphics are available as single-sided only. Double-sided graphics are not available.

You can choose to have Side A face the room side or the street side.

Side A
Shows Printed Image

Side B
White Fabric

Ordering Information for Custom Graphics Cellular Shades

Step 1. Fill out the Custom Graphics Cellular Shades

Order Form. This form includes your fabric and hardware selections. Fax the completed order form to (800) 336-4580 to place your order.

Custom Graphic orders can only be placed by faxing this form.

Step 2. Receive your Comfortex Work Order Confirmation number. Be sure to reference this number when submitting you artwork in Step 3.

Step 3. Send your graphic files via email to:
CustomGraphics@Comfortex.com

Or ship a CD containing your graphics to:
Custom Graphics
Comfortex Window Fashions
21 Elm Street
Maplewood, NY 12189

Graphic File Specifications

Preferred Formats:

- Adobe Illustrator
- EPS

Other Accepted Formats:

- TIFF
- JPEG
- PSD

- All typography should be converted to paths when submitting an Illustrator or EPS file.
- TIFF and JPEG files should be submitted at the largest size possible, 300 DPI is preferred. We will size your graphics according to your shade size and specifications.
- Contact Comfortex Customer Care at 800-843-4151 with all questions regarding Custom Graphic Orders.
- Comfortex will not print any copyrighted custom graphics without appropriate permission.

Step 4. The Custom Graphic Team will email a PDF proof of your shade order for you to approve. Once the artwork is approved, it will take two weeks for your order to be printed, assembled, and shipped.

Custom Graphic Shades

CELLULAR SHADE FEATURES & GENERAL INFORMATION

How to order Custom Graphic Shades

STEP 1. FAX OR E-MAIL YOUR ORDER

Fax the appropriate Custom Graphics Cellular order form located on comfortex.com/comfortex-dealers to (800) 336-4580. Or e-mail the order form to customercare@comfortex.com. Upon receipt and review of your order, you will receive a work order confirmation number from Comfortex. Please be sure to reference this number when submitting your artwork in Step 2.

STEP 2. SOURCE AND SEND YOUR GRAPHIC

Source your graphic from a stock photo site such as www.istockphoto.com or use your own high resolution photography. Send your files via e-mail to: customgraphics@comfortex.com OR ship a CD/portable media containing your graphics to:

Custom Graphics
Comfortex Window Fashions
21 Elm Street
Maplewood, New York 12189

Using Online Stock Agencies for Graphics for Your Shades

Sometimes, finding the right graphic or photograph to fit your shade size, shape, or content can be challenging. Fortunately, many web sites offer a great solution. Online stock agencies allow you to purchase reasonably priced, royalty-free digital illustrations, graphics, photographs, patterns, and more in thousands of different subject areas. Some of the more popular sites include:

- thinkstock.com
- istockphoto.com
- veer.com
- shutterstock.com
- gettyimages.com
- 123rf.com
- photosearch.com

Using these sites is easy, simply follow these steps:

Step 1. Create an account and search for your image (i.e. apples).

Step 2. Select, purchase, and download the image you like. You may be given a choice of sizes, so take care to select an option large enough for your needs. Be sure to include the Work Order Confirmation Number received from Comfortex Customer Service with your graphic files.

STEP 3. APPROVE YOUR PROOF

The Custom Graphic Team will email a PDF proof of your shade order which must be reviewed and approved for production to begin. Once the artwork is approved, it will take 2 weeks for your order to be printed, assembled, and shipped.

Graphic File Specifications

Preferred Formats

- Vector files/Adobe Illustrator (AI or EPS)
Please convert all typography to paths prior to submitting your vector artwork.
- TIFF, JPG/JPEG, or Adobe Photoshop (PSD) files with a minimum resolution of 100 pixels per inch at 100% size. For example, a shade measuring 30" x 40" should be supported by a graphic measuring at least 3000 x 4000 pixels.
- Adobe Acrobat (PDF) files created in "Press Quality" or "High Quality Print" with a minimum resolution for all raster elements of 100 pixels per inch at 100% size.

Graphics optimized for, or harvested from the internet are, in general, not suitable for reproduction onto shades.

Comfortex will seek to verify ownership and rights to reprint for all images showcasing copyrighted material.

Cleaning & Care

Cellular Shade Collection

GENERAL INFORMATION

Scotchgard™ and Certified Fabrics

Scotchgard Protection

Scotchgard™ Protector is available with all cellular Shades. Scotchgard™ keeps your shades looking newer, fresher and cleaner longer.

A combination of the latest advances in stain release and repellency provides exceptional stain protection. Spills wipe away easily and most dirt and stains lift out when cleaned. Both sides of the fabric are treated with Scotchgard.

