Product Information - Continuum™ Cord Loop Control

Product Features

- Fits rectangular window openings.
- Shadings open from bottom to top using Continuum cord loop.
- Color-coordinated headrail with fabric insert.
 - [View color coordination chart.](#)
- Color coordinated cord loop, bottom rail and end caps.

Size Standards

- [Continuum: Page 4](#)

Important Child Safety Note

In order to comply with the ANSI approved Standard For Safety of Window of Window Covering Products all supplied cord tension/locking devices or cord cleats must be properly installed.

Standard Cord Drops

Shade Length	Drop	Shade Length	Drop
16" - 26 7/8"	12"	60" - 83 7/8"	48"
27" - 39 7/8"	24"	84" - 107 7/8"	60"
40" - 59 7/8"	36"	108" - 132"	72"

• *Note: Specified lengths outside of the above measurements will have a white cord.

- [Design Option Details - Page 19](#)
- [Motorization - Pages 12-14](#)
- [Exclusions - Page 5, 2-on-1 Headrail with End mount \(EB\)](#)

Ordering Notes

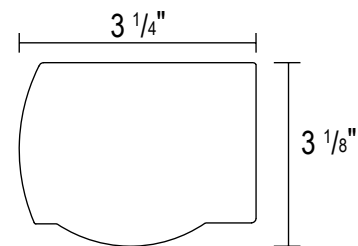

- Specify Inside (IB), Outside (OB) or End (EB) mount.
- Specify Right or Left control
- Specify side by side vane alignment if desired.
- For 2-on-1 Headrail, panel widths may or may not be equal.
 - With unequal panels, smaller panel must be at least 1/3 the measured width of larger panel.

Caution

- Vane alignment is only guaranteed within 1/4" when shadings are ordered at same time, same height, same color and fabric.
- The degree of maximum vane closure varies slightly from the top to the bottom of the shading. Due to added weight in room dimming vanes the variance may be slightly more pronounced.
- As with all textiles, product is subject to some variations. Slight wrinkling, puckering, or bowing is inherent to this textile product and should be considered normal, acceptable quality. These characteristics are not usually visible from the front or rear but may be visible from a side angle. Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure through open windows and doors will accelerate the fabric deterioration.

Pricing

- [Pages: 7-10](#)

Shade Operation

- Pull down on rear half of cord to lower shade and open fabric vanes. Pull down on front half of cord to close vanes and raise shade.
- The Continuum cord loop allows for adjustment of fabric vanes from open to closed and anywhere in between.

Product Information - Somfy Battery/Rechargeable Operated Series

System II Information (1.1Nm)

- 12V DC Motor
- Can be powered via 8AA Lithium batteries, Solar Pack Kit, Transformer, hardwired, or rechargeable battery pack
- Adjustable speed 10 - 28 RPM
- Compatible with all of Somfy's RTS transmitters

System II Motor

R28 WireFree Information

- Built in lithium-ion rechargeable battery (2600 mAh)
- Adjustable speed 10 - 28 RPM
- Compatible with all of Somfy's RTS transmitters
- 55 decibels
- Soft Start/Soft Stop

Somfy myLink Overview

- WiFi to RTS bridge that can control up to 16 channels of RTS motorized products using the Somfy myLink apps for iOS and Android devices.
- Using the app, users can send immediate RTS commands, create Scenes and Schedules.
- Users can access their myLinks from anywhere with the apps' remote access feature.
- Multiple myLinks can be joined within the same system for multi-zone control.
- Can also serve as an IP to RTS bridge for 3rd party control systems.
- Amazon Alexa integration
- IFTTT (If This Then That)

Product Information - Auto-Wand Motorization Version 2.0

Auto-Wand V2 Product Features

- Battery operated motor with wand control.
- Economical child safe solution with no cords.
- Up or Down position controlled by button on wand.
- Top and bottom limits can be set.
- Li-ion battery is internal and rechargeable. (2200 mAh)
- Wand is White, Gray or Black.
- Wand control is on either side of the shade.
- Rechargeable battery can offer 6 to 12 months on a single charge under normal conditions.
- 5 Year Motor Warranty

