Discoveries® Vertical Blinds - Design Features

Louver Options

- Free Hanging
 - Fabric verticals are available free hanging with enclosed weights standard. Sewn-in weights with open pocket sides are optional at no charge. Bottom weights with chains and clips can be requested for sewn-in only. **Note:** Several fabrics are too delicate for shipping with weights and chains inserted.
- Channel Panel Insert
 - Channel Panel insert in color Ivory or White, with crystal clear edges, is available for most fabrics to provide energy efficiency.
- Channel Panel only
 - Channel Panel may be purchased separately (use FH row in price chart to price). Will be supplied with insert adhesive backing. Testing is recommended on a small area as some fabrics and wallpapers may adhere more strongly than others. **We cannot guarantee the insert backing material will adhere to all fabrics.**
- Vinyl
 - May have a keyhole punched and chains inserted as a no charge option. S-shaped vinyl materials cannot be keyhole punched.
- Louver Orientation and Light Diffusion
 - **S-shaped louvers** have distinct left-facing/right-facing louver orientations that affect light diffusion. **Louver orientation must be specified at time of order and cannot be changed in the field.** S-shaped louver materials are designated on page 3.

Product Features - Palladian Window Shelf

- Double beaded hardwood shelf designed to mount horizontally in arched or angled openings to serve as divider and mounting surface for any window fashions product
- Allows area above shelf to be covered differently or uncovered
- Finishes available from Woodland Harvest and Heartland Woods
- Inside Mount Applications only

Size Standards

- Dimensions
 - Height: 1 1/2"
 - Depth: 4" (Can be cut down to 2" minimum upon request)
 - Maximum Length: 8'

Ordering Notes

- Must be installed below the radius of window as routed ends are square
- Specify exact width from jamb to jamb. A 1/16" deduction will be taken by Lafayette.
- Ordered separate from Vertical Blind (Priced by lineal foot - round up from exact width to next highest lineal foot.)

Online Template Service

- Lafayette produced - Flat fee.
- To order a factory-made template visit the Dealer Center of the Lafayette web site at www.lafvb.com
 - Print and complete template order form to be submitted via fax
 - Complete and submit web-based order form online.

Other Special Installations and Options

- Abutted Blinds
 - Channels may be ordered to butt together when dimensions exceed maximum widths. **Exact measurements required.**
- Cut-Outs
 - Free hanging verticals may be ordered for cut-out installations when objects interfere with louvers, i.e. air conditioner, heat register, etc.
- Striping
 - Using same louver material with a different colorway. Number of louvers in each colorway must be specified. (See [page 13](#) for number of louvers in stacking charts for respective headrail systems)

Best Practices for Measuring

- Always use a steel tape or a metal ruler for measuring.
- Always measure every window even though they look the same.
- Check for obstructions that could affect operation of the shade.
- For Inside Mount (jamb to jamb in a window or door, wall to wall in a room), give exact inside to inside width measurements, and top to bottom length measurements of the area to be covered.
- Measure the width in at least three places and specify the narrowest width.
- Measure the length in at least three places and specify the shortest length.
- Take two diagonal measurements. If there is a greater than 3/8" difference in diagonal measurements, outside mount is strongly recommended to avoid irregular light gaps.
- For Outside Mount, measure the exact width and height of the area to be covered.

Measuring Information

- Inside Mount
 - For verticals installed inside an area (jamb to jamb in a window or door, wall to wall in a room) give EXACT inside to inside width measurements, and top to bottom length measurements of area to be covered. **DO NOT MAKE ALLOWANCES.** Factory will make all adjustments. Louvers will clear bottom between 1/4" and 1/2".
 - See Mounting Requirements - pages 8 -9
- Outside Mount
 - Measure exact width and height of area to be covered. No allowances will be made by factory for width or length. When measuring from top of headrail to floor or ceiling to floor, a deduction of 1/2" to 3/4" is recommended. **You must make this deduction!**
 - To cover a window or door, vertical blind should overlap by minimum 3" - 6" on each side to reduce light gap.
 - When installing above a window frame, vertical track should be installed at least 2" above frame or molding. Adjust length of vertical accordingly.

General Advisories

Please examine all merchandise and packages for accuracy and make sure all parts, brackets, etc. are included **before** sending them to be installed. While we constantly strive to make sure each order is exact and complete, we do occasionally make mistakes, and **we cannot be responsible for trip charges or reinstallation charges. Repairs or remakes must be requested within 30 days of invoice date.**