GREENGUARD Certified Fabrics

GREENGUARD Indoor Air Quality Certified® Fabrics
The GREENGUARD Environmental Institute has established performance based standards to define goods with low chemical and particle emissions for use indoors.

The following fabrics have the passed GREENGUARD Indoor Air Quality Certified® certification program for low emitting interior building materials, furnishings, and finish systems:

- Symphony (All)
- Baritone (All)
- Natural Linen Flax
- Virtuoso (All)
- Premiere (All)
- Debut (All)
- Linen Weave

The following fabrics have the passed GREENGUARD Children & SchoolsSM product certification program for low emitting interior building materials, furnishings, and finish systems used in educational (day care and K-12) environments:

- Symphony Light Filtering
- Symphony Blackout

Symphony Flame Resistant Fabrics

Symphony Flame Resistant Fabrics have been registered as a Flame Resistant Products by the California State Fire Marshall for products identified in section 13115, California Health and Safety Code (California CHSC). Copies of the certificates are located on the Comfortex.com/comfortex-dealers web site or on the On Demand Mobile library.

Color Selection

Use the current Cellular Shades Collection sample book to select colors from the Symphony light filtering fabric collection. All thirty colors are available in 3/8" Symphony light filtering double cell and 3/4" light filtering single cell.

Ordering Flame Resistant Shades

The SKU structure for Symphony Flame Resistant material is: 3012 05 XXX (XXX representing the color number).

To order Symphony Flame Resistant Shades: Use the SKU number listed on the decks.

The SKU structure for the 3/4" Symphony Flame Resistant material is: 2512 05 XXX

To order 3/4" Symphony Flame Resistant Shades:

Use the Symphony three digit color number to identify your desired color.

In this example:
2512 05 108

EZ Level on Comfortex Cellular Shades

EZ Level makes quick work of leveling without cords to cut or tuck into a rail. No special tools needed – just use a nickel, quarter or penny to adjust plug on the bottom rail.

EZ Level is standard on all Cellular and Pleated Shades with the following hardware systems:

- Standard and Deluxe Cord Lock
- Cordless Ultra
- Cord Loop
- SlumberShades
- Simplicity Motorized Systems

EZ Level is not available with Lift & Lock Cordless.

How does EZ Level work?

- Slightly raise the bottom rail you want to level.
- Insert a coin or flat head screwdriver into the adjustment screw and turn it.
- Turn the adjustment screw clockwise or counter clockwise to make slight adjustments up or down.

- One quarter turn of the adjustment screw will move the bottom rail up or down 1/4".
- Lower the rail to check the level and make further adjustments if necessary.

Cellular Shade Collection GENERAL INFORMATION

Cleaning and Care

While beautiful and pleasing to the eye, all Comfortex products are designed to be durable, easily cared for and easily cleaned. Our non-woven fabrics are inherently anti-static and repel dust, but occasional feather dusting or vacuuming may be necessary to keep the fabrics clean and bright. Comfortex Cellular fabrics may be ultrasonically cleaned.

Cleaning Symphony Blackout Fabrics: Our blackout fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. To spot clean, use a cloth or sponge dipped in a light solution of lukewarm water and clear dish detergent and lightly dab. Do not scrub the surface. Rinse thoroughly.

Cleaning all other Comfortex Cellular Fabrics:

Our light filtering and room darkening fabrics are inherently anti-static and repel dust, but occasional cleaning may be necessary to keep the fabrics clean and bright. The fabric can be dusted with a soft, clean cloth, feather duster or lightly vacuumed with a soft brush attachment. Spills and stains can be lightly blotted with a cloth or damp sponge. More difficult stains may require soaking in water with mild soap. For this, remove the shades from the window and soak in warm water. Complete immersion of hardware is not recommended.

DO NOT submerge the Cordless Ultra head rail in water. When damp, lay flat to dry or place back in window and raise tightly to recrisp pleats. Please test any stronger cleaners on an unobtrusive portion of the shade before using.

For additional advice on care or cleaning, please contact our Technical Services Department.

Scotchgard™ Treated Shades

The following are the recommended cleaning and care instructions for window treatments with fabric treated with Scotchgard™ Protector.

- Gently blot liquid stains immediately with a clean, white cloth.
- If stain remains, prepare a solution of ¼ teaspoon of clear, non-bleaching dish detergent mixed with 1 cup of lukewarm water. Dampen a clean white cloth and gently blot the stain.
- Do not overwet the fabric or excessively rub the stained area.
- See the Installation and Care instructions for complete details.

For additional assistance with stain removal, call the Scotchgard™ Protector Service Center at 1-800-433-3296. Customer Care representatives are available Monday through Friday, 8am to 6pm CT.

Cut-Outs

Cut-outs are available with all cellular fabrics and are subject to approval by the Comfortex Technical Service department.