Product Information - EZ Charge™ Lithium Rechargeable Series

EZ-Charge Version 2.0 (1.1Nm)(2200 mAh) Product Features

- Battery powered motor with remote control, wall switch or app interface (all purchased separately).
- Lithium-ion battery is internal and rechargeable.
- Remote offers up to 15 channels separately or in groups.
- Electronic stop setting.
- Rechargeable battery can offer 6 to 12 months on a single charge under normal conditions. Charger has a 12' cord sold separately. Extension cables sold separately.
- 6 hours for a full peak charge (from a complete dead to a full charge).
- Warning sound when battery charge is low.
- Adjust speed: 40 RPM (30 RPM or 20 RPM)
- Economical child safe solution with no cords.
- 5 Year Motor Warranty

- To price, add motorization surcharges to shade price.
- [For Motorization Surcharges - Lafayette Motorization Pricing](#)

Caution

- If specified, shades are vane aligned when shipped. Vane alignment will change with use and is not guaranteed after shipment. Each shading individually resets limits at various intervals depending on use. Battery voltage variations can also affect vane alignment.
- Vane alignment is only guaranteed within 1/4" when shadings are ordered at same time, same height, same color and fabric.

Product Information - Sure-Lift Retractable Pull Cord

Product Features

- Fits rectangular window openings.
- Shadings open from bottom to top using a single retractable cord.
- Cord length never varies when shade is raised or lowered.
- Color-coordinated headrail with fabric insert
- [View Color Coordination](#)
- Color-coordinated pull cord, bottom rail and end caps. Tassel is frosted.

Size Standards

- [Page 4](#)

Important Child Safety Note

- In order to comply with the ANSI approved Standard For Safety of Window of Window Covering Products all supplied cord tension/locking devices or cord cleats must be properly installed.

Standard Cord Drops

- Cord length is 40% of the shade length.
- Cord length may be shortened at time of installation for improved child safety.

Caution

- Vane alignment is only guaranteed within 1/4" when shadings are ordered at same time, same height, same color and fabric.
- The degree of maximum vane closure varies slightly from the top to the bottom of the shading. Due to added weight in room dimming vanes the variance may be slightly more pronounced.
- As with all textiles, product is subject to some variations. Slight wrinkling, puckering, or bowing is inherent to this textile product and should be considered normal, acceptable quality. These characteristics are not usually visible from the front or rear but may be visible from a side angle. Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure through open windows and doors will accelerate the fabric deterioration.

Product Information - Specialty Shapes

Product Features - Specialty Shapes

- Fits the following windows:
 - Arch (perfect and imperfect)
 - Extended Arch (perfect and imperfect)
 - Angle
- All specialty shapes are stationary with vanes in the open position.
- Arches and angles are fabricated with a bottom rail.
- Color-coordinated bottom rail;
- Flexible mounting clips support fabric and are installed into window casement.
- Bottom rail rests on sill or on Tenera headrail when positioned above a standard rectangular shading.

Ordering Notes

- Available as Inside (IB) Mount only.
- Available as stationary with vanes in the open position.
- **Exclusions:** Outside Mount, side-by-side vane alignment

Pricing

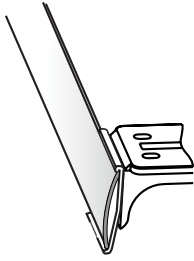

- [Pages 7-10](#)

Product Information - Design Options

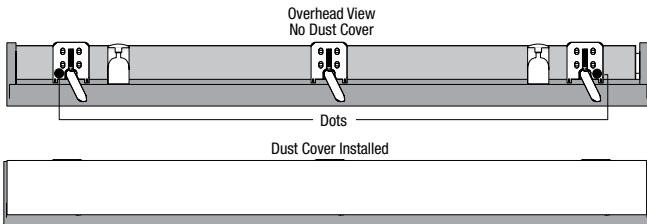

Optional Back Cover

- Used with inside (IB) and end mounts (EB) when necessary to conceal the open rear side of headrail. Back cover and brackets add 1/4" to minimum inside mounting depth.

Optional Top Dust Cover

- Outside (OB) mount shades only.
- Attach to top of headrail
- Protects fabric and internal operating mechanisms from dust, dirt and other contaminants

Side-By-Side Vane Alignment

- When Tenera shades are installed side by side, vane alignment can be guaranteed within 1/4" only if:
 - Shadings are ordered at the same time and in identical style, color and height
 - Shadings that need to be aligned are specified on order form.

Light Gap Stop

- Blocks light gap for shades inside mounted in rectangular openings.
- Comes with self adhesive tape attached for installation.
- Projection is 1 5/8".
- Ordered by lineal foot.
- Made of PVC and available in 5 colors: Black, Bronze, Grey, Vanilla and White

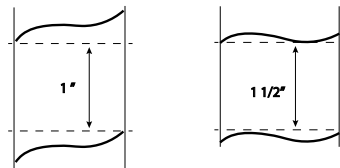

2-on-1 Headrail

- Two shades share a common headrail
- Overall max width is

Vane Operation

- Opened
 - Vanes on all Tenera fabrics open to slightly different degrees when tilted to their maximum open positions.
 - Limit stops located on the top of the headrail halt cord movement to prevent the bottom rail from being retracted too far into the headrail when fully raised. They should not be removed or adjusted. Internal limit stops prevent shadings from over-rotating when in the fully lowered and opened position.
- Closed
 - When vanes of a Tenera shading are closed, they overlap blocking the view. However vanes do not contact each other along full length of shading - they do not form a perfect seal against light leakage. This is most visible toward bottom of shading.
 - Vane closure is measured as distance between front and rear fabric facings 6" up from lowest point of bottom rail, with shading fully lowered and vanes closed.
 - Vane closure for all 2" fabrics is 5/8" for shadings under 60" in height and 7/8" for shadings over 60" in height.
 - Vane closure for all 3" fabrics is 1", regardless of height.

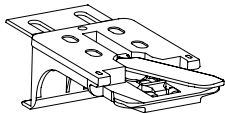

2" Vane Size, 2 1/2" Vane Size

3" Vane Size

Measuring & Installation Information

Bracket Information

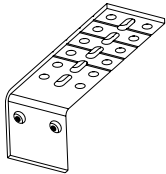

Installation
Bracket

2 3/4", 3 5/8" Projection

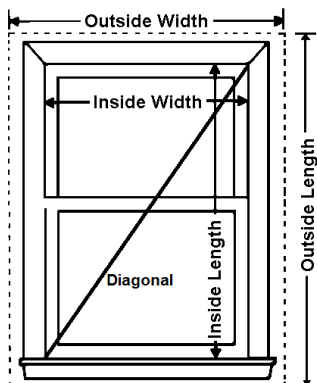

Optional Spacer Block

Item # 15-2012 (3-pack)
Item # 15-2011 (2-pack)

Best Practices for Measuring

- Always use a steel tape or a metal ruler for measuring.
- Always measure every window even though they look the same.
- Check for obstructions that could affect operation of the shade.
- For Inside Mount (jamb to jamb in a window or door, wall to wall in a room), give exact inside to inside width measurements, and top to bottom length measurements of the area to be covered.
- Measure the width in at least three places and specify the narrowest width.
- Measure the length in at least three places and specify the shortest length.
- Take two diagonal measurements. If there is a greater than 3/8" difference in diagonal measurements, outside mount is strongly recommended to avoid irregular light gaps.
- For Outside Mount, measure the exact width and height of the area to be covered.

Measuring for Tenera Shades

- All shade pricing is based on the width and the window opening height. Orders are accepted for inside or outside dimensions, to the nearest 1/16".
- It is critical that the shade brackets be mounted so that the shade is level when installed.
- For an Inside Mount, measure the exact width between the jambs (inside) where the shade is to be mounted. If the end caps are not tightly secured it is possible the shade will not fit in the opening.
- For an Outside Mount, we recommend that the brackets be placed to allow a minimum of 1 1/2" to 2" overlap on each side of the casement. Measure between the point where the brackets are to be placed and specify that as an outside width.

Cord Tension Lock

- Standard on all Tenera shades with Continuum system.
- Must be secured to the wall to provide the necessary tension for the shade to operate.
- Available in white, vanilla, black, brown, clear, or gray. Will coordinate with the fabric color.

Magnetic Hold-Down Brackets

- Secures bottom of shade to prevent swaying

Palladian Window Shelf

- Double beaded hardwood shelf designed to mount horizontally in arched or angled openings to serve as divider and mounting surface for any window fashions product
- Allows area above shelf to be covered differently or uncovered
- Finishes available from Heartland Woods
- Palladian shelf has a 1/32" per foot tolerance for warpage
- Inside Mount Applications only

Size Standards

- Height: 1 1/2"
- Depth: 4" (Can be cut down to 2" minimum upon request)
- Maximum Length: 8'