There are no limits on cut out lengths. There are limits on cut out widths:

Cellular shade widths 18" or less 3" maximum width
Cellular shade widths greater than 18" 5" maximum width

Cellular Shade Collection GENERAL INFORMATION

Cellular Shade MEASURING INSTRUCTIONS

Comfortex accepts measurements down to $\frac{1}{16}$ " increments.

Inside Mount

Use a steel tape to measure the opening at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade $\frac{3}{16}$ " narrower so it will not rub against the window casing. Measure the height of the window from the top (soffit) down to the sill.

Outside or Ceiling Mount

Use a steel tape to measure the exact height and width of the area to be covered. It is recommended that the shades overlap the window by at least $1\frac{1}{2}$ " on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least $1\frac{1}{2}$ ". Shade fabric will measure width indicated on the order form.

Measuring for Specialty Shapes

Templates are required with some specialty shade orders. Consult the individual product sections of this guide for specifics regarding accurate measurements and mounting information.

Arches and Quarter Round Circles

- Measure the window height and width appropriately for an inside or outside mount.
- With perfect arches, the height will be one half the width. With perfect quarter rounds, height will equal width. If the arch or quarter round is perfect, **a template is not required.**
- Windows with imperfect arch measurements do not maintain the height/width relationship. Templates **are required** for these windows.

Trapezoids

- Measure the window height and width appropriately for an inside or outside mount. For outside mounts, remember to add the desired amount of overlap.
- Measure all four sides for accurate fabrication. Provide all measurements. **Templates are not required.**
- The slope angle must be measured with a protractor. Slope is the angle between slope and a horizontal line. The maximum slope is 30 degrees.

Octagons

- Measure the window height and width appropriately for an inside or outside mount. Be sure to measure the width at the shade's widest point.
- Provide the width, length and the length of one side when ordering.

Cellular Shade Collection

GENERAL INFORMATION

Making the Perfect Template

Tape brown craft paper over the window opening. Be sure to allow plenty of overlap and check to see that the paper is smooth and pulled taut. Do not use newspaper as the ink can rub off on fabric. Do not use paper that has been folded. Notice the outline of the framework superimposed on the template as the light filters through the window. You may create the template in one of two ways:

Trace the outline of the window with a pencil and continue along the side of the window frame. Once the window is completely traced, remove the craft paper from the window. Cut out the traced shape with a pair of scissors.

You may choose to skip tracing the window outline with a pencil and cut out the shape immediately with a razor knife.

Once your template is cut, double check its width and height with your initial measurements. Test the template by placing it in the window. Check for light gaps, uneven cutting of curves etc. Trim or remake if necessary.

With arch top shades, fold the template in half. Check the outline of the curve for smoothness, light gaps and curve continuity. Place the template in the window and check it for light gaps or uneven cutting of curve. Trim or remake it if necessary.

On the front of the template, mark the shade measurements along with your company name, account number, sidemark, shade style and color. Be sure to indicate inside or outside mount, the room side and which ends of the template are top and bottom. Do not take any deductions on inside mount shades. The factory will make all necessary allowances for inside mounts.

Remember: The quality of the finished shades depends heavily on the quality of the template supplied. Do not hesitate to remake a template if you feel uncomfortable of the quality of your first attempt.

Template Kits: Comfortex offers template kits which includes brown craft paper, razor knife, instructions and order form. Please contact Customer Service or visit www.comfortex.com to order. Stock number: 751000

Cut-Outs

Cut-outs are available with all cellular fabrics.

Cut-outs are \$69.00 per side and are subject to approval by the Comfortex Technical Service department.

There are no limits on cut out lengths.

There are limits on cut out widths.

Cellular shade widths 18" or less: maximum 3" width cut-out

Cellular shade widths greater than 18": maximum 5" width cut-out

Cellular Shade Collection GENERAL INFORMATION

⚠️ WARNING

Window Blind Cord Can
STRANGLE Your Child.

To prevent strangulation, purchase
cordless products or products with
inaccessible cords.

⚠️ ADVERTENCIA

La cuerda ciega de la ventana
puede ESTRANGULAR su niño.

Para evitar el estrangulamiento,
compre alternativas inalámbricas o
productos con cables inaccesibles.

Child Safety

Comfortex has a long history of designing new child-safety products and is proud to provide a leadership role in cooperating with the Consumer Product Safety Commission (CPSC) for the development of policies and guidelines for the industry by serving on the WCMA Standards Development Committee.

Cord Cleat

Cord
Tensioner

All Comfortex products have been fully tested and proven to comply with the current WCMA Standards for safety of corded window coverings.

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

A cord cleat or cord tensioner is an effective way to implement this essential precaution. Please use them.

To mount the cord cleat at a safe height, take into account furniture or other objects upon which a child may climb. Then, after the use of the blind, simply wrap the excess cord around the cleat.