Ordering Notes

- Must be installed below the radius of window as routed ends are square
- Specify exact width from jamb to jamb. A 1/16" deduction will be taken by Lafayette
- Ordered separate from Tenera Shade (Priced by lineal foot - round up from exact width to next highest lineal foot)
- Exclusions: Outside mount applications

Flame Retardant Coating

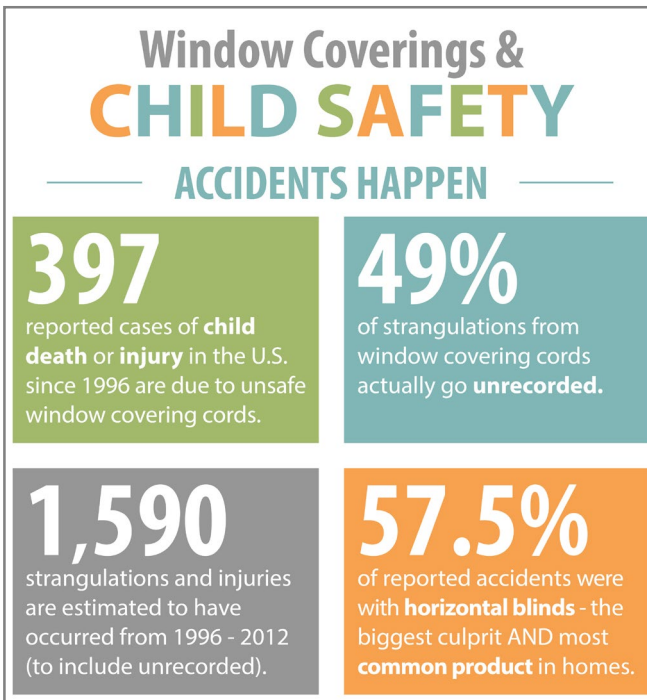

- A flame retardant coating is available for all fabrics and is done through an external facility. The shade is fabricated then sent to an external facility for the flame coating process. Allow four to six weeks extra delivery time for this service. Standard shipping is included. Call for quote on flame retardant coating.

Tenera Care & Cleaning

- Headrail Fabric Insert - Spot-clean headrail using a sponge or delicate cloth, cool distilled water and a mild soap solution; handle with care as you would any fine fabric.
- Dusting - Regular light dusting with a feather duster is all the cleaning that is needed in most circumstances.
- Vacuuming - Use a low suction, hand-held vacuum for thorough dust removal.
- Forced Air - Blow away dirt and debris between the vanes using compressed air.
- Ultrasonic Cleaning - This product can be ultrasonically cleaned by a professional. (Translucent fabrics only)
 - Specify that a mild detergent solution be used.
 - Never immerse the headrail in the solution.
 - Dry the shading completely in the lowered position
- Electrostatic Cleaning - Do NOT use electrostatic cleaning wipes on this product.

CHILD SAFETY

It's your first priority, but child and pet safety is often the last thing you think about when choosing window coverings. Did you know that the most common window products in homes are not child safe? Those horizontal blinds that were there when you moved in are a potential strangulation hazard for your little ones. As our infographic shows, accidents still happen with those long cords.

BEST FOR KIDS™ CERTIFICATION PROGRAM

The Best for Kids™ certification label makes it easy for parents and caregivers to identify products that are best suited for their home.

To become certified, Lafayette Interior Fashions must meet the specified program criteria and submit their window covering products to a designated third party testing laboratory. To pass the tests, the products may not have:

- any operating cords
- inner cords that are accessible
- cords that create a hazardous loop or potential wrap-around hazard

ADDITIONAL SAFETY MEASURES

The window covering industry uses warning tags, labels, and other methods to communicate potential hazards. The warning shown here communicates the important message that cords are a potential strangulation hazard and suggests choosing cordless or inaccessible-cord alternatives. Together with the Window Covering Safety Council, we encourage you to install only cordless window coverings in rooms where children play and sleep.

For kids' sake, we offer a wide array of lifting system options, from cordless and motorized operating systems to retractable lift cords, cord tensioners, and wand controls for enhanced child safety.

All Lafayette products that utilize a clutch system are sent with a Cord Tension Lock. The Cord Tension Lock must be secured to the wall to provide the necessary tension for the shade to operate.

All **motorized** window treatment products offer child safe operation since the motor unit provides the mechanism for raising and lowering the shade.

For additional window treatment child safety information, please visit the Window Covering Safety Council (www.windowcoverings.org).
